HERALDRY SKIRMISH

THE DYING LANDS

A competitive GM-less PvPvE fantasy tabletop miniature skirmish game

Release Candidate 485 (RC485)

HERALDRY SKIRMISH

THE DYING LANDS

A competitive GM-less PvPvE fantasy tabletop miniature skirmish game

Release Candidate 485 (RC485)

HERALDRY SKIRMISH: THE DYING LANDS

Release Candidate 484 (RC484).

This edition is typeset from the RC484 manuscript with seven authorized clarifications to its rules text (area-of-effect sources, Impassable Terrain Cover, default party deployment, and three setup placements). Contents, running heads, page numbers, figures, bookmarks and the index are navigation and explanatory additions of this edition.

Art-light edition: atmospheric illustrations are not included in this release; ornaments and rules diagrams are original vector drawings.

Typeset in Source Serif 4, Source Sans 3 and Cinzel, used under the SIL Open Font License 1.1.

Formatted for borderless US Letter (8.5 × 11 in) printing.

How to Use This Book

Finding your way

The rules are presented in eleven numbered chapters followed by Appendices A, B and C. Chapter and section numbers are those of the RC484 manuscript, and every cross-reference in the text uses them. This edition adds page numbers, running heads, a contents list, PDF bookmarks, hyperlinks and an index.

Where to start

Section 1.1 contains a route table for a first game, a quick or demonstration game, a standard one-off adventure, a campaign, and rules lookup during play.

Appendix A (Learn to Play) is a guided first game. Appendix B (Basic Mode) is a simplified way to play. Appendix C (Rules Reference) gathers summaries for use at the table and cites the full rules.

Reading the page

Passages set entirely in italics describe the world. Worked examples are marked by a rule in the left margin.

Monster profiles open with a six-field stat line: HP, AV, SPD, LVL, CV and Sz. A few wide tables whose rows contain long rules text are set as entries: each source row becomes one entry, and every column heading is kept as a field label in its original order.

Figures

Numbered figures are explanatory additions to this edition. They illustrate the adjacent rules, are schematic unless a scale is stated, and do not add to or change any rule. Where a figure seems to differ from the text, the text governs.

Index

The index lists game terms, conditions, actions, terrain, procedures and campaign concepts with the pages where they are defined or applied. Page numbers refer to this edition only.

Contents

The World of Heraldry **1**
1.1 What is Heraldry Skirmish? 2

1.

The World of Heraldry

Banners rot in the rain. Shrines sink into the mud. Oaths are broken, kings are buried, and the roads between settlements grow more dangerous with each passing season. Yet the ruins of the world still glitter with coin, relics, and forgotten power, and the desperate, the devout, the greedy, and the doomed continue to march into darkness to claim them.

1.1 What is Heraldry Skirmish?

Heraldry Skirmish is a competitive GM-less PvPvE fantasy tabletop miniatures game of desperate expeditions, brutal clashes, and hard-won survival. Most battles pit two rival adventuring parties against one another as they race through monster-haunted ruins, damned wilderness, and blood-soaked strongholds in search of treasure, glory, and escape.

A standard competitive game uses **4 Heroes per side** on a **36"×36"** battlefield. It is usually played by **2 players**, but supports **2–8 players** by dividing control of each side's Heroes among allied players.

The battlefield is never passive. Neutral Monsters stalk the field, hazards punish hesitation, and scenarios place pressure on both sides from the first activation to the last. Even victory is rarely clean. The party that leaves the field richest is often the one that bled for every coin.

Heraldry Skirmish supports **solo** and **cooperative** play. In those games, **1–4 players** control **1–4 allied Heroes** against scenarios strengthened by additional Monsters, harsher threats, and fixed PvE pressure in place of a rival party. Whether played competitively or cooperatively, Heraldry is built around dangerous choices, concise tactical rules, and the constant risk that boldness will be rewarded before it is punished.

A typical single game, called an adventure, lasts about 60–90 minutes (4–8 rounds). A typical campaign spans 16–18 adventures and is usually split across 8–18 play sessions.

Use the routes below to learn or reference the game. The table is a navigation aid only and does not replace or modify the cited rules.

Goal	Recommended route
First game	Use **Appendix A. Learn to Play**; it contains the complete first-game setup, fixed parties, scenario, and guided opening. After it, create a standard party and choose any Core Scenario marked **[Intro]** for your first adventure using the full rules.
Quick or demonstration game	Use **Appendix B. Basic Mode**; consult the full core rules or **Appendix C** when Basic Mode directs you there.
Standard one-off adventure	Begin with **2. Core Mechanics**, then read the sections required by the chosen Heroes and scenario. Keep **Appendix C. Rules Reference** available during play.
Campaign	Use the standard-play route, then read **11. Campaign Play** before creating the campaign record or beginning the first campaign adventure.
Rules lookup during play	Start with **Appendix C** and follow its cited full-rule section when more detail is required.

A **Hero** is a player-controlled adventurer and the main unit of campaign progression. A **Hireling** is an allied non-Hero combatant controlled by a party. A **Monster** is a neutral or hostile non-party combatant controlled by Monster AI. A **Summon** is a temporary combatant that their creating rule identifies as a Summon.

1.2 The Grim World

*The world of **Heraldry Skirmish** is a realm of old faiths, broken kingdoms, hungry roads, and colder bargains. Kings, princes, bishops, and warlords still raise banners over land they can barely hold. They fight over relics, tolls, doctrine, trade roads, salt, iron, and pride. Their victories are measured in burnt farms and new taxes. Their defeats are carried by peasants who never chose a side.*

Most people live close to a gate. A palisade, a bell, a chapel lamp, and a few armed neighbours are the shape of civilization now. Beyond them lie drowned fields, plague roads, ruined shrines, black forests, dead bridges, and the shattered works of older realms. Merchants who travel between holdings are not soft men with ledgers. They bargain, lie, fight, navigate, and plan funerals with equal care. They know which inns change names too often. They know which milestones bleed in rain.

The countryside has teeth. Bandits prey on the weak and call it tax. Beasts prowl where settlement failed. Goblin raiders descend on lonely roads and isolated farms. Orcs, gnolls, and kobolds test the borderlands for weakness and plunder. Haunted crypts and mass graves fill with the failures of earlier expeditions. The dead do not always stay down. Some rise hungry. Some rise bitter. Some rise with orders still clenched behind their teeth.

Beneath ruined towers, sunken monasteries, and collapsed fortresses lie the vaults of fallen empires. Coin waits there. Relics wait there. Forbidden lore waits there too, written in dust, iron, blood, and languages that make candles gutter. Dragons still brood in the deep places of the earth and on the high forgotten peaks. Their hoards could ransom kingdoms. Their wrath could end them.

Magic is real, feared, and never trusted. It is too common to dismiss and too dangerous to treat as ordinary. Curses, omens, failed workings, and old catastrophes have taught peasants to spit before speaking of it. Wizards dig power from broken observatories, dust-choked books, and stolen manuscripts. Sorcerers pay in blood for gifts they rarely understand. Priests beg miracles from distant powers that answer by silence as often as grace. Druids bargain with roots, rivers, storms, and things that remember the world before walls. Psions return from forbidden disciplines with minds cracked open and something still echoing inside.

*Sensible people cling to hearth, habit, and walls. Your **Heroes** do not. They take writs from patrons who will not bleed for their own promises. They cross causeways where relief columns vanished, ford rivers that carry bones in flood season, and pry gold from rooms that should have stayed shut. In Heraldry, glory is a rumour told after the bodies are counted. Survival is a debt renewed one Skirmish at a time.*

1.3 The Dying Lands

The Dying Lands at a Glance. One ruined continent, 6 climates: the overgrown **Greenmark**, the ash-choked **Ashlands**, the lightless **Undermarches**, the frozen **Pale City**, the sun-scorched **Sun-Drowned**, and **The Mire**, poisoned and drowning beneath its own waters. Six **Bastions** hold what remains of mortal civilization; everything between them belongs to the dead and to the old powers that waited out the Fall. Adventurers are the few who go out into that country anyway. The sections below tell the story. The rules begin at **1.4**.

The world has fallen. The old roads end at graves. The horizon belongs to the things beyond the walls now.

The lands where Heraldry Skirmish is fought are not a kingdom. They are a continent in the oldest sense: a single body of land held together by mountains, rivers, roads, ruins, and grief long after its crowns and borders stopped being useful.

Six ruined climates define the known world. Each one keeps its own weather, customs, hungers, and dead. Forest has taken the old roads. Ash cities still enforce their laws. The deep places have opened under mines and cellars. The north is locked in a winter that will not spend itself. The southern dunes grind palaces into salt and bone. The marshes rise each year and return what they swallowed changed.

*Mortal civilization survives behind walls. Six great holdings have endured into the present age. Villages, fortified keeps, shrine-forts, and palisaded hamlets huddle in their shadows. Each great holding is called a **Bastion**. The country between them belongs to the dead, the hungry, and the old powers that waited out the Fall. Adventurers are the few who march into that country and pretend the contract matters.*

1.3.1 The Fall

No one agrees on what ended the world. That has not stopped anyone from blaming someone else.

Priests preach withdrawal. The gods, they say, turned their faces away after a final insult no surviving scripture will name. The faithful inherited punishment without inheritance, guilt without proof, and chapel bells that still ring when no hand pulls the rope.

Wizards prefer catastrophe. They write of a working too large for mortal hands, an imperial formula that tore a seam in the unseen structure of the world. Everything since, they claim, is the slow widening of that wound. Druids speak of an oath broken beneath the roots. They say the poison went deeper than any grave. Sorcerers whisper that a bloodline opened like a door and let in what had always pressed from the other side. Psions describe a hammering under the ruins. They say every mind hears one splinter of the blow.

*The common folk have stopped asking for one story. They use the names that fit the grief in front of them: **The Burning**, **The Long Silence**, **The Hollow Year**, **The Last Banner**, **The Drowning of the Throne**. Historians still argue the date. They argue the calendar first. Old people count generations since the Fall. Young people count winters since the last village they remember became empty.*

What remains is easier to prove. The roads between old capitals are closed to honest travel. The great libraries are ash, sealed, flooded, or staffed by hands that no longer need blood. Harvests shrink on every coast that still deserves the name. Each season, some Bastion sends a relief column through a gate at dawn. By dusk the clerks are already leaving space for the column in the dead books.

The world is not dying gently. It dies like a wounded animal under a hedge. Slow. Aware. Dangerous to touch.

1.3.2 The Six Climates of Ruin

Beyond the walls, land has become allegiance. Expedition ledgers still say forest, city, cavern, ice, desert, and swamp. Survivors know better. They use older names. The shape of the world is plain enough to anyone who has walked it. The broken mountains run down its spine. The dead empire and its ruined cities sprawl across the eastern heart. The great forest spreads west to the salt-coast, the ice locks the north, the dunes burn in the south beyond the mountain passes, and the swamps drown the south-east where the rivers give out at the sea. The old imperial roads still join all of it, straight and patient, running out from the Ashlands to every climate that survived. A dry label cannot warn a traveller that a road has memory, a court still sits without lungs, or a pool of black water may be listening.

The Greenmark

The Greenmark is the great temperate forest of the surviving world. It is larger than the maps. Roots take a road within a season and make the milestones useless. Travellers report trees shifting at the edge of sight, upright hounds between trunks, and grove-circles where moss stays warm after snow. Foresters cut warning signs into bark for those who know how to read them. The most common sign means turn back even if the voice ahead is your own. The forest is no wilderness. It is a country that does not recognize human law.

The Ashlands

The Ashlands are the cities of the old empires after fire, law, and death finished with them. They sprawl across the eastern heart of the world, where the imperial roads still run out to every climate like spokes from a shattered wheel. Forums have collapsed into crypts. Temples lean over plazas filled with soot. Streets run black across districts no living guide will enter twice. Lamps still burn in shrines whose gods have no congregation. Patrols still cross boundaries that vanished before the current Bastions had names. The Ashlands are rich because whole treasuries died under stone. They are feared because the city still knows how to count.

The Undermarches

The Undermarches begin under every place that claims to have a foundation, and run deepest beneath the broken mountains at the world's centre. Mines break into older shafts. Older shafts open into tunnels no pick made. Surveyors return with maps that disagree with themselves. Wells sour overnight. Cellars breathe in winter. Borders on the surface mean little below, where passages run under rivers, burial hills, and walls the Bastions call secure. Down in the true dark the deep elves keep their own houses and their own law, older than any empire and crueller than any court that ever sat above. The deep does not need to invade. The surface keeps falling into it.

The Pale City

In the north, winter has become government. Cities that once held tens of thousands stand ice-locked, their gates frozen mid-closing. Towers crack in the cold. Courts, offices, processions, and taxes continue in forms no living citizen would recognize. Hearthhold sends parties north with oil, fire-charms, and instructions to leave tribute on the old road. No one agrees who first made that bargain. The snow covers ruin with clean hands. It heals nothing.

The Sun-Drowned

South of the broken mountains, the dunes have climbed over the wealthiest realms the world ever boasted of. Tomb-cities of the priest-kings break the horizon like teeth. Salt flats glitter where harbours stood. The desert leaves the dead in sight, enthroned, armoured, embalmed, or half-uncovered by wind. Saltspire's ledgers call the southern routes profitable. Its guides call them damned and charge for the difference. Under the sand, sealed courts keep their lamps lit.

The Mire

Where the southern rivers gave out before the sea, the swamps inherited the rest, spreading across the world's south-eastern lowlands. Bogs swallowed roads. Mangroves grew through village roofs. Stilt-houses lean over water that looks shallow until it opens. Reedmarch survives by toll, ferry, leechcraft, and denial. The hag-courts hold the deep fen, and they keep older bargains than any Bastion will admit to honouring. Everyone there knows The Mire is rising. No one profits from saying it aloud. The dead drift below the walkways. Sometimes they drift back.

These six are the world now. The Bastions are what mortal civilization built against them. They are also what mortal civilization hides inside.

1.3.3 The Six Bastions

*Each **Bastion** is a fortified holding: a walled town, a fortress-chapel, a sealed mining city, a stilt-town behind river-locks. None ruled before the Fall. They survived because they were small enough to be missed, lucky enough to be spared, or stubborn enough to close the gate while neighbours screamed outside. Now they are the great powers of what remains.*

The six Bastions are not the only places where people live. They are the only places strong enough to claim next year with a straight face. Each shelters a ring of lesser holdings: tributary villages, palisaded hamlets, watch-keeps, toll bridges, shrine-forts, and the petty fiefs of minor lords who lost their kingdoms when the world ended. These lesser rulers still call themselves kings, princes, bishops, and marshals. Their domains are often smaller than the gardens their grandparents once owned.

They quarrel over relics, doctrine, tariffs, road rights, borders, stolen grain, marriage debts, and insults preserved beyond reason. They quarrel less with the Bastion that lets them winter behind its walls.

The Bastions themselves are not allies. They send envoys. They trade iron, salt, grain, oil, bodies, medicine, and lies. They exchange prisoners when it is useful. They accept refugees when plague at the gate would be worse than charity. Their treaties are thin things. Tired clerks write them. Hungry captains break them. No Bastion can afford open war with another. No Bastion trusts that fact to last.

The Bastions are not safe. They are safer. Their walls keep out the worst of the dark, not hunger, fever, debt, politics, superstition, or the quiet passengers hidden among refugees and trade goods. Every gate has a price. Every chapel keeps lists. Every guild counts favours. Every watch-fire burns lower than the captains admit.

Life inside the walls is crowded and mean. Families sleep in stairwells. Old soldiers sell their wounds as credentials. Minor lords quarrel over streets they do not own. Priests bless children who may later be sent beyond the gates under chapel seal. Coin buys food, medicine, forgiveness, silence, and time. It does not buy innocence.

*For most people, the Bastion is the end of the world made habitable by walls. For adventurers, it is where wounds are priced, contracts are stamped, dead companions are replaced, and the next mistake is made official. The **Town Phase** is not peace. It is the part of the war fought with ledgers, knives, prayers, and closed doors.*

Greythorn

***Greythorn** is a timber-walled town among ancient oaks at the last surviving crossroads of the western forest road. It endures because it pays the forest. Each autumn, tithe-bundles are left at the standing stones. Each spring, the gate-wardens count the foresters who returned, then count the tools of those who did not.*

The Council of Captains governs Greythorn: six veteran rangers, hunters, and timber-masters who take command by season. Its people are practical, wary, and patient with druids because practical people pay what keeps them alive. The lower district, called the Hollow Quarter, is kept for forest emissaries. Dryad ambassadors, satyr envoys, and stranger figures cross its bridges under truce. Once each winter, a robed figure with antlers is admitted through the west gate and permitted to speak only with the senior Captain.

Greythorn imports iron from Deepwarden and salt from Reedmarch. It pays both grudgingly. It has not exchanged ambassadors with Sablekeep in nine winters over the Watch's caster laws. Its chapel is small. Its arcane spire is smaller. Its training yard is the largest in the world.

Sablekeep

***Sablekeep** is a fortified chapel-town built into the throat of a ruined imperial city, where the Ashlands meet the eastern edge of the forest and the old roads run straight on into the dead empire. It survives by burning. Consecrated braziers stand at every gate, bridge, and chapel window. They are never permitted to go out. The lower terraces rest on the bones of an older temple, and the bones are not all the right shape.*

*The **Sable Watch** rules Sablekeep, an order of warrior-priests who train every able adult in vigil duty. The Watch claims no kingdom and no king. Its highest title, the **Lord Vigilant**, is conferred for life by acclamation of the captains and may be revoked only by death.*

The Watch demands custody of every relic recovered from the Ashlands and the registration of every caster beneath its banner. Refusal of either is treated as war in all but name. The Watch hates the Ashlands. It trains its young to march into them anyway.

Deepwarden

***Deepwarden** is a sealed mining city carved into the foothills of the broken mountains. It survived the Fall by closing its great gate. Half the city was on the wrong side when it closed. The half that survived now lives in the upper terraces above what its people call simply **the Dark**.*

*Deepwarden is governed by the **Lantern Council**: mine masters, tunnel-priests, and forge-captains who meet in chambers without doors that can be barred from the outside. Each Council member carries a lantern of consecrated flame. A Council member whose lantern goes dark is considered to have resigned.*

Deepwarden controls the best forges in the surviving world. It pays for that monopoly with hunger for grain, labour, timber, and safe routes to the other Bastions, none of which it fully trusts. Adventurers find work here readily. Most contracts include a clause explaining what to do if the contractor begins speaking in a voice that does not belong to them.

Hearthhold

***Hearthhold** is a walled town in the high north, built around the **Great Hearth** that has burned without interruption since the Fall. If the Hearth goes out, Hearthhold dies: first the children, then the elderly, then everyone. Every resident takes a turn on the fire-watch. Children are taught to feed the flame before they are taught to read.*

*Hearthhold is ruled by the **Hearth Marshal**, who is in practice the captain of the fire-watch and in protocol the sovereign of the town. The current Marshal is the seventh in an unbroken line, each chosen from the senior watch-captains by lot. The chapel is a side-chamber of the Hearth itself. The training ground is the wall around it.*

Hearthhold needs fuel, grain, and bodies for the watch. It pays with the only currency it still has in quantity: the relics, weapons, and frozen treasures its parties drag back from the Pale City. It is the smallest of the Bastions, the poorest, and the bravest.

Saltspire

Saltspire *is a tower-city built around a deep, sacred well at the centre of an oasis ringed by salt-pans and the bones of older cities. It has the only reliable water for a hundred miles. This makes it wealthy. It also makes it hated.*

The ***Well-Keepers*** *govern Saltspire, a hereditary order of priest-administrators who maintain the well, the cisterns, and the city's law. Their authority is unchallenged within the walls and meaningless outside them. The city's defence is contracted to desert nomads, mercenary captains, and free companies, who are often paid in water rights rather than coin.*

Saltspire controls the water and sells it like sovereignty. Its prices are not negotiated. Its treaties assume thirst will settle every argument in time. The well-shaft below the city descends farther than anyone alive has measured. The Well-Keepers do not permit it to be sounded.

Reedmarch

Reedmarch *is a stilt-town raised over log pilings on a network of barges, ferry platforms, and toll bridges. It is the only crossing for 30 miles in any direction. Its people are ferrymen, smugglers, apothecaries, leech-tenders, and corpse-haulers. They know what is buried under their floors. They prefer not to discuss it.*

The Marsh Council governs Reedmarch: five families who hold the ferry rights, salt-pan rights, leech-harvests, medicines, and bone-yard. The Council meets in a hall built on a barge that is repositioned before every meeting, on the theory that enemies can visit a hall in a known location. Decisions pass by silence. Any motion the Council does not refuse aloud is considered carried.

Reedmarch controls the southern marsh roads, the common medicine trade, and every smuggling route worth a name. It charges for all three and refuses to itemize. Its adventurers are the only ones in the world fluent in negotiating with hags.

1.3.4 Magic in the Dying Lands

The Five Traditions all survived the Fall. None survived intact.

***Arcane Spells** are the inheritance of the broken empires. Wizards seek ruined libraries, half-burned grimoires, observatories with cracked lenses, and silent towers where their predecessors are still slumped over their work. Most Bastions tolerate wizards because they are useful. Tolerance is not trust. Sablekeep requires registration. Greythorn pays enough to keep them polite. Deepwarden watches their shadows on tunnel walls. They are blamed whenever blame needs a shape.*

***Divine Prayers** answer fitfully. The old saints remain in chapel rolls, and a few still seem to listen. Most do not. Priests who can call down a working become famous. Fame makes them useful, feared, and watched. Some teach that prayers fail because the gods withdrew. Others teach that prayers fail because the faithful are not yet worthy. Both teachings recruit. Both can get people killed.*

***Druidic Rituals** are alive in a way the other traditions are not. The forests have grown stronger since the Fall, and so have the rivers, storms, roots, and old stones. Druids are welcomed in Greythorn, tolerated in Reedmarch, mistrusted in Saltspire, and hanged in Sablekeep when the Watch can catch them without starting a riot. Their oldest circles teach that the world is shedding what no longer fits. They do not promise that mortal civilization will survive the shedding.*

***Sorceries** are the cheapest power to fall into and the most feared. They run in bloodlines, surface in fevers, and answer before they are understood, and they always take their price in blood. No Bastion registers sorcerers, because no Bastion wants a list of them. Sablekeep hangs them. The others look away and hope the affliction burns itself out. A sorcerer learns early to spend the gift in private and to keep moving, because power that arrives uninvited is rarely forgiven by the neighbours who watched it arrive.*

***Psychic Abilities** are rarer still, and worse understood. They wake in those who have spent too long near ruin-thinned places, and no one can tell true sight from madness, possession, or grief until the damage is done. The Bastions distrust psions on principle and use them anyway, quietly, the way one uses a cracked tool that still cuts. A psion seldom asks for the gift and is seldom thanked for it. Most learn to say nothing of what they hear in other people's heads.*

Magic-infused items are rarer still. Each one is a wonder, a terror, a property dispute, and a possible catastrophe. A sword with a saint's name on the fuller may save a hamlet. It may also prove the chapel that sold it was lying. A ring taken from a drowned tomb may heal a wound, sour a bloodline, or make the wearer dream in a language spoken under the world.

1.3.5 Monstrous Threats

*The **Monsters** of the Dying Lands are not scattered obstacles. They hold the world now. They keep roads closed, fields empty, shrines silent, and old borders meaningless. A village may vanish because of hunger, tax, fever, or weather. Outside the walls, those causes often have claws, banners, laws, or names.*

***The Restless Dead** rise from plague pits, battlefields, sealed crypts, mass graves, drowned roads, and execution fields. Many are hunger given a body. Others remember offices, titles, and grudges. The lich-kings of the Ashlands hold court with the courtesy of rulers and the patience of corpses. Beneath the rubble, mummified guards, animated armour, and gargoyle hosts still answer laws no living tongue remembers.*

***Goblinoids, kobolds, gnolls, and orcs** raid wherever they can find a foothold. Goblin clans and webwrights haunt the Greenmark roads. Gnoll warbands ride the Sun-Drowned surface under banners cured stiff by heat. Orcs test borderlands for weak gates, poor watch, and winter hunger. Kobolds vanish into drains, old mines, and foundation cracks. Some serve stolen banners from older kingdoms. Some serve nothing. Some Bandit Captains of the forest roads are no longer mortal enough for that title to comfort anyone.*

***Beasts and corrupted beasts** prowl where settlement failed. Wolves follow armies that no longer*

march. Hounds walk upright between trees. Rime-beasts hunt broken northern streets. Carrion birds perch on standing stones and watch the living as if waiting for permission. Boars root in grave mould. Things with too many eyes weave roads shut in the Greenmark. Hydras patrol The Mire's channels. Bog maws and worse rise when the wet months come.

***The old peoples and border powers** have not vanished. Were-creatures, satyr cohorts, dryad ambassadors, deep elves, nagas, gnoll raiders, necromancers, lizardfolk temple-guards, and stranger courts hold places the Bastions still mark as lost. Some bargain. Some tithe. Some raid. Some remember treaties humanity has forgotten and punish the breach with perfect sincerity. In the Sun-Drowned, the tomb-cities of the priest-kings are administered by **necromancers** who have outlasted their own deaths: judges, clerks, and tax-collectors preserved in linen, oil, and old authority. They do not acknowledge the Fall. They acknowledge overdue accounts.*

***Dragons** did not sleep easily through the Fall. Some woke into a world without tribute and decided to take it back. Others changed after feeding on what fell from the burning sky, what leaked from broken vaults, or what the dead left behind. Five named dragons mark the climate maps of the Dying Lands: **Maelthorn the Verdant** of the Greenmark, **Sirrach the Black** of the Undermarches, **Visath the White** of the Pale City, **Khorrun the Dracolich** of the Sun-Drowned, and **Vossegar of the Flooded Cathedral** in The Mire. No named dragon marks the Ashlands. The tales of the old cities claim their founders slew the region's dragons aeons before the Fall, raising capitals where hoards had cooled and bones had been divided into civic relics. Ashland courts disagree on how many dragons died. They agree only that the debt was paid in full, and that nothing winged has laid claim to the ash cities since. Khorrun alone among the five has not drawn breath since the Fall. Its bones still hold the shape of greed. The priest-king tombs it claimed were already full of the dead when it arrived, and the dead were glad of the company. Adventurers who have returned from Khorrun's vault describe a dragon-shaped absence at its centre, a hollow of lightning-scorched ribs, and ledgers stacked to the ceiling in every chamber, each recording exactly who has taken what, in handwriting no living scribe would claim. Parties do not hunt the five. They plan around them, as they plan around winter or plague. The **Avatar of the Old Growth**, said to walk in the deep Greenmark, is older than any of them and less interested in negotiation. Youthful ignorants who tried to find it either were lost or returned unable to speak.*

***Demons, devils, cinder lords, frost bailiffs, and the unnamed** appear where sorcery has worn the world thin. They bargain more often than they kill. That makes them worse. Saltspire keeps a contract clerk whose only duty is to review infernal documents pressed on the city by passing envoys of fire and ash. The Pale City has courts where frost bailiffs conduct trials over warmth, trespass, and debts no living magistrate would recognize.*

***Imperial constructs and the wakeful dead of old empires** still patrol routes that no longer exist. They enforce decrees no living person can read. They answer to seals nobody now possesses. Some can be delayed by adventurers who know the correct titles. Most cannot be reasoned with at all.*

1.3.6 Adventurers and the Road

Adventurers exist because the Bastions need work done beyond the reach of soldiers.

A Bastion can fund armies for siege, garrisons for walls, and watch companies for gates. It cannot keep a standing army alive in the country between Bastions. Columns need wagons, fodder, road crews, messengers, surgeons, priests, and graves. The Greenmark returns regiments as antlers and boot leather. The Ashlands add their names to old rolls. The Undermarches take scouts through floors that were solid yesterday. The Pale City counts soldiers into its census. The Sun-Drowned lets thirst do the killing. The Mire waits for the road to sink beneath the baggage train.

What works is a party of four. Small enough to hide. Large enough to fight. Cheap enough to lose.

*So the patrons of every Bastion pay parties to do what armies cannot. Merchant houses chasing a debt, chapels hungry for relics, councils short of grain, debt-holders calling in what they are owed, Well-Keepers, watch captains, and discreet nobles all stamp writs and call them necessity. Each wants two things, the one written on the seal and the one that is not, and a wise party reads for both. Recover medicine from a ruined apothecary. Extract a relic from a sealed crypt and carry it to the chapel that will pay to register it. Burn a sorcerer out of a tower. Carry a sealed letter through The Mire to a holding that may not still be there. Recover a body before it can rise, or before a rival can. Slay a particular **Monster**. Confirm that another party did not. Each contract is a tax someone is willing to pay to keep their walls standing a little longer.*

Parties take these contracts for different reasons. Some believe in the chapel, the council, the saint, the old oath, or the cause printed on the seal. Some take the coin and forget the cause before the gate closes behind them. Most take the work because starvation inside the walls is slower than danger outside them, and less likely to make a song.

Every Bastion knows rival parties work the same ruins. Rivalry is accounted for in the contracts. A council may hire one party to recover a strongbox and another to make sure no rival Bastion receives it. A chapel may bless both sides by mistake or policy. A noble may issue a warrant so old that nobody remembers whether the land named in it still exists. The Dying Lands settle such disputes without appeal.

*Those who survive begin to build something larger than a purse. A keep on a hill. A reclaimed manor. A forge, a chapel, a vault, and a wall thick enough to last one hard winter. Few parties live long enough to raise such a place. Fewer reach **Triumph**, the old Bastion word for planting a banner in ground that has stayed clean for a generation. Every party leaving the gate tells itself this is the road ahead. Most roads end before that.*

1.3.7 Legends and Echoes

The Dying Lands remember. They do not remember kindly.

***Saint Cael of the Broken Gate** held a river crossing during the first winter after the Fall while the dead crossed in the thousands. Cael ordered the refugees behind them to burn the bridge while they still stood on it. The Sable Watch teaches that Cael smiled as the fire took them. Older songs say they screamed and damned every god by name. Both versions are useful.*

***Ysolde Vane** was a witch-scholar who proved that some Arcane formulae could be strengthened by writing them in the caster's own blood. They were condemned by three courts, pardoned by two princes, and finally drowned in a locked iron cage. Their body was never recovered. Their marginalia still appear in copied spellbooks written long after their death, in handwriting that matches no living scribe.*

Mordain Kest *was a warlord-exorcist of the late empire who bound* ***Monsters*** *into iron reliquaries, forced ghosts to testify in court, and is said to have sealed a dragon's shadow beneath what is now Deepwarden. Kest vanished during the Fall. Their reliquaries still surface in Ashland ruins, usually warm to the touch and never empty.*

Edrava Salttide *ruled the salt-coast before the Fall. They fed their enemies to the tide, married four pirate-kings in succession, and paid druids to curse every harbour that refused their ships. Sailors who run the salt-coast at low winter tide still claim to see them counting ships that should have paid their toll. Now The Mire holds what the tide could not keep, and Edrava reigns as its bog witch and drowned queen, still counting and still collecting tolls no living hand can pay.*

Old Wode of the Antlered Path *is the druid-name remembered in Greythorn's oldest tithe-songs. They are said to have walked into the standing stones at the end of the first post-Fall winter, struck the ground three times with an iron-shod staff, and returned with the agreement under which the forest accepts Greythorn's autumn tithe. The agreement has never been written down. The forest has never broken it.*

Karnessa Iron-Vein *was a sorcerer whose blood was used to seal an Ashland vault that had begun to leak something through its walls. The vault has held. Karnessa's surviving line is said to be born with iron filings in their teeth and a tendency to bleed black under moonlight.*

The Hollow Crown *is the title given to the last sovereign of the fallen empires. No personal name survives. Their statues have no faces. Their tomb has never been found. Some Ashland constructs still accept orders issued in the Hollow Crown's name. Others, less reassuringly, no longer do.*

The Voice Beneath the Bells *appears in the chapel records of three different Bastions and the folk songs of all six. Every account mentions a child heard singing beneath a buried bell tower during the Fall of a city. No two accounts agree on the city, the song, or the bell. No grave has ever been found. Parties that descend into the deepest crypts are not always asked, on return, whether they heard anything. It is considered impolite.*

The omens are smaller and more common.

A red moon over a Bastion means a debtor militia will march before dawn. White moths in winter mean a saint's relic has been disturbed. Three crows on a gallows mean the hanged person lies at the end. A bell heard underground means something sealed has found a door. A road found dry during heavy rain is an imperial road and should not be followed after sunset. A corpse with clean fingernails has been dead before. A torch that burns blue near a ruin means magic is leaking. A torch that burns black means something is drinking the light.

These are not rules. They are warnings.

The lore of the Dying Lands provides names, scars, and old quarrels for expeditions, rival parties, patrons, ***Monsters****, relics, and campaign goals. A scenario does not need to explain the whole world. It needs only enough history to make the blood on the ground feel older than the fight.*

1.4 What You Need to Play

To play Heraldry Skirmish, you need:

- **1–8 players**.
- One battlefield in either **Tabletop Mode** or **Grid Mode**.
  - **Tabletop Mode** uses an open **36"×36"** surface measured in inches, a suitable collection of terrain, and a tape measure.
  - **Grid Mode** uses a **36"×36"** battle map marked in **1"** squares.
- 1 miniature, standee, or token for each Hero, Hireling, Monster, and Summon in play.
- Distinguishable markers or miniatures for objectives, Treasure Chests, hazards, scenario elements, and other temporary battlefield features. Coins, paper tokens, spare miniatures, or similar markers are sufficient.
- A record sheet for each Hero and party, plus pencils or another method of recording game state.
- **AP**, **Activated**, **Resting**, **HP**, **NRG**, condition, and Luck tokens, or another method of tracking each resource and state.
- At least **4d4, 4d6, 4d8, 4d10, 2d12, and 2d20** dice.

1.5 Goals of the Game

A single game of Heraldry Skirmish is called an adventure. Your goal is to complete the scenario's objective and satisfy its victory conditions. Many competitive scenarios compare secured wealth, measured in **coins**. Throughout this book, values are written as **Xc**, where **X** is the number of coins. **Coin Value**, abbreviated **CV**, refers to an equivalent value in coins. Parties earn coins by looting treasure, completing objectives, defeating Monsters, and surviving long enough to escape the battlefield with their spoils.

1.5.1 Campaign Goals and the Three Fates

In campaign play, the goal is **Triumph**.

In a competitive campaign, a party achieves **Triumph** when it completes any **5** different Stronghold Components. In a solo or cooperative campaign, a party achieves **Triumph** when it completes the rolled objective and extraction requirement in the **Triumph Finale**.

Over the course of a campaign, every Hero eventually meets one of three Fates:

- **Die:** A Hero who dies and is not returned to life before the next adventure is removed from the campaign permanently.
- **Retire:** A Hero may retire during the Town Phase. A retired Hero is removed from the Roster permanently, returns their eligible items to **Storage**, and adds a Retirement Payout to the Treasury. A Hero that retires at **Level 10** becomes a **Legendary Veteran**.
- **Triumph:** A Hero who remains on the Roster when their party achieves **Triumph** shares in that victory unless another rule says otherwise.

1.6 Rules Hierarchy and Precedence

If two rules conflict, use the more specific rule. Scenario rules override the core rules for that scenario. Class features, Powers, Monster rules, terrain rules, and item rules override the general rules they explicitly modify. If two rules are equally specific, use the more restrictive rule. Examples, summaries, and reference tables never override the main rules text.

For reading rules text, **must** marks a required instruction, **may** marks a permission or choice, and **cannot** marks a prohibition. These words do not create a separate precedence system: resolve every conflict using the rule-precedence paragraph above.

2.

Core Mechanics

Heraldry Skirmish uses fixed procedures for uncertainty, movement, visibility, terrain, and resource spending. Uncertain actions use a **Check** against **12**. Unless a rule says otherwise, this section applies to every mode of play.

2.1 Core Terms

A **combatant** is any Hero, Hireling, Monster, Summon, or other model that can act on the battlefield.

A **Hero** is a player-controlled adventurer and the primary member of a party.

A **Hireling** is an allied non-Hero combatant whose profile or granting rule identifies them as a Hireling. Hirelings follow the normal rules for combatants unless a rule says otherwise.

A **Monster** is a neutral or hostile non-party combatant controlled by the Monster AI rules.

A **Summon** is a temporary combatant that their creating rule identifies as a Summon. A combatant does not become a Summon merely because a rule places or creates them. In particular, a named bestiary Monster placed by a Monster or scenario rule remains a **Monster** unless that rule explicitly identifies them as a Summon.

A **living combatant** is any combatant that does not have the **Undead** or **Construct** ability.

A **Celestial** is a combatant whose rule gives them the **Celestial** tag. A **Fiend** is a combatant whose rule gives them the **Fiend** tag; the **Fiend** Special Ability grants this tag. Neither tag has an effect by itself; rules that affect Celestials or Fiends say so explicitly.

An **allied** combatant is on your side. An **ally** is another combatant on your side; you are not your own ally. A rule that can affect you says **you**, **yourself**, **self**, or **you or an ally**. An **enemy** combatant is any combatant not on your side, including opposing party combatants and Monsters, unless a rule says a specific combatant is not an enemy for that interaction.

A **party** is one side's allied Heroes and Hirelings. Allied Summons belong to their controlling party for party-wide limits, but are not Heroes, Hirelings, or Roster members.

A **Party Leader** is the Hero designated by a side to anchor that side's Initiative rolls and to make choices assigned to the **Party Leader** by these rules. Each side designates one **Party Leader** as described in **6.1**. A party does not replace its **Party Leader** during an adventure. If the **Party Leader** is not on the battlefield, use **3.2** for Initiative and **6.1** for shared-control authority.

A **target** is the combatant, marker, hazard, terrain feature, or point chosen by a rule or action.

A combatant, marker, hazard, terrain feature, or point is **adjacent** to another when the horizontal distance and vertical separation between the two are each **1"** or less. In **Grid Mode**, the two horizontal positions must overlap or neighbour each other orthogonally or diagonally, and the vertical separation between them must be **1"** or less.

A **space** is the area a combatant, marker, hazard, or terrain feature occupies. A combatant's space is their rules **footprint**, determined by **Sz** under the **Size and Footprints** rules in **2.6**. In **Grid Mode**, it is the square or squares that footprint occupies.

Unless a rule says otherwise, combatants are aware in all directions and do not use facing.

An **Area of Effect** is any blast, burst, cone, line, Aura, or similar effect that affects an area rather than one target.

An **Explosion** is an effect that specifically says it explodes. Do not treat every Area of Effect as an Explosion unless the rule says so.

A combatant, marker, hazard, terrain feature, or point is **visible** to you if you have **LOS** to it, it is not **Hidden** from you, and no other rule prevents you from seeing it.

2.1.1 Core Stats and Abbreviations

Term	Meaning
HP	Hit Points; a profile that lists one HP value uses it as both current and maximum HP unless a rule says otherwise
AP	Action Points
NRG	Energy used to cast Powers or fuel abilities
AV	Armour Value
AD	Armour Dice rolled to generate **AV**
CV	Coin Value used for rewards and extraction
APL	Average Party Level
LVL	Monster Level
LOS	Line of Sight
SPD	Speed, the distance moved per **Move** action
Sz	Size: **S** (Small), **M** (Medium), **L** (Large), or **H** (Huge)
TAP	Town Action Points used during campaign Town Phases

2.1.2 Same-Named Effects

Two or more ongoing effects with the same name do not stack on the same combatant, item, or area unless a rule explicitly says otherwise. Apply only one instance at a time. Apply the instance with the strongest numerical effect. If tied, apply the one with the longest remaining duration. If the instances cannot be compared numerically, apply the most recently resolved instance. When the applied instance ends, another applicable instance may continue. Instantaneous effects resolve normally. Conditions use the stacking and immunity rules in **5.9 Conditions**.

Bookkeeping aid: When the source or expiry of an ongoing effect may matter later, players may place a token or note beside the affected model, item, or area showing those details. This is optional record-keeping only; the originating rule remains authoritative for the effect's duration, controller, stacking, and timing.

2.2 Ability Scores

Heroes and Hirelings use ability scores. A non-Monster Summon or other combatant uses the ability scores listed in their profile. If such a combatant must make a **STR**, **DEX**, **INT**, or **SPI Check** with an omitted score, treat that score as **+0** for that Check. **Monsters never have or use ability scores.** Ability scores are added as modifiers to **Checks** and other listed rolls. Most starting Heroes have values between **-1** and **+3**.

Ability scores may be negative and have no maximum unless a rule says otherwise.

A combatant with ability scores has four ability scores:

- **Strength (STR):** melee force, physical power, climbing, forcing objects, and resisting bodily harm.
- **Dexterity (DEX):** ranged accuracy, speed, balance, stealth, dodging, and delicate physical tasks.
- **Intelligence (INT):** perception, reasoning, knowledge, investigation, initiative, **Arcane Spells**, and **Psychic Abilities**.
- **Spirit (SPI):** willpower, faith, resolve, leadership, and powers of faith, nature, and sorcery.

2.3 Ability Checks

When a rule calls for a **Check**, roll **1d20** and add the listed ability score. If the total is **12** or higher, the **Check** succeeds. If the total is **11** or lower, it fails.

The rule calling for the **Check** tells you which ability to use.

A **natural 1** on a d20 **Check** is a **Critical Failure** and always fails. A **natural 20** on a d20 **Check** is a **Critical Success** and always succeeds.

Natural 1 and **natural 20** apply only to **d20 Checks** unless a rule says otherwise. Some attacks, Reactions, and Power rules define their own critical results for non-d20 rolls.

A **Monster** never makes a Check. A **Monster** has no **STR**, **DEX**, **INT**, or **SPI** score. If a rule would require a **Monster** to make a Check, do not roll it: resolve the effect that would occur on a failed Check against that Monster automatically unless they are **Immune** to it. If a **Power** would require a **Monster** to make such a Check and that **Monster's LVL** is higher than the Level of the Hero casting it, that **Power's Casting Check** is made with **Disadvantage**.

If a non-Monster combatant is required to make a **STR**, **DEX**, **INT**, or **SPI Check** but has no listed value for that ability score, treat that score as **0** for that Check. This does not grant the combatant ability scores for any other purpose.

2.4 Advantages and Disadvantages

When a roll has **Advantage**, add one extra die of the affected type, then ignore the lowest single die of that type.

When a roll has **Disadvantage**, add one extra die of the affected type, then ignore the highest single die of that type.

For a **d20 Check**, the affected type is **d20**.

For a damage roll, only base damage dice are affected. After ignoring the required die, determine **Total Misses**, **Critical Hits**, exploding dice, and total damage using only the retained base damage dice.

For a non-d20 roll that uses more than one die type, the rule granting **Advantage** or **Disadvantage** determines the affected die type. If it does not, use the highest-sided die type in the roll.

If both **Advantage** and **Disadvantage** apply to the same roll, they cancel each other out, and the roll is made normally. Multiple instances of **Advantage** do not stack. Multiple instances of **Disadvantage** do not stack.

2.4.1 Attack Advantage and Disadvantage

The following table lists every core rule that gives an attack **Advantage** or **Disadvantage**. Weapons, Talents, Powers, items, Monster abilities, terrain features, weather, injuries, scenarios, and other specific rules list any additional source in their own entries.

Source	Attack Modifier	Full Rule
Attacker is at a **higher elevation** than the target	**Advantage**	**2.9.9**
Attacker resolves their first qualifying attack while **Hidden**	**Advantage**	**5.9**
Target is **Prone**	Melee attack: **Advantage**	**5.9**
Attacker is swimming in **Deep Water**	**Disadvantage**	**2.9.7**
Attacker is **Blinded**	**Disadvantage**	**5.9**
Attacker is **Frightened** by the target	**Disadvantage**	**5.9**
Attacker is **Weakened**	**Disadvantage**	**5.9**
Target has **Cover**	Ranged weapon attack, thrown weapon attack, or non-area damaging ranged Power: **Disadvantage**	**2.8.4**
Target is **Invisible**, and the attacker is adjacent but cannot ignore **Invisible**	**Disadvantage**	**5.9**
Target is **Prone** and the ranged weapon attacker is more than **2"** away	**Disadvantage**	**5.9**
Attack is a **Reflex Attack**	**Disadvantage**	**5.5.4**
Attack is the second or later weapon attack made by the same Hero or Hireling during one activation	**Disadvantage**	**5.7**

These modifiers apply only to the roll stated by the rule. An extra base damage die, a flat modifier, or a reroll is not **Advantage** or **Disadvantage**.

This is not **Advantage** or **Disadvantage** and is listed here only to prevent confusion: an **Off-Hand Weapon** attack always rolls exactly **1** base damage die (**6.13**).

2.5 Action Points and Summons

Action Points (**AP**) measure how much a Hero, Hireling, allied Summon, or other player-controlled combatant can do in a round.

Heroes begin each round with **3 AP**. Hirelings begin each round with **2 AP**. Monsters do **not** use AP. Instead, when a **Monster** activates, resolve their activation entirely by following the Monster AI rules in **Section 9.5**.

Summons and other non-Monster combatants use the AP listed in their rules. An allied Summon with no listed AP has **2 AP**. A Summon created during a round gains their full listed or default AP immediately. If a combatant does not have enough AP to pay a cost, they cannot perform that action.

2.5.1 Summon Limits

A party's limit is **2 allied Summons** in play.

If a rule would create a third allied Summon for that party, create the Summon, then immediately choose one allied Summon in that party to be dispelled and removed from play. Resolve the new Summon's "when summoned" effects only if the new Summon remains in play.

If more than one player controls that party, the player exercising **Party Leader** authority chooses which allied Summon is dispelled.

Enemy, neutral, and Monster-created Summons do not count against a party's allied Summon limit unless a rule says otherwise.

Unless a rule says otherwise, a **Summon** remains in play until they are reduced to **0 HP**, are dispelled through the allied Summon limit, are removed by a rule, or the adventure ends.

An allied Summon counts as a combatant under their party's command for activation order, AP economy, and Party Phase participation, but they do **not** count as a Hero or a Hireling for rules that reference those terms.

Unless a rule explicitly says otherwise, an allied **Summon** cannot take **Reactions**, cannot take the **Interact**, **Spot**, or **Hide** actions, cannot carry, claim, control, or score treasure or scenario objective markers, cannot contribute **Coin Value**, cannot satisfy extraction requirements, cannot complete campaign objectives, and is removed at the end of the adventure. If an allied **Summon** is carrying a treasure or scenario objective marker without a rule that allows them to do so, they immediately drop that marker in their current space.

2.6 Measurement, Size, Distances, and Rounding

You may measure any distance or check **LOS** at any time.

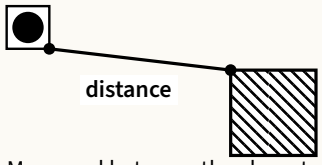
Heraldry Skirmish is played on a **36"×36"** battlefield unless a scenario says otherwise.

Tabletop Mode: Measure distances in inches between the closest points of the source and target spaces. If a rule measures from or to an origin point, target point, or other point, use that point.

Grid Mode: Use a **36"×36"** battle map marked in **1"** squares. A combatant occupies the squares listed by their **Sz** footprint. A marker, token, hazard, or terrain feature occupies every square whose centre lies under it, rounded outward at ties.

Each orthogonal square of movement or distance counts as **1"**, and each diagonal square counts as **1.5"**, unless a rule says otherwise. For range and other non-movement distances, count the shortest grid distance without counting the source square. Obstacles do not change this distance unless a rule says otherwise; check **LOS**, **Cover**, and terrain separately.

A **Tabletop Mode (2.6)**

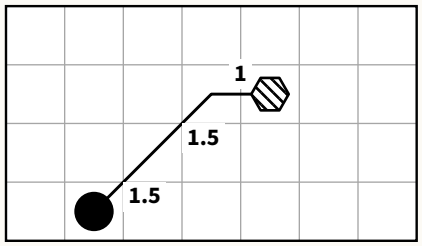


Measured between the closest points of the source and target spaces.

Rules footprints are used, not the miniature's base. Rules that measure from a point use that point.

Schematic — not to scale

B **Grid Mode: range / distance (2.6)**

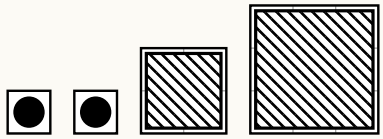


source square

1.5" + 1.5" + 1" = 4"

Orthogonal square = 1", diagonal square = 1.5". Count the shortest grid distance without the source square. Obstacles do not change it; check LOS, Cover and terrain separately.

C **Grid Mode: footprints (2.6)**



A combatant occupies the squares of their Sz footprint (S and M 1×1, L 2×2, H 3×3). Their whole footprint must fit in every legal final position.

D **Declared movement and positional state (2.6.1)**

1 Declare
Before voluntary or forced movement, declare the intended path and final position (for placement, the final position).

→

2 Verify
An opposing player may measure and verify it. If illegal, amend it or choose another action; an abandoned declaration costs no AP.

→

3 Move
Once movement begins, or a Reaction is declared against it, the declaration cannot be amended or abandoned. A triggered Reaction resolves at the first point on the path where its trigger occurs.

→

4 Declared State
The actual path and final position become the Declared State until the combatant moves or is moved. If a miniature is moved accidentally, restore it.

FIG-04. Tabletop Mode measures between closest points; Grid Mode counts orthogonal squares as 1" and diagonal squares as 1.5", so this range is 1.5 + 1.5 + 1 = 4" without the source square. Footprints follow Sz, and movement is declared and verified before it is resolved (see 2.6).

Track movement and distance in **0.5"** increments. Do not round a **1.5"** diagonal or a combatant's remaining movement.

If a source or target occupies more than one square, check each source-square and target-square pair. When range, **LOS**, and **Cover** apply to the same target or effect, one pair must satisfy all requirements. If more than one pair does, use the pair that grants the target the least **Cover**. If **Cover** is tied, use the shortest range. For a distance that does not also require **LOS** or **Cover**, use the closest occupied squares.

If a rule measures from or to a point, marker, hazard, or terrain feature, use the square containing it unless the rule says otherwise.

Size and Footprints

Every combatant has a **Size (Sz): Small (S), Medium (M), Large (L),** or **Huge (H)**. Published profiles list **Sz** explicitly. If a temporary or generic combatant has no listed Size, treat them as **Medium (Sz M)**.

Sz	Size	Footprint	Grid Footprint
S	Small	**1"×1"**	**1×1 square**
M	Medium	**1"×1"**	**1×1 square**
L	Large	**2"×2"**	**2×2 squares**
H	Huge	**3"×3"**	**3×3 squares**

The listed footprint is authoritative for rules purposes even if a miniature uses a differently shaped or sized physical base. When needed, use a footprint template or marker beneath the miniature. Measure range, movement, **LOS**, Areas of Effect, terrain occupancy, adjacency, and overlap from the combatant's rules footprint. A combatant's entire footprint must fit in every legal final position.

Size grants no additional reach, damage, **AV**, resistance to forced movement, or other benefit unless another rule says so.

Universal Rounding: Do not round measured distances, listed fractional distances, or Grid Mode movement tracked in **0.5"** increments. When any other calculation in Heraldry Skirmish produces a fraction, round down to the nearest whole number immediately after that calculation. Rounding down is the default and need not be restated. A rule that requires a different direction must say so explicitly using the phrase **rounded up**.

Minimum Values: Except for ability scores, values cannot be reduced below **0** unless a rule explicitly says otherwise.

Small: A combatant with **Sz S** has the **Small** Special Ability. A combatant has **Small** if and only if their current Size is **Sz S**. A Small combatant cannot equip equipment with the **Heavy** trait. This restriction refers to the equipment trait, not the Monster Special Ability **Heavy**, which remains a separate rule. During voluntary movement, a Small combatant may move through spaces occupied by **Large** or **Huge** combatants, including enemies, but cannot end movement overlapping any combatant. This permission does not ignore terrain, hazards, movement costs, **Engagement**, **Reflex Attack**, or any other movement restriction.

Changing Size: When an effect changes a combatant's **Sz**, keep the centre of their footprint fixed. If the larger footprint cannot fit legally at that centre, the size-changing effect cannot resolve. When a Size-changing effect ends, restore the combatant's previous Size at the same centre if possible. If battlefield changes now make that footprint illegal, move the combatant the minimum distance required to the nearest legal placement; determine a tied nearest placement using **Random Determination** in **2.6.3**. Changing Size never displaces another combatant.

2.6.1 Declared Movement and Positional State

Before resolving voluntary movement or forced movement, declare the combatant's intended path and final position. Before resolving placement, declare only the final position unless the rule gives a path.

- **Tabletop Mode:** State the path, if any, and indicate the final position.
- **Grid Mode:** Declare the destination square and, if the path matters, each square entered. For a combatant that occupies more than one square, declare every destination square they will occupy.

An opposing player may measure and verify the declaration before movement or placement begins. In solo or cooperative play, verify it before movement or placement begins.

If the declaration is illegal, amend it or choose another action. An abandoned declaration costs no **AP**. If the declaration is legal, its path and final position are verified. Once movement begins, or once a **Reaction** is declared against that movement, the declaration cannot be amended or abandoned.

Resolve movement along the verified path. If a **Reaction** is triggered by that movement, resolve it at the first point on the path where its trigger occurs, before the combatant travels beyond that point. For that **Reaction** and its consequences, treat the moving combatant as occupying the trigger point.

If multiple **Reactions** trigger at different points on the same path, resolve them in path order. If multiple **Reactions** trigger at the same point, use **3.6 Timing Rules**.

After each **Reaction** or other effect that interrupts movement, continue the verified movement if the combatant remains able to do so and the remaining path is still legal. If the effect moves the combatant, leaves them unable to continue voluntary movement, or otherwise makes the remaining path illegal, end the movement at the combatant's current position. Do not refund any **AP** spent on that movement.

When movement or placement ends, its actual path and final position become the combatant's **Declared State**. A **Declared State** remains authoritative until the combatant moves, is moved, or a battlefield change invalidates it. Verify it before resolving a rule that depends on the combatant's position or path. If a miniature is moved accidentally, restore its **Declared State** before play continues; no roll or vote is required.

2.6.2 Dice

Heraldry Skirmish uses the following dice: **d2, d3, d4, d6, d8, d10, d12, d20, and d100**.

- **d2:** Roll any die. Even results count as **2**, odd results count as **1**.
- **d3:** Roll a **d6**. Results of **1–2** count as **1**, **3–4** count as **2**, and **5–6** count as **3**.
- **d100:** Roll two **d10**, reading one as the tens digit and the other as the ones digit. A result of **0** on both dice counts as **100**. The **d100** is used only where a table lists a **d100** column or a rule explicitly calls for it.

2.6.3 Random Determination

When a rule requires **1 random option** from a finite set and does not give another procedure, give every eligible option an equal chance. If only **1** option is eligible, use it without rolling. Otherwise, number the eligible options consecutively, then roll the smallest die listed in **2.6.2** that can include every option. Reroll any result greater than the number of eligible options.

2.7 Line of Sight and Areas of Effect

Most ranged attacks, Powers, and interactions require **Line of Sight (LOS)**.

2.7.1 The Sight Line

Use one straight sight line between the source and target to determine both **LOS** and **Cover**.

Tabletop Mode: Draw the sight line from the centre of the source combatant's footprint, marker, hazard, terrain feature, or origin point to the centre of the target's footprint, marker, hazard, terrain feature, or target point.

Grid Mode: Draw the sight line from the centre of the source square to the centre of the target square.

If either occupies more than one Grid Mode square, use the same source-square and target-square pair for range, **LOS**, and **Cover**, as described in **2.6**. When **LOS** is checked together with range or **Cover**, one pair must satisfy every requirement under **2.6**. When **LOS** is checked alone, the source has **LOS** if at least one pair has an unblocked sight line.

Sight-line geometry is mutual: terrain or a combatant that blocks the line in one direction blocks it in both directions. A rule that changes an observer's senses, maximum **LOS**, visibility, or ability to draw **LOS** through terrain applies only to that observer unless it says otherwise.

Ignore the space the source occupies. Ignore weapons, banners, wings, scenic basing, and other decorative parts of a miniature unless a scenario or terrain rule says otherwise.

A combatant on a stable upper surface is not in the terrain supporting that surface. When drawing a sight line to or from that combatant, ignore only the part of the supporting feature directly beneath their footprint that the line touches as it leaves or reaches the combatant. Do not ignore the supporting surface if the sight line passes through it to reach something on the opposite side; such a sight line is blocked normally under **2.7.2**. Every other part of the feature applies normally.

Hidden and **Invisible** do not change the geometric sight line or block **LOS** by themselves. They change visibility and targeting as described in **2.8** and **5.9**.

2.7.2 Blocked Line of Sight

LOS is blocked if the sight line crosses **Blocking Terrain**, or if a solid floor, roof, or platform lies between the source and target.

Grid Mode: LOS is also blocked if the sight line touches a corner shared by 2 **Blocking Terrain** squares.

Cover Terrain can be seen into and out of near its edge, but not across its depth.

Tabletop Mode: LOS is blocked if the sight line crosses **1"** or more of continuous **Cover Terrain** between the source and target spaces. Ignore **Cover Terrain** within the source and target spaces for this rule.

Grid Mode: LOS is blocked if the sight line passes through the interior of a **Cover Terrain** square that neither the source nor target occupies. A sight line that only touches the edge or corner of that square does not pass through it, but it does grant **Cover**.

If no legal sight line can be drawn, the target cannot be targeted by an **LOS**-based effect.

A rule that reduces a combatant's **LOS** to a stated distance sets a maximum sight range. It does not block **LOS** within that range.

2.7.3 Areas of Effect

Areas of Effect cannot penetrate **Blocking Terrain** or a solid floor, roof, or platform. If the sight line from the origin point to a combatant, marker, hazard, terrain feature, or square is blocked by either under **2.7.2**, that target or square is unaffected, even if the template physically covers it. An Aura whose combatant source occupies more than one Grid Mode square uses every occupied source square, as described below.

Cover does not protect a combatant from an Area of Effect unless the effect or Cover rule says otherwise.

Hidden and **Invisible** do not prevent a combatant from being affected by an Area of Effect that does not target them directly.

Shape	Area
Cone X"	A triangle extending **X"** from its origin along a chosen centreline, with a far edge **X"** wide and perpendicular to that centreline.
Line X"	A rectangle extending **X"** from its origin along a chosen centreline. Its default width is **1"**.
Aura X"	Extends **X"** in all directions from its source. Measure from a combatant's footprint in **Tabletop Mode** and every square they occupy in **Grid Mode**. For any other source, measure from its centre or listed origin point. Unless a rule says otherwise, an Aura moves with its source and ends when that source leaves play.

Unless a rule says otherwise, a cone or line originates at the effect's source and does not affect the combatant it originates from. If a line lists a width but no length, its length equals the effect's **Range**.

A placed area's origin is the source, centre point, target point, marker, terrain feature, or other point named by its rule.

Mode	Placing an Area
Tabletop Mode	Centre a placed square, rectangle, or circle on its origin point unless its rule says otherwise. Use its listed template, dimensions, or boundary. A square or rectangle may be oriented freely.
Grid Mode	Choose the origin square before measuring a cone, line, or placed area. Use the square containing the source or point named by the rule. If a source occupies more than one square, choose one legal occupied square. Measure a cone or line from that square's centre. Measure an Aura from every square its combatant source occupies, or from the single origin square of any other source.

Tabletop Mode: If a combatant is the source of an Area of Effect other than an **Aura**, use the centre of their footprint as the origin point unless the rule names another origin point. A combatant is affected if any part of their rules footprint lies within or touches the area's boundary. A marker, hazard, or terrain feature is affected if any part of its rules space lies within or touches the area's boundary. A point is affected if it lies within or on that boundary.

In **Grid Mode**, Areas of Effect use geometric square-centre measurements rather than the orthogonal and diagonal distance counting in **2.6**, unless a rule says otherwise. Treat each grid square as **1"×1"** when measuring a shape. Determine affected squares as follows:

Shape	Affected Squares
Cone	Every square whose centre lies within the cone, rounded outward at ties.
Line	Every square whose centre lies within its width, rounded outward at ties. Include the origin square if its centre lies within the line unless the rule says otherwise.
Aura	Every square whose centre lies within the listed straight-line distance of the centre of at least one source square, rounded outward at ties. Include every source square.
Square or rectangle	Exactly the listed number of squares along each dimension. The origin must be one of the central squares; the player resolving the effect chooses among tied central squares.
Other placed area	Every square whose centre lies within its boundary, rounded outward at ties.

In **Grid Mode**, an Area of Effect cannot affect a square if the sight line from the centre of the origin square to the centre of that square is blocked by **Blocking Terrain** or a solid floor, roof, or platform under **2.7.2**, unless the rule says otherwise. An Aura with more than one source square affects the square if this sight line is unblocked from at least one source square.

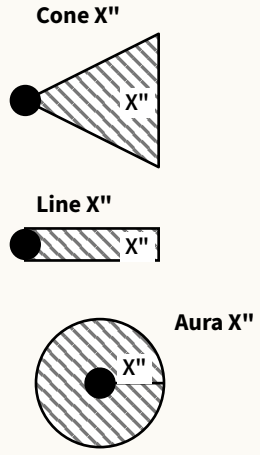
Measure every Area of Effect in the horizontal plane. A difference in elevation between the origin and a combatant, marker, hazard, terrain feature, or square does not add distance and does not remove that target from the area, as described in **2.9.9**. A solid floor, roof, or platform lying between the origin and that target blocks the effect under **2.7.2**, so an Area of Effect does not reach a target separated from its origin by such a surface. Where no such surface lies between them, as at an open ledge, balcony, gantry, stair, or shaft, the area reaches every legal target within its horizontal footprint at every elevation.

A combatant, marker, hazard, or terrain feature that occupies more than one space is affected if at least one of those spaces is affected. Resolve the effect only once for each affected combatant, marker, hazard, or terrain feature unless the effect says otherwise.

Unless an Area of Effect says otherwise, roll its damage once and apply that same rolled total separately to every affected combatant. Whenever one damage roll is shared by multiple combatants, resolve it in this order:

1. Each affected combatant that can take a legal **Reaction** against the effect may declare at most one under **4.5**.
2. Roll the shared damage.
3. Before resolving any defence or mitigation, resolve any **Luck** reroll under **2.10**. The **Luck** window closes when defence or mitigation begins.
4. Using the final roll, each affected combatant separately resolves their declared **Reaction**, if any, then applies **AD**, **AV**, **Resistance**, **Vulnerability**, **Immunity**, and other mitigation under **5.1.1**. If the order among affected combatants matters, use **3.6 Timing Rules**.

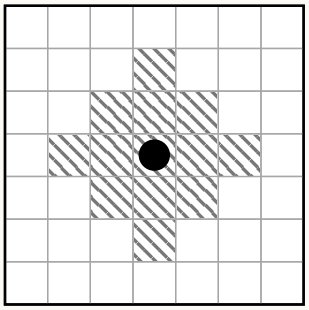
A **Templates (2.7.3)**



Line width is 1" unless listed. Unless a rule says otherwise, a Cone or Line does not affect the combatant it originates from. Tabletop: affected if any part of the footprint is within or touches the boundary.

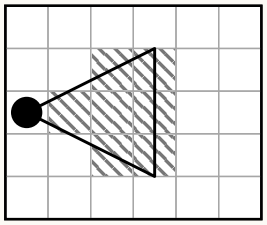
Schematic — not to scale

B **Grid: Aura 2"**



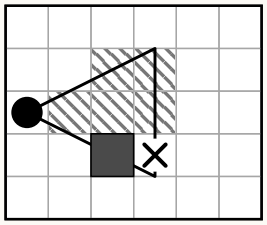
Squares whose centre lies within 2" of the source square's centre (a tie at exactly 2" is included), including the source square: **13 squares**.

C **Grid: Cone 3"**



Squares whose centre lies within the cone (ties rounded outward): **7 squares** beyond the origin square. The combatant the cone originates from is not affected.

D **Blocked by terrain**



A square is unaffected if the sight line from the origin to it is blocked by Blocking Terrain, even though the cone covers it.

E **When one damage roll is shared by several combatants (2.7.3)**

1 Declare
Each affected combatant that can take a legal Reaction may declare at most one (4.5).

→

2 Roll once
Roll the shared damage once, unless the effect says otherwise.

→

3 Luck
Resolve any Luck reroll (2.10) before defence or mitigation begins.

→

4 Resolve
Using the final roll, each affected combatant separately resolves their Reaction, then applies AD, AV, Resistance, Vulnerability, Immunity and other mitigation (5.1.1).

Key ● Source / origin ▨ affected square / area ■ Blocking Terrain
✕ covered but unaffected (sight line blocked)

FIG-08. A Grid Mode Aura 2" affects 13 squares (including the source square); a 3" Cone affects 7 squares beyond its origin square, and never affects the combatant it originates from. A square whose sight line from the origin is blocked by Blocking Terrain is unaffected even if the template covers it, and shared area damage is rolled once (see 2.7.3).

A non-area effect with multiple targets or separate damage instances rolls damage separately for each target or damage instance unless it says one roll is shared.

2.8 Cover, Light, Hidden, and Visibility

Concealment in Heraldry is a ladder of three steps. Each step is harder to reach than the one below it and gives more protection.

Step	State	Effect
1	**Exposed**	The combatant has no **Cover**. Attacks and effects target them normally.
2	**Cover**	The combatant is still targeted normally, but applicable ranged attacks and effects against them suffer **Disadvantage**.
3	**Hidden**	The combatant cannot be targeted by anything that requires **LOS**.

Cover is the gateway to **Hidden**: a combatant becomes **Hidden** only by holding **Cover** from every enemy that has **LOS** to them, or by standing outside every enemy's **LOS** entirely. A combatant who loses **Cover** falls to step 1 and loses **Hidden** with it.

To close on a concealed enemy, an attacker has three answers: move within their **Hide distance**, use **Spot**, or break their **Cover** by changing the angle of approach. **Areas of Effect** are the exception at every step, because an area that does not target a combatant directly still affects them.

2.8.1 Visibility State

Each battlefield has one **Visibility State**:

- **Light**
- **Darkness**

If a scenario, weather result, or special rule does not set the battlefield's **Visibility State**, the battlefield starts in **Light**.

2.8.2 Light

Light has no special effect unless a rule says otherwise.

A **Light Source** is a torch, lantern, brazier, campfire, magical light, glowing terrain feature, or similar source of illumination. Unless a rule lists another size, it has **Aura 3"**. A carried **Light Source** uses its carrier as its source.

A **Light Source** creates **Light** within its **Aura**, removing **Darkness** there but not any other source of **Cover**.

A combatant carrying a **Light Source** cannot be **Hidden** unless a rule says otherwise.

A **Light Source Aura** follows the Area of Effect geometry and obstruction rules in **2.7.3**. It is not a harmful effect unless a rule says otherwise.

2.8.3 Darkness

Darkness provides **Cover** to a combatant in its area against nonadjacent enemies, as described in **2.8.4**. While the battlefield's **Visibility State** is **Darkness**, every area not lit by a **Light Source** is in **Darkness**. A rule may instead create **Darkness** only within a specific area.

Magical Darkness is **Darkness** that a rule explicitly describes as magical. Ordinary **Darkvision** does not ignore **Cover** or visual penalties caused by **Magical Darkness** unless another rule says otherwise. All other **Darkness** is nonmagical **Darkness**.

2.8.4 Cover

An area that provides **Cover** does not change its underlying **Terrain Type**, **Terrain Tags**, movement, hazards, or **LOS** unless its rule says otherwise.

A combatant has **Cover** from an enemy when at least one of the following is true:

- the enemy is not adjacent, and the target occupies **Cover Terrain** or an area that provides **Cover**;
- the sight line between them crosses, or touches the edge or corner of, a terrain feature that is not **Open Terrain**, outside their own spaces;
- the sight line between them crosses another combatant that is not **Prone** or **Knocked Out** and whose **Sz** is the same as or larger than the target's **Sz**;
- a rule says the combatant has **Cover**.

For a target that occupies more than one square in **Grid Mode**, determine whether it occupies **Cover Terrain** using the target square selected under **2.6**.

Cover is binary. Multiple sources of **Cover** do not stack unless a rule says otherwise.

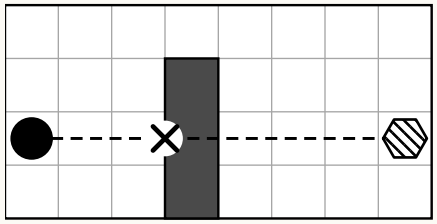
> *Example: a Ranger has clear **LOS** to a Skeleton Warrior, but the sight line crosses their own Fighter. The Skeleton Warrior has **Cover**, so the Ranger rolls their base damage dice with **Disadvantage**. The Fighter is not a target and suffers nothing. If the Ranger first spends **1 AP** to **Shift** clear of the sight line, no **Cover** applies.*

If a rule lets a combatant ignore **Cover** from a source, that source provides no **Cover** against them. If a rule only lets a combatant draw **LOS** through terrain or a visibility effect, it does not block their **LOS**, but it still provides **Cover** unless that rule says otherwise.

Cover is not the same as **Hidden** or **Invisible**. **Cover** granted only by a sight line crossing a combatant does not satisfy any requirement to have **Cover** in order to become or remain **Hidden**.

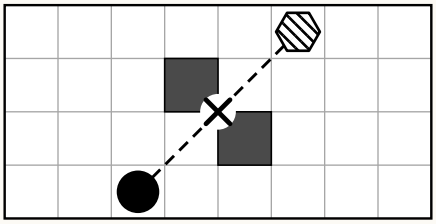
If a target has **Cover**, ranged weapon attacks and thrown weapon attacks against them roll their base damage dice with **Disadvantage**. If a non-area damaging ranged Power rolls damage dice against a target in **Cover**, roll those damage dice with **Disadvantage**. **Cover** gives **Disadvantage** to harmful **LOS**-based Power **Checks** made by the caster against the covered target. **Cover** does not modify **Checks** made by the target unless the Power says otherwise. **Cover** never applies to melee weapon attacks.

A **Blocking Terrain**



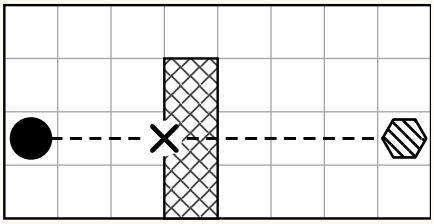
LOS blocked.
The sight line crosses Blocking Terrain (2.7.2).

B **Corner of 2 Blocking squares**



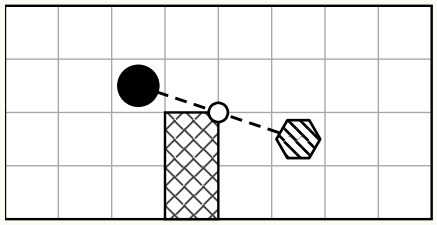
LOS blocked.
Grid Mode: the line touches a corner shared by 2 Blocking squares (2.7.2).

C **Across Cover Terrain**



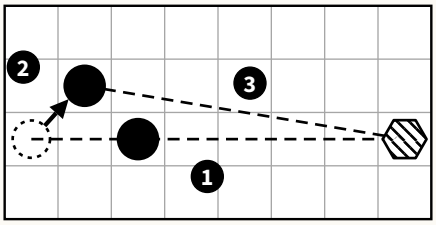
LOS blocked.
Grid Mode: the line passes through the interior of a Cover Terrain square that neither occupies (2.7.2).

D **Touching only a corner**



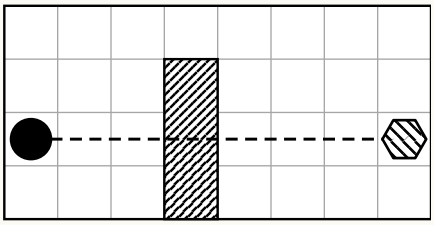
LOS clear; target has Cover.
The line only touches the corner of a non-Open feature, which still grants Cover (2.7.2, 2.8.4).

E **Intervening combatant**



Cover at 1; none at 3.
1 The line crosses an ally that is not Prone or Knocked Out and is the same Sz or larger than the target: Cover. 2 Shift 1 AP clear of the line. 3 No Cover (2.8.4).

F **Impassable Terrain**



LOS clear; Cover by default.
A generic Impassable feature provides Cover unless its terrain entry says otherwise (chasms and pits provide none), and does not block LOS (2.9.1, 2.8.4).

Cover is binary and does not stack. Against a target with Cover, ranged weapon and thrown attacks roll their base damage dice with Disadvantage. Cover never applies to melee attacks, and Areas of Effect and hazards ignore Cover (2.8.4). Tabletop Mode: the sight line runs centre to centre, and 1" or more of continuous Cover Terrain between the spaces blocks LOS (2.7.2).

Key Party A · Monster · Blocking · Cover Terrain · Impassable · sight line · where LOS is blocked · Shift · starting position

FIG-07. Blocking Terrain, a corner shared by two Blocking squares and the interior of Cover Terrain block LOS. Touching only a Cover Terrain corner, an intervening combatant and Impassable Terrain leave LOS clear and give the target Cover (Impassable Terrain unless its terrain entry says otherwise); a Shift of 1 AP clear of the line removes the combatant's Cover (see 2.7.2 and 2.8.4).

Areas of Effect and hazards ignore **Cover** unless a rule says otherwise.

2.8.5 Hidden and Invisible

Hidden and **Invisible** are separate conditions. A combatant may have either or both. Neither blocks **LOS**; each limits visibility and targeting as described in **5.9**.

While a combatant has both conditions, **Invisible** governs targeting, and the combatant does not gain the **Hidden** benefit in **5.9** until **Invisible** ends. The combatant remains **Hidden** for every other rule. **Spot** removes only **Hidden** unless a rule says otherwise.

If a rule explicitly removes **Hidden** or **Invisible** from a combatant, that combatant cannot regain the removed condition until the end of the round unless a more specific rule says otherwise. Losing **Hidden** or **Invisible** through the ordinary end conditions in **5.9** does not trigger this restriction.

2.9 Terrain

Every terrain feature, distinct part of a complex feature, and supporting surface has exactly one **Terrain Type** and any number of **Terrain Tags**. Its type determines whether it may be entered and its default interaction with **Cover** and **LOS**. Its tags add movement, hazard, or other rules without changing its type.

Before play, identify each feature's boundary, type, tags, climbable surfaces, stable upper surfaces, and elevation. A scenario's assignments take precedence. Once play begins, an assignment changes only if a rule changes it.

Tabletop Mode: A combatant occupies terrain when the centre of their footprint lies within that terrain's boundary. Determine when a movement path enters or crosses enterable terrain using the path travelled by the centre of the footprint. The combatant's full footprint must still clear any combatant or terrain it cannot move through and any gap it cannot legally pass through.

Grid Mode: A combatant occupies every terrain feature assigned to a square they occupy at their elevation. If a combatant occupies more than one square, apply every applicable Terrain Tag, but resolve the same terrain feature or hazard against that combatant only once at each applicable timing.

2.9.1 Terrain Types

Open Terrain has no effect on movement, **Cover**, or **LOS**.

Cover Terrain may be entered. It provides **Cover** to its occupant against nonadjacent enemies. It can be seen into and out of near its edge, but not across its depth, as described in **2.7.2**.

Impassable Terrain cannot be entered or moved through, and a combatant cannot end movement overlapping it. It provides **Cover** unless its terrain entry says otherwise. It does not block **LOS**. A combatant may **Jump** over an **Impassable Terrain** feature if the declared landing point is legal, as described in **4.4.9**; they do not enter the feature.

Blocking Terrain cannot be entered or moved through, and a combatant cannot end movement overlapping it. It blocks **LOS**.

A rule may give a feature the **LOS** property of one Terrain Type and the movement property of another. Where it does, that rule governs.

For a feature not assigned a type by its scenario, use these defaults: an enterable feature is **Cover Terrain** if it partly obscures an occupant from outside, and **Open Terrain** otherwise. A feature that cannot be entered is **Blocking Terrain** if its solid body normally prevents sight through its footprint, and **Impassable Terrain** otherwise.

Use these standard assignments unless a scenario says otherwise. For an unlisted feature, use the defaults above.

Feature	Type	Tags
Roads, floors, courtyards, clearings, halls, trails, ledges, walkways, islands, hummocks, raised ground	**Open Terrain**	-
Open doorways, archways, breaches, stairs, ramps, and slopes	**Open Terrain**	-
Mud, bog, muck, deep or drifted sand, crumbling banks	**Open Terrain**	**Difficult Terrain**, **Natural**
Natural ice, snow, or frozen ground	**Open Terrain**	**Slippery Terrain**, **Natural**
Wet floors, paving, or worked stone	**Open Terrain**	**Slippery Terrain**
Fords, streams, tidal flats, and marsh pools	**Open Terrain**	**Shallow Water**, **Natural**
Flooded floors and constructed channels	**Open Terrain**	**Shallow Water**
Rivers, ponds, lakes, and sea channels	**Open Terrain**	**Deep Water**, **Natural**
Flooded pits, cisterns, and reservoirs	**Open Terrain**	**Deep Water**
Tree areas, thickets, dense foliage, reeds, mangroves	**Cover Terrain**	**Natural**
Reed beds, flooded thickets, and mangrove shallows	**Cover Terrain**	**Shallow Water**, **Natural**
Hedges, treelines, and thorn barriers	**Cover Terrain**	**Difficult Terrain**, **Natural**
Fences, lattice screens, reed screens, and picket lines	**Cover Terrain**	**Difficult Terrain**
Undergrowth, scrub, brambles, dunes, rocky outcrops	**Cover Terrain**	**Difficult Terrain**, **Natural**
Rubble fields, debris fields, wreckage fields, scattered small pieces	**Cover Terrain**	**Difficult Terrain**
Floor gratings and navigable gaps between scattered objects	**Open Terrain**	-
Open flames and burning ground	**Open Terrain**	**Dangerous Terrain**: **1d6 fire damage**
Acid pools	**Open Terrain**	**Dangerous Terrain**: **1d6 acid damage**
Caltrops and fields of broken glass	**Open Terrain**	**Dangerous Terrain**: **1d6 piercing damage**
Other environmental hazards	Determine normally	**Dangerous Terrain** with the effect stated by its scenario or rule
Low walls, barricades, railings, tables, workbenches, platform supports, fallen pillars, broken columns, statue bases, sarcophagi, altars, pedestals	**Impassable Terrain**	-
Individual bars, standing gratings, crates, shelving, machinery, boulders, stalagmites	**Impassable Terrain** or **Blocking Terrain**	Use **Blocking Terrain** if the feature's solid body normally prevents sight through its footprint.
Chasms and pits	**Impassable Terrain**	They provide no **Cover**.
Wall sections, building footprints, cave walls, closed doors, gates, solid palisades, standing stones, standing pillars and columns	**Blocking Terrain**	-
Stable upper surfaces, including platforms, rooftops, bridges, and upper floors	**Open Terrain** unless assigned another type	-

If terrain features overlap at the same elevation, each retains its tags and special rules. Use the most obstructive applicable Terrain Type in the order **Blocking Terrain**, **Impassable Terrain**, **Cover Terrain**, **Open Terrain**.

Grid Mode: Determine terrain separately at each tracked elevation. Each square at that elevation has one Terrain Type, taken from the feature or supporting surface covering the square's centre. A bridge, platform, rooftop, upper floor, or similar supporting surface controls its squares at that elevation without replacing terrain below it.

2.9.2 Terrain Tags

A **Terrain Tag** adds its listed rules without changing the feature's type. A tag does not grant or remove **Cover** unless its rule says otherwise.

- **Natural:** Roots, undergrowth, foliage, water, mud, sand, snow, ice, or unworked earth or stone. **Natural** does not include doors, walls, buildings, stairs, bridges, structural rubble, traps, objectives, Power-created terrain, or scenario hazards unless a rule explicitly labels that feature natural.
- **Difficult Terrain:** Defined in **2.9.3**.
- **Dangerous Terrain:** Defined in **2.9.4**.
- **Slippery Terrain:** Defined in **2.9.5**.
- **Shallow Water:** Defined in **2.9.6**.
- **Deep Water:** Defined in **2.9.7**.

Difficult Terrain, **Dangerous Terrain**, **Slippery Terrain**, **Shallow Water**, and **Deep Water** apply to **Open Terrain** and **Cover Terrain**. **Natural** applies to any type.

2.9.3 Difficult Terrain

Terrain in which each **1"** moved costs **2"** of movement. In **Grid Mode**, entering a **Difficult Terrain** square costs **2"** of movement for an orthogonal step and **3"** for a diagonal step.

2.9.4 Dangerous Terrain

Terrain with a listed hazard. A combatant that enters it, crosses it, or ends movement or forced movement in it suffers the listed effect or makes the listed **Check**. Unless the terrain rule says otherwise, a combatant resolves a given **Dangerous Terrain** feature no more than once per movement or forced movement.

The Standard Terrain Features table in **2.9.1** lists default hazards for the recurring cases. A scenario's stated hazard beats that default.

2.9.5 Slippery Terrain

Ice, wet stone, polished floors, algae-covered flagstones, loose scree, and similar unstable ground use this tag.

The first time during each activation that a combatant uses voluntary movement to move through **Slippery Terrain**, they must make a **DEX Check**. On a failure, the combatant falls **Prone**, and their movement ends. Forced movement does not count toward this trigger unless the terrain rule says otherwise.

If a combatant becomes **Prone** or falls while on **Slippery Terrain**, after resolving that placement, **Slide** them **2"** in the horizontal direction they were travelling or being moved. If their travel or forced movement was purely vertical, or there was no direction of travel or forced movement, the controller of the effect that caused them to become **Prone** or fall chooses the slide direction. If no combatant controlled that effect, identify the directions under **Random Direction** in **10.1** that allow any legal **Slide**. If none do, do not **Slide** the combatant. Otherwise, roll **Random Direction**, rerolling any direction that allows no legal **Slide**.

If a **Slide** caused by this rule carries the combatant beyond a supporting surface, resolve **Falling** normally. That fall, and the **Prone** placement it causes, do not trigger this **Slippery Terrain** rule again.

2.9.6 Shallow Water

Water shallow enough to wade through. A combatant may wade or swim across **Shallow Water**. **Shallow Water** is also **Difficult Terrain** unless a listed **Swim** speed or **Amphibious** says otherwise. It does not grant **Cover** by itself. A feature that both slows a combatant and conceals them is **Cover Terrain** tagged **Shallow Water**.

2.9.7 Deep Water

Water too deep to stand in. A combatant in **Deep Water** swims at the water's surface. Swimming does not change elevation.

A swimming combatant treats **Deep Water** as **Difficult Terrain**, cannot be **Prone**, and makes attack damage rolls, **STR Checks**, and **DEX Checks** with **Disadvantage**.

Swim (X") allows a combatant to swim across **Shallow Water** and **Deep Water** at the listed Speed. A combatant using **Swim** ignores movement penalties, movement **Checks**, **Difficult Terrain**, and attack, **STR Check**, and **DEX Check Disadvantage** caused by water or swimming.

The **Amphibious** Special Ability modifies these rules only as stated in that ability.

2.9.8 Terrain and Other Rules

If **LOS** between two combatants is blocked under **2.7.2**, they are not adjacent to each other and cannot be **Engaged** with each other. **Impassable Terrain** does not prevent adjacency or **Engagement**. A combatant may be adjacent to a terrain feature regardless of its type.

A combatant using **Fly (X")** ignores **Impassable Terrain** while moving but cannot end movement overlapping it. **Fly** does not ignore **Blocking Terrain**.

A combatant may stand on a stable upper surface after reaching it legally. The upper surface is normally **Open Terrain** unless assigned another type. Standing on that surface does not count as entering or overlapping the supporting terrain feature.

A rule that creates **Cover Terrain** may overlap **Open Terrain** or **Cover Terrain**. It may extend over **Impassable Terrain** or **Blocking Terrain**, but does not replace their Terrain Type unless its rule explicitly says otherwise. All applicable tags and special rules remain in effect.

2.9.9 Elevation

Elevation is height above the battlefield surface. A combatant's elevation is the height of the surface supporting them. A combatant on a stable upper surface uses that surface's height.

A combatant is at a **higher elevation** than another combatant only when the difference between their elevations is **2"** or more.

Grid Mode: Each marked elevation level is **1"**. A combatant is at a **higher elevation** than another combatant only when they occupy an elevation level at least **2** levels above that other combatant's level.

A scenario may state the height of a terrain feature or the number of marked elevation levels on the battlefield. Where it does, use that height. A feature that a scenario describes as raised, elevated, overlooking, or higher ground stands **2"** above the surrounding surface unless the scenario states another height.

When a combatant at a **higher elevation** than an enemy attacks that enemy, the attack's base damage dice are rolled with **Advantage**.

Use vertical distance when a movement or **Falling** rule tells you to measure it, when determining adjacency, and when determining melee distance between combatants. Otherwise, elevation does not change distance, range, **LOS**, **Cover**, **Areas of Effect**, or terrain rules unless a rule says otherwise.

For adjacency and melee attacks, compare horizontal position and vertical separation separately.

Tabletop Mode: Two combatants are adjacent only if their horizontal distance and vertical separation are each **1"** or less. A melee attack may target an enemy only if both distances are no greater than that attack's melee distance.

Grid Mode: Use the melee square bands in **5.1** for horizontal position. Two combatants are adjacent only if their horizontal positions satisfy the adjacency band and their vertical separation is **1"** or less. A melee attack may target an enemy only if their horizontal positions satisfy that attack's melee band and their vertical separation is no greater than that attack's melee distance. Squares at the same map coordinate on different elevation levels have **0"** horizontal separation. Each marked elevation level counts as **1"** of vertical separation.

Ranged attacks, **Powers**, **Areas of Effect**, and every other distance continue to ignore elevation unless a rule says otherwise.

2.10 Luck Points

Luck Points represent rare moments of fortune.

A Hero may spend **1 Luck Point** after seeing the result of one d20 **Check** made by or against that Hero, or one damage roll whose source is that Hero or that directly affects that Hero, but before applying consequences from that roll.

A **Check** is made against a Hero if that Hero is the target of the **Check**, is directly affected by the **Check**, or would suffer the **Check**'s consequences.

Reroll the entire **Check** or damage roll. If the original roll had **Advantage** or **Disadvantage**, the reroll uses the same **Advantage** or **Disadvantage**. If a damage roll is rerolled, reroll the complete damage roll and determine **Total Misses**, **Critical Hits**, exploding dice, and total damage from the new result.

If one roll affects more than one combatant, reroll that roll and apply the new result to every combatant affected by that roll.

If more than one Hero could spend **Luck** on the same roll, the side that won **Initiative** decides first; within a side, the **Party Leader's** controller chooses the decision order. Once one Hero spends **Luck**, no other Hero can spend **Luck** on that roll.

A roll can be rerolled by **Luck** only once.

The new result must be used, even if it is worse.

Luck Points refresh to their maximum at the start of each new adventure unless a rule says otherwise.

> *Example: One damage roll from an **Explosion** affects one Hero from each side, so both sides could spend **Luck** on the same roll. The side that won **Initiative** this round decides first and declines. A Hero on the other side spends **1 Luck Point**. The entire damage roll is rerolled, and the new result applies to every combatant affected by that roll. Another Hero cannot spend **Luck** on that roll, and the new result stands even if it is worse.*

3.

The Game Round

Heraldry Skirmish is played in rounds. Each round has four phases: **Initiative Phase**, **Party Phase**, **Monster Phase**, and **End of Round**.

3.1 Overview of a Round

Unless a specific rule changes the order of the **Party Phase** and **Monster Phase**, each round is resolved in the following order:

Initiative Phase

- Refresh AP for each combatant on the battlefield with an AP maximum.
- Determine Initiative.
- Resolve start-of-round effects.

Party Phase

- Sides alternate activating eligible allied combatants.
- Heroes, Hirelings, and allied Summons act during this phase unless a rule says otherwise.
- Each allied combatant may activate **once per round** while they are eligible.

Monster Phase

- Resolve Monster waking rules.
- Activate each **Awake** Monster Group.

End of Round

- Resolve end-of-round effects.
- End effects that last **until the end of the round**.
- Remove unspent AP.
- Resolve scenario scoring, extraction, round limits, and victory conditions.

A new round begins after the previous round ends unless the scenario ends first.

If a specific rule places the **Monster Phase** before the **Party Phase**, both phases still resolve once before the **End of Round** begins.

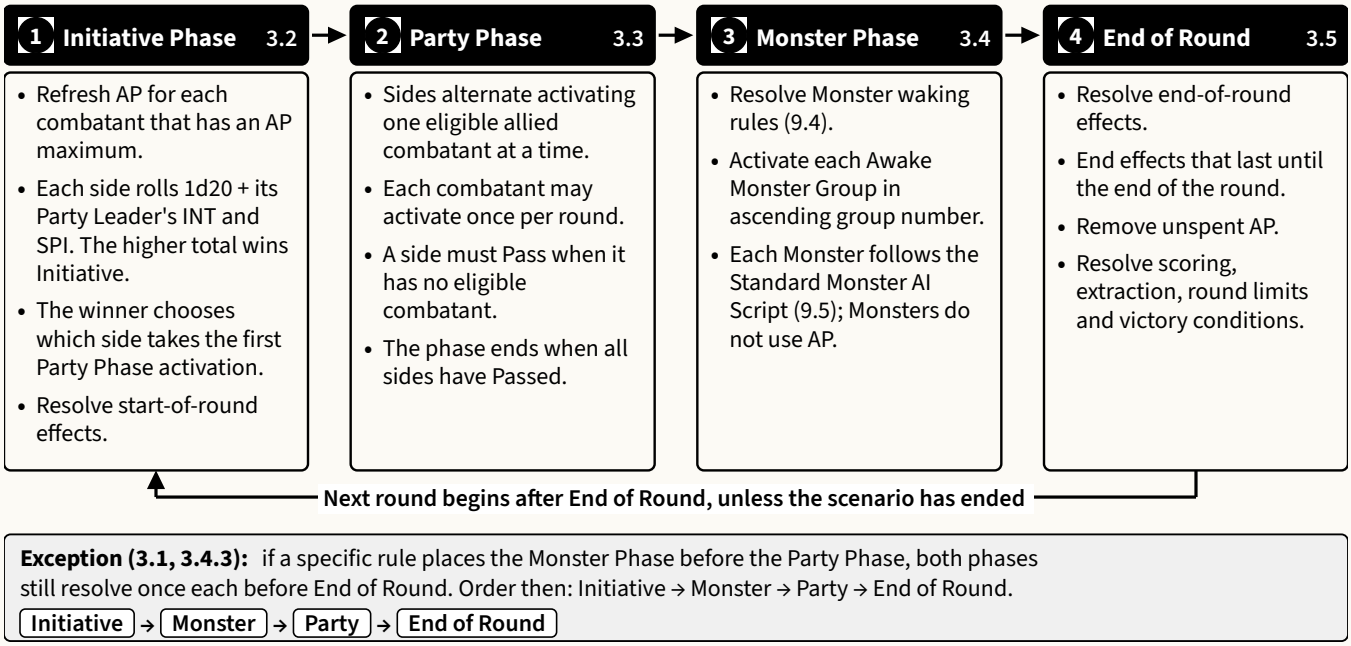


FIG-01. The four phases of a round in order. If a specific rule places the Monster Phase before the Party Phase, both phases still resolve once before End of Round (see 3.1).

3.2 Initiative Phase

At the start of each round, each combatant on the battlefield with an AP maximum refreshes AP to their normal maximum unless a rule says otherwise.

Each side rolls **1d20** and adds its **Party Leader's INT and SPI**. The higher total wins Initiative for the round.

If a **Party Leader** is not on the battlefield, that side chooses one allied Hero on the battlefield to provide the modifier instead. If that side has no allied Hero on the battlefield, it rolls **1d20** with no ability modifiers.

If Initiative is tied, apply these tie-breakers in order and use the first one that resolves the tie:

1. Highest **DEX** among the Heroes used for the Initiative roll, if each side used a Hero.
2. Starting in Round 2, the side that won Initiative in the previous round.
3. Roll off again.

The side that wins Initiative chooses which side takes the first **Party Phase** activation.

After Initiative is determined, resolve effects that occur **at the start of the round**. If multiple start-of-round effects would resolve at the same time, use **3.6 Timing Rules**.

> *Example: At the start of Round 3, both sides refresh AP. The Road Wardens roll **1d20 + Party Leader's INT + Party Leader's SPI** for **17**. The opposing side rolls **14**. The Road Wardens win Initiative and choose to act second. A Power that lasts until the start of Round 3 ends after Initiative is determined.*

3.3 Party Phase

During the **Party Phase**, each allied combatant may activate **once per round**. Sides alternate activating one eligible allied combatant at a time, beginning with the side chosen during the **Initiative Phase**.

A combatant is **eligible to activate** if they:

- are on the battlefield,
- belong to that side,
- have at least **1 AP** remaining,
- have not already activated this round,
- and are not prevented from activating by another rule.

A more specific rule may allow a combatant to activate without meeting these requirements. A **Stunned** or **Sleeping** combatant remains eligible to activate to end the condition with **0 AP** if they meet every other requirement. They cannot take actions or spend AP during that activation (**5.9 Conditions**).

Effects that trigger **at the start of an activation**, **during an activation**, or **at the end of an activation** trigger once for that combatant's activation.

If an allied **Summon** is created during the **Party Phase**, they become eligible to activate later in that phase when their side next has an opportunity to activate. If their side has already **Passed**, that Summon does not activate until the next round. A Summon created by a Power follows the immediate activation timing in **8.2 Casting Powers** instead. This immediate activation is an exception to normal alternating activation.

3.3.1 Activating a Combatant

When you activate a combatant, follow these steps:

1. Choose one eligible allied combatant.
2. Resolve effects that occur **at the start of that combatant's activation**.
3. Spend at least **1 AP** to perform actions in any order allowed by the rules. The combatant may spend additional available **AP** during this activation. If the combatant cannot perform any action, spend no AP and proceed to step 4.
4. Resolve effects that occur **at the end of that combatant's activation**.
5. Mark that combatant as having activated this round.

A combatant's activation ends when:

- they have spent all the AP they will spend during that activation,
- they can no longer perform further actions,
- or their controller ends the activation after the combatant has spent at least **1 AP**.

A combatant cannot activate again during the same round after their activation ends.

A **Activating a combatant (3.3.1)**

Eligible to activate (3.3):

- on the battlefield and belongs to the side
- at least 1 AP remaining
- has not already activated this round
- not prevented by another rule

1. Choose one eligible allied combatant.
2. Resolve effects that occur at the start of that combatant's activation.
3. Spend at least 1 AP on actions, in any order the rules allow. Further AP may be spent in the same activation.
4. Resolve effects that occur at the end of that combatant's activation.
5. Mark the combatant as having activated this round.

Reactions (4.5): taken when a rule's trigger occurs, usually outside the reacting combatant's activation. Taking one does not begin or end an activation. Only 1 Reaction may modify the same action or effect against a given combatant.

B **One Hero's AP through a round (example)**

Assumes a Hero with an equipped shield. Heroes begin each round with 3 AP (2.5).

Heroes' AP is shown with squares: ■ unspent ☒ spent

Initiative Phase 3.2

■■■ Refresh to 3 AP.

Party Phase — this Hero's one activation 3.3

Move – 1 AP **Attack – 1 AP** → ☒☒■

Move (4.2) and Attack (4.2, 5.1) cost 1 AP each. The activation ends with 1 AP unspent; unspent AP may be kept for Reactions (3.3.2).

Monster Phase 5.5.1

☒☒☒ A Monster's slashing attack would damage the Hero: the Hero declares **Block** (Reaction, 1 AP). It is not an activation.

End of Round 3.5

No AP is carried into the next round (3.3.2).

If no Reaction is taken, the 1 unspent AP is simply removed at End of Round. A combatant reduced below 1 AP by Reactions is no longer eligible to activate (3.3.2).

FIG-02. Left: the activation procedure. Right: a Hero's 3 AP across one round, assuming a shield: Move (1 AP) and Attack (1 AP) leave 1 AP, which a Block Reaction (1 AP) uses in the Monster Phase; otherwise it is removed at End of Round (see 3.3).

3.3.2 Unspent AP and Reactions

Heroes and Hirelings may keep unspent AP after an activation. Unspent AP may be spent later in the same round on **Reactions** whenever a rule allows one. Allied Summons also keep unspent AP, but cannot spend it on **Reactions** unless a rule explicitly grants that **Summon** Reactions (**2.5.1**).

Unspent AP never carries into the following round.

A combatant that has not activated during the Party Phase may still spend their AP on **Reactions** later in that round if they are otherwise able to do so. Spending AP on a **Reaction** does not count as activating, but a combatant reduced below **1 AP** by Reactions is no longer eligible to activate.

3.3.3 Passing

When it is your side's opportunity to activate a combatant, your side must **Pass** if it has no eligible combatants left. A side cannot choose to **Pass** while it has at least one eligible combatant. If a side has **Passed**, the remaining sides continue alternating opportunities among themselves.

If your side **Passes**, it ends all further **Party Phase** activations for your side this round. You cannot activate any more allied combatants during that **Party Phase**, even if a later rule gives one of them AP or creates a new allied combatant.

Any AP remaining on your combatants is retained until the end of the round and may still be spent on **Reactions**.

The **Party Phase** ends when all sides have **Passed**.

3.4 Monster Phase

During the **Monster Phase**, resolve all neutral and hostile Monster Groups.

3.4.1 Monster Wake-Up

At the start of the Monster Phase, resolve Monster waking rules in **Section 9.4** and any scenario wake-up rules.

A **Resting** Monster Group does not activate. An **Awake** Monster Group activates as described below.

3.4.2 Monster Group Activation Order

After all wake-up rules have been resolved, activate each **Awake** Monster Group in ascending group number order, starting with **Monster Group 1**, then **Monster Group 2**, and continuing until every **Awake** Monster Group has activated.

Players do not choose, delay, skip, or reorder **Monster Groups** unless a scenario rule explicitly says otherwise.

If a **Monster Group** becomes **Awake** during the **Monster Phase** and has not activated, add it to the remaining activation order. If its normal position has passed, it activates next after the current Group or effect finishes; otherwise, it activates in its normal position. Resolve simultaneous insertions in ascending group number order.

Each Monster in an activating group activates once unless a rule says otherwise. If more than 1 Monster remains to activate and no rule sets their order, use **Random Determination** to choose the next Monster. Resolve that Monster's activation completely, then repeat until every Monster in the Group has activated.

If a rule creates a true tie after all listed Monster AI tie-breakers are applied, use **Random Determination** among the tied legal options.

3.4.3 Monster Activations

When an individual **Monster** activates, they do not spend AP. Resolve their activation by following the **Standard Monster AI Script** in **Section 9.5** from top to bottom. The **Monster** executes the first valid instruction, then their activation ends unless their rule explicitly says otherwise.

Unless a rule says otherwise, a **Monster** cannot preserve actions or movement for later use.

After all **Awake** Monster Groups have activated, proceed to the next unresolved phase of the round. Normally this is the **End of Round**. If a specific rule placed the **Monster Phase** before the **Party Phase**, proceed to the **Party Phase** instead.

3.5 End of Round

The **End of Round** begins after both the **Party Phase** and **Monster Phase** have resolved. During the **End of Round**, resolve all rules that occur **at the end of the round**.

Resolve the **End of Round** in this order unless a more specific rule says otherwise:

1. Resolve ongoing damage, conditions, terrain, weather, Power effects, item effects, **Monster** effects, and scenario effects that occur at the end of the round. Use **3.6 Timing Rules** if 2 or more resolve at the same time.
2. End effects that last **until the end of the round**.
3. Remove any unspent AP.
4. Resolve scenario scoring, extraction, round limits, and victory conditions.

3.6 Timing Rules

The following timing terms are used throughout the game:

- **At the start of the round:** After AP is refreshed and Initiative is determined, but before the first activation of the round.
- **At the start of an activation:** After a combatant is chosen to activate and before they perform actions. This timing occurs each time a combatant activates.
- **During an activation:** While that combatant is spending AP and resolving actions during that activation.
- **At the end of an activation:** After that combatant finishes acting during that activation. This timing occurs each time a combatant activates.
- **At the end of the round:** During the distinct **End of Round** phase, after both the **Party Phase** and **Monster Phase** are complete.

If two or more effects would resolve at the same time, the more specific rule takes priority. If no rule is more specific, resolve them in this order:

1. Initiative winner's side effects.
2. Non-Initiative side effects.
3. Monster Group effects in ascending Monster Group number.
4. Terrain, weather, hazard, and scenario effects in the order listed by the relevant rule.

In solo and cooperative play, the round's resolved phase order replaces steps 1 and 2: if the **Party Phase** resolves first, allied-side effects resolve before Monster Group effects; if the **Monster Phase** resolves first, Monster Group effects resolve before allied-side effects. Monster Group effects still resolve in ascending Monster Group number, and terrain, weather, hazard, and scenario effects remain last.

If two effects from the same side would resolve at the same time, the **Party Leader's** controller chooses the order.

If these rules still leave 2 or more simultaneous effects tied, use **Random Determination** to choose the next effect to resolve, then repeat until no tied effects remain.

4.

Actions and Movement

During their activation, a combatant with AP spends AP to move, fight, use Powers, interact with the battlefield, and use activated rules. **Monsters** do not use this action list unless a rule explicitly says otherwise; they activate through **Monster AI**.

Battlefield Reference Table

Topic	Reminder	Full Rule
Move	Spend [**1 AP**] to move up to **Speed**.	**4.4.2**
Shift	Move **1"** without triggering **Reflex Attack**.	**4.4.4**
Stand	Remove **Prone**.	**4.2** and **5.9**
Engagement	A combatant is **Engaged** while adjacent to at least one enemy. **Reach** attacks may target farther enemies but do not change **Engagement**.	**5.1**
LOS	Confirm whether a legal line can be drawn.	**2.7**
Cover	**Cover** is binary. Multiple sources do not stack unless a rule says otherwise.	**2.8.4**
Light	**Light** has no special effect unless a rule says otherwise.	**2.8.2**
Darkness	Every unlit area provides **Cover** against nonadjacent enemies. It does not block or limit **LOS** unless a rule says otherwise.	**2.8.3**
Difficult Terrain	Each **1"** moved costs **2"** of movement.	**2.9.3** and **4.4.7**
Dangerous Terrain	Resolve the listed hazard when its trigger occurs.	**2.9.4** and **4.4.7**
Shallow Water	**Difficult Terrain** that may be crossed by wading or surface swimming. It does not provide **Cover** by itself.	**2.9.6**
Deep Water	Surface swimming only. It is **Difficult Terrain**; a swimmer cannot be **Prone** and has **Disadvantage** on attack damage rolls, **STR Checks**, and **DEX Checks** unless **Swim** or **Amphibious** says otherwise.	**2.9.7**
Cover Terrain	May be entered. Provides **Cover** against nonadjacent enemies. Can be seen into and out of near its edge, but not across its depth.	**2.7.2** and **2.9.1**
Impassable Terrain	Cannot be entered, moved through, or ended in. Provides **Cover**. Does not block **LOS**.	**2.9.1**
Blocking Terrain	Cannot be entered, moved through, or ended in. Blocks **LOS**.	**2.9.1**
Collision	**Impassable Terrain**, **Blocking Terrain**, or another combatant stops forced movement early. Missing support causes **Falling** instead.	**4.4.6**
Elevation	A combatant is at a **higher elevation** than another only when the difference is **2"** or more. Attacks against that lower combatant roll base damage dice with **Advantage**. Adjacency, **Engagement**, and melee distance also use vertical separation.	**2.9.9**
Areas of Effect	Use template geometry. In **Grid Mode**, squares and rectangles affect exactly their listed dimensions; other areas use square centres, rounded outward at ties.	**2.7.3**

This table is a navigation aid. The full rules in the listed sections are authoritative.

4.1 Action Basics

Unless a rule says otherwise, a combatant may take actions in any order during their activation and may repeat the same action if they can pay the cost and meet the action's requirements each time. Actions are taken during the acting combatant's own activation; **Reactions** are the exception (**4.5**).

A combatant may take the same non-Reaction **0 AP** action only once during each of their activations unless that action explicitly states a different limit. This restriction does not apply to **0 AP Reactions**, which use their own triggers and frequency limits.

A combatant may take an action only if they have enough AP to pay that action's cost.

Actions that require ability **Checks** are normally taken only by combatants with ability scores. A combatant without ability scores may take such an action only if a rule explicitly allows them and gives a modifier or procedure. If a **Monster** is required to make an ability-style **Check**, use **Section 2.3**.

A combatant may speak, signal, and drop non-objective held items in their current space during their activation without spending AP unless a rule says otherwise. Treasure, satchels, relics, and scenario objective markers use their own **Interact** or scenario rules.

A combatant may use a **Special Ability** only if they currently have access to that ability from their class, ancestry, item, **Monster** rule, Summon rule, or scenario rule.

Passive and triggered **Special Abilities** are not actions and do not gain an AP cost from the universal **Special Ability** action. Every activated Special Ability must print its AP cost, including **[0 AP]**.

4.2 Universal Actions

The following actions are available to AP-using combatants unless a rule says otherwise.

Action	AP Cost	Effect
Move	1 AP	Move up to your Speed.
Shift	1 AP	**Shift 1"** without triggering **Reflex Attack**.
Attack	1 AP	Make one melee or ranged attack.
Push	1 AP	Make a **STR Check** with **Disadvantage**. On a success, **Push** an adjacent combatant **2"** directly away (**5.6**).
Trip	1 AP	You must be wielding a weapon with **Trip**. Choose a combatant of your **Sz** or smaller within that weapon's **Range** or melee distance. Make a **STR or DEX Check** with **Disadvantage**. On a success, the target becomes **Prone** (**5.6**).
Power	Varies	Use one Power you know.
Read Scroll	1 AP	Use one equipped scroll.
Special Ability	Varies	Use one activated Special Ability. Every activated Special Ability lists an AP cost, including **0 AP**. Passive and triggered Special Abilities are not actions.
Stand	1 AP	Remove **Prone** from yourself.
Interact	1 AP	Interact with an **adjacent** and **visible** battlefield element.
Hide	1 AP	Become **Hidden** if you meet the requirements in **4.3.2 Hide**.
Spot	1 AP	Make an **INT Check** to reveal one eligible **Hidden** enemy combatant.
Wait	1 AP	Do nothing. A combatant that can act must spend at least **1 AP** during their activation (**3.3.1**); **Wait** satisfies that requirement while holding the remaining **AP** for **Reactions**.
Reload	1 AP	Ready an equipped weapon with the **Reload** trait so it may attack again.

4.2.1 Summons and Universal Actions

Summon restrictions on universal actions and **Reactions** are defined in **2.5.1.**

4.3 Interact, Hide, Spot, and Read Scroll

4.3.1 Interact [1 AP]

You manipulate a battlefield object that is **adjacent** and **visible** to you.

Use **Interact** to open doors, pull levers, loot containers, inspect treasure markers, pick up objective markers, operate scenario devices, disable scenario objects, trigger scenario interactions, and resolve any other battlefield-object interaction.

You may also use **Interact** to remove **Sleeping** from an adjacent allied combatant. An enemy cannot remove **Sleeping** from a combatant this way.

If an **Interact** requires a **Check**, the scenario or rule lists the required ability and the result of success or failure. If no **Check** is listed, the **Interact** succeeds automatically.

Interact cannot target a carried or worn item unless a rule explicitly allows it.

4.3.2 Hide [1 AP]

You become **Hidden** if either condition is true:

- you are outside **LOS** of all enemies;
- or you have **Cover** from every enemy that has **LOS** to you, and no enemy is within your **Hide distance**.

Cover granted only by a sight line crossing a combatant does not satisfy the second condition, as stated in **2.8.4**.

You cannot take **Hide** while **Engaged**.

You cannot take **Hide** while carrying a **Light Source** unless a rule says otherwise.

You do not make a **Check** to take **Hide**.

4.3.3 Spot [1 AP]

You attempt to reveal a **Hidden** combatant.

Choose one **Hidden** enemy combatant within **Line of Sight** and within **12"**. **Spot** may choose a **Hidden** combatant despite the targeting restriction in **5.9**.

Make an **INT Check** or a **SPI Check** against **12**, whichever modifier is higher. On success, the target loses **Hidden**. On failure, nothing happens.

A combatant that loses **Hidden** to **Spot** cannot become **Hidden** again until the end of the round, as stated in **2.8.5**.

Terrain density is the intended dial for how much stealth a battlefield supports. **Hidden** depends on **Cover**, so a sparse battlefield suppresses stealth and a dense one rewards it. To make stealth stronger or weaker at your table, change how much **Cover Terrain** and **Blocking Terrain** you place rather than changing **Hide distance**.

Spot cannot be used to interact with terrain, treasure, containers, objectives, doors, traps, clues, scenario markers, or battlefield objects. Use **Interact** for those rules.

Spot does not remove **Invisible** unless a rule says otherwise.

4.3.4 Read Scroll [1 AP]

A Hero may **Read Scroll** to use one equipped scroll. **Hirelings**, **Summons**, and **Monsters** cannot **Read Scroll** unless a rule explicitly allows them to do so.

If a scroll's effect is marked as a **Reaction**, the Hero may use **Read Scroll** as a **Reaction** when the scroll's trigger is met. This still costs **1 AP**.

Resolve the scroll, including what counts as equipped, its **Casting Check**, costs, limits, and destruction, using **7.15 Scrolls**.

4.3.5 Reload [1 AP]

Choose one equipped weapon with the **Reload** trait that has been fired since it was last reloaded. After paying **1 AP**, that weapon is reloaded and may make a ranged attack again.

A weapon with the **Reload** trait begins each adventure reloaded. After making a ranged attack with such a weapon, that weapon cannot attack again until that combatant takes the **Reload** action for that weapon. Reactions that grant a ranged attack with a **Reload** weapon may be used only if the weapon is reloaded.

Hirelings and **Summons** use **Reload** only if their profiles or rules say so. Monster attacks ignore **Reload** unless a specific Monster rule explicitly applies it.

4.4 Movement Rules

A combatant's **Speed** shows how far they may move with one **Move** action.

4.4.1 Movement Type Reference

Movement Type	Meaning	Triggers Reflex Attack?
Move	Voluntary movement up to Speed.	Yes, when leaving an enemy melee distance.
Shift	Short voluntary movement of **1"**, or another distance granted by a rule.	No, unless the rule says otherwise.
Climb	Vertical movement during **Move**; costs **2"** per **1"** and requires a **STR Check**.	Yes, when leaving an enemy melee distance.
Jump	Horizontal movement during **Move**; costs **2"** per **1"** and requires a **DEX Check**.	Yes, when leaving an enemy melee distance.
Push	Forced movement directly away from a source or point.	No.
Pull	Forced movement directly toward a source or point.	No.
Slide	Forced movement in the direction named by the effect.	No.
Fly (X")	Voluntary aerial movement using the listed Fly Speed.	Yes, when leaving an enemy melee distance.
Teleportation	Placement at a legal destination without crossing intervening space.	No.

4.4.2 Move [1 AP]

When a combatant takes a **Move** action, they may move up to their Speed in inches. Resolve that **Move** completely before the combatant takes another action unless a rule says otherwise.

A combatant may **Climb** or **Jump** only during a **Move** action unless a rule explicitly says otherwise.

A **Prone** combatant may move, but cannot **Climb** or **Jump** until they **Stand** unless a rule says otherwise.

During voluntary movement, a combatant may move through allied combatants unless a rule says otherwise, but they cannot move through enemies. A **Hidden** enemy is an exception: a combatant may move through a **Hidden** enemy's space as described under **Hidden** in **5.9**. **Small** combatants use the exception under **Size and Footprints** in **2.6**.

A combatant cannot end movement overlapping another combatant's space, **Impassable Terrain**, or **Blocking Terrain**. They may overlap a marker only if that marker's rule allows it, or if the marker is picked up, carried, claimed, removed, or otherwise resolved by that movement or an **Interact** action.

Leaving an enemy's melee distance during a **Move** may trigger **Reflex Attack**. See **5.5.4 Reflex Attack**.

A combatant with **Fly (X")** may use their listed Fly Speed instead of their ground Speed when they take **Move**. A flying Move ignores ground-based terrain and **Impassable Terrain** and may pass through spaces occupied by other combatants, but cannot pass through **Blocking Terrain**, cannot end movement overlapping **Impassable Terrain**, and cannot end in an occupied or otherwise illegal space. If flight ends while the combatant has no legal supporting surface, resolve **Falling**.

4.4.3 Grid Mode Movement

In **Grid Mode**, convert each **1"** of movement to **1** square. Orthogonal movement costs **1"** per square. Diagonal movement costs **1.5"** per square unless a rule says otherwise.

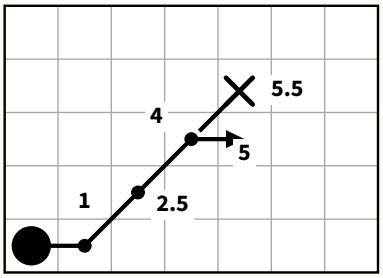
A combatant cannot enter a square if doing so would place their footprint in an illegal position, overlap an enemy or another combatant they cannot move through, overlap a marker not resolved by that movement or an **Interact** action, or cross **Impassable Terrain** or **Blocking Terrain** that their movement cannot legally cross.

A combatant cannot move diagonally unless at least one of the 2 orthogonal intermediate positions is one they could legally enter. An intermediate position is the position the combatant would occupy after taking one orthogonal step from the starting position toward the destination. This restriction applies to combatants of every size and prevents movement between terrain, enemies, or other obstructions that close both routes around a corner.

If a combatant occupies more than one square, every occupied square must remain legal throughout the move and in the final position. For each step, use the highest movement cost that applies to any square the combatant will occupy after that step.

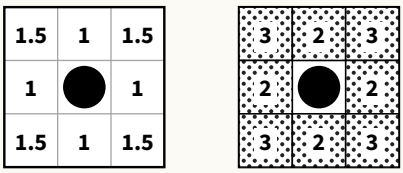
> *Example: In **Grid Mode**, a Hero with **Speed 5"** takes a **Move** action. They enter one orthogonal square for **1"**, then two diagonal squares for **1.5"** each, spending **4"** in total. With **1"** of movement remaining, they may enter one more orthogonal square, but they cannot enter another diagonal square, because its **1.5"** cost exceeds their remaining movement.*

A **Grid Mode Move, Speed 5" (4.4.3)**



Running total of movement spent (inches).
Speed 5": one orthogonal square (1"), two diagonal squares (1.5" each) = 4". One more orthogonal square (1") is allowed; another diagonal (1.5") would exceed the 1" remaining.

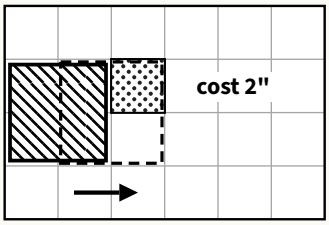
B **Cost of one step into a square (2.6, 2.9.3)**



Open Terrain **Difficult Terrain**

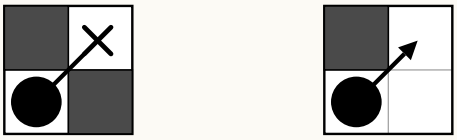
Numbers are the movement spent to enter that square from the centre square. Difficult Terrain: 2" orthogonal, 3" diagonal. If Difficult Terrain, Climb or Jump each apply to the same 1", use only the single highest cost (4.4.7).

C **Multi-square footprint (4.4.3)**



A Large combatant stepping east would occupy a Difficult Terrain square. For each step, use the highest movement cost that applies to any square occupied after the step: this orthogonal step costs 2".

D **Diagonal steps around corners (4.4.3)**



Not allowed **Allowed**

A diagonal step needs at least one of the 2 orthogonal intermediate positions to be one the combatant could legally enter. If both are closed, no diagonal step is possible.

Key Combatant Monster Difficult Terrain Blocking Terrain Move (permitted) Not permitted

FIG-05. Source example: a Speed 5" Move of 1 + 1.5 + 1.5 = 4" leaves 1", enough for one orthogonal square but not for another 1.5" diagonal. Difficult Terrain costs 2" orthogonal and 3" diagonal, a multi-square footprint pays the highest cost among its squares, and a diagonal step needs an open orthogonal route (see 4.4.3).

4.4.4 Shift [1 AP]

A combatant may spend **1 AP** to **Shift 1"**. A **Shift** is not a **Move**, does not trigger **Reflex Attack**, and may leave an enemy melee distance.

Grid Mode: A diagonal square costs **1"** of **Shift** distance.

Other rules may grant a **Shift** of a different distance. Unless that rule says otherwise, a granted **Shift** follows the rules in this section and does not trigger **Reflex Attack**.

A **Shift** follows normal movement restrictions, including **Impassable Terrain**, **Blocking Terrain**, occupied spaces, elevation, hazards, and movement-cost terrain. If the granted **Shift** distance is not enough to pay the terrain cost for the destination, the combatant cannot enter that space unless the rule granting the **Shift** says otherwise.

A **Shift** cannot include **Climb** or **Jump**, or cross a gap, obstacle, or elevation change that would require **Climb** or **Jump**, unless a rule explicitly says otherwise.

4.4.5 Teleportation

Teleportation places a combatant at a legal destination without moving through intervening space. **Teleportation** never triggers **Reflex Attack** and ignores intervening terrain and combatants.

Place the combatant at a legal destination, or a legal destination square in **Grid Mode**, within the listed distance and any listed **LOS** requirement. The destination must have enough legal space for the combatant's footprint and a surface that could normally support them. A combatant cannot teleport into empty air unless they can fly or a rule explicitly allows it. Apply terrain, hazards, **Light**, **Darkness**, **Cover**, and other destination effects after placement.

4.4.6 Forced Movement

Forced movement is movement caused by a rule rather than chosen by the moved combatant. Forced movement never triggers **Reflex Attack**.

Push X" moves the target up to **X"** directly away from the source of the effect or directly away from a specified point.

Pull X" moves the target up to **X"** directly toward the source of the effect or directly toward a specified point.

Slide X" moves the target up to **X"** in the direction named by the effect.

In **Tabletop Mode**, determine the direction of a **Push** or **Pull** using the straight line between the centres of the source's and target's spaces, or between the specified point and the centre of the target's space. If the centres coincide, the controller of the effect chooses the direction.

In **Grid Mode**, each square of **Push** must increase the target's grid distance from the source or specified point. Each square of **Pull** must decrease that distance. If more than one legal square qualifies, the controller of the effect chooses. **Slide** follows the direction named by the effect; if more than one legal square matches that direction, the controller of the effect chooses.

Forced movement cannot move a target through **Impassable Terrain** or **Blocking Terrain**, through another combatant, or into an illegal position unless the rule explicitly allows it. Move the target as far along the forced movement path as possible and stop them at the last legal position.

If **Impassable Terrain**, **Blocking Terrain**, or another combatant causes the target to stop early, the target suffers a **Collision**. A stop caused only by another restriction is not a **Collision**. A **Collision** deals no damage by itself; a rule that deals **Collision** damage says so.

A battlefield edge stops movement unless a scenario allows that combatant to leave through it during voluntary movement or the rule causing the movement explicitly allows them to leave. Stopping at a battlefield edge is not a **Collision** or **Falling** unless a rule identifies that edge as a physical obstacle or drop.

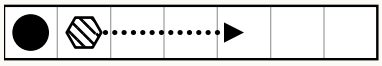
A missing supporting surface beyond an edge, including a chasm or pit assigned **Impassable Terrain**, does not stop forced movement. If forced movement would carry a target beyond that edge, move them to the edge point along the forced movement path, then resolve **Falling** from that point after the forced movement ends. This is not a **Collision**.

If forced movement moves a target into hazardous terrain or another rule-defined danger, resolve that hazard after the forced movement ends.

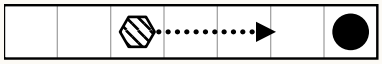
*Example: An effect pushes a Skeleton **3"** directly away from the effect's source, toward a ledge that lies **2"** along the forced movement path. The missing surface beyond the ledge does not stop the forced movement. The Skeleton moves **2"** to the edge point, the forced movement ends, and the Skeleton then resolves **Falling** from that point.*

A **Push, Pull, Slide (4.4.6)**

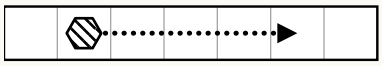
Push X": directly away from the source



Pull X": directly toward the source



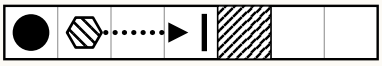
Slide X": in the direction the effect names



Forced movement never triggers Reflex Attack. Terrain movement costs count against the listed distance (4.4.7).

B **Collision (4.4.6)**

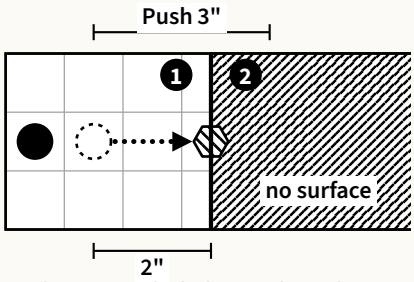
Impassable Terrain in the path



Another combatant in the path

The target stops at the last legal position and suffers a Collision. A Collision deals no damage by itself; a rule that deals Collision damage says so.

C **Ledge example (4.4.6)**



Push 3" toward a ledge 2" along the path (Skeleton). (1) The missing surface does not stop the push: the Skeleton moves 2" to the edge point and the forced movement ends. (2) Falling is then resolved from that point. This is not a Collision.

Key Pushing source · Target (Skeleton) · Another combatant · Impassable Terrain / missing surface · Forced movement · starting position

FIG-09. Forced movement follows a line and stops at the last legal position; a Collision deals no damage by itself. Source example: a 3" Push toward a ledge 2" away moves the Skeleton 2" to the edge point, then Falling is resolved from that point (see 4.4.6).

4.4.7 Terrain and Movement

Terrain types and tags are defined in **Section 2.9**. Apply terrain movement costs and hazards to **Move**, **Shift**, **Climb**, **Jump**, **Push**, **Pull**, and **Slide** unless a rule says otherwise. For **Push**, **Pull**, and **Slide**, count terrain movement costs against the listed forced movement distance.

Difficult Terrain, **Climb**, and **Jump** each cost **2"** of movement per **1"** moved. If more than one of these costs applies to the same **1"** of movement, apply only the single highest movement cost for that **1"** unless a rule says otherwise.

Teleportation ignores intervening terrain but applies destination terrain after placement.

4.4.8 Climb

A combatant may **Climb** only during a **Move** action unless a rule explicitly says otherwise. Each **1"** climbed costs **2"** of movement.

Declare a legal destination whose total climb cost does not exceed the combatant's remaining movement, then make a **STR Check**. On a success, move the combatant to that destination. On a failure, the combatant remains at the climb's starting position, becomes **Prone**, and their movement ends. If that position has no legal support, resolve **Falling** from that point.

In **Grid Mode**, each **1"** climbed equals **1** level of vertical movement if the terrain uses marked elevation, or **1** square of vertical distance if the map tracks height directly. Each marked elevation level is **1"**, as described in **2.9.9**.

A combatant can **Climb** a surface only if it has handholds, footholds, or another climbable structure, unless a rule says otherwise. Terrain Type alone neither permits nor prevents **Climb**.

4.4.9 Jump

A combatant may **Jump** only during a **Move** action unless a rule explicitly says otherwise. Each **1"** jumped costs **2"** of movement.

Before jumping, declare a legal landing point whose total jump cost does not exceed the combatant's remaining movement, then make a **DEX Check**. On a success, the combatant lands at the declared point. On a failure, place them at the last legal point before the gap, obstacle, hazard, or landing point. The combatant falls **Prone**, and their movement ends. If that point is lower than the jump's starting elevation, also resolve **Falling** using the vertical distance between the starting elevation and that point.

A **Jump** is horizontal movement. A **Jump** cannot increase the combatant's elevation by more than **1"**. Use **Climb** to move higher.

A **Jump** may cross gaps, low obstacles, hazards, or terrain features if the declared landing point is legal. A combatant does not enter spaces they jump over. Apply terrain and hazards only to the takeoff point, landing point, and any space the **Jump** rule says the combatant enters. A combatant cannot end a **Jump** in an illegal position.

In **Grid Mode**, an orthogonal square jumped costs **2"** of movement and a diagonal square jumped costs **3"**. A **Jump** may cross an empty or hazardous square without entering it, but the landing square must be legal.

4.4.10 Falling

A combatant falls when a rule says they fall, when a failed **Climb** or **Jump** leaves them without legal support or directs them to a lower point, when forced movement carries them beyond a supporting surface, or when they have no legal surface beneath them.

When a combatant falls, determine the fall origin. The fall origin is the point named by the triggering rule. If no rule names a fall origin, use the point where the combatant lost support or fell from. Place the combatant at the lowest legal point directly below the fall origin. If no such point exists, place them at the nearest legal point below, chosen by the controller of the effect that caused the fall. If no combatant controlled the fall, use **Random Determination** among the nearest legal points.

Fall distance is the vertical distance between the fall origin and the point where the combatant is placed after the fall. A falling combatant loses **1 HP for every full 1" fallen beyond the first 1"**. After applying this HP loss, they become **Prone** unless a rule says otherwise. A fall of **1"** or less causes no HP loss.

This HP loss has no damage type and cannot be reduced by **AV**, **AD**, **Resistance**, or **Immune**.

Falling is not movement and does not trigger **Reflex Attack**.

4.5 Reactions

A **Reaction** is an action taken when a rule's stated trigger occurs, usually outside the reacting combatant's activation. A combatant may take a **Reaction** during their own activation if its trigger occurs then. Taking a **Reaction** does not begin or end an activation.

To take a **Reaction**, a combatant must have enough unspent AP to pay their cost.

Heroes and Hirelings may spend unspent AP on **Reactions** whenever a rule allows one. Each allied **Summon** may spend unspent AP on **Reactions** only if a rule explicitly grants that **Summon Reactions**. **Monsters** do not take **Reactions** unless a rule explicitly allows it.

A combatant may take multiple **Reactions** in the same round if they have enough AP and a legal trigger, but may take only one **Reaction** in response to the same action or effect. This limit includes Reactions that modify how the source resolves and Reactions that grant a separate action.

> *Example: an Ogre attacks a Cleric. The Cleric spends **1 AP** to **Dodge**. No other **Reaction** may now modify how that attack resolves against the Cleric, because only 1 **Reaction** may modify a single action or effect against each affected combatant. The Cleric may still take a **Reaction** against a different attack later in the round.*

For each affected combatant, only 1 **Reaction** may be declared by that combatant or on their behalf to prevent, redirect, or otherwise modify how the same action or effect resolves against them. If 2 or more legal **Reactions** would do so, the affected combatant's controller chooses which one is declared; do not spend the costs of the others. A **Reaction** used by the source's controller to modify the source's own roll does not count against an affected combatant's limit.

A Reaction resolves immediately when declared unless its own rule or a resolution sequence assigns it a later timing. A Reaction that grants a separate action resolves that action separately, and the granted action may trigger Reactions normally unless a rule says otherwise. Declaring that Reaction still uses the reacting combatant's one-Reaction limit for the triggering action or effect, but does not prevent a different combatant from reacting unless both Reactions would modify the source against the same affected combatant.

An ongoing effect created by a Reaction to an earlier source is not a Reaction to a later source. Its ongoing modifiers apply normally without using the one-Reaction limit against that later source.

4.6 Illegal Actions

If an action requires a target, the target must be legal when the action is declared and when it resolves.

A target is legal only if it matches the rule's target description and count, is within the required distance or range, meets any required **LOS** or visibility, and satisfies every other restriction in that rule. This procedure does not add an **LOS** or visibility requirement to a rule that does not require one.

If a **Climb** or **Jump** cannot be declared with a legal destination before the **Check** is rolled, the combatant cannot attempt it.

If an action becomes illegal before it resolves, it fails and has no effect unless a rule says otherwise. Its AP remains spent unless the action was abandoned during **Declared State** verification.

If declared movement is interrupted by a **Reaction**, resolve that interruption under **2.6.1**. If movement has otherwise begun and its path cannot be completed legally, the combatant stops at the last legal position.

Combat attacks and combat manoeuvres are resolved in **Section 5**. Powers are resolved in **Section 8**.

5.

Combat

Combat in Heraldry Skirmish is fast, direct, and lethal. Weapon attacks do not use d20 attack rolls. If a target is legal, in range, and in **LOS**, resolve the attack. Survival depends on armour, reactions, positioning, and luck.

5.1 Combat Basics

A combatant is **Engaged** if they are adjacent to at least one enemy.

A **melee attack** normally targets an otherwise valid enemy adjacent to the attacker. In **Tabletop Mode**, this means within **1"**. In **Grid Mode**, this means a target in one of the immediately surrounding squares, including diagonal squares.

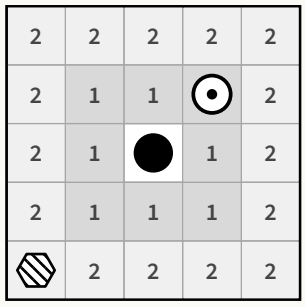
Reach is a weapon, natural attack, or **Monster** attack trait. A melee attack made with **Reach** may instead target an otherwise valid enemy within **2"** in **Tabletop Mode**, or within **2** squares in **Grid Mode**, including diagonal squares. The **Reach** weapon trait has no number. **Monster** attacks and **Special Abilities** may instead use **Reach X** as defined in **9.6**. If any other rule grants a longer melee distance, it states the exact distance in its own effect text.

Grid Mode melee adjacency and **Reach** use these square bands instead of the normal **1.5"** diagonal range cost.

When combatants are at different elevations, use **2.9.9** to determine whether they are adjacent or within a melee attack's distance. The distances and square bands above remain the horizontal limits.

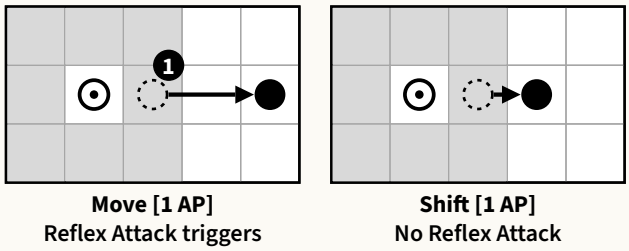
Reach does not change **Engagement**. A combatant can be within a **Reach** attack's melee distance without being **Engaged**.

A **Grid Mode melee bands (5.1)**



Engaged = adjacent to at least one enemy: the Party B combatant is adjacent, so both are Engaged. The Monster is within Reach distance but not adjacent, so it does not Engage. Digits give the distance in squares. Tabletop Mode: melee 1", Reach 2". Reach does not change Engagement.

B **Leaving melee distance (4.4.4, 5.5.4)**



Move away from the Party B combatant's melee distance: that combatant may spend 1 AP on a Reflex Attack (base damage dice with Disadvantage). It resolves at the trigger point (1), before the mover leaves. **Shift** (1", 1 AP) and forced movement do not trigger it.

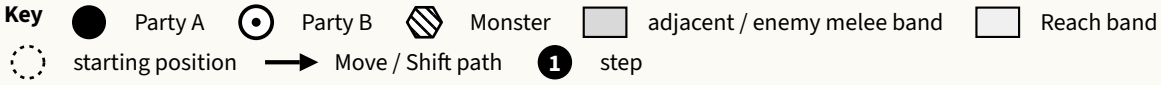


FIG-06. In Grid Mode a melee attack targets the 8 surrounding squares and Reach extends to 2 squares; only adjacency Engages. Leaving an enemy's melee distance with Move allows a Reflex Attack at the trigger point, while Shift does not (see 5.1).

A **ranged attack** targets an enemy within range and **LOS**. A combatant may make a ranged weapon attack while within the melee distance of an enemy, but doing so may trigger **Reflex Attack** from each enemy whose melee attack could legally target them.

For **AP**-using combatants, unless a rule says otherwise:

- all melee and ranged weapon attacks cost **1 AP**,
- attacks made with **Finesse** weapons add **DEX** instead of **STR** to damage,
- other melee weapon attacks add **STR** to damage,
- ranged attacks made with **Thrown** weapons that do not have **Finesse** add the higher of **STR** or **DEX** to damage,
- other ranged weapon attacks add **DEX** to damage.

Monsters do not add ability score modifiers to weapon attack damage unless a rule says otherwise.

Weapon ranges, damage dice, traits, **Armour Dice**, shield profiles, and similar item rules are found in **Section 7**.

Some class features and weapon traits cause an attack to roll more than one **base damage die**. Treat all base damage dice as base dice for **Advantage**, **Disadvantage**, **Critical Hits**, exploding dice, and **Total Misses**. Add the appropriate **STR** or **DEX** damage modifier only once per attack after all base and bonus dice are resolved.

Different applicable sources of additional damage are cumulative. Unless a rule says otherwise, add all applicable additional base damage dice, bonus damage dice, flat damage modifiers, and conditional damage modifiers to the attack. Same-named ongoing effects still follow **2.1.2 Same-Named Effects**.

5.1.1 Mitigation Order

After damage is determined and any chosen **Reaction** is resolved, use this order:

1. Keep each damage type separate. Determine your **AV** under **5.4.3** and apply it, together with any flat mitigation, once. If one mitigation value can reduce more than one damage type, reduce eligible types in the order the source lists them. Reduce each type to a minimum of **0**.
2. Apply **Immune**, **Resistant**, and **Vulnerable** separately to each remaining damage type.
3. Total the remaining damage and apply it.

See **5.4 Damage Types, AV, and Damage Modifiers** for the complete **AV** and damage-type rules.

> *Example: An attack deals **6 slashing damage** and **4 fire damage** to a Fighter who declares **Block**. The Fighter generates **5 AV** from armour and shield **AD**, reducing the slashing damage to **1**. The fire damage ignores **AV**. The Fighter suffers **1 slashing damage** and **4 fire damage**, for **5 damage** total.*

A combatant is damaged only if the final damage total is **1** or higher. If the final damage total is **0**, rules that trigger **when damaged** do not trigger.

Dodge may be declared against an attack or harmful effect of any damage type whenever that effect allows evasion. **Immune**, **Resistant**, **Vulnerable**, and explicit mitigation rules apply normally to damage of every type.

5.1.2 Combat Reaction Guide

Reaction	AP Cost	Best Use
Block	1 AP	Best against strong **blunt**, **piercing**, or **slashing** attacks when you have a shield.
Dodge	1 AP	Best when a rule allows evasion and your **DEX** is strong.
Parry	1 AP	Best for melee specialists who can meet or exceed incoming damage.
Reflex Attack	1 AP	Punishes an enemy that leaves your melee distance with **Move** or makes a ranged attack within your melee distance.

5.2 The Attack Sequence

Whenever a combatant makes an attack that uses the normal weapon damage system, resolve the attack in this order. The detailed rules in this section remain authoritative.

1. **Declare and verify.** Declare the attacker, attack, target, primary damage type, and any additional damage types. Confirm **LOS**, visibility, range, **Cover**, and every other targeting requirement.
2. **Resolve declaration Reactions.** Resolve target redirection and other Reactions triggered by the declaration, then verify the attack again. If it is illegal, it fails under **4.6**. Otherwise, if no Reaction has been declared to modify the attack against the current defender, choose at most one legal Reaction that will do so under **4.5**. A defender who already declared another Reaction cannot declare another Reaction to modify that attack.
3. **Roll and build damage.** Generate the complete damage roll: roll and retain the base damage dice with all **Advantage** and **Disadvantage**, resolve permitted changes or rerolls of retained base dice, determine provisional **Total Miss** and **Critical Hit** results, roll all applicable exploding and other damage dice, and add modifiers by damage type. Before applying consequences, resolve any **Luck** reroll under **2.10**; rebuild the complete damage roll and all **Total Miss** and **Critical Hit** determinations from the new result. Using only the final result, resolve any **Total Miss** and end the attack if applicable. Otherwise, resolve **Critical Hit** and other after-roll effects at their stated timings, then announce the total for each damage type.
4. **Defend and mitigate.** Resolve any chosen **Reaction** if it has not already resolved, then use **5.1.1 Mitigation Order**.
5. **Apply and finish.** Reduce the defender's **HP** by the remaining damage, then resolve any remaining **Critical Hit** effects, damage-triggered effects, and conditions at their stated timings.

A **The attack sequence (5.2)**

1. **Declare and verify.** Attacker, attack, target, primary damage type and any additional types. Confirm LOS, visibility, range, Cover and other targeting rules.
2. **Resolve declaration Reactions.** Redirection and similar Reactions first, then verify again. The defender may declare at most one Reaction that modifies the attack (4.5).
3. **Roll and build damage.** Base dice with Advantage/Disadvantage, Total Miss and Critical Hit checks, exploding dice, modifiers by damage type. Any Luck reroll (2.10) happens before consequences.
4. **Defend and mitigate.** Resolve the chosen Reaction, then apply the Mitigation Order (5.1.1).
5. **Apply and finish.** Reduce HP, then resolve remaining Critical Hit effects, damage-triggered effects and conditions.

Total Miss (5.3): if every retained base damage die shows a natural 1, the attack deals no damage and ends at step 3.

B **Mitigation Order and worked example (5.1.1)**

1. Keep each damage type separate. Apply AV once to blunt, piercing and slashing damage only; reduce each type to a minimum of 0.
2. Apply Immune, Resistant and Vulnerable to each remaining type.
3. Total the remaining damage and apply it.

Example: a Fighter declares Block

Damage type	Rolled	AV	Suffered
slashing	6	− 5	1
fire (ignores AV)	4	—	4
Total damage			**1 + 4 = 5**

The Fighter's 5 AV (armour AD plus shield AD) reduces the 6 slashing damage to 1. Fire damage ignores AV.

Second example: Hero with d6 AD Chest armour (5.4.3)

Case	AV	Suffered
9 slashing, no Block (d6 = 3)	3	9 − 3 = 6
same attack, Block (+2 AV)	3 + 2 = 5	9 − 5 = 4

FIG-03. The five-step attack sequence and the Mitigation Order. Source example: 6 slashing and 4 fire damage against 5 AV is (6 − 5) + 4 = 5 damage; with d6 AD rolling 3, 9 slashing is 9 − 3 = 6, or 9 − (3 + 2) = 4 with a +2 AV Block (see 5.2).

If the attack deals flat damage and uses no base damage dice, it cannot be a **Total Miss** or score a **Critical Hit** unless a rule says otherwise.

5.3 Critical Hits and Exploding Damage Dice

When an attack rolls one or more base damage dice, use these rules.

- **Critical Hit:** If any retained base damage die shows its maximum value, the attack is a **Critical Hit**.
- **Exploding Dice:** For every retained base damage die that shows its maximum value, roll one additional bonus die of the same type and add it to the total. If a bonus die also shows its maximum value, it explodes again.
- **Total Miss:** An attack is a **Total Miss** only if all retained base damage dice are natural **1s**, unless a rule says otherwise. A **Total Miss** deals no damage and ends the attack.

A **Critical Hit** remains a **Critical Hit** for the rest of the damage sequence. After applying **Advantage** or **Disadvantage**, only retained base damage dice can trigger a **Critical Hit** or begin an exploding-dice chain.

An attack's **primary damage type** is the first damage type listed in its profile. Any other listed damage types are additional damage types. Unless a rule says otherwise, apply only the universal **Critical Hit** rider of that attack's primary damage type.

Whenever a rule refers to an attack's or damaging Power's "damage type" in the singular without naming a type, use that source's primary damage type.

When an attack scores a **Critical Hit**, apply the appropriate universal rider:

- **Piercing (P):** During mitigation, the attack ignores the target's **AV**, including **AV** generated by **AD**, unless a rule says otherwise.
- **Blunt (B):** During mitigation, halve the target's total **AV**, rounded down as normal, against this attack. After the attack resolves, if the target has any **AP** remaining, they lose **1 AP**. A **Monster** or target with no **AP** remaining becomes **Prone** instead.
- **Slashing (S):** After all mitigation and damage-type modifiers, if the target suffers at least **1 damage** from the attack, they become **Bleeding**.

Damage types other than piercing, blunt, and slashing have no universal **Critical Hit** rider unless a rule says otherwise. If a rule expands the critical range, follow that rule.

If a rule says a **Critical Hit** deals normal damage, do not roll exploding bonus dice or apply universal critical riders or other **Critical Hit** effects unless that rule says otherwise.

5.4 Damage Types, AV, and Damage Modifiers

5.4.1 HP Loss and Untyped Harm

A rule that says a combatant **loses HP** does not deal damage. **HP** loss has no damage type and cannot be reduced by **AV**, **AD**, **Resistance**, or **Immune** unless the **HP**-loss rule says otherwise. A rule that deals damage must use one of the listed damage types.

Unless a rule explicitly says otherwise, a combatant's current **HP** cannot exceed their **Max HP**. Any excess HP gained or restored is lost.

A damage modifier that does not name a damage type is added to the source's primary damage type. If the source has no primary damage type, the rule granting the modifier must name its damage type.

When a rule says an attack or effect deals **additional damage**, include that damage in the triggering source before mitigation. Damage resolved **after the attack or effect resolves** is a separate source.

5.4.2 Temporary HP

Temporary HP is a separate pool of temporary protection. It is not healing and cannot raise a combatant's current **HP** or maximum **HP**.

An **HP** cost or amount a combatant chooses to lose is paid from current **HP** and cannot be absorbed by **Temporary HP**. A combatant cannot pay such a cost unless they have enough current HP to pay it and satisfy any restriction in the effect.

When a combatant with **Temporary HP** would take damage or lose **HP**, subtract the damage or **HP loss** from their **Temporary HP** first. Any excess damage or **HP loss** reduces their normal **HP**.

If a combatant gains **Temporary HP** while they already have **Temporary HP**, use only the higher remaining value unless the new rule says otherwise. **Temporary HP** from different sources does not stack.

Temporary HP always expires at the end of the round. A combatant loses all remaining **Temporary HP** earlier if they are reduced to **0 HP**, become **Knocked Out**, or leave the battlefield. A rule that grants **Temporary HP** must state a fixed value and cannot require a dice roll to determine the amount gained.

> *Example: A Berserker gains **Temporary HP** = 5. Later that round, while 4 **Temporary HP** remains, another effect would grant them **Temporary HP** = 3. The Berserker keeps only the higher remaining value, 4. An attack then deals **6 damage** after mitigation: the 4 **Temporary HP** absorbs 4, and the Berserker's **HP** is reduced by 2. Any **Temporary HP** remaining at the end of the round expires.*

5.4.3 Damage Types

Use only these damage types in Heraldry Skirmish:

acid, arcane, blunt, fire, holy, ice, lightning, necrotic, piercing, poison, psychic, slashing

The following abbreviations may be used in weapon tables, **Monster** attacks, and compact profiles.

Abbreviation	Damage Type
Ac	acid
Ar	arcane
B	blunt
F	fire
H	holy
I	ice
L	lightning
N	necrotic
P	piercing
Po	poison
Ps	psychic
S	slashing

Armour Value (AV) reduces only **blunt**, **piercing**, and **slashing** damage, regardless of its source. Damage of every other type and **HP** loss ignore **AV**.

5.4.4 Immune, Resistant, and Vulnerable

- **Immune** means the target takes **0 damage** from that source or damage type.
- **Resistant** means the target takes half damage, rounded down as normal. This can reduce damage to **0**.
- **Vulnerable** means the target takes double damage.
- If a target is both **Resistant** and **Vulnerable** to the same damage, those rules cancel.
- Multiple instances of **Immune**, **Resistant**, or **Vulnerable** to the same source do not stack.

AV comes from two kinds of source:

- **Flat AV** is a fixed number, such as a **Monster**'s listed **AV**, a shield's **+AV**, or an enchantment's **+AV**.
- **Armour Dice (AD)** are rolled to generate **AV**.

Whenever you would suffer **blunt**, **piercing**, or **slashing** damage, roll your equipped Chest armour's **AD**, if any, then add every applicable source of flat **AV**. The total is your **AV** against that damage. This is automatic: it costs no **AP**, is not a **Reaction**, and applies even if you cannot take **Reactions**.

A shield's **AD** and **AV** are added only when you use **Block**. A combatant with a listed flat **AV**, such as a **Monster**, a **Hireling**, or most **Summons**, applies that value instead of rolling Chest **AD**.

However it is generated, all **AV** is treated identically. A rule that reduces, halves, or ignores **AV** applies to the total.

> *Example: A Hero wearing **d6 AD** Chest armour suffers **9 slashing damage**. They roll the d6 for **3**, spending no **AP**, and take **6 damage**. Had they also spent **1 AP** to **Block** with a shield granting **+2 AV**, their total would have been **5 AV**. If the damage ignored AV, none of it would apply.*

5.5 Reactions in Combat

See **4.5** for Reaction eligibility and the limit on Reactions that may modify how an action or effect resolves against a combatant.

5.5.1 Block [1 AP]

Trigger: An attack or effect would deal **blunt**, **piercing**, or **slashing** damage to you while you have an equipped shield and can take **Reactions**.

Duration: Resolves against the single triggering source of damage.

Effect: Roll your equipped shield's **AD**, if any, and add its flat **AV**. Add that total to the **AV** you already apply against the triggering source under **5.4.3**.

Because shield **AD** generates **AV**, any rule that reduces, halves, or ignores **AV** applies to the combined total.

5.5.2 Dodge [1 AP]

Trigger: An attack or harmful effect that allows evasion targets you. A melee or ranged weapon attack that targets you always allows evasion unless a rule says otherwise, whether it targets you alone or targets you together with other combatants. An Area of Effect, hazard, or non-targeted effect allows evasion only if its rule says so.

Effect: Make a **DEX Check**. For this Check, use a maximum of **+5** from your own **DEX** score. Apply all other modifiers, **Advantage**, and **Disadvantage** normally.

- **Success:** You suffer no damage or **HP** loss from the triggering effect.
- **Failure:** Resolve the triggering effect normally.
- **Critical Failure (natural 1):** Resolve the triggering effect normally, then you become **Prone**.

A successful **Dodge** does not cancel non-damage effects unless the triggering rule says it does.

> *Example: A **Power** that allows evasion deals **7 fire damage** to a Rogue. The Rogue spends **1 AP** to **Dodge** and fails the **DEX** Check. The Power resolves normally, and because fire damage ignores **AV**, the Rogue suffers all **7 fire damage**.*

5.5.3 Parry [1 AP]

Trigger: A melee attack that deals **blunt**, **piercing**, or **slashing** damage targets you while you are wielding a weapon with the **Parrying** trait, or have a rule that allows that weapon to **Parry**, and can take **Reactions**.

Duration: Resolves against the single triggering attack.

Effect: Roll the parry weapon's normal base damage dice and normal attack modifier. For **Parry**, the normal attack modifier includes the relevant **STR** or **DEX** modifier, the weapon's listed flat damage bonus, and its **Enchanted +X** modifier. It does not include temporary or conditional bonus damage from class features, Talents, **Powers**, stances, or similar effects unless a rule says it applies to **Parry**.

Parry gains any additional base damage dice granted by **Martial Supremacy**. It does not gain

extra base damage dice from **Caster Supremacy**, dual-wielding rules, or similar effects unless a rule says those dice apply to **Parry**.

For **Parry**, incoming damage is the triggering attack's total damage of every type after the **Roll and build damage** step, but before mitigation, **AV**, **Immune**, **Resistant**, or **Vulnerable**.

Resolve the parry roll in this order:

1. Roll the parry weapon's base damage dice. If all retained dice are natural **1s**, the **Parry** is a **Critical Failure**: the **Parry** fails, and the triggering attack ignores all of your **AV**. Resolve the attack normally otherwise, then end the **Parry**.
2. If any retained base die shows its maximum value, roll exploding dice. Add the weapon's normal attack modifier to determine the parry total.
3. If the parry total is lower than the incoming damage, the **Parry** fails and the attack resolves normally. If it equals or exceeds the incoming damage, you suffer none of the attack's damage. Effects of that attack that do not require it to damage you resolve normally.
4. If the **Parry** succeeds and any retained base die showed its maximum value, the attacker suffers a **Riposte** equal to the parry total.

A **Riposte** uses the parry weapon's damage type but does not apply that weapon's **Critical Hit** rider unless a rule says otherwise. The attacker applies **AV** against a **Riposte** normally but cannot take a **Reaction** against it. A **Riposte** is not an attack and cannot generate another **Riposte** or **Reflex Attack**.

Parry roll	Outcome
All retained base dice are natural **1s**	**Critical Failure.** The **Parry** fails, and the triggering attack ignores all of your **AV**. Resolve the attack normally otherwise.
Parry total lower than incoming damage	**Fails.** Resolve normally, with normal mitigation.
Parry total equal to or higher than incoming damage	**Succeeds.** You suffer none of the attack's damage. Effects that do not require the attack to damage you resolve normally.
Succeeds and a retained base die showed its maximum	As above, and the attacker suffers a **Riposte** equal to the parry total.

> *Example: A Guard is targeted by a melee attack that deals **5 slashing** and **2 fire** damage, **7** in total, and spends **1 AP** to **Parry** with a shortsword. The Guard rolls the shortsword's d6 and gets a **6**, rolls an exploding d6 for **2**, then adds **DEX +1** for a parry total of **9**. The **Parry** succeeds, so the Guard suffers none of the attack's damage. Because the retained parry base die showed its maximum value, the attacker suffers **9 Riposte damage** and applies **AV** against it normally.*

5.5.4 Reflex Attack [1 AP]

Trigger: During an enemy's activation, that enemy willingly leaves the melee distance of one of your melee attacks using a **Move** action, or makes a ranged attack while within that distance. Your melee distance is **1"** for a normal melee attack or **2"** for a melee attack with **Reach**, unless a rule gives that attack a longer melee distance. At different elevations, determine that melee distance under **2.9.9**. **Shift**, movement that explicitly does not provoke **Reflex Attack**, and forced movement do not trigger **Reflex Attack**. A ranged attack made as a **Reaction** does not trigger **Reflex Attack**.

Effect: If a ranged attack triggered this **Reaction**, declare the **Reflex Attack** before that attack's damage is rolled. Make one melee attack against that enemy. If movement triggered this **Reaction**, resolve the attack at the trigger point under **2.6.1**, before the enemy leaves your melee distance. If a ranged attack triggered this **Reaction**, resolve the **Reflex Attack** immediately after that ranged attack resolves and before the acting combatant takes any further action. This attack rolls its base damage dice with **Disadvantage**.

A combatant may make more than one **Reflex Attack** in the same round if they have enough **AP** and each trigger is legal.

Reflex Attacks are **Reactions** and follow **Section 4.5**.

> *Example: A Ranger makes a ranged attack while within **1"** of an enemy Fighter. The ranged attack resolves first. Immediately afterward, the Fighter spends **1 AP** to make a **Reflex Attack** against the Ranger, rolling its base damage dice with **Disadvantage**, before the Ranger takes another action.*

5.6 Push and Trip

Push is a universal combat action for AP-using combatants. **Trip** is available while you wield a weapon with the **Trip** trait. Neither action is an Attack action or weapon attack, neither rolls damage dice, and neither counts toward the multi-attack **Disadvantage** chain.

A **Monster** may use **Push** or **Trip** only if their profile, AI rule, scenario rule, or **Special Ability** tells them to do so.

A combatant may take **Push [1 AP]** or **Trip [1 AP]** only during their own activation. Because these actions are not attacks, they do not trigger **Block**, **Dodge**, **Parry**, or rules that trigger when an attack targets a combatant.

Taking **Push** or **Trip** is a hostile action. If the acting combatant is **Hidden**, they lose **Hidden** after the action resolves.

Unless a rule says otherwise, a **Push** target must be adjacent to the acting combatant. A **Trip** target must be within the **Range** or melee distance of the weapon used for **Trip**.

5.6.1 Push [1 AP]

Choose one legal combatant. Make a **STR Check** with **Disadvantage**. On a success, **Push** the target **2"** directly away from you. On a failure, nothing happens.

If the target is **Pushed** over an edge or into hazardous terrain, resolve that terrain or **Falling** after the forced movement ends.

Forced movement from **Push** never triggers **Reflex Attack**.

5.6.2 Trip [1 AP]

You must be wielding a weapon with the **Trip** trait. Choose a combatant of your **Sz** or smaller within that weapon's **Range** or melee distance.

Make a **STR or DEX Check** with **Disadvantage**. On a success, the target becomes **Prone**. On a failure, nothing happens.

If the target is already **Prone**, **Trip** has no additional effect unless a rule says otherwise.

A rule may make a target fixed, anchored, or otherwise immune to **Trip**.

5.7 Multiple Attacks

Each melee or ranged weapon attack costs **1 AP** unless a rule says otherwise. A Hero or Hireling may make more than one weapon attack during the same activation if they have enough **AP**.

The second and each later weapon attack a Hero or Hireling makes during one activation rolls its base damage dice with **Disadvantage** unless a rule says otherwise. This is the **Multiple Attacks** rule, and the sequence of attacks it counts is that combatant's **multi-attack Disadvantage chain**.

The chain is tracked per activation and resets at the start of each of that combatant's activations.

An attack counts toward the chain unless a rule says it does not. The following do **not** count toward the chain:

- **Push** and **Trip**, which are not attacks and roll no damage dice (**5.6**);
- attacks granted by a **Reaction**, such as **Reflex Attack**, **Counter Attack**, **No Escape**, and **Duelist's Riposte**;
- a **Riposte**, which is not an attack (**5.5.3**);
- any attack whose own rule states that it does not count toward the chain.

An attack made with two **Light** weapons counts as a single attack for this rule, as does a **Sweep** attack (**7.7**).

A rule may exempt an attack from the **Disadvantage** without removing it from the chain. **Agile** exempts the second weapon attack made with that weapon; **Combat Mastery** exempts a Hero's second weapon attack; **War Master** exempts all of that Hero's melee weapon attacks. Later attacks resolve normally unless another rule applies.

Monsters do not use **AP** and do not use this rule. A **Monster** with **Multi-Attack** makes the attacks listed by that ability, as described in **9.6**.

5.8 Knocked Out, Wounds, and Death

Reduced to 0 HP

A combatant's **HP** cannot fall below **0**.

When a **Hero** is reduced to **0 HP**, resolve the following in order:

1. The Hero becomes **Knocked Out** and **Prone**, and loses all remaining **Temporary HP** (**5.4.2**).
2. The Hero marks **1 Wound**.
3. If this is the Hero's **third Wound**, that Hero dies immediately and is removed from play. Do not roll on the **Injuries Table**.
4. Otherwise, the Hero makes an **Injuries Roll**: roll **1d20** and apply that result from the **Injuries Table** in **5.8.1**.

An **Injuries Roll** is a roll, not a **Check**. A rule may modify it by a stated amount. Apply all modifiers, then treat a modified result lower than **1** as **1** and a modified result higher than **20** as **20**.

A rule may allow a Hero to avoid gaining the Wound and the **Injuries Roll**, such as the Human **Determined Resolve** trait. Such a rule cannot prevent **True Death**, a third Wound, or death caused by a rule that causes immediate death.

Knocked Out ends when the Hero's **HP** is restored above **0**. Restoring a Hero above **0 HP** does not remove a Wound or reverse an **Injuries Table** result unless the rule explicitly says so.

If a **Hireling** is reduced to **0 HP**, remove them from play (**6.15**). Hirelings do not gain Wounds and never make an **Injuries Roll**. **Monsters** and **Bosses** are removed from play when reduced to **0 HP**; they never suffer Wounds and never roll on the **Injuries Table** (**9.1**).

Damaging a Knocked Out Hero

Whenever a **Knocked Out** Hero suffers **1** or more damage or **HP** loss from a single source, after all mitigation and damage-type modifiers, that Hero marks **1 Wound**. If this is their third Wound, they die immediately and are removed from play. Resolve this once per source, and do not make an **Injuries Roll** for it.

A source reduced to **0** damage does not trigger this rule, as described in **5.1.1**.

Wounds

A Hero has a maximum of **3 Wounds**. A Hero who marks a third Wound dies.

Unless a rule says otherwise, every newly created Hero begins with **0 Wounds** (**6.3**).

Wounds are not a condition and are not a negative condition (**5.9**). A rule does not remove a Wound unless it explicitly says so.

In campaign play, Wounds persist between adventures and are removed by **Chirurgeon's Care** during the **Town Phase** or by specific high-tier consumables, as described in **11.2.4**. Lingering **Injuries Table** results likewise persist until healed during the **Town Phase**, as described in **5.8.1**.

Death

A dead Hero is removed from play and takes no further part in the adventure. In campaign play, resolve a dead Hero under **11.1.5 The Three Fates** and the **Aftermath** step in **11.2.3**.

A Hero returned to play by a resurrection effect returns with the **HP** and **Wounds** stated by that effect (**7.15**).

5.8.1 Injuries Table

Results **1–5** are catastrophic. Results **6–14** are lingering injuries or battlefield setbacks. Results **15–20** are hard survival results. Even favourable results leave the **Hero** wounded, exposed, or in pain.

d20	Result	Effect
1	**True Death**	This **Hero** dies immediately and is removed from play. In campaign play, follow **11.1.5 Die**; remove the **Hero** from the Roster permanently only if they are not returned to life before the next adventure.

d20	Result	Effect
2	**Bleeding Out**	This **Hero** dies at the end of the following round unless they are restored to at least **1 HP** or treated by an adjacent ally using **Bandages** as an **Interact** [**1 AP**] action and succeeding on an **INT Check**. On a success, the **Hero** no longer dies from **Bleeding Out**, but remains **Knocked Out** unless restored above 0 **HP**.
3	**Shattered Arm**	This **Hero** remains **Knocked Out**. When they are no longer **Knocked Out**, they have **Disadvantage** on **STR** Checks, cannot use items that occupy **2 Hands**, and cannot use shields until healed during the **Town Phase**.
4	**Crushed Leg**	This **Hero** remains **Knocked Out**. When they are no longer **Knocked Out**, their Speed is reduced by **2"**, they cannot **Shift**, and they have **Disadvantage** on **DEX** Checks until healed during the **Town Phase**.
5	**Cracked Skull**	This **Hero** remains **Knocked Out**. When they are no longer **Knocked Out**, they have **Disadvantage** on **INT** Checks, **SPI** Checks, and Casting Checks until healed during the **Town Phase**.
6	**Gut Wound**	This **Hero** remains **Knocked Out**. When they are no longer **Knocked Out**, their maximum **HP** is reduced by **3** until healed during the **Town Phase**.
7	**Blood in the Eyes**	This **Hero** remains **Knocked Out**. When they are no longer **Knocked Out**, their **LOS** is reduced to **6"**, and sight-based attacks and Checks are made with **Disadvantage** until healed during the **Town Phase**.
8	**Broken Ribs**	This **Hero** returns to **1 HP**, remains **Prone**, and cannot spend more than **1 AP** during their next activation.
9	**Concussion**	This **Hero** remains **Knocked Out** and **Prone**, and becomes **Stunned**.
10	**Torn Shoulder**	This **Hero** returns to **1 HP** and remains **Prone**. Until healed during the **Town Phase**, their first weapon attack each round rolls its base damage dice with **Disadvantage**.
11	**Split Brow**	This **Hero** returns to **1 HP**, remains **Prone**, and gains **Bleeding**.
12	**Winded**	This **Hero** returns to **1 HP**, remains **Prone**, and cannot take **Reactions** until the start of their next activation.
13	**Crawling Survival**	This **Hero** remains **Knocked Out**, but the next source of damage they suffer before the end of the round is reduced by **2**. This may reduce that damage to **0** before the rule for damaging a **Knocked Out Hero** is applied.
14	**Shaking Hands**	This **Hero** returns to **1 HP** and remains **Prone**. Until the end of the round, they cannot use **Powers**, scrolls, or **Special Abilities**.
15	**Scarred but Standing**	This **Hero** returns to **1 HP**, immediately **Stands**, and gains **Bleeding**.
16	**Grim Return**	This **Hero** returns to **1d4 HP**, immediately **Stands**, and has **Disadvantage** on their next Check this round.
17	**Last Reserve**	This **Hero** returns to **1 HP**, immediately **Stands**, and regains **1 NRG** or **1 Luck Point**, chosen by that **Hero**'s controller. A **Hero** with **Max NRG 0** regains **1 Luck Point**.
18	**Spiteful Return**	This **Hero** returns to **1 HP** and remains **Prone**. The next weapon attack they make before the end of their next activation deals an additional **2 damage of that attack's primary damage type**, unless it is a **Total Miss**.
19	**Death Refused**	This **Hero** returns to **1d6 HP**, immediately **Stands**, and may immediately **Shift 1"**.
20	**Vengeful Surge**	This **Hero** returns to half their maximum **HP**, rounded down as normal, immediately **Stands**, and gains **+1 AP** for their next activation.

> *Example: A Ranger is reduced to **0 HP** for the first time. The Ranger becomes **Knocked Out** and **Prone**, marks **1 Wound**, then rolls **1d20** on the **Injuries Table** and gets **11**. The Ranger returns to **1 HP**, remains **Prone**, and gains **Bleeding**.*

5.9 Conditions

This is the authoritative list of core combat conditions. Conditions with the same name do not stack unless a rule says otherwise. If a combatant would gain a second copy of the same condition, keep the longer duration. If both copies use numeric values, keep the higher numeric value. Otherwise, keep the existing condition unless the new rule says they replace it.

After a condition applied by an enemy effect ends on a combatant, that combatant is immune to the same named condition from enemy effects until the end of their next activation unless a rule says otherwise. This immunity never applies to **Hidden**, **Invisible**, **Prone**, or **Knocked Out**, and never prevents a condition a combatant applies to themselves.

Each condition defines its own timing and endpoint. A condition has no default expiry unless its entry or the rule that applies it specifies one.

For rules that remove or prevent a **negative condition**, the negative conditions are **Bleeding**, **Blinded**, **Burning**, **Cursed**, **Frightened**, **Immobilized**, **Poisoned [dX]**, **Prone**, **Silenced**, **Sleeping**, **Slowed**, **Stunned**, and **Weakened**. **Hidden**, **Invisible**, **Knocked Out**, and **Wounds** are not negative conditions. A rule does not remove a **Wound**, scenario-specific state, or permanent injury unless it explicitly says so.

Bleeding

At the end of their activation, a combatant with **Bleeding** loses **2 HP**. This **HP** loss cannot be reduced by **AV**, **AD**, **Resistance**, or **Immune**.

Bleeding ends when the combatant regains **HP**, receives successful **Bandages**, or a rule removes it. **Bleeding** does not end automatically.

Blinded

You cannot draw **LOS** beyond **2"**. Attack damage rolls and Checks that require sight are made with **Disadvantage**.

Blinded ends at the end of the affected combatant's next activation, or immediately if a rule removes it.

Burning

At the end of each round, you suffer **1 fire damage**.

During your activation, you may spend **1 AP** to end **Burning** on yourself. **Burning** also ends when you enter water or a rule removes it. **Burning** does not end automatically.

Cursed

While you are **Cursed**, you cannot regain **HP** by any means. A **Cursed** combatant therefore cannot end **Bleeding** by regaining HP; **Bandages** and condition-removal effects still work.

Cursed lasts until the end of the adventure. It ends early only when a rule removes it, such as **Purify**, a **Potion of Remove Curse**, or another effect that ends curse effects.

Frightened

You cannot willingly move closer to the source of the effect while it is in **LOS**. Attack damage rolls and Checks you make against the source are made with **Disadvantage**.

Frightened ends at the end of the affected combatant's next activation, or immediately if a rule removes it.

Hidden

A **Hidden** combatant cannot be targeted by attacks, **Powers**, abilities, or actions that require **LOS**. **Hidden** does not block **LOS** to the combatant.

A **Hidden** combatant does not block enemy movement. An enemy may move through a **Hidden** combatant's space but cannot end their movement overlapping them. A combatant that moves through a **Hidden** combatant's space immediately ends that combatant's **Hidden**, before any further movement is resolved.

A **Hidden** combatant can still be affected by an Area of Effect if that area does not target them directly.

The first attack, harmful **Power**, or harmful **Special Ability** a **Hidden** combatant resolves gains the first applicable **Hidden** benefit:

- if it rolls base damage dice, roll those dice with **Advantage**;
- otherwise, if the acting combatant makes a Check, make that Check with **Advantage**;
- otherwise, if the target makes a Check, the target makes the first such Check with **Disadvantage**.

After resolving that attack, harmful **Power**, or harmful **Special Ability**, the combatant loses **Hidden**.

Your **Hide distance** is **2"** unless a rule changes it. **Hide distance** governs both the distance requirement for taking **Hide** in **4.3.2** and the distance at which a nearby enemy causes you to lose **Hidden** below. A rule that changes your **Hide distance** changes both.

Immobilized

Your Speed becomes **0"**. You cannot **Move**, **Shift**, **Climb**, or **Jump**.

Immobilized ends at the end of the affected combatant's next activation, or immediately if a rule removes it.

A **Hidden** combatant also loses **Hidden** if any of the following occur:

- they take damage;
- they become **Engaged**;
- an enemy is within their **Hide distance** and has **LOS** to them;
- an enemy has **LOS** to them and they do not have **Cover** from that enemy;
- an enemy successfully uses **Spot** against them;
- they take **Push**, **Trip**, or another action that a rule states breaks **Hidden**;
- a rule removes **Hidden**.

Check whether a combatant loses **Hidden** each time a combatant finishes a **Move** or **Shift**, each time an action, **Power**, or **Reaction** finishes resolving, and at the end of each activation. A combatant does not lose **Hidden** because a loss condition was true only partway through another combatant's movement. When checking whether a combatant loses **Hidden**, apply terrain, **Cover**, **Darkness**, **Light Sources**, special senses, and other rules normally. **Cover** granted only by a sight line crossing a combatant never counts as **Cover** for becoming or remaining **Hidden**.

> *Example: A **Hidden** Assassin stands at the edge of a thicket of **Cover Terrain**, **9"** from a Ghoul. The Assassin has **Cover**, and the sight line enters the thicket only within the Assassin's space, so the thicket does not block **LOS**. The Ghoul moves to **1"** from the Assassin. The Ghoul has **LOS** to the Assassin and is within the Assassin's **Hide distance** of **2"**, so the Assassin loses **Hidden**. The **Cover** still applies; **Cover** and **Hidden** are separate rules.*

Invisible

Enemies cannot target you with **LOS**-based attacks, **Powers**, or **Special Abilities** unless the attacker is adjacent or has a rule that ignores **Invisible**. A melee attack with **Reach** does not by itself allow a combatant to target an **Invisible** enemy unless the combatant is adjacent or another rule allows it.

Attacks from adjacent enemies are legal if the attack is otherwise legal, but the attacker rolls the attack's base damage dice with **Disadvantage** unless the attacker can ignore **Invisible**.

Areas of Effect, Auras, hazards, and effects that do not choose a visible target can still affect you.

Invisible does not require **Cover** or **Darkness**. A normal **Light Source** does not remove or ignore **Invisible**. **Invisible** ends after your first attack, harmful **Power**, harmful **Special Ability**, **Push**, or **Trip** resolves unless the effect says otherwise.

Knocked Out

You are at **0 HP** and cannot activate, take actions, voluntarily move, attack, use **Powers**, use **Special Abilities**, or take **Reactions**. You remain **Prone** unless a rule prevents you from being **Prone**.

Resolve damage and **HP** loss suffered while **Knocked Out** under **5.8**.

Knocked Out ends when your **HP** is restored above 0.

Poisoned [dX]

At the end of your next activation, suffer poison damage using the die size listed by the source, then remove **Poisoned**. For example, **Poisoned [d4]** deals **1d4 poison damage**, and **Poisoned [d6]** deals **1d6 poison damage**.

Remove **Poisoned** early if you consume an Antitoxin, or if a rule explicitly removes **Poisoned** or poison.

If you gain a second **Poisoned** condition while already **Poisoned**, keep only the larger potential poison damage. Do not stack multiple **Poisoned** dice.

Place an appropriately sized die next to the model as a reminder.

> *Example: A **Hero** with **Poisoned [d4]** is damaged by an attack that applies **Poisoned [d6]**. Keep only the larger potential poison damage: the **Hero** is **Poisoned [d6]**. At the end of their next activation, they suffer **1d6 poison damage**, then remove **Poisoned**.*

Prone

Melee attacks against you roll their base damage dice with **Advantage**. Ranged weapon attacks made from more than **2"** away roll their base damage dice with **Disadvantage**. You cannot **Block** or **Parry**. Spend **1 AP** to **Stand**.

If a **Monster** is **Prone** at the start of their activation, remove **Prone** before resolving their AI.

Prone ends when you **Stand** or a rule removes it.

Silenced

You cannot cast **Powers**, and you cannot use a **Special Ability** that explicitly requires speech, chanting, or invocation.

Silenced ends at the end of the affected combatant's next activation, or immediately if a rule removes it.

Sleeping

You immediately fall **Prone** unless a rule prevents it. You cannot take actions, voluntarily move, attack, use **Powers**, use **Special Abilities**, or take **Reactions**. Melee attacks against you roll **1** additional base damage die, in addition to any **Advantage** from **Prone**.

Sleeping ends immediately when you take damage or lose **HP**, after resolving that damage or **HP** loss; you remain **Prone**. It also ends when an adjacent ally uses **Interact [1 AP]** to wake you (**4.3.1**), or at the end of your next activation. You remain eligible to activate to end **Sleeping** even with **0 AP**, but cannot take actions or spend **AP** during that activation.

Sleeping is a condition and is not the same as a Resting **Monster**. A **Resting** Monster is not **Sleeping**, and a **Monster** that wakes from **Sleeping** does not become Resting.

Slowed

If your Speed is greater than **0"**, halve it, rounded down to a minimum of **1"**.

Slowed ends at the end of the affected combatant's next activation, or immediately if a rule removes it.

Stunned

You cannot take actions, voluntarily move, attack, use **Powers**, use **Special Abilities**, or take **Reactions**.

Stunned ends at the end of the affected combatant's next activation, or immediately if a rule removes it. You remain eligible to activate to end **Stunned** even with **0 AP**, but cannot take actions or spend **AP** during that activation.

Weakened

Your attack damage rolls are made with **Disadvantage**.

Weakened ends at the end of the affected combatant's next activation, or immediately if a rule removes it.

6.

Your Adventuring Party

Adventuring parties are not the heroes sung about in warm halls. They are the people the Bastions can send when soldiers would die too loudly. Debtors march with seals burned into their papers. Condemned prisoners carry pardons that become valid only if they return. Chapel agents, guild cutters, ruined heirs, oath-bound hirelings, and free companies with no banner worth saluting all leave by the same gates.

*A Bastion blesses these parties when it must. It pays them when it can. It denies them when the work turns shameful. Most **Expeditions** begin with a writ: a council mark, chapel order, guild contract, noble warrant, salvage-right, grave-tax exemption, or debt bond. The paper grants legal cause to enter forbidden ground and take what can be carried out. Rival parties may hold different writs for the same ruin. Each seal may be valid under some law, oath, or patronage. The Dying Lands do not care. A contract only matters if someone lives long enough to collect.*

In Heraldry Skirmish, each side fields a small band of hard-bitten adventurers.

Hero creation is normally **chosen**, not random. Start with the miniature or standee that will represent the Hero, then choose the ancestry, background, class, and starting equipment package that best suit that model. This section explains how to create Heroes, assemble a party, judge party strength, and handle advancement through campaign play.

6.1 Party Structure

A **party** is one side's allied Heroes and Hirelings. In campaign play, its **Roster** contains all persistent Heroes belonging to that party, and its **Active Party** contains the Heroes selected for the current adventure. Allied Summons belong to their controlling party for party-wide limits, but are not Roster members.

A standard campaign begins with **4 Level 1 Heroes**. In matched one-off play, both sides field the same number of Heroes at the agreed Hero Level. A scenario or game format may instead allow **1–4 Heroes** per side.

In solo or cooperative play, the allied side fields **1–4 Heroes** and the scenario adds Monsters, hazards, or other pressure in place of an opposing party.

Party Leader

When a party is formed, its controlling player or players must nominate one Hero as the **Party Leader**.

The Party Leader serves two purposes.

Initiative. At the start of each round, the Party Leader's **INT** and **SPI** scores are added to that side's Initiative roll, as described in **3.2**.

Shared-Control Decisions. In games where multiple players share one side, those players divide control of the side's combatants among themselves before deployment. Each player makes all legal choices for the combatants they control, including movement, targets, actions, and Reactions. The **Party Leader's** controller makes any choice assigned to the side as a whole, any choice explicitly assigned to the **Party Leader**, and the side's activation order when the controlling players do not agree. The **Party Leader's** controller cannot override another player's legal choice for a combatant that player controls.

Party Leader status cannot be changed voluntarily. If the **Party Leader** leaves the battlefield or is removed from play during an adventure, they remain the **Party Leader** for the rest of that adventure. Use the Initiative and shared-control substitutions below. If the **Party Leader** ends their career through one of the three Fates (**Die**, **Retire**, or **Triumph**), that side must nominate a new **Party Leader** from the remaining Heroes in the **Roster** before the next adventure begins.

If the Party Leader is not currently on the battlefield, that side selects one allied Hero currently on the battlefield to provide the **INT** and **SPI** modifiers for Initiative in the Party Leader's place. If the Party Leader's controller is not participating in the adventure, the participating players on that side nominate one of themselves to exercise the Party Leader's shared-control authority for that adventure.

A **Hireling** cannot be nominated as **Party Leader**.

6.2 Character Creation Procedure

Create each Hero in the following order:

1. Select a miniature, standee, or token to represent the Hero.
2. Select or roll the Hero's ancestry, background, and class, in that order.
3. Calculate the Hero's final **STR**, **DEX**, **INT**, and **SPI** scores.
4. Choose the Hero's starting known Powers, if any.
5. Choose the **General Talent** and **Novice Class Talent** granted at Level 1.
6. Select or roll the Hero's starting equipment package and determine which items are equipped or carried.
7. Calculate **Max HP**, **SPD**, **Max NRG**, maximum **Luck**, and **Initiative Bonus**, including every applicable modifier.
8. Record all abilities, Powers, Talents, and equipment.
9. In campaign play, add starting coins to the **Treasury**. Record each starting item as equipped, assigned to that Hero to carry during the first adventure, or held in **Storage**.
10. Set current HP, NRG, and Luck equal to their final maximum values.

A Hero's final starting ability scores are:

Final Ability Score = Ancestry Base Score + ancestry trait modifiers + Background Bonus + Class Modifier + any Random Background Bonus

A Hero's starting Max HP is:

Starting Max HP = Ancestry Base HP + Class Starting HP Bonus

After calculating each base value, apply every applicable ancestry, background, class, Talent, item, and random-generation modifier. Use **6.4 Hero Attributes** for **Initiative Bonus** and **Max NRG**.

6.3 Core Hero Creation Rules

Equipment Eligibility

Heraldry Skirmish does **not** use weapon or armour proficiencies.

If a Hero meets an item's listed ability score requirement, that Hero may equip and use it unless another rule prohibits it. A **Small** Hero cannot equip equipment with the **Heavy** trait. If a Hero does not meet an item's requirements or is prohibited from equipping it, they may carry it but cannot equip or use it unless a rule says otherwise.

After calculating the Hero's final ability scores, confirm all starting equipment. A chosen starting package must contain only weapons, armour, and shields that the Hero can legally equip; otherwise choose another package. Any other starting item that the Hero cannot legally equip begins in **Storage**. If a randomly determined package or reward grants an unusable item, place it in **Storage** and do not reroll it.

Starting State

Unless a rule says otherwise, every newly created Hero begins at **Level 1** with **0 Wounds**.

6.4 Hero Attributes

Every Hero records the following:

- **Name**
- **Ancestry, Background,** and **Class**
- **Level**
- **STR, DEX, INT,** and **SPI**
- current and maximum **HP**
- current and maximum **NRG**
- **SPD**
- **Sz**
- current and maximum **Luck**
- **Wounds**
- **Initiative Bonus**
- **Known Powers**, if any
- **General Talents, Class Talents,** and **Special Abilities**
- **Inventory**, including equipped and carried items
- **Carried Coins**

Use the following derived values unless a rule says otherwise:

- **Initiative Bonus = INT + SPI**
- **Base Max NRG = Level + (2 × Primary Casting Score), minimum 0** for non-Martial classes that cast Powers. Then apply any background, ancestry, talent, item, or class feature that modifies **Max NRG**. Recalculate **Max NRG** whenever the Hero's Level, Primary Casting Score, or a permanent Max NRG modifier changes. Martial classes always have **Max NRG 0** and cannot gain **Max NRG** unless a rule explicitly grants a replacement benefit.

If a combatant's **Max HP**, **Max NRG**, or maximum **Luck** decreases below their current value, reduce the current value to the new maximum. Increasing a maximum does not restore that resource unless a rule says otherwise.

Unless a rule explicitly says otherwise, a Hero's current **HP**, **NRG**, and **Luck** cannot exceed the corresponding maximum. Any excess gained or restored is lost. **Temporary HP** is separate.

Carried Coins records only coins currently carried on the battlefield. In campaign play, secured coins belong to the party's shared **Treasury**, not to an individual Hero. Record current HP, NRG, and Luck separately from their maximum values.

6.5 Chosen and Random Creation

Chosen creation is the default. Random generation is optional.

A Hero may randomly determine any of the following separately. Each category is rolled on its own:

- ancestry
- background
- class
- starting package

Each category rolled randomly grants an additional bonus.

Random Ancestry Bonus

If ancestry is rolled randomly, the Hero gains that ancestry's listed **Random Ancestry Bonus**.

Random Background Bonus

If background is rolled randomly, roll **1d4** and gain **+1** to the indicated ability score:

- **1:** STR
- **2:** DEX
- **3:** INT
- **4:** SPI

Random Class Bonus

If class is rolled randomly, choose one **General Talent** list: **STR**, **DEX**, **INT**, or **SPI**. Roll **1d10** on that list, counting talents from top to bottom, and gain the rolled talent immediately. This random Talent may come from any list and ignores the Hero's Class Archetype restriction.

If the rolled talent is a duplicate, lists an **NRG** cost the Hero cannot legally use, cannot function for that Hero, or is otherwise illegal for that Hero, reroll until the result is legal. For example, a Martial Hero must reroll **Channel Energy** because they cannot gain NRG.

Random Starting Package Bonus

If the starting package is rolled randomly, roll **1d6** after choosing or randomly determining class. On **1–2**, use package **A**. On **3–4**, use package **B**. On **5–6**, use package **C**. If a class or later supplement lists more than three packages, use the random package table in that class entry.

If the starting package is rolled randomly, the Hero gains **+4c**.

A Hero may gain multiple random-creation bonuses if multiple categories were rolled randomly.

Random-creation bonuses are optional narrative and campaign rewards. Matched competitive play may use the random creation tables, but ignores all **Random Ancestry, Random Background, Random Class,** and **Random Starting Package Bonuses**.

6.6 Random Ancestry Tables

Random Ancestry Table (d10)

d10	Ancestry	Random Ancestry Bonus
1–4	Human	Roll on the Human Trinket Table
5–6	Halfling	Increase maximum **Luck** by **1**
7	Dwarf	One eligible starting item gains the **Masterwork** quality
8	Elf	One eligible starting item gains the **Elven** quality
9	Gnome	Roll twice on the **Tier 1 Special Items** table and keep 1 result
10	Rare Ancestry	Roll on the Rare Ancestry Table

After selecting all starting items, choose the item that gains the listed quality. For the Dwarf result, an eligible item is one mundane starting weapon, piece of Chest armour, or shield that does not already have an Item Quality. For the Elf result, an eligible item is one mundane starting weapon or piece of metal Chest armour that does not already have an Item Quality. If no eligible item exists, gain **4c** instead.

Rare Ancestry Table (d10)

d10	Rare Ancestry	Random Ancestry Bonus
1–2	Goblin	Increase maximum **Luck** by **1**
3–4	Orc	Gain a Masterwork Handaxe and Ring Shirt
5–6	Ratkin	Once per round, when an attack with **Teeth** damages an enemy, that enemy becomes **Poisoned** [**d4**]
7–8	Deep Elf	Gain a Masterwork Dagger and 5 uses of Basic Venom
9	Demonborn	Gain **1 Demon's Horn**
10	Drakeblood	Gain a Masterwork Spear and Hide Cuirass

6.7 Human Trinket Table

If a Hero randomly generates **Human** ancestry, roll **1d10** on the table below. All Human Trinkets have **0 / 0 / 0 / 0** ability score requirements and may be transferred or sold normally for the listed coin value.

Except for **A Simple Ring** and **Heirloom Shortsword**, Human Trinkets are carried adventuring equipment and function for the Hero carrying them. **A Simple Ring** occupies 1 Ring location while equipped. **Heirloom Shortsword** occupies 1 Hand and otherwise uses the mundane Shortsword profile.

d10	Trinket	Value	Rules
1	**Glyph of Resurrection**	4c	[**2 AP**] **Destroy:** Choose one adjacent allied Hero who died this adventure and is still represented by a model or marker. Return that Hero to play at **1 HP**, **Prone**, and with **2 Wounds**. It cannot reverse Retirement, Triumph, or any death a scenario says cannot be reversed.
2	**Immortal Candle**	2c	[**1 AP**] **Light or Extinguish:** While lit, each allied Hireling within **12"** deals an additional **1 damage of that attack's primary damage type** with the first attack they make each round that is not a **Total Miss**. The candle counts as a **Light Source** while lit.
3	**Awakening Bell**	1c	[**1 AP**] **Ring:** Until the end of the round, each **Awake Monster** within **12"** treats this Hero as **2" closer** when selecting its **Primary Target**. Use the Hero's actual distance for movement, attack range, and all other rules.
4	**Telescoping Pole**	1c	Passive. Your **Interact Checks** are rolled with **Advantage**, and you may **Interact** with hazards, levers, and floor plates from **1"** farther away.
5	**Strange Slippers**	1c	Passive. Ignore HP loss and becoming **Prone** from falls of **6"** or less if you land in a legal standing space.
6	**Mysterious Key**	1c	[**1 AP**] **Unlock:** Use on one adjacent locked nonmagical door, chest, or mechanism. Roll **1d6**. On **1–5**, it opens. On **6**, the key fails and cannot be used on that object again this adventure.
7	**Holy Wafer ×5**	2c for all 5	[**1 AP**] **Consume 1:** Restore **1d6 NRG**.
8	**A Simple Ring**	2c	[**1 AP, 2 NRG**] Gain **Invisible** until the end of the round.
9	**Demon's Horn**	2c	[**1 AP**] **Destroy:** Place one **Infernal Imp** allied **Summon** in a legal unoccupied space within **6"** and **LOS**. They use the **Infernal Imp** stat block in **6.13 Hero Classes (Sorcerer)** and follow the universal Summon rules in **2.5.1**.
10	**Heirloom Shortsword**	3c	This Shortsword deals **+X damage**, where **X = the wielding Hero's Level**, to a maximum of **+5**.

6.8 Common Trait Rules

The following ancestry traits are defined here for easy reference during Hero creation.

Small: This Hero has **Sz S** and therefore the universal **Small** Special Ability under **Size and Footprints** in **2.6**. **Small** is lost if an effect changes the Hero to another Size and regained when their Size returns to **S**.

Darkvision: This Hero ignores **Cover** and visual penalties caused solely by nonmagical **Darkness** when determining **LOS** to, targeting, or resolving an effect against a combatant, object, space, or area origin within **12"** of this Hero. **Darkvision** does not create **Light** or remove **Darkness**. **Magical Darkness** applies normally unless another rule says otherwise.

Superior Darkvision: This Hero ignores **Cover** and visual penalties caused solely by nonmagical **Darkness** when determining **LOS** to, targeting, or resolving an effect against a combatant, object, space, or area origin within **18"** of this Hero. **Superior Darkvision** does not create **Light** or remove **Darkness**. **Magical Darkness** applies normally unless another rule says otherwise.

Fey Ancestry: This Hero is **Immune** to **Sleeping**. Their **Checks** made to resist **Frightened** are rolled with **Advantage**.

Naturally Stealthy: While this Hero is in **Cover**, their **Hide distance** is **0"**.

Sunlight Sensitivity: While in direct sunlight or an equivalent effect, this Hero suffers **Disadvantage** on ranged attack damage rolls and on **INT Checks** relying on sight.

Infernal Resistance: This Hero is **Resistant** to fire damage.

6.9 Ancestries

Ancestries provide a compact rules package that supports, but does not replace, class identity. Special senses appear on the ancestry statline; an ancestry without a **Senses** line has normal sight.

Rare Ancestries: Goblin, Orc, Ratkin, Deep Elf, Demonborn, and Drakeblood are rare ancestries. In matched play, all ancestries are permitted, but each party may field no more than **1 Hero** with a rare ancestry. A campaign's starting Roster may contain no more than **1 Hero** with a rare ancestry. If a random ancestry result would exceed either limit, reroll that ancestry result until it is legal.

Human

Humans are short-lived strivers who raise fragile things in a brutal world and call the result civilization. They learn fast, adapt faster, and persist in places that wear steadier peoples down to nothing.

Base Ability Scores: STR 0, DEX 0, INT 0, SPI 0
Base HP: 8
Sz: M
Speed: 5"
Luck: 2

Traits

- **Versatile:** At Hero creation, add **+1** to any one ability score.
- **Determined Resolve:** When this Hero is reduced to **0 HP**, they may spend **1 Luck Point** to make a **SPI Check** before gaining a Wound. On a success, they remain at **0 HP**, **Knocked Out**, and **Prone**, but do not gain that Wound and do not roll on the **Injuries Table**. This use of **Luck** is not a reroll. This trait cannot prevent **True Death**, a third Wound, or death caused by a rule that causes immediate death.

Halfling

Halflings keep to hearth smoke and hidden roads, and to the quiet wisdom of staying alive while larger folk blunder into the dark. They are small and quick, and far harder to break than strangers ever expect.

Base Ability Scores: STR -1, DEX +1, INT 0, SPI +1
Base HP: 6
Sz: S
Speed: 5"
Luck: 2

Traits

- **Small**
- **Naturally Stealthy**
- **Brave Heart:** You are **Immune** to **Frightened**.

Dwarf

Dwarves are cut from sealed stone halls, old grudges, and craft traditions older than most fallen kingdoms. Hardship did not sour them so much as harden them, and little in this world meets one of them head-on and walks away whole.

Base Ability Scores: STR +1, DEX -1, INT 0, SPI +1
Base HP: 10
Sz: M
Speed: 4"
Senses: Darkvision
Luck: 1

Traits

- **Dwarven Resilience: Checks** against poison are rolled with **Advantage**. Reduce poison damage taken by **1**.
- **Heavy Step:** Reduce the magnitude of the **DEX Pen** of equipped Chest armour with **STR Req 4** or higher by **1**; for example, **-3** becomes **-2**.

Elf

Elves are shaped by older forests and longer memories, and carry a grace that seems almost inhuman to the hurried peoples of the age. They move lightly, notice much, and bear the weight of beauty and loss without letting it show.

Base Ability Scores: STR -1, DEX +1, INT +1, SPI 0
Base HP: 7
Sz: M
Speed: 6"
Luck: 1

Traits

- **Fey Ancestry**
- **Elven Grace:** Once per round, after completing a **Move**, **Shift 1"**.

Gnome

Gnomes hold that every lock, mechanism, and buried device hides a lesson, and that the lesson is usually worth the risk of learning it. They are clever and precise, drawn to the exact dangers that sensible folk step around.

Base Ability Scores: STR -1, DEX 0, INT +2, SPI 0
Base HP: 7
Sz: S
Speed: 5"
Senses: Darkvision
Luck: 1

Traits

- **Small**
- **Gnome Cunning:** Your **INT** and **SPI Checks** made to resist enemy effects that would make you **Blinded**, **Frightened**, **Sleeping**, or **Weakened**, or force your movement, attacks, or target choices, are rolled with **Advantage**.
- **Artificer's Touch: INT Checks** made to **Interact** with, understand, or examine mechanical hazards and devices are rolled with **Advantage**.

Goblin

Goblins learn fast hands and quicker feet, and the plain truth that the weak survive by being where the blow is not. They fight mean, flee smart, and take every edge a hard world leaves lying about.

Base Ability Scores: STR -1, DEX +2, INT 0, SPI -1
Base HP: 6
Sz: S
Speed: 5"
Luck: 2

Traits

- **Small**
- **Nimble Escape:** Once per round, when damaged by a melee or ranged attack, **Shift 1"** directly away from the attacker.
- **Vicious Opportunist:** Your attacks deal **+1 damage** of their primary damage type against an enemy that has at least 1 Wound or is at half their **Max HP** or less when you declare the attack.

Orc

Orcs are raised where weakness is punished at once and hesitation is never forgotten. Strength, momentum, and raw nerve have carried them this far, and they trust those three further than they trust subtlety.

Base Ability Scores: STR +2, DEX 0, INT -2, SPI 0
Base HP: 10
Sz: M
Speed: 5"
Senses: Darkvision
Luck: 1

Traits

- **Aggressive:** If unengaged at the start of their activation, this Hero may move up to **2"** toward the nearest enemy in **LOS** before taking their first action. This movement is voluntary movement and may trigger **Reflex Attack** normally.
- **Savage Attacks:** On a melee **Critical Hit**, add **+2** to one exploding bonus die. This modifier cannot cause another explosion.

Ratkin

Ratkin come up from refuse heaps, tunnel warrens, and plague-alleys where numbers, speed, and hunger settled every argument. They know how to scatter, swarm, and strike where the enemy is already bleeding.

Base Ability Scores: STR -1, DEX +2, INT 0, SPI -1
Base HP: 6
Sz: S
Speed: 5"
Senses: Darkvision
Luck: 1

Traits

- **Small**
- **Teeth:** This Hero has a natural melee weapon: **1d4 piercing damage**, **Light**. Add **STR** to its damage normally. Teeth cannot be dual-wielded, disarmed, removed, bought, sold, or given Item Qualities. Teeth otherwise count as a melee weapon for attacks, Talents, and class abilities.
- **Pack Hunter:** Deal an additional **1 damage of that attack's primary damage type** when attacking a target already engaged by an ally.

Deep Elf

Deep elves are a crueller branch of the elder blood, raised on night, venom, and treachery taught as a fine art. They are graceful and dangerous, and far more at ease beneath the dark than beneath the sun.

Base Ability Scores: STR 0, DEX +1, INT +1, SPI -1
Base HP: 7
Sz: M
Speed: 6"
Senses: Superior Darkvision
Luck: 1

Traits

- **Sunlight Sensitivity**
- **Deep Elf Magic:** Choose one Tier 1 Arcane Spell at Hero creation. Once per round, spend **1 Luck Point** to cast that Power for **1 AP** and **0 NRG**, following all normal **Casting Check** rules for that Power. The Hero may cast this Power even if they have no **NRG** pool and no class casting tradition. Use **INT** as the Casting Score. The metal equipment restrictions in **8.2** apply normally.

Demonborn

Something infernal stains the demonborn line, whether by old pact, curse, or ancestral trespass. Doors do not open for them, but fire parts, fear bends, and darker powers sometimes answer when they are called.

Base Ability Scores: STR 0, DEX 0, INT +1, SPI +1
Base HP: 8
Sz: M
Speed: 5"
Senses: Darkvision
Luck: 0

Traits

- **Infernal Resistance**
- **Fiendish Legacy:** Choose one at Hero creation:
  - **Ash Tongue: Checks** to resist fire and smoke are rolled with **Advantage**.
  - **Cruel Insight: SPI Checks** made to resist **Frightened** and enemy effects that would force your movement, attacks, or target choices are rolled with **Advantage**.
  - **Hellstep [1 AP]: Shift 3"**.

Drakeblood

The drakeblood carry the remnant of an older majesty in the blood, as blessing, burden, or half-remembered debt. The world is fallen, but power still answers them in the old language of flame, storm, and scale.

Base Ability Scores: STR +1, DEX 0, INT 0, SPI +1
Base HP: 8
Sz: M
Speed: 5"
Luck: 1

Traits

- **Draconic Resistance:** Choose acid, fire, ice, lightning, or poison. This Hero is **Resistant** to that damage type.
- **Breath Weapon [2 AP]:** Once per round, make a **SPI Check** to project either a **Cone 6"** or **Line 6"** originating from your space, using the damage type chosen for **Draconic Resistance**. On a success, affected enemies suffer **1d6** damage of that type.

6.10 Backgrounds

Choose one background or roll **1d20** on the **Random Background Table**.

Random Background Table (d20)

d20	Background
1	Farmer
2	Nomad
3	Sailor
4	Soldier
5	Smuggler
6	Courier
7	Scout
8	Performer
9	Artisan
10	Scholar
11	Apprentice
12	Alchemist
13	Believer
14	Hermit
15	Cultist
16	Shepherd
17	Merchant
18	Noble
19	Pauper
20	Vagabond

Farmer

A farmer grows up with callused hands, stubborn habits, and the certain knowledge that work hurts and stops for no one. Hard ground built them a thicker frame than most wandering blades will ever earn.

Bonus: +1 STR
Starting Coins and Items: 1c, Sickle, Bandages
Special Rule: Gain **+3 Max HP**.

Nomad

A nomad crosses hard country under open skies, surviving where the roads fail and shelter is never promised. The land that grinds others down only taught them its lessons.

Bonus: +1 STR
Starting Coins and Items: 1c, Scimitar
Special Rule: Once per round, when terrain, weather, or a scenario hazard would cause this Hero to suffer damage or HP loss, reduce that damage or HP loss by **1**.

Sailor

A sailor learns balance on wet planks and danger under bad skies, shaped by rope, spray, and labour that does not wait on the weather. They keep their feet and keep moving while steadier folk go down.

Bonus: +1 STR
Starting Coins and Items: 1c, Rope, Short-sword, Buckler
Special Rule: Ignore additional movement costs and movement **Checks** caused by wind, rain, ice, shallow water, and **Slippery Terrain** caused by water, ice, or weather. Your **Checks** to resist forced movement caused by wind or water are rolled with **Advantage**.

Soldier

A soldier marched where they were told and fought when they were ordered, and learned that discipline keeps people alive longer than courage alone. War has settled into them now, and sits easy on the shoulders.

Bonus: +1 STR
Starting Coins and Items: 1c, Spear
Special Rule: Your first melee attack each round deals an additional **1 damage of that attack's primary damage type**.

Smuggler

A smuggler lives by false bottoms, whispered routes, and the craft of keeping valuable things out of dangerous hands. Stealth is not a flourish to them. It is the trade that buys supper.

Bonus: +1 DEX
Starting Coins and Items: 1c, Dagger, Lockpicks
Special Rule: While you are in **Cover**, your **Hide distance** is **0"**.

Courier

A courier carried news, coin, or secrets across broken roads and worse weather, for patrons who paid for speed and asked no questions. Speed was never a convenience. It was the difference between arriving and being found later.

Bonus: +1 DEX
Starting Coins and Items: 1c, Shortbow
Special Rule: Gain **+1" SPD**.

Scout

A scout lived ahead of the line, where a broken branch or a fresh print decided whether the column ate or buried. They read ground, distance, and silence better than most people read letters.

Bonus: +1 DEX
Starting Coins and Items: 1c, Shortbow
Special Rule: During each **Move**, ignore the first **1"** of additional movement cost imposed by **Difficult Terrain**.

Performer

A performer survived on wit, nerve, and the knack of making a crowd look where they wanted. Stage, tavern, or market square, they learned how attention is turned into a weapon.

Bonus: +1 DEX
Starting Coins and Items: 1c, 3 Throwing Knives
Special Rule: Once per round, after you damage one enemy within **6"**, reduce the final damage dealt to each target by that enemy's next attack this round by **1**, to a minimum of **0**.

Artisan

An artisan spent years making useful things with patient hands and a careful eye. The craft taught them the worth of good tools and good steel, and of work done properly the first time, because a second time is rarely offered.

Bonus: +1 INT
Starting Coins and Items: 1c, Hammer
Special Rule: One chosen mundane starting weapon, piece of Chest armour, or shield gains the **Masterwork** quality. The item cannot already have an Item Quality.

Scholar

A scholar lived among books, diagrams, and arguments, and the stubborn belief that knowledge matters even in a dying world. Where others see only rubble, they read the record of how it came to fall.

Bonus: +1 INT
Starting Coins and Items: 1c, Quarterstaff
Special Rule: Your **INT Checks** made to **Interact** with, decipher, or investigate nonmagical objects, inscriptions, clues, and hazards are rolled with **Advantage**.

Apprentice

An apprentice served beneath someone wiser, crueller, or more dangerous than themselves, and took what scraps of the craft they could. Even unfinished training leaves marks that never quite fade.

Bonus: +1 INT
Starting Coins and Items: 1c
Special Rule: If this Hero has a non-Martial class, increase their **Max NRG** by **2**. If this Hero has a Martial class, they gain no NRG and start with **3 random Tier 1 scrolls** instead. Choose **Arcane Spells** or **Divine Prayers** once, then roll each scroll independently from that tradition's Tier 1 scrolls. Duplicates are allowed.

Alchemist

An alchemist learned that fire, acid, tincture, and powder solve problems steel cannot reach. Their satchel never quite loses the smell of copper, ash, and the next mistake.

Bonus: +1 INT
Starting Coins and Items: 1c, 2 Acid (Phosphoric), 2 Healing Potions
Special Rule: The first time each adventure this Hero's party gains one or more potions as treasure while this Hero is in the **Active Party**, choose one of those potion types and gain one additional potion of that type.

Believer

A believer kept faith in a world that rewards it rarely, and learned that courage spreads as readily as panic. People stand straighter when they believe something is still watching from above.

Bonus: +1 SPI
Starting Coins and Items: 1c, 3 Holy Water, Lantern
Special Rule: You are **Immune** to **Frightened**. Allies within **6"** roll Checks to resist or remove **Frightened** with **Advantage**.

Hermit

A hermit withdrew from the world, or was left behind by it. Silence, hunger, and long solitude taught them to listen for older truths and to depend on no one.

Bonus: +1 SPI
Starting Coins and Items: 0c, Quarterstaff
Special Rule: While no ally is within **4"**, your non-Casting **SPI Checks** are rolled with **Advantage**.

Cultist

A cultist served a darker altar once, out of terror, conviction, or need. Whatever they walked away from, part of it still answers when blood is spilled.

Bonus: +1 SPI
Starting Coins and Items: 1c, Dagger, Torch
Special Rule: Dark Devotion: Once per round, when you or an ally within **6"** reduces an enemy to **0 HP**, restore up to **2 HP** to yourself.

Shepherd

A shepherd watched helpless things for long hours and learned how predators move, wait, and choose. The surest way to live is to be the least tempting thing in the field.

Bonus: +1 SPI
Starting Coins and Items: 1c, Sling, Quarterstaff, Bandages
Special Rule: When a **Monster** selects a **Primary Target** or chooses whom to attack, they ignore you if they have **LOS** to another non-**Monster** combatant within **8"** of you that is no farther from that **Monster** than you are. This rule does not apply to a **Monster** you damaged this round or that is **Engaged** with you.

Merchant

A merchant learned value, leverage, and the quiet power of knowing what desperate people will pay. Coin is never only money to them. It is movement, influence, and another season behind the walls.

Bonus: Increase maximum **Luck** by **1**.
Starting Coins and Items: 1c, Sickle
Special Rule: If the party's **Roster** includes at least **1 Merchant**, once during each Town Phase, either resolve one sale at **75%** of base value instead of **50%**, or buy one item for **90%** of its listed price, rounded up to the nearest **1c**. Multiple Merchants do not increase this benefit. This benefit does not stack with another purchase or sale modifier unless a Town action says otherwise.

Noble

A noble was raised among banners, debts, and inherited expectation. The fortune may be broken now, but privilege leaves marks the world is slow to forget.

Bonus: Increase maximum **Luck** by **1**.
Starting Coins and Items: 0c, Rapier
Special Rule: After the party wins a scenario, if at least **1 Noble** in the **Active Party** survived and was not **Knocked Out** when the scenario ended, add **1c × APL** to the **Treasury**. This benefit resolves only once per party after each scenario.

Pauper

A pauper came up from the bottom, where every crust and every coin had to be fought for. Want made them wiry, stubborn, and stubbornly hard to finish.

Bonus: Increase maximum **Luck** by **1**.
Starting Coins and Items: 0c, Club
Special Rule: Once per adventure, when damage or HP loss would reduce you to **0 HP**, roll **1d6**. On **4–6**, remain at **1 HP** instead.

Vagabond

A vagabond drifted from road to road with no roots deep enough to hold them anywhere. Luck, instinct, and shameless persistence carried them further than skill alone ever should have.

Bonus: Increase maximum **Luck** by **1**.
Starting Coins and Items: 1c, Bandages
Special Rule: Once per round, when you roll a natural **1** on a non-**Casting Check** that is not part of any **Reaction**, reroll it before resolving **Critical Failure**. You must use the new result.

6.11 Random Class Table

If class is determined randomly, choose **d4**, **d6**, **d8**, **d10**, or **d12**, then roll on the table below. Use a smaller die for a more conventional class pool or a larger die for a broader and more specialized pool.

Result	Class
1	Fighter
2	Rogue
3	Cleric
4	Wizard
5	Berserker
6	Ranger
7	Paladin
8	Druid
9	Psion
10	Sorcerer
11	Assassin
12	Trickster

6.12 General Talents

General Talents are universal advancement options available to any **Hero**. These talents are also used for the **Random Class Bonus** and by any other rule that grants a talent.

General Talent Rules and Archetype Restrictions

General Talents are grouped into **STR**, **DEX**, **INT**, and **SPI** lists. A Hero does not need a particular ability score to choose from a list.

Every **General Talent** selected through the **Universal Class Progression**, including the General Talent selected at Level 1, must comply with the Hero's **Class Archetype**:

- **Martial Classes** choose from the **STR** or **DEX** list.
- **Caster Classes** choose from the **SPI** or **INT** list.
- **Hybrid Classes** choose from any General Talent list.

A General Talent explicitly granted by a background, random-creation bonus, or another rule may ignore this restriction only when the granting rule says so.

A Hero cannot choose the same General Talent more than once unless that Talent says otherwise. A Hero without an NRG pool cannot choose a General Talent with an NRG cost. Whenever the Universal Class Progression offers a choice between a General Talent and an ability-score increase, choose one; mandatory ability-score increases cannot be exchanged. Retraining must comply with the Hero's current archetype restriction.

STR General Talents

- **Bulwark:** While you are equipped with metal Chest armour as defined in **7.2**, increase your **Max HP** by **4**.
- **Crusher:** After applying **Advantage** and **Disadvantage** to a melee weapon attack that deals **blunt** damage, but before determining **Total Miss** or **Critical Hit**, you may add **+1** to one retained base damage die. If this brings that die to its maximum value, the attack is a **Critical Hit** and resolves exploding bonus dice as normal.
- **Firm Stance [1 AP Reaction]: Trigger:** A rule other than the universal **Push** or **Trip** action would make you **Prone** or move you with forced movement. **Effect:** Ignore that forced movement or application of **Prone**.
- **Vicious:** Add **+2** damage to your melee weapon attacks against **Prone** or **Stunned** targets. When a target you successfully **Push** suffers a **Collision**, they lose **1 HP**.
- **Shield Master:** While you are equipped with a shield, your **Block** gains **+1 AV**.
- **Counter Attack [1 AP Reaction]:** Once per round. **Trigger:** An enemy within your melee distance declares a melee weapon attack against you. **Effect:** After the triggering attack resolves, if it damaged you, make one melee weapon attack against that enemy. The target cannot use **Block** against this attack; other legal Reactions resolve normally. This attack does not count toward the multi-attack **Disadvantage** chain.
- **Heavy Strike [2 AP]:** Make one melee weapon attack with a two-handed weapon that uses **STR**. That attack rolls one additional base damage die.
- **Headlong Rush:** Once during each activation, when you make a melee weapon attack after using **Move** to move at least **4"** in a straight line toward that attack's target during the same activation, that attack rolls one additional base damage die.
- **Topple [1 AP]:** During your activation, take this action immediately after a melee weapon attack that uses **STR** and a two-handed weapon finishes resolving and damages an enemy. That enemy becomes **Prone**.
- **Weapon Specialist:** When you select **Weapon Specialist**, choose one category: melee weapon attacks that deal **slashing** damage; melee weapon attacks that deal **blunt** damage; melee weapon attacks that deal **piercing** damage; attacks with weapons that have **Thrown**; or attacks with weapons that have **Ranged**. The first qualifying weapon attack you make during each of your activations deals **+2 damage** of its primary damage type.

DEX General Talents

- **Acrobatic:** You are **Immune** to becoming **Immobilized**. Your **Climb** costs **1"** of movement per **1"** climbed instead of **2"**. Standing from **Prone** costs **0 AP**.
- **Fleet:** Increase your **Speed** by **2"**.
- **Keen Shot:** After applying **Advantage** and **Disadvantage** to a ranged weapon attack that deals **piercing** damage, but before determining **Total Miss** or **Critical Hit**, you may add **+1** to one retained base damage die. If this brings that die to its maximum value, the attack is a **Critical Hit** and resolves exploding bonus dice as normal.
- **Finesse Strike:** After applying **Advantage** and **Disadvantage** to a melee weapon attack with a **Finesse** weapon, but before determining **Total Miss** or **Critical Hit**, you may add **+1** to one retained base damage die. If this brings that die to its maximum value, the attack is a **Critical Hit** and resolves exploding bonus dice as normal.
- **Skirmisher [1 AP Reaction]: Trigger:** Your weapon attack triggers a **Critical Hit**. **Effect:** After the triggering attack resolves, **Shift 2"**.
- **Tumble [0 AP]:** Once during each activation, **Shift 2"**. During this **Shift**, you may move through enemy spaces, but you cannot end this movement in an enemy space. This **Shift** does not trigger **Reflex Attack** from enemies whose spaces you move through.
- **Camouflage:** While you are in **Cover Terrain** or **Difficult Terrain**, your **Hide distance** is **0"**. Once during your activation, after you **Move** through **Cover Terrain** or **Difficult Terrain**, you may **Shift 1"**.
- **Marksman:** Your ranged weapon attacks do not roll their base damage dice with **Disadvantage** from **Cover** if the target is within **12"** of you.
- **Dodge Roll:** When you succeed on **Dodge**, you may **Shift 2"** after the triggering effect resolves. If the triggering effect was a melee weapon attack, instead **Shift 3"**.
- **Surprise Attack:** During each of your activations, add **+2** damage when you attack an enemy that did not have **LOS** to you at the start of that activation.

INT General Talents

- **Observant:** Your **Spot Checks** are rolled with **Advantage**. Once during each of your activations, choose one **Hidden** or **Invisible** enemy within **4"**. You know that enemy's current space, but this does not remove their state or independently make them a legal target.
- **Field Scholar:** Your **INT Checks** involving scenario objectives, **Monsters**, and hazards are rolled with **Advantage**.
- **Tutelage:** Once per round, when one **Hireling** you control within **6"** makes a weapon attack, that Hireling rolls one additional base damage die.
- **Tactician:** While you are on the battlefield, your party gains **+1** on Initiative rolls. Multiple instances of **Tactician** do not stack.
- **Knowledge:** Add **+2** to your **Casting Checks** for **Tier 0** and **Tier 1** Powers.
- **Savvy:** Once per round, when you fail a **Check** during **Interact** with a non-scoring trap, lock, hazard, or object, ignore the consequences of that failure unless the die was a natural **1**. **Savvy** cannot affect objectives, Treasure Chests, extraction, or scenario scoring unless a rule explicitly allows it.
- **Explorer:** Allies within **6"** of you gain **+2** on **Interact Checks**.
- **Combat Assessment:** Once per round, when an ally within **6"** of you and within your **LOS** declares a weapon attack, add **1 damage of that attack's primary damage type** to that attack before mitigation.
- **Sharp Mind [0 AP, 1 NRG]:** Once during your activation, the next Power you cast during this activation costs **1 less AP**, minimum **1 AP**.
- **Channel Energy [2 AP]:** Once per round, restore **2 NRG**, up to your **Max NRG**.

SPI General Talents

- **Conviction [1 AP Reaction]: Trigger:** After applying **Advantage** and **Disadvantage**, one retained base damage die for your attack shows **1**, before determining **Total Miss** or **Critical Hit**. **Effect:** Reroll that die. You must use the new result.
- **Courageous:** You are **Immune** to **Frightened**. Once per round, when one ally starts their activation within **6"** of you, that ally gains **+1" Speed** during that activation.
- **Guiding Presence:** Allies within **6"** of you gain **+1** on **SPI Checks**.
- **Inner Light:** You count as a **Light Source** with **Aura 3"**, and increase your **Max HP** by **3**.
- **Indomitable Spirit:** Once per round, when you fail a **SPI Check**, you may reroll it. You must use the new result. If the rerolled **Check** succeeds and you are **Frightened**, remove **Frightened**.
- **Resist Power [1 AP Reaction, 3 NRG]: Trigger:** A Power is declared that would affect you or 1 ally within **6"** and could impose a condition or forced movement. **Effect:** Choose that combatant. They ignore conditions and forced movement caused by the triggering Power. Its damage and other effects resolve normally.
- **Stoicism:** Your **Checks** to resist or remove **Frightened** are rolled with **Advantage**. The first time each round you would suffer **psychic** damage, reduce that damage by **2**.
- **Intercessor [1 AP Reaction]: Trigger:** An ally within **2"** is chosen as the target of an attack or effect from a source you can see, you are not already a target of that source, and you are otherwise a legal target. **Effect:** You become the target instead. Reduce the triggering source's damage against you by **2**. **Intercessor** cannot redirect an Area of Effect.
- **Inspiration [2 AP]:** Choose one ally within **6"** of you. That ally may immediately **Shift 2"** and make one melee weapon attack for **0 AP**. This attack does not count toward that ally's multi-attack **Disadvantage** chain.
- **Beast Keeper:** Your **Hirelings** and **Animal Companions** gain **+1 AV** while within **6"** of you.

Recommended First Party: For your first full-rules party, build a **Human Fighter (Soldier)**, an **Elf Ranger (Scout)**, a **Dwarf Cleric (Soldier)**, and a **Halfling Rogue (Smuggler)**, each using **Starting Package A**. This party provides front-line pressure and protection, ranged offence and control, healing and support, and mobility and objective utility. This is a recommendation, not a requirement.

6.13 Hero Classes

Each class defines a distinct battlefield role, resource model, and talent ecosystem. Class talents are mechanically explicit and use the standard timing, action, and reaction rules of **Heraldry Skirmish**.

Class	Archetype	Complexity	Role
Fighter	Martial	1/5	Weapon damage and protection
Berserker	Martial	2/5	Volatile weapon damage
Rogue	Martial	2/5	Stealth, mobility, and utility
Assassin	Martial	3/5	Weapon damage and stealth
Ranger	Hybrid	3/5	Ranged weapon damage and control
Cleric	Caster	3/5	Healing, support, and protection
Paladin	Hybrid	4/5	Melee weapon damage and support
Wizard	Caster	4/5	Power damage and utility
Psion	Caster	4/5	Power damage and control
Trickster	Hybrid	5/5	Power utility and weapon damage
Sorcerer	Caster	5/5	Volatile power damage
Druid	Caster	5/5	Power utility and support

Class Archetypes

Every class has one of three **Archetypes**: **Martial**, **Hybrid**, or **Caster**. The archetype determines three things:

- which **Automatic Special Abilities** the Hero gains at Levels 4 and 7.
- which **General Talent** lists the Hero may use through the **Universal Class Progression** (see **6.12**).
- whether the Hero's **Primary Casting Score** applies to a tradition.

Universal Class Progression

Every Hero class uses the following universal progression structure from Level 1 to Level 10:

- **Level 1:** Choose 1 **General Talent** and 1 **Novice Class Talent**.
- **Level 2:** Gain **+1** to two different ability scores.
- **Level 3:** Choose 1 **Novice Class Talent**.
- **Level 4:** Gain your **Automatic Archetype Ability 1**, and choose 1 **General Talent** or gain **+1** to one ability score.
- **Level 5:** Choose 1 **Adept Class Talent**.
- **Level 6:** Choose 1 **General Talent** or gain **+1** to one ability score.
- **Level 7:** Gain your **Automatic Archetype Ability 2**, and choose 1 **Adept Class Talent**.
- **Level 8:** Choose 1 **General Talent** or gain **+1** to one ability score.
- **Level 9:** Choose 1 **Master Class Talent**.
- **Level 10:** Gain **+1** to two different ability scores.

General Talent choices follow **6.12**. Class Talent choices at Levels 1, 3, 5, 7, and 9 are drawn from the class's own **Novice**, **Adept**, and **Master** talent pools. A Hero cannot choose the same Class Talent twice. **Novice** talents are available at Level 1 or higher, **Adept** talents at Level 5 or higher, and **Master** talents at Level 9 or higher.

Resource Restrictions

- **Martial classes** do not gain class Powers or a class casting tradition. They always have **Max NRG 0**, cannot gain **Max NRG**, and cannot select talents that list an **NRG** cost. A Martial Hero may still use a scroll or cast a Power when a specific rule explicitly allows it. If a rule would grant **Max NRG** to a Martial Hero, ignore that increase unless the rule explicitly grants a replacement benefit. The martial classes are **Fighter**, **Rogue**, **Berserker**, and **Assassin**.
- Only **Sorcerer** talents may list an **HP** cost.

Automatic Special Abilities

Every class gains two **Automatic Special Abilities** determined by its **Archetype**, one at Level 4 and one at Level 7. These are gained in full at the listed levels regardless of other choices made at those levels.

When a Hero equips one or more weapons, choose one equipped weapon as their **Primary Weapon**. A two-handed weapon, or the only weapon equipped, is automatically the Primary Weapon. If the Hero equips two one-handed weapons, the other is their **Off-Hand Weapon**. The Hero may change this choice only when they change equipped weapons. Attacks made with an **Off-Hand Weapon** always roll exactly **1** base damage die; **Martial Supremacy** and other general additional-die rules do not override this unless a rule explicitly says it applies to **Off-Hand Weapon** attacks.

- **Martial Classes (Fighter, Rogue, Berserker, Assassin):** Automatically gain **Martial Supremacy** at Level 4 and **Sunder** at Level 7.
- **Hybrid Classes (Ranger, Paladin, Trickster):** Automatically gain **Martial Supremacy** at Level 4 and **+1 Primary Casting Score** at Level 7.
- **Caster Classes (Cleric, Wizard, Druid, Psion, Sorcerer):** Automatically gain **Caster Supremacy** at Level 4 and **+4 Max NRG** at Level 7.

The automatic abilities resolve as follows:

- **Martial Supremacy (Martial):** Weapon attacks roll one additional base damage die.
- **Martial Supremacy (Hybrid):** Weapon attacks made with your **Primary Weapon** roll one additional base damage die.
- **Sunder:** Weapon attacks ignore the first **4 AV** of their target. This applies to the target's total **AV**, whether that **AV** is flat or generated by **AD**.
- **Caster Supremacy:** When you cast a damaging **Tier 0** Power, roll one additional base damage die of that Power's normal base damage die type.
- **+1 Primary Casting Score (Hybrid, Level 7):** Gain **+1** to your **Primary Casting Score**. This increase is permanent and stacks with other ability score increases.
- **+4 Max NRG (Caster, Level 7):** Gain **+4** to your **Max NRG**. This increase is permanent and stacks with other Max NRG increases.

Additional rules governing these abilities:

- When multiple base damage dice are rolled, use the rules in **5.2** and **5.3** for **Critical Hits**, exploding dice, and **Total Misses**.
- **Automatic Special Abilities** cannot be retrained, exchanged, or swapped out by any Town Phase action, scenario reward, or class feature unless a rule explicitly says they can.

Fighter [1/5 Complexity]

A Fighter is forged in places where hesitation gets people killed. Drill, repetition, and hard lessons carve in the instinct to hold ground when holding it is the only thing that matters. They have watched lines collapse, and they know to the heartbeat how long one can stand before it does.

Archetype: Martial
Class Modifiers: STR +2, DEX +1, INT 0, SPI -1
Starting HP Bonus: +5
Max HP Gained per Level: +3
Primary Casting Score: None
NRG Pool: None

Starting Packages

- **A. Vanguard (Defensive):** Shortsword, Targe, Ring Shirt, Dagger.
- **B. Ravager (Offensive):** Great Falchion, Ring Shirt, Javelin, Bandages.
- **C. Duelist (Flexible):** Main-Gauche, Leather Coat, Healer's Kit, Bandages, Rope, 4c.

Novice Fighter Talents

- **Combat Mastery:** Your second weapon attack during your activation does not suffer **Disadvantage** from the **Multiple Attacks** rule. Later attacks resolve normally.
- **Shield Drill:** While you are equipped with a shield, you gain **+1 AV** against melee weapon attacks.
- **No Escape [1 AP Reaction]: Trigger:** An enemy within your melee distance declares **Shift** and would leave that distance during their activation. **Effect:** Before the enemy moves, make one melee weapon attack against them. That attack rolls its base damage dice with **Disadvantage**, does not add STR or DEX to damage, and does not count toward the multi-attack **Disadvantage** chain. If the enemy can still act after the attack resolves, complete the triggering **Shift**.
- **Duelist's Riposte:** When you declare **Parry**, you may spend **1 additional AP**. If the **Parry** succeeds, make one melee weapon attack against the attacker after resolving any normal **Riposte**. This attack does not count toward the multi-attack **Disadvantage** chain.

Adept Fighter Talents

- **Guard Break:** Reduce the **AV** an enemy applies against your melee weapon attack by **1**. When an enemy uses **Parry** against your melee weapon attack, reduce their parry total by **1**.
- **Relentless:** When you succeed on **Push** or **Trip**, you may make one melee weapon attack against the same target for **0 AP**. The bonus attack counts toward the multi-attack **Disadvantage** chain.
- **Iron Discipline [1 AP Reaction]: Trigger:** You fail a **STR**, **DEX**, or **SPI Check** that was not made as part of another Reaction. **Effect:** Reroll that **Check**. You must use the new result.
- **Spiked Armour:** While equipped with Chest armour, after an adjacent enemy's attack resolves, that enemy loses **1 HP** if the attack damaged you, or if you successfully used **Parry** against it.

Master Fighter Talents

- **War Master:** Your melee weapon attacks do not suffer **Disadvantage** from the **Multiple Attacks** rule.
- **Commanding Presence [2 AP]:** During your activation, take this action immediately after you damage an enemy with a melee weapon attack. Choose one ally within **6"** of you. That ally may **Shift 2"** and make one melee weapon attack for **0 AP**. That attack does not count toward the ally's multi-attack **Disadvantage** chain.
- **Killing Pursuit [2 AP Reaction]: Trigger:** An enemy within your melee distance leaves that distance during their activation. **Effect: Shift** up to **2"** toward that enemy. If they are within your melee distance after this **Shift**, make one melee weapon attack against them. After applying **Advantage** and **Disadvantage**, treat one retained base damage die as having rolled its maximum value, triggering a **Critical Hit** and exploding bonus dice as normal.

Berserker [2/5 Complexity]

A Berserker learned early that restraint is no shield. Pain becomes familiar, then distant, until nothing is left in the noise but the fight itself. When the violence starts, they meet it with nothing held back.

Archetype: Martial
Class Modifiers: STR +1, DEX +1, INT -1, SPI 0
Starting HP Bonus: +6
Max HP Gained per Level: +2
Primary Casting Score: None
NRG Pool: None

Starting Packages

- **A. Raging Brute (Offensive):** Morningstar, Hide Cuirass, Handaxe.
- **B. Pit Fighter (Flexible):** Club, Targe, Leather Coat, 2 Bandages, 3c.
- **C. Twin Fury (Mobile):** 3 Handaxes, Leather Coat, Targe, Bandages, 1c.

Novice Berserker Talents

- **Hewing Strike [1 AP]:** During your activation, take this action immediately after your melee weapon attack reduces an enemy to **0 HP**. **Shift 1"** and make one additional melee weapon attack with the same weapon against another enemy within your melee distance. The bonus attack counts toward the multi-attack **Disadvantage** chain.
- **Blood Frenzy:** Your melee weapon attacks deal **+2 damage** against an enemy that is at half their **Max HP** or less when you declare the attack.
- **Reckless Charge:** When you make a melee weapon attack after using **Move** to move at least **3"** in a straight line toward your target during the same activation, that attack deals an additional **2 damage of that attack's primary damage type**.
- **Rage:** Your melee weapon attacks deal **+2 damage** while you are below half your **Max HP**.

Adept Berserker Talents

- **Deathless Rage:** Once per round. When you would be reduced to **0 HP** by damage during your activation, you are reduced to **1 HP** instead and become **Stunned** until the end of the round. **Deathless Rage** cannot prevent HP loss.
- **Bonebreaker:** When you score a **Critical Hit** with a **blunt** weapon attack, that attack deals an additional **4 blunt damage**.
- **Smash [2 AP]:** Move up to **6"** in a straight line toward 1 enemy. This movement may trigger **Reflex Attack** normally. If you end within your melee distance of that enemy, make one melee weapon attack against them. If the attack damages them, **Push** them **1"** directly away.
- **Whirlwind [2 AP]: Shift 1"**, then make one melee weapon attack against each of up to **2** different enemies within **2"**. Resolve each attack separately for the **Multiple Attacks** rule. A **Whirlwind** attack cannot use **Sweep**.

Master Berserker Talents

- **Pain Fuelled:** While your current HP is below half your **Max HP**, rounded down, the first melee weapon attack you make during each activation rolls one additional base damage die.
- **Last Stand:** While your current HP is below half your **Max HP**, rounded down, you gain **+2 AV** and enemy weapon attacks against you roll their base damage dice with **Disadvantage**.
- **Red Mist:** When you reduce an enemy to **0 HP** with a slashing melee weapon attack, the target of your next melee weapon attack during this activation applies no **AV** against that attack. **Dodge** and **Parry** apply normally.

Rogue [2/5 Complexity]

A Rogue is bred in scarcity, where chances come rarely and are never handed over. Locks, shadows, and blind corners become tools long before anyone calls them a trade. A Rogue learns to take what is needed and be elsewhere before the loss is noticed.

Archetype: Martial
Class Modifiers: STR 0, DEX +2, INT +1, SPI 0
Starting HP Bonus: +3
Max HP Gained per Level: +2
Primary Casting Score: None
NRG Pool: None

Starting Packages

- **A. Shadow Striker (Offensive):** Rapier, 2 Daggers, Leather Coat, Lockpicks, Smokestick.
- **B. Skirmishing Scout (Flexible):** Shortbow, Dagger, Leather Coat, Lockpicks, Caltrops (Bag), Bandages, Rope.
- **C. Infiltrator (Utility):** Dagger, Leather Coat, Lockpicks, Crowbar, Rope, Smokestick, Caltrops (Bag), 6c.

Novice Rogue Talents

- **Backstab:** The first melee weapon attack during each of your activations against an enemy that is **Prone**, **Weakened**, **Engaged** by one of your allies, or without **LOS** to you deals additional damage equal to your **DEX**, using that attack's primary damage type, before mitigation.
- **Quick Step:** When you take the universal **Shift** action, you may **Shift 4"** instead of **1"**. After you **Hide**, you may immediately **Shift 4"**.
- **Evasion:** When you declare **Dodge**, you may spend **1 additional AP**. If the **Dodge** Check fails, reroll it. You must use the new result.
- **Pickpocket [1 AP]:** Once per round. Choose one visible enemy within **3"** and your **LOS**, then make a **DEX Check**, with **Advantage** if you are **Hidden**. On a success, steal one consumable item from that enemy, or **2c × APL** in unbanked coins carried by that enemy's side. **Pickpocket** cannot steal from a side's **Treasury** and cannot steal more coins than that side carries. You may then **Shift 2"**. **Pickpocket** does not break **Hidden**.

Adept Rogue Talents

- **Throw Sand [1 AP]:** Once per round. Choose one visible combatant within **2"** and your **LOS**. Make a **DEX Check**. On a success, that combatant becomes **Blinded**.
- **Fade from Sight:** Once during each activation, after you **Move**, **Shift**, or **Interact**, you may take the **Hide** action without spending AP.
- **Opportunist [1 AP Reaction]:** Once per round. **Trigger:** An adjacent enemy becomes **Blinded**, **Burning**, **Frightened**, **Immobilized**, **Poisoned**, **Prone**, **Slowed**, or **Stunned**. **Effect:** Make one melee weapon attack against that enemy with **Advantage** on its base damage dice.
- **Scatter Caltrops [1 AP]:** Place a caltrop marker in your space or in an adjacent space. The first enemy combatant to enter or be moved into a space within **2"** of the marker suffers **1d6 piercing damage** and becomes **Slowed**. The marker is then removed. You may have only one active caltrop marker at a time.

Master Rogue Talents

- **Ghost:** While you are within **2"** of any terrain feature that is not **Open Terrain**, you are treated as having **Cover** from every enemy for the purpose of becoming and remaining **Hidden**. **Ghost** does not grant **Cover** for any other purpose, and does not prevent you from losing **Hidden** when an enemy is within your **Hide distance** and has **LOS** to you.
- **Impossible Fortune:** Increase your maximum **Luck** by 3.
- **Leap from Shadows [1 AP]:** Once per round. Take this action only while you are **Hidden**. **Shift 8"** and make one weapon attack. **Hidden** is not broken by this Shift; the attack breaks **Hidden** as normal. After applying **Advantage** and **Disadvantage**, treat one retained base damage die as having rolled its maximum value, triggering a **Critical Hit** and exploding bonus dice as normal.

Assassin [3/5 Complexity]

An Assassin is built on patience and certainty. They watch, wait, and act only when the outcome is assured. Most fights are avoided. The rest are ended quickly.

Archetype: Martial
Class Modifiers: STR -1, DEX +1, INT +1, SPI 0
Starting HP Bonus: +3
Max HP Gained per Level: +2
Primary Casting Score: None
NRG Pool: None

Starting Packages

- **A. Silent Marksman (Ranged):** Shortbow, Dagger, Leather Coat, Basic Venom, Smokestick.
- **B. Shadow Blade (Offensive):** Rapier, Dagger, Leather Coat, Basic Venom, Smokestick, Caltrops (Bag), Bandages.
- **C. Infiltrator (Utility):** Dagger, Gambeson, Basic Venom, Lockpicks, Grappling Hook, Smokestick, Bandages, 5c.

Novice Assassin Talents

- **Marked for Death [0 AP]:** Once during each activation, choose one visible enemy within **12"**. The first weapon attack you make against that enemy during each of your activations deals **+3 damage**. The mark ends when you choose a new target, the target leaves play, or you are reduced to **0 HP**.
- **Poison Hand:** Poisons you apply deal **+3 poison damage**.
- **Vanish [0 AP]:** Once during each activation, take this action only while you meet the conditions to become **Hidden** in **4.3.2**. You become **Hidden**.
- **Heartseeker:** Weapon attacks you make while **Hidden** deal **+2 damage**. If the target is also your **Marked for Death** target, after applying **Advantage** and **Disadvantage**, treat one retained base damage die as having rolled its maximum value, triggering a **Critical Hit** and exploding bonus dice as normal.

Adept Assassin Talents

- **Silent Killer:** When you reduce an enemy to **0 HP** with an attack while you are **Hidden**, make a **DEX Check**. On a success, you do not lose **Hidden** from resolving that attack.
- **Coup de Grace:** Your weapon attacks deal **+6 damage** against an enemy that is below **25%** of their **Max HP** when you declare the attack.
- **Shadow Jump [0 AP]:** Once during each activation, take this action only while you are **Hidden**. Teleport up to **8"** to a legal unoccupied space in **Cover Terrain** that you can see. You remain **Hidden**.
- **Cloak Killer:** While you are **Hidden**, you may move up to **3"** immediately before your first weapon attack during that activation. This voluntary movement may trigger **Reflex Attack** normally and does not cause **Hidden** to end before that attack resolves.

Master Assassin Talents

- **Death Mark:** Requires **Marked for Death**. The first weapon attack during each of your activations against your **Marked for Death** target while you are **Hidden** deals an additional **4 damage of that attack's primary damage type** and ignores **AV**.
- **Perfect Ambush:** While you are **Hidden**, your first weapon attack this activation deals an additional **4 damage of that attack's primary damage type** and ignores **Cover**.
- **Black Formula:** When you roll poison damage dice from a poison you applied or from a **Poisoned [dX]** condition you caused, each such die that shows its maximum value explodes: roll one additional die of the same type and add it to the total. If a die produced by that explosion also shows its maximum value, it explodes again. If a poison damage die from that source shows a **1**, you may reroll that die once and must use the new result; a rerolled die that shows its maximum value explodes normally. A die produced by an explosion cannot be rerolled by **Black Formula**. **Black Formula** does not make the attack a **Critical Hit**.

Ranger [3/5 Complexity]

A Ranger is schooled by ground that kills the careless. Tracks, wind, and distance tell them what others miss entirely. They learn to act before danger closes the gap, and to strike from where the enemy cannot answer.

Archetype: Hybrid
Class Modifiers: STR 0, DEX +1, INT 0, SPI +1
Starting HP Bonus: +5
Max HP Gained per Level: +2
Primary Casting Score: SPI
Tier 0 Ranger Minor Rituals: You know the three **Tier 0 Ranger Minor Rituals** listed in **8.6**. These Powers do not count against your known Tier 1–2 **Druidic Rituals**.
Starting Druidic Rituals: Know **2 Tier 1 Druidic Rituals**. Gain access to Tier 2 at Level 7. Learn one additional **Druidic Ritual** at Levels 3, 5, 7, and 9.

Starting Packages

- **A. Master Archer (Ranged):** Shortbow, Elven Dagger, Leather Coat.
- **B. Wilderness Trapper (Utility):** Club, Leather Coat, 2 Snares, Rope, 6c.
- **C. Pathfinder (Defensive):** Elven Spear, Hide Cuirass, 2 Snares.

Novice Ranger Talents

- **Hunter's Mark [0 AP, 1 NRG]:** Choose one visible enemy within **12"**. The first attack or damaging Power you resolve against that target during each of your activations deals **2 additional damage of its primary damage type before mitigation**. The mark lasts until you choose a new target or the target leaves play.
- **Fieldcraft:** While in terrain tagged **Natural**, your **Interact** and terrain-related **DEX** and **INT Checks** are rolled with **Advantage**, and while in that terrain your **Hide distance** is **0"**.
- **Ambush Archer:** Add **+2 damage** to your ranged weapon attacks against enemies that have not yet activated this round.
- **Monster Hunter:** Neutral **Beasts** ignore you unless you target or damage them. Your **Interact Checks** involving **Beast** or **Monster** tracks, lairs, or signs are rolled with **Advantage**. The first attack or damaging Power you resolve against a **Beast** or **Monster** during each of your activations deals **2 additional damage of its primary damage type before mitigation**.

Adept Ranger Talents

- **Skirmish Shot:** When you damage an enemy with a ranged weapon attack, you may **Shift 2"**.
- **Trailblazer:** You ignore additional movement costs from natural **Difficult Terrain**, weather-created **Difficult Terrain**, and **Slippery Terrain** caused by terrain or weather. Adjacent allies ignore the first **1"** of additional movement costs from those sources during each of their activations. **Trailblazer** does not ignore constructed barriers, magical terrain, objective-specific movement costs, or scenario rules unless that rule says otherwise.
- **Ambusher:** During the first round of an adventure, your **SPD** increases by **2"** and your ranged weapon attacks' range increases by **6"**.
- **Hazard Setter [1 AP]:** Place a snare marker in your space or in an adjacent space. The first enemy combatant to enter or be moved into a space within **1"** of the marker suffers **1d10 + SPI piercing damage** and becomes **Immobilized**. The marker is then removed. You may have only one active snare marker at a time.

Master Ranger Talents

- **Twin Hunt [1 AP]:** Requires **Hunter's Mark**. Once per round during your activation, take this action immediately after you damage your **Hunter's Mark** target with a ranged weapon attack. Make one additional ranged weapon attack against that target. This bonus attack ignores and does not count toward the multi-attack **Disadvantage** chain.
- **Stalker:** While you are **Hidden**, your first weapon attack this activation deals an additional **1d8 damage of that attack's primary damage type**.
- **Predator's Patience:** Once during each activation, if you did not voluntarily **Move**, **Shift**, or teleport before making your first ranged weapon attack this activation, that attack deals an additional **1d8 damage of that attack's primary damage type**.

Cleric [3/5 Complexity]

A Cleric keeps the faith long after letting it go would be easier. They have knelt in the silence where an answer should be and spoken the words anyway. Now and then something answers, and that is reason enough to kneel again.

Archetype: Caster
Class Modifiers: STR 0, DEX -1, INT -1, SPI +3
Starting HP Bonus: +3
Max HP Gained per Level: +2
Primary Casting Score: SPI
Tier 0 Orisons: You know the three Cleric **Tier 0 Orisons** listed in **8.4**. These Powers do not count against your known Tier 1–3 **Divine Prayers**.
Starting Divine Prayers: Know **3 Tier 1 Divine Prayers**. Gain access to Tier 2 at Level 5 and Tier 3 at Level 9. Learn one additional **Divine Prayer** at Levels 3, 5, 7, and 9.

Starting Packages

- **A. Devout Healer (Support):** Mace, Targe, Ring Shirt, 2 Bandages.
- **B. Wrathful Priest (Offensive):** Morningstar, Mail Shirt, Holy Water.
- **C. Sacred Support (Flexible):** Quarterstaff, Targe, Gambeson, Holy Water, 2c.

Novice Cleric Talents

- **Healing Hands:** Whenever you restore HP to one or more allies with a Power or item, each affected ally regains **+2** additional HP.
- **Wrath of Faith:** When a Power or weapon attack you control deals **holy** damage, that effect deals an additional **2 holy damage**.
- **Protective Prayer:** Allies within **6"** gain **+1 AV** and **+1** on Checks made to resist Powers.
- **Turn Undead [1 AP, 1 NRG]:** Choose one **Undead** or **Fiend** within **8"** of you and within your **LOS**. The target must pass a **SPI Check**. On a failure, move the target up to their **Speed** directly away from you as forced movement, then the target becomes **Stunned**.

Adept Cleric Talents

- **Battle Theurge:** You may add **SPI** instead of **STR** or **DEX** when calculating damage for melee weapon attacks made with blunt weapons. Once per round, one of those attacks may deal **holy** damage instead of **blunt** damage.
- **Cleansing Light [1 AP, 1 NRG]:** Remove one negative condition from one ally within **6"** of you.
- **Blessed Weapon:** Your weapon attacks may deal **holy** damage instead of their normal damage type. Against **Undead** or **Fiend** enemies, they deal **+2 holy damage**.
- **Radiant Rebuke [1 AP Reaction, 1 NRG]: Trigger:** An enemy within **6"** of you damages one of your allies. **Effect:** That enemy suffers **1d8 + SPI holy damage**.

Master Cleric Talents

- **Miracle Worker:** Once during each activation, when you cast a **Divine Prayer** that restores HP or removes a condition, that Prayer costs **1 less AP**, to a minimum of **1 AP**.
- **Final Benediction [1 AP Reaction, 5 NRG]: Trigger:** A source is declared that would deal damage or HP loss to an adjacent ally, before the affected ally declares a Reaction. If the source has no declaration step, this Reaction instead triggers immediately before that damage or HP loss resolves. **Effect:** Choose that ally. They cannot take another Reaction against the triggering source. The first time the triggering source's damage or HP loss would reduce the ally to **0 HP**, it reduces them to **1 HP** instead. All other effects from the source resolve normally. After the source finishes resolving, you become **Stunned**.
- **Sacred Champion:** Once during each activation, after rolling damage for a melee weapon attack that is not a **Total Miss** but before mitigation, you may add **1d6 holy damage** to that attack, or **1d10 holy damage** if the target is an **Undead** or **Fiend**.

Paladin [4/5 Complexity]

A Paladin is bound to a promise that does not bend, in an age that breaks promises for sport. Oaths weigh more than steel, and keeping one costs more than strength. Most let theirs go. A Paladin does not.

Archetype: Hybrid
Class Modifiers: STR +1, DEX -1, INT 0, SPI +1
Starting HP Bonus: +6
Max HP Gained per Level: +3
Primary Casting Score: SPI
Tier 0 Orisons: You know the three Paladin **Tier 0 Orisons** listed in **8.4**. These Powers do not count against your known Tier 1–2 **Divine Prayers**.
Starting Divine Prayers: Know **2 Tier 1 Divine Prayers**. Gain access to Tier 2 at Level 7. Learn one additional **Divine Prayer** at Levels 3, 5, 7, and 9.

Starting Packages

- **A. Knight Protector (Defensive):** Mace, Targe, Ring Shirt.
- **B. Sacred Avenger (Offensive):** Longsword, Ring Shirt, Healer's Kit.
- **C. Pilgrim Guardian (Flexible):** Quarterstaff, Targe, Gambeson, Holy Water, Bandages, 3c.

Novice Paladin Talents

- **Lay on Hands [1 AP, 1 NRG]:** Restore **1d4 + SPI** HP to an adjacent ally or to yourself.
- **Oath of Protection [1 AP Reaction, 1 NRG]: Trigger:** A visible source is declared that would deal damage to 1 ally within **6"**. **Effect:** Reduce the triggering source's damage against that ally by **1d4 + SPI**.
- **Divine Challenge [1 AP, 2 NRG]:** Once per round. Move up to your **Speed** toward one visible enemy. This voluntary movement may trigger **Reflex Attack** normally. If you end adjacent to that enemy, neither combatant may use voluntary movement, teleportation, or another voluntary movement effect to move farther from the other until the end of the round.
- **Sanctified Weapon:** Your first melee weapon attack during each of your activations deals **+3 holy damage**.

Adept Paladin Talents

- **Aura of Courage:** You and allies within **4"** are **Immune** to **Frightened** and gain **+1" Speed**.
- **Holy Retribution [1 AP Reaction, 1 NRG]: Trigger:** An adjacent enemy declares an attack or harmful effect that would affect you. **Effect:** After the triggering action or effect resolves, if it damaged you, that enemy suffers **1d4 + SPI holy damage**.
- **Shield of Faith [1 AP Reaction, 2 NRG]:** Once per round. **Trigger:** You or 1 adjacent ally is chosen as a target of an attack. **Effect:** Reduce the triggering attack's damage against that target by **1d8 + SPI**, to a minimum of **0**.
- **Zealous Smite:** Once during each activation, after rolling damage for a melee weapon attack that is not a **Total Miss** but before mitigation, you may add **1d4 holy damage** to that attack.

Master Paladin Talents

- **Crusader's Charge:** Once during each activation, when you make a melee weapon attack after using **Move** to move at least **3"** in a straight line toward your target during the same activation, that attack deals an additional **1d6 holy damage** and the target is **Pushed 2"** directly away when this attack damages the target.
- **Beacon of the Just:** Once per round. At the end of your activation, if you dealt **holy** damage or restored HP during that activation, you may choose one ally within **6"** of you that has half their **Max HP** or less. That ally regains **1d8 + SPI HP**.
- **Avenging Step [1 AP Reaction]:** Once per round. **Trigger:** An enemy within **6"** of you reduces one of your allies to half their **Max HP** or less. **Effect: Shift 3"** toward that enemy. If that enemy is within your melee distance after this **Shift**, your next melee weapon attack against them before the end of the round deals an additional **1d4 damage of that attack's primary damage type**.

Wizard [4/5 Complexity]

A Wizard is formed through study that most would not endure. Fragments of knowledge, careful notes, and repeated failure shape their craft. Power is taken apart, understood, and rebuilt with precision.

Archetype: Caster
Class Modifiers: STR -1, DEX -1, INT +3, SPI 0
Starting HP Bonus: +2
Max HP Gained per Level: +2
Primary Casting Score: INT
Tier 0 Cantrips: You know the three Wizard **Tier 0 Cantrips** listed in **8.3**. These Powers do not count against your known Tier 1–3 **Arcane Spells**.
Starting Arcane Spells: Know **4 Tier 1 Arcane Spells**. Gain access to Tier 2 at Level 5 and Tier 3 at Level 9. Learn one additional **Arcane Spell** at Levels 3, 5, 7, and 9.

Starting Packages

- **A. Cautious Apprentice (Defensive):** Quarterstaff, Bandages, Magnifying Glass.
- **B. Erudite Scholar (Flexible):** Quarterstaff, 2 Torches, 1c.
- **C. Travelling Magician (Utility):** Elven Dagger, Sling, Scroll of Arcane Bolt.

Novice Wizard Talents

- **Arcane Reserve:** Increase your **Max NRG** by **1 + your Level**.
- **Spell Savant:** Add **+1** to **Casting Checks** for **Arcane Spells**. When you select this talent, learn **2** additional **Arcane Spells** of Tiers you can cast.
- **Counterspell [1 AP Reaction, 1 NRG]: Trigger:** A visible enemy within **18"** of you declares the casting of a Power whose Tier does not exceed the highest Arcane Spell Tier you can cast. **Effect:** Make an **INT Check** against **12**. On a success, cancel the triggering Power before its **Casting Check**. The caster does not regain the **AP** or **NRG** spent to cast it. On a failure, the triggering Power resolves normally. Only **1 Counterspell** may be used against each declared Power.
- **Dimensional Step [0 AP, 1 NRG]:** Once during each activation, teleport up to **6"** to a legal unoccupied space you can see.

Adept Wizard Talents

- **Empowered Cantrip:** The first damaging **Tier 0 Arcane Spell** you cast during each activation deals **+2 arcane damage**.
- **Spell Echo [1 AP, 2 NRG]:** During your activation, choose one **Tier 1 Arcane Spell** you successfully cast earlier this activation. Cast that Power again. The second casting uses this talent's cost instead of the Power's printed cost. Resolve a new **Casting Check** for the second casting. You cannot use **Spell Echo** to cast a Power that was already cast with **Spell Echo** during this activation.
- **Quick Cast:** Once during each activation, before casting a **Tier 1** or higher **Arcane Spell**, you may spend **1 NRG**. If you do, that Power costs **1 less AP**, to a minimum of **1 AP**, and gains **+1** on its **Casting Check**.
- **Arcane Resistance:** You are **Resistant** to **arcane** damage. You gain **+2** on **Checks** made to resist **Arcane Spells**.

Master Wizard Talents

- **Overchannel:** When you roll damage for an **Arcane Spell**, you may reroll each base or bonus damage die that shows a **1** or **2**. You must use each new result.
- **Perfect Formula [0 AP Reaction, 1 NRG]: Trigger:** You fail a **Casting Check** for an **Arcane Spell**. **Effect:** Reroll that **Casting Check** with **Advantage**. You must use the new result.
- **Magic Resistance:** You gain **+2** on **Checks** made to resist enemy Powers. When you suffer damage from an enemy Power, reduce that damage by **2**.

Psion [4/5 Complexity]

A Psion turns inward until thought itself sharpens into a weapon, paring away everything that does not serve. What others fight to hold steady, a Psion bends to plain intent. The discipline is not so much chosen as survived.

Archetype: Caster
Class Modifiers: STR -1, DEX 0, INT +2, SPI 0
Starting HP Bonus: +3
Max HP Gained per Level: +2
Primary Casting Score: INT
Tier 0 Psychic Techniques: You know the three Psion **Tier 0 Psychic Techniques** listed in **8.7**.

These Powers do not count against your known Tier 1–3 **Psychic Abilities**.
Starting Psychic Abilities: Know **3 Tier 1 Psychic Abilities**. Gain access to Tier 2 at Level 5 and Tier 3 at Level 9. Learn one additional **Psychic Ability** at Levels 3, 5, 7, and 9.

Starting Packages

- **A. Kinetic Warrior (Defensive):** Dagger, Hide Cuirass, Targe.
- **B. Focused Adept (Flexible):** Quarterstaff, Leather Coat, Bandages, Magnifying Glass, 1c.
- **C. Mind Blade (Offensive):** Dagger, Gambeson, 3 Throwing Knives, 2c.

Novice Psion Talents

- **Mental Shield [1 AP Reaction]: Trigger:** A Power or a source that deals **arcane** or **psychic** damage is declared and would affect you. **Effect:** Reduce the triggering source's damage against you by **6**.
- **Kinetic Push [1 AP, 1 NRG]:** Once during each activation, choose one visible enemy within **10"** of you. The target suffers **1d6 + INT psychic damage** and is **Pushed 3"** directly away.
- **Mind Spear:** Add **+3 damage** when you deal **psychic** damage with a Power.
- **Thoughtstep [1 AP]:** Once during each activation, teleport up to **8"** to a legal unoccupied space.

Adept Psion Talents

- **Psychic Echo:** Once during each activation, when a **Psychic Ability** damages one or more enemies, choose **1** enemy not damaged by that **Psychic Ability** within **6"** of any damaged target. The chosen enemy suffers **1d6 + INT psychic damage**.
- **Ego Lash [1 AP, 1 NRG]:** Once during each activation, choose one visible enemy within **10"** of you. The target must pass a **SPI Check**. On a failure, the target becomes **Prone**, and you may **Slide** them **2"**.
- **Iron Mind:** Once per round, when you fail a **SPI** or **INT Check**, you may reroll it. You must use the new result. You are **Immune** to **Frightened**, and your Checks made to resist enemy effects that would force your movement, attacks, or target choices are rolled with **Advantage**.
- **Force Blast:** When one of your Powers **Pushes** or **Pulls** an enemy at least **1"**, that enemy suffers **2 psychic damage**. The target must then pass a **SPI Check**. On a failure, the target becomes **Stunned**.

Master Psion Talents

- **Psychic Overload:** Once during each activation, after a damaging **Psychic Ability's** damage is rolled but before mitigation, you may spend **1 NRG** and choose one enemy affected by that roll. Roll one bonus die matching the first listed base damage die in that Power's damage expression and add it to the damage total applied to that enemy only, using the expression's listed damage type. This bonus die is not a base damage die, cannot explode, and does not change the damage applied to any other target.
- **Master Telekinetic:** When one of your **Psychic Abilities** would **Push**, **Pull**, or **Slide** a combatant, you may increase that distance by up to **4"**.
- **Mindquake:** Once during each activation, when a **Psychic Ability** damages one or more enemies, choose one enemy damaged by it. If the target is a **Monster**, they become **Stunned**. Otherwise, the target must pass a **SPI Check** with **Disadvantage** or immediately lose **1 AP**, minimum **0**.

Trickster [5/5 Complexity]

A Trickster survives by shaping what others take for true. Fact matters less than belief, and belief can be steered. They learn to move freely through the confusion they have already laid down.

Archetype: Hybrid
Class Modifiers: STR -1, DEX +2, INT +1, SPI 0
Starting HP Bonus: +3
Max HP Gained per Level: +2
Primary Casting Score: INT
Tier 0 Cantrips: You know the three Trickster **Tier 0 Cantrips** listed in **8.3**. These Powers do not count against your known Tier 1–2 **Arcane Spells**.
Starting Arcane Spells: Know **2 Tier 1 Arcane Spells**. Gain access to Tier 2 at Level 7. Learn one additional **Arcane Spell** at Levels 3, 5, 7, and 9.
Practised Vanishing: Your **Hide distance** is **0"**. You may become and remain **Hidden** at any distance from an enemy, provided you meet every other requirement in **4.3.2**. You still cannot take **Hide** while **Engaged**, and you still lose **Hidden** when you become **Engaged**.

Starting Packages

- **A. Illusory Fencer (Flexible):** Elven Rapier, Leather Coat, Bandages.
- **B. Deceptive Marksman (Ranged):** Shortbow, Elven Dagger, Gambeson, Caltrops (Bag).
- **C. Veiled Infiltrator (Utility):** Elven Dagger, Leather Coat, Lockpicks, 3 Elven Throwing Knives, Smokestick, Caltrops (Bag), 2c.

Novice Trickster Talents

- **Arcane Gambit [1 AP, 1 NRG]:** Make one melee weapon attack. That attack rolls its base damage dice with **Advantage**. If it damages an enemy, you may **Shift 2"**. If you then meet the conditions to become **Hidden** in **4.3.2**, you become **Hidden**.
- **Sleight of Spell:** The first **Trickster Tier 0 Cantrip** you use during each of your activations costs **0 AP**.
- **Smoke and Mirrors:** Once per round. After you succeed on **Dodge** or successfully cast an **Arcane Spell**, you may **Shift 2"**. If you then meet the conditions to become **Hidden** in **4.3.2**, you become **Hidden**.
- **Spellthief:** Once per round, when you damage an enemy with a melee weapon attack, gain **1 NRG** and **Shift 2"**. If that enemy has NRG, they lose **1 NRG**, to a minimum of **0**.

Adept Trickster Talents

- **Blink Step [0 AP, 1 NRG]:** Once per round. Teleport up to **6"** to a legal unoccupied space you can see. If you then meet the conditions to become **Hidden** in **4.3.2**, you become **Hidden**.
- **Dazzle Strike [1 AP]:** Once during each activation, immediately after you successfully cast an **Arcane Spell** or a **Trickster Tier 0 Cantrip**, **Shift 2"** and make one melee weapon attack. Reactions cannot reduce, prevent, redirect, or negate damage from that attack. Automatically applicable **AV** and non-Reaction mitigation apply normally.
- **False Double [1 AP Reaction, 2 NRG]:** Once per round. **Trigger:** You are targeted by a weapon attack or a harmful Power. **Effect:** You suffer no damage from the triggering attack or Power. After it resolves, you may **Shift 2"**. If you then meet the conditions to become **Hidden** in **4.3.2**, you become **Hidden**.
- **Hexed Blade:** Once during each activation, after rolling damage for a melee weapon attack that is not a **Total Miss** but before mitigation, you may add **3 arcane damage** to that attack. If the attack damages its target, that target becomes **Silenced**.

Master Trickster Talents

- **Ascendant Deception:** The first **Tier 1** or higher **Arcane Spell** you cast during each of your activations costs **1 less AP**, to a minimum of **1 AP**, and rolls its **Casting Check** with **Advantage**. Casting it does not break **Hidden**.
- **Fatal Misdirection:** The first weapon attack you make during each of your activations against an enemy that cannot see you deals an additional **1d6 damage of that attack's primary damage type** and ignores **AV**.
- **Phantom: Hidden** is not broken when you use a **Trickster Tier 0 Cantrip** or when you lose **Cover**. While you are **Hidden**, enemies cannot use Reactions in response to your weapon attacks.

Sorcerer [5/5 Complexity]

A Sorcerer is handed power they never asked to carry. It comes fast and demands to be spent, and left to fester it consumes the one who holds it. Spent well, it can settle everything in a single breath.

Archetype: Caster
Class Modifiers: STR -1, DEX 0, INT 0, SPI +2
Starting HP Bonus: +3
Max HP Gained per Level: +2
Primary Casting Score: SPI
Tier 0 Sorceries: You know the three Sorcerer **Tier 0 Sorceries** listed in **8.5**. These Powers do not count against your known Tier 1–3 **Sorceries**.
Starting Sorceries: Know **3 Tier 1 Sorceries**. Gain access to Tier 2 at Level 5 and Tier 3 at Level 9. Learn one additional **Sorcery** at Levels 3, 5, 7, and 9.

Starting Packages

- **A. Elemental Channeler (Flexible):** Quarterstaff, Bandages.
- **B. Shadow Weaver (Defensive):** Dagger, Gambeson, Bandages.
- **C. Innate Prodigy (Utility):** Sling, Bandages.

Novice Sorcerer Talents

- **Blood Surge:** Once per round, after a **Sorcery's** damage is rolled but before mitigation, choose one enemy affected by that roll. You may lose HP up to your current Level, to a maximum of **5 HP**, and add the same amount of one damage type dealt by the Sorcery to the damage total applied to that enemy only. HP lost this way ignores **AV** and cannot be reduced. This does not change the damage applied to any other target.
- **Channel Vitality:** When **Blood Price** causes you to lose **2 or more HP**, gain **1 NRG**.
- **Infernal Grace:** Once per round, when a failed **Sorcery Casting Check** would make you lose HP from **Blood Price**, reduce that HP loss by **2**, minimum **0**.
- **Burning Soul:** Add **+1 fire damage** to your weapon attacks and to your damaging **Sorceries**.

Adept Sorcerer Talents

- **Infernal Familiar [2 AP, 2 NRG]:** If you do not currently control an Infernal Imp created by this talent, place 1 Infernal Imp allied **Summon** under your control in a legal unoccupied space within **6"** and **LOS**, using the **Infernal Imp** stat block in this class entry. They cannot activate during the round they are Summoned.
- **Volatile Gift:** Once for each **Sorcery** you cast, when one of its damage rolls scores a **Critical Hit**, choose one enemy affected by that roll. Roll one bonus die matching the first listed base damage die in that Sorcery's damage expression and add it to the damage total applied to that enemy only, using the expression's listed damage type. This bonus die is not a base damage die, cannot explode, and does not change the damage applied to any other target.
- **Blood Vortex:** When you lose HP from **Blood Price**, each enemy combatant within **3"** of you loses **1 HP**. This HP loss ignores **AV** and cannot be reduced.
- **Warp Step:** Once per round. When you lose HP from **Blood Price**, you may teleport up to **2"** to a legal unoccupied space you can see.

Master Sorcerer Talents

- **Cataclysmic Pulse:** Once during each activation, when a **Sorcery** damages one or more enemies, choose one enemy damaged by it. Each other enemy within **3"** of that enemy suffers **1d6 fire damage** once.
- **Living Conduit:** Increase your **Max HP** and **Max NRG** by **4** each. Once per round, when you lose HP from **Blood Price** or **Blood Surge**, gain **1 NRG**.
- **Searing Blood [1 AP Reaction]: Trigger:** You lose HP from **Blood Price**. **Effect:** Attempt to cast 1 **Tier 0** or **Tier 1 Sorcery** for **0 AP**. You must pay that **Sorcery's** normal **NRG** cost and resolve its **Blood Price** normally. If that Sorcery deals damage, add **3 damage** of its primary damage type to each of its damage totals. **Searing Blood** cannot be triggered by **Blood Price** HP loss from a **Sorcery** cast through **Searing Blood**.

Infernal Imp Summon

A **Sorcerer** with the **Infernal Familiar** talent uses the following stat block for the **Infernal Imp**.

Infernal Imp

- **AP:** 2
- **HP:** 10
- **AV:** 1
- **SPD:** 6"; **Fly (12")**
- **Sz:** S
- **Abilities:** STR +0, DEX +2, INT +0, SPI +1
- **Attacks: Infernal Bolt:** Ranged 8", **1d6 + 4 fire damage**. A Hero, Hireling, or Summon damaged by this attack must pass a **SPI Check** or become **Burning**. A Monster damaged by it becomes **Burning**. **Claws: 2d4 slashing damage**.
- **Special Abilities: Small**; **Fiend**; **Immune:** fire; **Vulnerable:** holy.

The **Infernal Imp** is an allied **Summon** controlled by the **Sorcerer** and follows the universal Summon rules in **2.5.1**.

Druid [5/5 Complexity]

A Druid knows the world was never owned by those who built upon it. Stone cracks, root spreads, and time takes everything back into the dark soil. A Druid has seen that plainly, and chosen to serve it rather than resist it.

Archetype: Caster
Class Modifiers: STR -1, DEX 0, INT -1, SPI +3
Starting HP Bonus: +5
Max HP Gained per Level: +2
Primary Casting Score: SPI
Tier 0 Druidic Minor Rituals: You know the three **Tier 0 Druidic Minor Rituals** listed in **8.6**. These Powers do not count against your known Tier 1–3 **Druidic Rituals**.
Starting Druidic Rituals: Know **3 Tier 1 Druidic Rituals**. Gain access to Tier 2 at Level 5 and Tier 3 at Level 9. Learn one additional **Druidic Ritual** at Levels 3, 5, 7, and 9.

Starting Packages

- **A. Primal Guardian (Defensive):** Quarterstaff, Leather Coat.
- **B. Beast Whisperer (Flexible):** Club, Wooden Shield, Leather Coat, 2 Bandages.
- **C. Wilderness Shaper (Ranged):** Sling, Elven Sickle, Leather Coat.

Novice Druid Talents

- **Wild Shape [0 AP]:** Once during each activation, you may transform into one **Beast Form** from the **Wild Shape Forms** table below; the **Wild Shape Rules** appear with that table. You cannot use **Wild Shape** during the same activation after you cast a **Tier 1** or higher **Druidic Ritual**. **Wild Shape** ends at the end of your next activation, when you are reduced to **0 HP**, or when you choose to end it as a **0 AP** action. You cannot use **Wild Shape** again while a **Wild Shape Form** is active or during the same activation after a form ends.
- **Verdant Ward [2 AP Reaction]: Trigger:** 1 ally within **12"** is chosen as the target of an attack or harmful effect. **Effect:** Reduce the damage that the triggering action or effect deals to that ally by **8**.
- **Thornwhip [1 AP, 1 NRG]:** Once during each activation, choose one enemy within **8"** of you and within your **LOS**. The target suffers **1d6 + SPI piercing damage**, and you may **Pull** them **2"** directly toward you.
- **Nature's Recovery:** Whenever you cast a **Druidic Ritual** that restores HP, each target regains **+3 HP**.

Adept Druid Talents

- **Stormcaller:** Once for each damaging **Druidic Ritual** you cast, after its damage is rolled but before mitigation, choose one enemy affected by that roll. Add **1d8 damage** of one damage type dealt by the Ritual to the damage total applied to that enemy only. This is not a base damage die and does not change the damage applied to any other target.
- **Packspeaker: Beasts** and **Summons** you control within **6"** of you deal **+2 damage** with their attacks and gain **+1" Speed**. A combatant that is both a Beast and a Summon gains each bonus only once.
- **Barkskin [1 AP]:** Gain **+1 AV** and **Temporary HP** = 5 until the end of the round. You cannot use this talent while in **Wild Shape**.
- **Rootsnare [1 AP, 1 NRG]:** Choose one enemy within **8"** and **LOS**. The target must pass a **DEX Check**. On a failure, the target becomes **Immobilized** until the end of the round.

Master Druid Talents

- **Great Shape:** Requires **Wild Shape**. While you are in **Wild Shape**, gain **+1 AV** and your **Wild Shape Form's** natural attack damage rolls one additional base damage die. If you have **Great Shape**, using **Wild Shape** costs **1 NRG**. When you select **Great Shape**, choose one **Apex Form** from the **Wild Shape Forms** table. That **Apex Form** is added to your available **Wild Shape Forms** for as long as you have **Great Shape**. You cannot select more than one **Apex Form**.
- **Wrath of the Wild:** Reduce the **NRG** cost of any **Tier 1** or higher **Druidic Ritual** that deals damage by **1**, to a minimum of **1 NRG**. Add **+3** to that Ritual's damage total.
- **Circle Renewal [1 AP, 3 NRG]:** During your activation, take this action immediately after you successfully cast a **Druidic Ritual**. All allied combatants within **6"** of you gain **Temporary HP** = 5 until the end of the round.

Wild Shape Forms

Wild Shape Rules

While you are in a **Wild Shape Form**:

- Replace your **SPD** and **Sz** with the form's listed **SPD** and **Sz**, and use the form's listed flat **AV**. Because **Small** is derived from **Sz S**, you gain or lose **Small** as your Size changes. Your Chest armour and shield remain equipped, but their **AD**, **AV**, **DEX Pen**, **Max Speed**, Item Qualities, and other rules are suspended. You cannot use **Block** or **Parry**. Apply other modifiers to the form's values normally.
- Replace your weapon attacks with the form's natural attack. A natural attack counts as a weapon attack only for its normal AP cost and the **Multiple Attacks** rule; it does not count as a weapon for prerequisites, item rules, Talents, or other effects unless the rule explicitly affects natural attacks. Add the higher of your **STR** or **SPI** modifier to its damage. At Levels 1–3, the natural attack rolls **1** base damage die. At Level 4 and above, it rolls **2** base damage dice.
- Items that occupy Hands remain equipped but cannot be used, including weapons, shields, potions, scrolls, thrown items, and **Bandages**.
- Retain your current HP, Wounds, NRG, ability scores, General Talents, class talents, ancestry traits, known Powers, and class features.
- You cannot cast Powers or use scrolls. You may take **Dodge** and **Reflex Attack**, and may take **Hide**, **Spot**, and **Interact** normally unless the form's trait says otherwise.

The four **Novice Forms** are available as soon as a Druid takes **Wild Shape**. The three **Apex Forms** become available only when a Druid takes **Great Shape**. The Druid gains only the **Apex Form** chosen at that time.

Wolf Shape
Tier Novice **SPD** 7" **Sz** M **AV** 1
Natural Attack **Bite:** 1d6 piercing damage
Form Trait: When you declare **Bite** against an enemy adjacent to at least one of your allies, the attack rolls one additional base damage die.

Boar
Tier Novice **SPD** 6" **Sz** M **AV** 2
Natural Attack **Tusks:** 1d6 piercing damage
Form Trait: When you make a **Tusks** attack after using **Move** to move at least **3"** in a straight line toward the target during the same activation, the target is **Pushed 1"** directly away from you when this attack damages the target.

Great Eagle
Tier Novice **SPD** 5", Fly (10") **Sz** L **AV** 1
Natural Attack **Talons:** 1d4 slashing damage
Form Trait: While using **Fly**, you do not gain **Cover** from a terrain feature.

Lynx
Tier Novice **SPD** 7" **Sz** S **AV** 1
Natural Attack **Claws:** 1d4 slashing damage
Form Trait: **Small.** While in this form and in **Cover**, your **Hide distance** is **0"**. You ignore additional movement costs from **Difficult Terrain** and do not make terrain **Checks** caused by **Slippery Terrain**.

Bear
Tier Apex **SPD** 5" **Sz** M **AV** 3
Natural Attack **Maul:** 1d8 slashing damage
Form Trait: When **Maul** damages an enemy, that enemy must pass a **STR Check**. On a failure, the enemy becomes **Prone**. While in **Bear** form, you are **Immune** to forced movement.

Stag
Tier Apex **SPD** 8" **Sz** M **AV** 2
Natural Attack **Antlers:** 1d8 piercing damage
Form Trait: When you make an **Antlers** attack after using **Move** to move at least **4"** in a straight line toward the target during the same activation, the attack rolls one additional base damage die and the target is **Pushed 2"** directly away from you when this attack damages the target.

Lion
Tier Apex **SPD** 7" **Sz** M **AV** 2
Natural Attack **Pounce:** 1d8 slashing damage
Form Trait: The first **Pounce** attack you make each activation rolls the attack's base damage dice with **Advantage**. When a **Pounce** attack reduces an enemy to **0 HP**, you may **Shift 2"**.

6.14 Average Party Level (APL)

APL means **Average Party Level**. During an adventure, calculate APL using only the Heroes in the **Active Party** selected for that adventure. During the following Town Phase, continue using the APL of the Active Party that completed that adventure; do not recalculate it after swapping Heroes. Before the first adventure of a campaign, use the starting Active Party.

To determine APL:

1. Add together the Levels of all Heroes in the Active Party.
2. Divide by the number of Heroes in the Active Party.
3. **Round down**.

Hirelings, Summons, and Heroes on the Bench do not count toward APL.

6.15 Hirelings

Campaign Hirelings persist between adventures until dismissed, lost, or removed by a rule. A scenario or another rule may instead grant a temporary Hireling for the duration it specifies.

A **Summon** is a separate category of temporary allied combatant. A combatant does not become a Hireling or Summon merely because they temporarily become allied.

An **Animal Companion** is a subtype of Hireling. Animal Companions use **11.2.6** and count as Hirelings for roster, deployment, and control limits unless a more specific rule says otherwise.

Use **11.2.5 Hirelings** to hire, dismiss, and manage campaign Hirelings. Use **11.2.6 Animal Companions** for Animal Companion limits, control, and replacement.

Hirelings follow the normal rules for allied combatants with the following exceptions:

- A Hireling is not a Hero.
- A Hireling normally has **2 AP** each round unless their profile says otherwise.
- A Hireling's printed **AV** is flat **AV** and applies automatically. If their profile grants shield **AD**, they may use **Block** to roll that shield **AD** and add it to their printed **AV**.
- A Hireling does not count toward **APL**.
- A Hireling does not gain Levels.
- A Hireling does not gain Talents unless a rule explicitly says otherwise.
- A Hireling cannot carry, claim, score, or extract treasure or scenario objectives unless their profile or the scenario explicitly allows it.
- A Hireling never counts as a **Party Leader**.
- If a Hireling is reduced to **0 HP**, remove them from play unless a rule says otherwise.
- If every Hero in a Hireling's party is **Knocked Out** or dead, every Hireling in that party immediately flees: remove those Hirelings from the battlefield. A Hireling removed this way does not count as reduced to **0 HP** and takes no further part in the adventure.
- A Hireling grants **0 CV** when removed from play unless a scenario or profile explicitly says otherwise.
- A Hireling uses the **STR**, **DEX**, **INT**, and **SPI** scores printed in their profile. If a Hireling profile omits one or more of these scores, each omitted score is **+0**.
- A Hireling's listed attack damage is complete. Do not add **STR**, **DEX**, **INT**, or **SPI** to that damage unless the attack profile includes that ability score or another rule explicitly says otherwise.
- A Hireling uses only the attacks, armour, shields, and abilities printed in their profile unless a rule explicitly says otherwise.

6.16 Hero Advancement

Heroes do not automatically gain levels after an adventure.

A Hero starts at **Level 1**. The maximum Hero level is **Level 10**.

Gaining a Level

When a Hero gains a level, resolve these steps in order:

1. Increase the Hero's Level by **1**.
2. Increase their **Max HP** by the **Max HP Gained per Level** value listed by their class.
3. Apply every benefit listed for the new level in the **Universal Class Progression**.
4. Learn any additional Power granted by the Hero's class at that level.
5. Recalculate the Hero's **Initiative Bonus** and **Max NRG**.

Resolve these steps once for each level gained. Increasing **Max HP**, **Max NRG**, or maximum Luck does not restore the corresponding current resource unless a rule says otherwise.

During the Town Phase, the party may train Heroes by using **Train [1 TAP]**.

Train [1 TAP]

Choose one Hero in the Roster. Spend coins from the Treasury equal to that Hero's Training Cost. The Hero gains 1 level.

A Hero cannot gain more than 1 level from a single Train action unless they qualify for **Catch-Up Training**.

A Hero cannot be trained above Level 10.

Hirelings, Monsters, and Summons do not gain levels unless a rule says otherwise.

Catch-Up Training

When the party uses **Train**, it may choose one Hero whose Level is lower than the Town Phase APL established in **6.14**.

That Hero may gain any number of levels, up to that APL, as part of the same Train action. The party must pay the Training Cost for each level gained.

Do not recalculate APL during the Train action.

Training Cost

Current Level	New Level	Training Cost
1	2	16c
2	3	24c
3	4	32c
4	5	40c
5	6	48c
6	7	56c
7	8	64c
8	9	72c
9	10	80c

6.17 Party Building Guidelines

For matched one-off play, use the following standards:

- Both sides field the same number of Heroes unless the scenario says otherwise.
- Before creating Heroes, choose a Hero Level from **1–10**. Every Hero begins at that Level unless the scenario says otherwise.
- To create a Hero above Level 1, first complete Hero creation at Level 1. Then resolve **Gaining a Level** once for each additional Level without paying Training Costs.
- Before deployment, pool all starting coins. Each party may spend those coins at list price on items or equipment normally available through **Buy and Sell Goods** in **11.2.4**. Assign purchased items to Hero inventories and equip them legally. Discard all unspent coins when the adventure begins.
- After completing all creation, advancement, purchases, and equipment choices, set each Hero's current HP, NRG, and Luck equal to their final maximum values.
- Rules that resolve during a Town Phase, Aftermath Phase, or later adventure have no effect unless the scenario says otherwise.
- Matched one-off play does not use Hirelings unless the scenario explicitly allows them.
- Both sides use the same campaign restrictions, if any.
- Apply the rare ancestry limit in **6.9 Ancestries**.
- If using random creation, apply the matched-play restrictions in **6.5**.

7.

Equipment and Items

This section defines how gear is bought, equipped, carried, enhanced, found, and used. Unless a more specific rule says otherwise, the rules in this section govern all weapons, armour, shields, potions, poisons, scrolls, adventuring equipment, treasure, and permanent special items.

7.1 Equipment Overview

Reading Path

Section 7 is layered for learning and reference. Read **7.1–7.4** before using equipment, then read only the mundane profiles relevant to your Hero in **7.7–7.12**. Use **7.5–7.6** and **7.13–7.17** as lookup catalogues during party building, treasure generation, and play; you do not need to read every item entry in sequence. **Appendix C.14** summarizes the most common equipment procedures.

How to Read Item Tables

- **Cost (c):** The item's purchase price in coins.
- **Requirements:** Listed **STR, DEX, INT,** and **SPI** values must be met before the item can be equipped or grant its benefits.
- **No Requirement:** An entry of - in an equipment requirement column means the item has no requirement for that ability score.
- **Hands / type / location:** These tell you where the item is worn or how many hands it occupies.
- **Traits and rules text:** If an item has special behaviour, the exact rule appears in its final column.

All equipment is purchased using **Coins**, written as **Xc**. Heraldry Skirmish does **not** use an inventory slot or encumbrance track. Heroes are assumed to carry a reasonable load of mundane gear, consumables, and scenario tools. A Hero's full list of owned items is recorded on their Hero sheet; this list is referred to as that Hero's **inventory** when a rule needs to identify items the Hero owns but is not currently using. In play, what matters is what a Hero is actively **wielding**, **wearing**, or **using**.

Choose every equipped permanent item before deployment. A Hero cannot change equipped permanent items during an adventure unless a rule explicitly allows it.

Equipment Category Reference

Category	Use	Full Rule
Weapon Traits	Defines weapon handling, range, and attack modifiers.	**7.7**
Melee Weapons	Lists melee weapon costs, requirements, damage, and traits.	**7.8**
Ranged Weapons	Lists ranged weapon costs, requirements, damage, and traits.	**7.9**
Armour	Lists **Chest** items and armour **AD**.	**7.10**
Item Qualities	Adds quality-based rules to equipment.	**7.11**
Shields	Lists shield **AD/AV** used with **Block** and related rules.	**7.12**
Potions	Lists consumable healing and utility items.	**7.13**
Poisons	Lists consumable weapon toxins and their application rules.	**7.14**
Scrolls	Lists one-use Power items and their reading rules.	**7.15**
Adventuring Equipment	Lists mundane and utility gear.	**7.16**
Permanent Special Items	Lists named permanent items and special equipment rules.	**7.17**

Specific item text overrides general equipment rules only where it explicitly says so.

7.2 Universal Item Rules

- **Ability requirements:** A Hero must meet an item's listed STR, DEX, INT, and SPI requirements to equip or benefit from it. Bonuses granted by that same item never help qualify the Hero to equip it.
- **Equipment types:** All equipped permanent items use one of these equipment types only: **Chest, Head, Back, Neck, Waist, Arms, Feet, Ring, Hands**.
- **Equip limits:** A Hero may equip **1 Chest item**, **1 Head item**, **1 Back item**, **1 Neck item**, **1 Waist item**, **1 Arms item**, **1 Feet item**, **up to 2 Ring items**, and **up to 2 hands worth of Hands items**.
- **Permanent special item limit:** A Hero may have a maximum of **5 non-consumable Permanent Special Items** equipped at one time. This limit applies only to named non-consumable items from **Section 7.17** and does not count mundane equipment, consumables, or non-special enhanced items.
- **Type mapping:** Use the following equipment types consistently: **Eyes / Goggles / Lenses / Helms = Head**; **Cloaks / Brooches = Back**; **Amulets / Charms = Neck**; **Belts / Sashes = Waist**; **Gloves / Gauntlets / Bracers = Arms**; **Boots / Anklets = Feet**; **Weapons / Shields / Lanterns / Torches / Chimes = Hands**.
- **Metal equipment:** The following items count as metal for all rules:
  - **Chest armour: Ring Shirt, Mail Shirt, Steel Scale, Breastplate, Brigandine, Banded Armour, Mail Suit, Half Plate, Splinted Mail, Steel Lamellar, Full Plate,** and a named Chest item whose name or base profile identifies it as mail, chain, scale, lamellar, brigandine, breastplate, splinted armour, half plate, full plate, or another form of metal armour.
  - **Shields:** Every shield and defensive off-hand item in **7.12** or **7.17** unless its entry says it is non-metal.
  - **Weapons:** Every weapon except **Unarmed Combat, Club, Net, Lasso, Sling, Shortbow, Longbow, Composite Bow, Greatbow, Blowgun, Quarterstaff,** and **Weighted Cord**. A named weapon is non-metal only if its name or parenthetical base profile identifies it as one of those non-metal weapons; otherwise, it is metal unless its entry says otherwise.
  - **Qualities: Silvered, Cold Iron, Palesteel,** and **Adamantine** are metal qualities and make an item metal. **Masterwork, Elven, Sacred,** and **Enchanted** are not metal by themselves.
- **Hands:** A Hero has **2 hands worth** of held capacity. A one-handed weapon, shield, lantern, torch, chime, or one other held item uses **1 hand**. A two-handed weapon uses **2 hands**. A value of **1/2** means the weapon may be used either one-handed or two-handed.
- **Held utility items:** Hand-held permanent items such as **lanterns, torches, and chimes** function only while the item is actually held.
- **No stacking by location:** If two permanent items would occupy the same equipped location, choose one. Only the equipped item functions. Identical named item effects never stack.
- **Carried gear:** Potions, poisons, scrolls, and adventuring equipment are carried until used unless a scenario says otherwise.
- **Consumables:** Potions, poisons, scrolls, and **Bandages** are expended when used. A specific item rule may say that item is not expended.
- **Sale value:** Unless a rule says otherwise, an item sells for **50%** of its base value. Round the sale value down to the nearest **1c**, minimum **0c**. An item with a final sale value below **1c** sells for **0c**.
- **Weapon damage modifiers:** Add the appropriate ability modifier to weapon damage once per attack: **DEX** for an attack with a **Finesse** weapon; otherwise, **STR** for a melee attack, the higher of **STR** or **DEX** for a ranged attack with a **Thrown** weapon, and **DEX** for a ranged attack with any other **Ranged** weapon. Do not add this modifier again for critical bonus rolls.
- **Shields:** Shield **AD** is rolled, and flat shield **AV** applies, only through **Block** unless a rule says otherwise.
- **Magical weapons:** A weapon is magical if it has an **Enchanted +X** quality, is a named **Per-**

manent Special Item, or a rule explicitly says it is magical. **Masterwork, Silvered, Cold Iron, Elven, Sacred, Palesteel,** and **Adamantine** do not by themselves make a weapon magical unless their rule says otherwise. A Power, poison, oil, or temporary damage-type change does not make a weapon magical unless it explicitly says so.

- **Free attacks:** A free attack cannot create another free attack unless a rule explicitly says it can.
- **Default item duration:** If an item, **Critical Hit**, poison, scroll, or special item creates a **temporary ongoing effect** and gives no duration, that effect ends at the end of the round. This default does not end a passive benefit that functions while an item is equipped, worn, or held; a permanent change; a named condition; or an effect with an explicit duration.
- **Damage modifiers:** Use **Immune**, **Resistant**, and **Vulnerable** exactly as defined in **5.4 Damage Types, AV, and Damage Modifiers**. Multiple instances of the same modifier do not stack.
- **Ending ongoing effects:** If a rule says to **end** an ongoing Power or special item effect, choose one active non-instantaneous effect affecting a target, area, held item, or equipped item in range. Instantaneous damage, healing, and permanent destruction cannot be ended this way.
- **Special-item rules:** Special items, Powers, and supernatural effects function only as written.
- **Weapon damage types:** Each weapon profile has exactly one **primary damage type**. If an effect changes a weapon's damage type, choose one listed damage type from **5.4 Damage Types, AV, and Damage Modifiers**; that type replaces the weapon's primary damage type until the effect ends. Additional damage with an explicitly listed type retains its own type unless the effect says otherwise.
- **Armour and source: Chest AD** is rolled automatically whenever you would suffer **blunt**, **piercing**, or **slashing** damage. Shield **AD** is rolled, and flat shield **AV** applies, only through **Block**. Apply all **AV** under **5.4 Damage Types, AV, and Damage Modifiers**.

7.3 Reading Item Entries

Item entries use the core terminology and procedures in **Sections 2, 4, 5,** and **7.2**. Apply those rules unless an entry gives a specific exception.

When an item entry includes rules text beyond its table fields, that information appears in this order when applicable: **action or cost**, **range or target**, **procedure**, **effect**, **duration**, then **restrictions or exceptions**. An entry omits elements that do not apply. Item entries include enough operational information to resolve ordinary use without unnecessary reference chains and repeat a universal rule only when the local reminder materially reduces lookup burden.

7.4 Stacking and Precedence

- If 2 item effects would modify the same statistic, **Reaction**, **Check**, or non-damage roll, apply only the **single highest bonus** and the **single worst penalty** unless a rule explicitly says the effects stack. Damage dice and damage modifiers stack under **5.4**.
- If two effects would change a weapon's damage type, the **most recent effect** applies.
- If a rule would both **replace** and **modify** damage, resolve the replacement first, then apply modifiers.
- **AV bonuses** from different equipped locations stack. Two effects from the **same named item** never stack.
- If a combatant is both **Hidden** and **Invisible**, follow **2.8.5**.
- If a rule says a combatant **cannot be chosen as the target** of attacks, Powers, or Special Abilities, that restriction overrides **Hidden**, **Invisible**, **LOS**, adjacency, and rules that ignore targeting restrictions unless another rule explicitly says they can affect untargetable targets.
- If an effect places a combatant in an illegal space, place that combatant in the nearest legal space instead. Forced movement follows **4.4.6**.
- If an item duplicates a **Reaction** such as **Block** or **Parry**, follow the item text exactly. If an item does not change the normal **Reaction** timing or cost, use the core rule.

7.5 Item Availability

- Random treasure generation outside the **Tier 4** and **Tier 5 Enhanced tables** cannot produce items with **Enchanted +4** or **Enchanted +5**. If any other random item table would produce an **Enchanted +4** or **Enchanted +5** result, reroll that result. The **Tier 4** and **Tier 5 Enhanced Weapon, Armour, and Shield Tables** are explicit exceptions and grant their listed items. Outside those tables, these items enter play only as named prizes, brokered commissions allowed by a specific Town Phase rule, major campaign rewards, or explicit scenario rewards.
- **Rare acquisition rule: Tier 3 consumables**, **Tier 3 permanent special items**, and items with **Enchanted +3** are **Rare**. They are not part of mundane open-market purchasing.
- **Very Rare acquisition rule: Tier 4 consumables**, **Tier 4 permanent special items**, and items with **Enchanted +4** are **Very Rare**. They normally require a brokered commission, a major reward, or a specific Town Phase action.
- **Legendary acquisition rule: Tier 5 consumables** and items with **Enchanted +5** are **Legendary** acquisitions. **Tier 5 permanent special items** are **Legendary Artifacts** and are never available for mundane purchase or commission unless a rule explicitly says otherwise.

7.6 Treasure Tables

Treasure in the Dying Lands is never clean. Coin comes from burial hoards, failed relief columns, chapel vaults, drowned roads, damned shrines, dead merchants, broken armies, and rooms sealed by people who feared being found. A purse is often the last record of a life. A crown may have passed through dirt, blood, ash, salt water, and another thief's stomach before it reaches a living hand.

Adventurers return to the ruins because coin keeps breath in the body. It buys bread, lamp oil, splints, armour, apothecary work, chapel rites, hired blades, and one more season behind a wall. A relic may ransom a village. It may also ruin one. A saint's ring may pay a healer. A king's cup may wake the court buried with it. Wealth is leverage, temptation, and tomorrow's trouble made bright enough to carry home.

7.6.1 Treasure Rolls

A **Treasure roll** is one roll of **1d100** on the Treasure Table matching the party's current **APL**. Higher rolls are generally more valuable.

Treasure markers list the number of Treasure rolls they yield instead of a coin value. Unless a rule says otherwise, a treasure marker yields one of the following:

Marker	Result
1 Treasure roll with Disadvantage	Roll **1d100** twice and use the lower result.
1 Treasure roll	Roll **1d100** once.
2 Treasure rolls	Roll **1d100** twice and gain both results.
3 Treasure rolls	Roll **1d100** three times and gain all three results.

- Resolve a marker's Treasure rolls immediately when that marker is looted, opened, retrieved, or otherwise claimed. The rewards are placed with the looting Hero and follow the scenario's carry, extraction, and banking rules.
- A marker yields its Treasure rolls only once, no matter how many times it is interacted with.
- Coins and items gained from a Treasure roll count toward that party's **Coin Value**. An item counts at its list price.
- A marker's other listed contents, such as a named item, scenario reward token, or scroll, are gained in full in addition to its Treasure rolls.
- A scenario, Secondary Objective, boss rule, or campaign reward may grant further Treasure rolls. Resolve each granted Treasure roll separately.
- **Advantage** and **Disadvantage** on a Treasure roll follow the normal rules in **2.4**: they do not stack, and they cancel each other.

7.6.2 Treasure Generation Rules

- Determine the treasure tier from the current **APL**:
  - **Tier 1:** APL 1–2
  - **Tier 2:** APL 3–4
  - **Tier 3:** APL 5–6
  - **Tier 4:** APL 7–8

  - **Tier 5:** APL 9–10
- Roll **1d100** on the matching Treasure Table, applying **Disadvantage** if the marker or rule granting the Treasure roll says so.
- Gain exactly the coins listed by that result. Coins listed on a Treasure Table are fixed. Do not multiply, scale, or reduce them by **APL** or by any other rule.
- If a result does not list a coin value, gain only the listed item, item-table roll, or other non-coin reward.
- If a result instructs you to roll on another table, roll that table once and gain the result.
- If a treasure result would grant a named **Legendary Artifact** already controlled by that party, reroll that treasure result once. If the reroll would still grant the same named **Legendary Artifact**, gain coins equal to **half** that item's list price instead.
- A party may gain no more than **1 Legendary Artifact** from Treasure rolls during the same adventure. If a later **Tier 5 Treasure Table** result would grant another **Legendary Artifact**, reroll that result once. If it would still grant a **Legendary Artifact**, gain the coins listed by that result and instead roll on the corresponding **Tier 4 Special** table.
- If a result references more than one table, roll once on each named table and gain all results.
- When a result grants **Tier 1 Scrolls**, **Tier 2 Scrolls**, or **Tier 3 Scrolls**, roll **1d2**: **1 = Arcane**, **2 = Divine**. Then roll once on the matching scroll table for that tier.
- **Tier 1** and **Tier 2** Treasure Tables use only **Tier 1 Scrolls**.
- **Tier 3** and **Tier 4** Treasure Tables use only **Tier 1 Scrolls** and **Tier 2 Scrolls**.
- **Tier 5** Treasure Table uses only **Tier 2 Scrolls** and **Tier 3 Scrolls**.
- Enhanced treasure uses the matching tier's **Enhanced Weapon Table**, **Enhanced Armour Table**, or **Enhanced Shield Table**.
- Unless the rule that generated the Treasure roll says its rewards are banked immediately, all Treasure Table rewards become unbanked adventure rewards and follow the scenario's reward, carry, and extraction rules. In campaign play, record secured rewards during the **Aftermath** under **11.2.3**.
- A permanent item that no current Hero can equip may still be secured. Once secured, the party controls it. In campaign play, keep it in **Storage**, sell it, or trade it during the **Town Phase** as normal.

Tier 1 Treasure Table (APL 1–2)

d100	Result	Chance
01–23	10c + roll on the **Tier 1 Potions**	23%
24–26	12c + roll on the **Tier 1 Poisons**	3%
27–36	13c + **Healing Potion**	10%
37–44	14c + roll on the **Tier 1 Scrolls**	8%
45–50	12c + roll on the **Tier 1 Enhanced Weapon Table**	6%
51–54	12c + roll on the **Tier 1 Enhanced Shield Table**	4%
55–67	13c + roll on the **Tier 1 Special Armour and Shields**	13%
68–71	15c + roll on the **Tier 1 Enhanced Armour Table**	4%
72–81	15c + roll on the **Tier 1 Special Items**	10%
82–100	16c + roll on the **Tier 1 Special Weapons**	19%

Tier 2 Treasure Table (APL 3–4)

d100	Result	Chance
01–08	18c + **Healing Potion**	8%
09–39	24c + roll on the **Tier 2 Potions**	31%
40–42	29c + roll on the **Tier 2 Poisons**	3%
43–50	31c + roll on the **Tier 1 Scrolls**	8%
51–53	28c + roll on the **Tier 1 Potions** and the **Tier 1 Special Armour and Shields**	3%
54–56	28c + roll on the **Tier 2 Enhanced Armour Table**	3%
57–61	28c + roll on the **Tier 2 Enhanced Weapon Table**	5%
62–63	29c + roll on the **Tier 1 Poisons** and the **Tier 1 Special Weapons**	2%
64–66	30c + roll on the **Tier 2 Enhanced Shield Table**	3%
67–75	31c + roll on the **Tier 2 Special Items**	9%
76–78	33c + roll on the **Tier 1 Potions** and the **Tier 2 Special Items**	3%
79–90	35c + roll on the **Tier 2 Special Weapons**	12%
91–100	38c + roll on the **Tier 2 Special Armour and Shields**	10%

Tier 3 Treasure Table (APL 5–6)

d100	Result	Chance
01–05	25c + roll on the **Tier 1 Scrolls**	5%
06–13	28c + **Potion of Greater Healing**	8%
14–39	35c + roll on the **Tier 3 Potions**	26%
40–45	42c + roll on the **Tier 2 Scrolls**	6%
46–48	44c + roll on the **Tier 3 Poisons**	3%
49–52	40c + roll on the **Tier 2 Potions** and the **Tier 2 Special Items**	4%
53–54	40c + roll on the **Tier 2 Poisons** and the **Tier 2 Special Weapons**	2%
55–58	41c + roll on the **Tier 2 Potions** and the **Tier 2 Special Armour and Shields**	4%
59–61	40c + roll on the **Tier 3 Enhanced Armour Table**	3%
62–66	41c + roll on the **Tier 3 Enhanced Weapon Table**	5%
67–69	43c + roll on the **Tier 3 Enhanced Shield Table**	3%
70–79	44c + roll on the **Tier 3 Special Items**	10%
80–90	49c + roll on the **Tier 3 Special Weapons**	11%
91–100	52c + roll on the **Tier 3 Special Armour and Shields**	10%

Tier 4 Treasure Table (APL 7–8)

d100	Result	Chance
01–05	34c + roll on the **Tier 1 Scrolls**	5%
06–13	38c + **Potion of Greater Healing**	8%
14–19	40c + roll on the **Tier 2 Scrolls**	6%
20–47	44c + roll on the **Tier 4 Potions**	28%
48–49	54c + roll on the **Tier 4 Poisons**	2%
50–54	45c + roll on the **Tier 3 Potions** and the **Tier 3 Special Items**	5%
55–59	47c + roll on the **Tier 3 Poisons** and the **Tier 3 Special Weapons**	5%
60–62	50c + roll on the **Tier 4 Enhanced Armour Table**	3%
63–67	52c + roll on the **Tier 3 Potions** and the **Tier 3 Special Armour and Shields**	5%
68–70	52c + roll on the **Tier 4 Enhanced Shield Table**	3%
71–75	53c + roll on the **Tier 4 Enhanced Weapon Table**	5%
76–84	57c + roll on the **Tier 4 Special Weapons**	9%
85–92	60c + roll on the **Tier 4 Special Items**	8%
93–100	61c + roll on the **Tier 4 Special Armour and Shields**	8%

Tier 5 Treasure Table (APL 9–10)

d100	Result	Chance
01–05	40c + roll on the **Tier 2 Scrolls**	5%
06–13	44c + **Potion of Superior Healing**	8%
14–19	31c + roll on the **Tier 3 Scrolls**	6%
20–48	38c + roll on the **Tier 5 Potions**	29%
49–51	47c + roll on the **Tier 5 Enhanced Shield Table**	3%
52–54	46c + roll on the **Tier 5 Enhanced Armour Table**	3%
55–59	49c + roll on the **Tier 5 Enhanced Weapon Table**	5%
60–61	50c + roll on the **Tier 5 Poisons**	2%
62–66	51c + roll on the **Tier 4 Poisons** and the **Tier 4 Special Weapons**	5%
67–71	54c + roll on the **Tier 4 Potions** and the **Tier 4 Special Items**	5%
72–76	54c + roll on the **Tier 4 Potions** and the **Tier 4 Special Armour and Shields**	5%
77–84	50c + roll on the **Tier 5 Legendary Artifact Armour and Shields**	8%
85–91	55c + roll on the **Tier 5 Legendary Artifacts**	7%
92–100	62c + roll on the **Tier 5 Legendary Artifact Weapons**	9%

7.7 Weapon Traits

Mechanical Traits

Trait	Rule
Agile	The second weapon attack you make with this weapon during an activation does not suffer **Disadvantage** from **Multiple Attacks**.
Cleave	After attacking and reducing a target to **0 HP**, you may immediately make a free attack against another target within the attack's melee distance. A free attack granted by **Cleave** may trigger **Cleave** again if it reduces its target to **0 HP**.
Deadly	On a **Critical Hit**, roll one additional bonus die of the same size as the weapon's base damage die and add it to the damage total. This bonus die does not explode.
Entangle	When you attack a combatant with this weapon, make a **DEX Check** with **Disadvantage**. On a success, the target becomes **Immobilized** until the start of your next activation.
Fatal	On a **Critical Hit**, each exploding bonus die triggered by this weapon's retained base damage dice is one size larger than the weapon's base damage die. For example, a **d12** base weapon rolls a **d20** for each such exploding die.
Finesse	Attacks use your **DEX** modifier instead of your **STR** modifier for damage calculations.
Graze	If this attack is a **Total Miss** or is **Dodged**, the target loses **2 HP** instead.
Heavy	A **Small** combatant cannot equip a weapon with this trait. On a **Critical Hit** with this weapon, you may choose to **Push** the target **2"** directly away or make them **Prone**, in addition to the weapon's primary damage type critical effect.
Light	This weapon may be dual-wielded. When attacking with two **Light** weapons, roll the damage dice for each weapon separately. Choose one weapon's total and discard the other. The chosen weapon is the source of the attack: only its damage type, traits, qualities, poison, and other attack effects apply. An attack made with two **Light** weapons counts as a single attack for the multi-attack rule and for the **Off-Hand Weapon** rule (**6.13**).
Parrying	You may use the **Parry** Reaction with this weapon.
Ranged	This weapon uses ranged attack rules. It cannot be used to make melee attacks unless a rule or profile says otherwise. You add your **DEX** modifier to the damage total of attacks made with this weapon.
Reach	This melee weapon, natural attack, or **Monster** attack may target otherwise valid enemies within **2"** in **Tabletop Mode**, or within **2** squares in **Grid Mode**, including diagonal squares. **Reach** does not change **Engagement**.
Reload	After making an attack with this weapon, you cannot attack again with this weapon until you take the **Reload** [**1 AP**] action. See **4.3.5**.
Sweep	**Sweep** applies only to melee attacks unless the weapon's entry says otherwise. When you make a melee attack with this weapon, you may target all enemies within the weapon's melee distance. Roll one base damage die with **Disadvantage**, even if a rule such as **Martial Supremacy** would grant additional base damage dice, and apply the result to each target separately. Each target may declare **Block**, **Dodge**, or **Parry** against a Sweep attack as though it targeted them alone. Because one damage roll is shared, resolve the attack using the shared-roll procedure in **2.7.3**. A Sweep attack counts as a single attack for the multi-attack rule.
Thrown	This weapon may be used to make a ranged attack out to **6"** unless a rule says otherwise. Each individual **Thrown** weapon may be thrown once per activation and can be lost on a **Total Miss**. The full rules are given under **Thrown Weapons** in this section.
Trip	You may use this weapon to take the **Trip** action.
Versatile	If used two-handed, use the higher listed damage die.

> *Example, Sweep: A Level 4 Fighter with **Martial Supremacy** attacks with a Great Falchion, using **Sweep** against two adjacent Goblins. **Sweep** overrides **Martial Supremacy**: the Fighter rolls one base damage die with **Disadvantage**, adds their **STR** modifier once to determine the attack's damage, and each Goblin resolves that damage separately against their own mitigation. The **Sweep** counts as a single attack for the **Multiple Attacks** rule.*

Thrown Weapons

A weapon with the **Thrown** trait may be used to make a ranged attack out to **6"** unless a rule says otherwise. The following rules govern all **Thrown** attacks.

- **Damage modifier:** Add the higher of your **STR** or **DEX** modifier to the damage total. If the weapon also has **Finesse**, use **DEX** instead.
- **One throw per weapon:** Each individual **Thrown** weapon can make only one ranged attack during each activation. After that attack, it cannot be used again until the start of its wielder's next activation, when it is assumed to have been recovered. It remains equipped and continues to occupy its listed **Hands** in the meantime.
- **Quantities:** An entry with a listed quantity contains that many individual weapons, each of which may be thrown once per activation.
- **Weapon loss:** When all of a Hero's retained base damage dice for a ranged attack with a **Thrown** weapon roll a natural **1**, a **Total Miss**, that individual weapon is lost and immediately removed from the Hero's inventory. If the weapon's attack uses a **Check** instead of base damage dice, it is lost on a **Critical Failure** instead.
- **Two Light weapons:** If one attack uses two **Light Thrown** weapons, both count as thrown. Determine whether each weapon is lost from its own base damage dice before choosing which weapon's total to use.
- **Returning weapons:** A returning weapon becomes available for other uses immediately after it returns, but it cannot make another ranged attack during the same activation unless its rule explicitly says otherwise.
- **Hirelings, Summons, and Monsters:** These combatants do not track thrown-weapon loss unless their profile says otherwise.

> *Example, Thrown Weapons: A Hero carrying Throwing Knives (3) may make up to three ranged attacks with them during one activation, using one knife for each attack. Each attack rolls exactly one base damage die. A knife whose attack is a **Total Miss** is removed from the Hero's inventory. Every knife that is not lost becomes available again at the start of that Hero's next activation.*

Material and Craftsmanship Traits

Trait	Rule
Adamantine	Value **×4**, minimum **10c**. Attacks with this weapon ignore up to **2 AV**.
Cold Iron	Value **×1.5**. Attacks with this weapon against a **Fey** ignore up to **2 AV** and deal an additional **2 damage of that attack's primary damage type**.
Elven	Value **×2**. Reduce this weapon's **DEX requirement** by **1**. If this would reduce the requirement below **1**, the weapon has no **DEX Req**. This weapon does not count as metal for the restrictions in **8.2**.
Sacred	Value **×2**. Attacks with this weapon against a **Fiend** deal an additional **1d4 holy damage**.
Masterwork	Value **×1.5**. Once per round, reroll one retained natural **1** rolled by this item's base damage dice, or one natural **1** rolled by this item's **AD** or a **Check** its rule requires. Resolve this reroll before determining **Total Miss** or **Critical Hit**, and use the new result.
Palesteel	Value **×2**. Reduce this weapon's **STR requirement** by **1**. If this would reduce the requirement below **1**, the weapon has no **STR Req**.
Silvered	Value **×1.5**. Attacks with this weapon against a **Lycanthrope** ignore up to **2 AV** and deal an additional **2 damage of that attack's primary damage type**.

7.8 Melee Weapons

Many of the arms below carry names from an older, wider world than the Bastions now remember: the long-bladed messer, the notched sword-breaker, the throwing cross, the bladed scourge, the weighted cord, and the hook-and-chain. They reach the Dying Lands as salvage, tribute, and trade goods, carried up the southern routes through Saltspire and bartered onward through Reedmarch. How a blade is named changes nothing about how it cuts. Each is listed here under the name the traders used.

Unarmed Combat is a universal attack profile, not an item. A Hero may use it only while both hands are free. It cannot be bought, sold, carried, lost, disarmed, or enhanced unless a rule explicitly says otherwise.

Damage type abbreviations in weapon tables: **(B)** blunt, **(P)** piercing, **(S)** slashing, **(F)** fire, **(I)** ice, **(L)** lightning, **(N)** necrotic, **(H)** holy, **(Ar)** arcane, **(Po)** poison, **(Ps)** psychic.

Weapon	Cost (c)	Hands	STR Req	DEX Req	Damage	Traits
Unarmed Combat	0	2	-	-	1 (B)	**Trip**
Club	0	1	-	-	1d4 (B)	-

Hook-and-Chain	8	2	2	4	1d6 (S)	**Agile**, **Entangle**, **Reach**, **Trip**
Swordbreaker	2	1	1	3	1d4 (P)	**Finesse**, **Light**, **Parrying**
Quarterstaff	2	2	-	-	1d6 (B)	**Parrying**, **Trip**
Weighted Cord	6	2	1	2	1d6 (B)	**Entangle**, **Finesse**, **Trip**

7.9 Ranged Weapons

Throwing Knives: Each individual Throwing Knife attack rolls exactly **1 base damage die**, regardless of level, **Martial Supremacy**, or any other rule that would add base damage dice. A set begins with three individual knives, as shown in the table, and otherwise follows the **Thrown** trait normally.

Weapon	Cost (c)	Hands	Range	STR Req	DEX Req	Damage	Traits
Throwing Knives (3)	2	1	10"	-	1	1d4 (P)	**Agile**, **Light**, **Thrown**
Javelin	1	1	6"	1	2	1d6 (P)	**Agile**, **Thrown**
Net	1	2	10"	1	2	-	**Entangle**, **Thrown**
Lasso	1	2	6"	1	4	-	**Entangle**, **Thrown**, **Trip**
Sling	1	1	12"	-	1	1d4 (B)	**Agile**, **Ranged**, **Reload**
Shortbow	8	2	12"	-	2	1d6 (P)	**Ranged**
Longbow	17	2	18"	2	3	1d8 (P)	**Ranged**
Composite Bow	19	2	18"	3	4	1d10 (P)	**Deadly**, **Ranged**
Greatbow	26	2	24"	4	5	1d10 (P)	**Deadly**, **Heavy**, **Ranged**
Hand Crossbow	8	1	12"	-	3	1d6 (P)	**Light**, **Ranged**, **Reload**
Light Crossbow	11	2	18"	2	2	1d8 (P)	**Ranged**, **Reload**
Heavy Crossbow	15	2	18"	3	3	1d10 (P)	**Heavy**, **Ranged**, **Reload**
Repeating Crossbow	22	2	18"	3	4	1d8 (P)	**Agile**, **Heavy**, **Ranged**
Blowgun	1	1	10"	-	2	1d4 (P)	**Agile**, **Ranged**, **Reload**

7.10 Armour

A **Chest** item's **AD** is rolled automatically whenever you would suffer **blunt**, **piercing**, or **slashing** damage, as described in **5.4.3**.

Chest armour sets the wearer's **STR Req**, **DEX Pen**, and **Max Speed** while worn.

An armour entry that lists a flat **+X AV** value instead of an **AD** die adds that flat value wherever its **AD** would be rolled.

A combatant may wear only one Chest armour at a time.

If a combatant's **STR** is lower than an armour's **STR Req**, they cannot wear that armour unless a rule says otherwise.

Apply a worn armour's **DEX Pen** to the result of the wearer's **DEX Checks**, including **Dodge**, and to any damage total or other value that adds the wearer's **DEX**. If both Chest armour and a shield list a **DEX Pen**, apply only the worse of the two values; **DEX Pen** values do not stack. A worn armour's **Max Speed** caps the combatant's **Speed** while worn.

Armour	Cost (c)	AD	STR Req	DEX Pen	Max Speed	Rule
Fur Coat	2	+1 AV	-	0	8"	You are **Resistant** to **ice**.
Leather Coat (Buff Coat)	1	d2	-	0	8"	-
Gambeson (Padded)	2	d3	-	-1	7"	-
Hide Cuirass (Cuir Bouilli)	3	d4	1	-2	7"	-
Leather Lamellar	3	d4	2	-1	7"	-
Ring Shirt (Ringmail)	4	d6	2	-2	6"	-
Mail Shirt (Haubergeon)	6	d6	2	-1	7"	-
Breastplate (Steel Cuirass)	10	d6	3	0	7"	-
Steel Scale (Scale Mail)	11	d8	3	-4	5"	-
Mail Suit (Hauberk)	11	d8	5	-3	5"	-
Brigandine (Coat of Plates)	14	d8	4	-3	6"	-
Banded Armour (Anima)	16	d8	4	-2	6"	-
Splinted Mail (Plate-and-Mail)	23	d10	5	-5	5"	-
Half Plate (Almain Rivet)	30	d10	5	-4	5"	-
Full Plate (Gothic Plate)	56	d12	6	-5	5"	After all exploding bonus dice from a **Critical Hit** against you are rolled, you discard one of those exploding bonus dice before calculating damage.
Steel Lamellar (Klivanion)	60	d12	6	-3	6"	-

7.11 Item Qualities

Item Qualities modify mundane weapons, **Chest** armour, and shields. Metal equipment is defined in **7.2.** A weapon, **Chest** armour, or shield can have only **one** Item Quality. Item Qualities do not stack with other Item Qualities unless a rule says otherwise.

A combatant cannot apply an **Item Quality** to **Unarmed Combat** unless a class feature, ancestry feature, item, or special rule explicitly allows it.

Add the listed value adjustment to the base item's cost when crafting or purchasing it. After applying all multipliers and flat value adjustments, a finished enhanced weapon, **Chest** armour, or shield has a minimum value set by its quality: **3c** for **Masterwork**, **Silvered**, and **Cold Iron**; **5c** for **Elven**, **Sacred**, and **Palesteel**; and the minimum listed by **Adamantine.** A quality that sets a higher minimum uses that minimum instead. Treasure tables that reference an **Enhanced Weapon Table**, **Enhanced Armour Table**, or **Enhanced Shield Table** grant the finished item shown on that table.

> *Example, Enhanced Value: A **Masterwork** Longsword costs 12c × 1.5 = **18c.** An **Adamantine** Buckler costs 1c × 4 = 4c, which is below the **60c** Adamantine shield minimum, so its value is **60c.***

Weapon Qualities

Weapon qualities that share a name with a weapon trait grant that exact trait from **Section 7.7.**

Quality	Value	Rule
Masterwork	×1.5 base value, minimum 3c	This weapon gains the **Masterwork** trait.
Silvered	×1.5 base value, minimum 3c	This weapon gains the **Silvered** trait.
Cold Iron	×1.5 base value, minimum 3c	This weapon gains the **Cold Iron** trait.
Elven	×2 base value, minimum 5c	This weapon gains the **Elven** trait.
Sacred	×2 base value, minimum 5c	This weapon gains the **Sacred** trait.
Palesteel	×2 base value, minimum 5c	This weapon gains the **Palesteel** trait.
Adamantine	×4 base value, minimum 10c	This weapon gains the **Adamantine** trait.
Enchanted +1	+8c	This weapon deals an additional **1 damage of that attack's primary damage type**.
Enchanted +2	+16c	This weapon deals an additional **2 damage of that attack's primary damage type**.
Enchanted +3	+24c	This weapon deals an additional **3 damage of that attack's primary damage type**.
Enchanted +4	+36c	This weapon deals an additional **4 damage of that attack's primary damage type**.
Enchanted +5	+50c	This weapon deals an additional **5 damage of that attack's primary damage type**.

Armour and Shield Qualities

A shield cannot take an **Enchanted +X** quality. Use the named shields in **Special Armour and Shields** in **7.17** instead.

Quality	Value	Rule
Masterwork	×1.5 base value, minimum 3c	**Chest or Shield:** Once per round, reroll one natural **1** when rolling this item's **AD**. A flat-AV shield instead gains **+1 AV** for one **Block** that round.
Silvered	×1.5 base value, minimum 3c	**Chest or Shield:** After a non-**Total Miss** melee attack made by a **Lycanthrope** against you resolves, the attacker suffers **1d6 holy damage**.
Cold Iron	×1.5 base value, minimum 3c	**Chest or Shield:** After a non-**Total Miss** melee attack made by a **Fey** against you resolves, the attacker suffers **1d6 fire damage**.
Elven	×2 base value, minimum 5c	**Metal only. Chest:** This item does not count as metal for the restrictions in **8.2**.
Sacred	×2 base value, minimum 5c	**Chest:** Add **+2** to **AD** rolls against attacks made by **Undead**, **Fiends**, and **Cursed** combatants. The wearer cannot become **Cursed**. **Shield:** Gain **+2 AV** when using **Block** against those attackers.
Palesteel	×2 base value, minimum 5c	**Metal only. Chest or Shield:** Reduce this item's **STR requirement** by **1**. If this would reduce the requirement below **1**, the item has no **STR Req**.
Enchanted +1	+7c	**Chest only:** Add **+1** to **AD** rolls.
Enchanted +2	+15c	**Chest only:** Add **+2** to **AD** rolls.
Enchanted +3	+24c	**Chest only:** Add **+3** to **AD** rolls.
Enchanted +4	+36c	**Chest only:** Add **+4** to **AD** rolls.
Enchanted +5	+48c	**Chest only:** Add **+5** to **AD** rolls.
Adamantine	×4 base value; minimum **60c** for Chest armour or a shield	**Metal only. Chest:** Add **+2** to **AD** rolls. When this item's **AD** is rolled against an attack, that attack cannot deal **Critical Hit** bonus damage or trigger **Critical Hit** effects against you. **Metal only. Shield:** Gain **+2 AV** when using **Block**. An attack modified by this **Block** cannot deal **Critical Hit** bonus damage or trigger **Critical Hit** effects against you.

Tier 1 Enhanced Weapon Table (d20)

d20	Item	Value (c)
1	Masterwork Dagger	3
2	Masterwork Club	3
3	Masterwork Mace	3
4	Masterwork Spear	6

17	Bulwark of the Ancients	80
18–19	The Aegis	124
20	Wall of the World	128

7.12 Shields

Shields occupy **Hands** and improve the **Block Reaction**. You cannot equip more than one shield or defensive off-hand item unless a rule says otherwise.

A shield uses **AD** when the wielder uses **Block**. A defensive off-hand item may state whether it can be used with **Block**, **Parry**, or as a weapon.

If a shield has **STR Req**, the wielder must meet that requirement to wield it. If a shield has **DEX Pen** or **Max Speed**, apply those values while the shield is wielded. If both armour and shield set **Max Speed**, use the lower value. If both Chest armour and a shield list a **DEX Pen**, apply only the worse of the two values; **DEX Pen** values do not stack.

Buckler
Cost (c) 1 **AD** d4 **STR Req** - **DEX Pen** 0 **Max Speed** 8"
Rule: You may use **Block** or **Parry** with a Buckler. If you use **Parry** with a Buckler, roll no parry base damage dice: the parry total is your **STR** or **DEX** modifier, whichever is higher. That **Parry** cannot be a **Critical Failure** and cannot deal **Riposte** damage.

Wooden Shield
Cost (c) 2 **AD** d4 **STR Req** - **DEX Pen** 0 **Max Speed** 8"
Rule: This shield is non-metal.

Targe
Cost (c) 4 **AD** d4 **STR Req** - **DEX Pen** 0 **Max Speed** 8"
Rule: When you use **Block** with a Targe against a melee weapon attack, add **+1** to the Targe's **AD** roll.

Round Shield
Cost (c) 5 **AD** d6 **STR Req** 1 **DEX Pen** 0 **Max Speed** 8"
Rule: -

Main-Gauche (Parrying Dagger)
Cost (c) 7 **AD** d4 **STR Req** - **DEX Pen** 0 **Max Speed** 8"
Rule: You may use **Block** or **Parry** with a Main-Gauche. It is also a **Light**, **Finesse** melee weapon that deals **1d4 piercing** damage.

Spiked Targe
Cost (c) 8 **AD** d4 **STR Req** 1 **DEX Pen** 0 **Max Speed** 8"
Rule: When you use **Block** with a Spiked Targe against a melee weapon attack, add **+1** to the Spiked Targe's **AD** roll. It is also a **Light** melee weapon that deals **1d4 piercing** damage.

Heater Shield
Cost (c) 9 **AD** d8 **STR Req** 2 **DEX Pen** -1 **Max Speed** 7"
Rule: -

Kite Shield
Cost (c) 12 **AD** d8 **STR Req** 2 **DEX Pen** -1
Max Speed 7"
Rule: When you use **Block** with a Kite Shield against a ranged weapon attack, add **+1** to the Kite Shield's **AD** roll.

Tower Shield
Cost (c) 21 **AD** d10 **STR Req** 4 **DEX Pen** -3
Max Speed 5"
Rule: Ranged weapon attacks and thrown weapon attacks made against you from more than **3"** away roll their base damage dice with **Disadvantage**.

Wall Shield
Cost (c) 16 **AD** d8 **STR Req** 3 **DEX Pen** -2
Max Speed 6"
Rule: When you use **Block** with a Wall Shield, add **+1** to the Wall Shield's **AD** roll, or **+2** instead if you are adjacent to an allied combatant wielding a shield.

Pavise
Cost (c) 30 **AD** d10 **STR Req** 4 **DEX Pen** -2
Max Speed 5"
Rule: **Deploy [1 AP]:** Place the Pavise touching your space. While deployed, it is **Cover Terrain**; it is not wielded, does not occupy **Hands**, and grants no **AD**. A deployed Pavise can be picked up by you or an adjacent ally with **Interact [1 AP]**.

7.13 Potions

Potion effects expire at the end of the round unless an item says otherwise.

7.13.1 Potion Use Rules

- Drinking, applying, or throwing a potion is a **[1 AP]** action unless the item's profile says otherwise.
- A potion affects only the stated target, weapon, or area.
- If two potion effects would grant the same type of bonus, apply only the highest bonus.
- **Thrown potions:** Choose an origin point within the listed range and **LOS**, then centre the listed area on that point.
- An oil, venom, or toxin applied to a weapon is a weapon-applied consumable: a weapon attack can benefit from no more than one such consumable, as stated in **7.14 Poisons**.
- Each rarity table contains **20 entries**, numbered **1–20**, for direct selection or d20 generation.

Tier 1 Potions

d20	Item	Cost (c)	Effect
1	Acid (Phosphoric)	1	**Thrown** 6" (Aura 1"): All affected combatants suffer **1d6 acid damage**.
2	Alchemist's Fire	2	**Thrown** 6" (Aura 1"): All affected combatants suffer **1d4 fire damage** now and **1d4 fire damage** at the end of the round.
3	Alchemist's Tinder	1	Ignite one flammable object or terrain feature within **3"**. The ignited object or terrain counts as a **Light Source** with **Aura 4"** until the end of the next round.
4	Antitoxin	1	Remove all poison effects from yourself. Until the end of the round, you are **Immune** to **poison**.
5	Cat's Eye	1	Until the end of the round, ignore **Cover** and visual penalties caused solely by nonmagical **Darkness** when determining **LOS** to, targeting, or resolving an effect against a combatant, object, space, or area origin within **12"** of you. This does not create **Light** or remove **Darkness**. **Magical Darkness** applies normally.
6	Flash Pellet	2	**Thrown** 6" (Aura 2"): All affected combatants reduce their **LOS** to **6"** and cannot use **Block** against ranged weapon attacks until the end of the round.
7	Fortifying Powder	1	Until the end of the round, you cannot be pushed, become **Prone**, or become **Immobilized**.
8	Liquid Courage	1	You are **Immune** to **Frightened** until the end of the round.
9	Oil of Lesser Sharpness	2	The weapon deals an additional **1 damage of that attack's primary damage type** until the end of the round.
10	Oil of Light	1	Item or weapon counts as a **Light Source** with **Aura 3"** until the end of the round.
11	Oil of Arcane Stones	2	Up to 3 thrown stones you throw this round deal an additional **1d4 arcane damage**.
12	Potion of Aggression	1	Your next melee attack this round deals an additional **1d4 damage of that attack's primary damage type**.
13	Potion of Climbing	1	Until the end of the round, you **Climb** without extra movement cost and with **Advantage** on **STR Checks** to **Climb**.
14	Healing Potion	1	Restore 1d6 HP.

d20	Item	Cost (c)	Effect
15	Potion of Poison	2	Your next weapon attack this round deals **poison damage** instead of its normal damage type and deals an additional **1d6 poison damage**.
16	Potion of Springing	1	Until the end of the round, during each **Move**, you may **Jump** up to **6"** without making a **DEX Check**. These **Jumps** may gain elevation.
17	Poison Smoke	1	**Thrown** 6" (Aura 2"): All affected combatants suffer **1d4 poison damage**.
18	Smokestick	1	Creates an **Aura 3"** area of smoke that provides **Cover** until the end of the round.
19	Tanglefoot Bag	2	**Thrown** 6" (Aura 1"): Each affected combatant must pass a **STR Check**. On a failure, their **Speed** becomes **0"** until the end of the round.
20	Thunderstone	2	**Thrown** 6" (Aura 1"): All affected combatants suffer **1d4 lightning damage** and cannot use **Reactions** until the end of the round.

Tier 2 Potions

d20	Item	Cost (c)	Effect
1	Acid (Sulfuric)	2	**Thrown** 6" (Aura 1"): All affected combatants suffer **1d8 acid damage**.
2	Gunpowder	2	**Thrown** 6" (Aura 1"): All affected combatants suffer **1d6 fire damage**; destroys mundane wood in the area.
3	Morning Star	2	Your next melee attack this round deals an additional **1d6 blunt damage**.
4	Oil of Darkness	3	Target area (**Aura 4"**) is **Darkness** with **LOS 0"** until the end of the next round.
5	Oil of Flame	3	A weapon you hold deals **fire damage** instead of its normal damage type until the end of the round and deals an additional **1d4 fire damage**.
6	Oil of Levitation	2	Immediately teleport up to **3"** to a legal unoccupied space you can see.
7	Oil of Shillelagh	3	A melee blunt weapon you hold deals an additional **2 damage of that attack's primary damage type** until the end of the round.
8	Oil of Slipperiness	3	An **Aura 3"** area becomes **Difficult Terrain** and **Slippery Terrain** until the end of the next round. The first time each combatant enters the area, **Slide** them **2"** directly away from the centre. They must then pass a **DEX Check**. On a failure, they become **Prone**.
9	Pomander of Warding	3	Until the end of the round, Undead and Fiends have **Disadvantage** on attack damage rolls and harmful Power or Special Ability **Checks** against you. You have **Advantage** on **Checks** made to resist their Powers, Special Abilities, and negative conditions.
10	Potion of Adaptation	2	Until the end of the round, ignore damage and conditions caused by weather and non-attack terrain or scenario effects involving environmental heat, cold, gas, or smoke. This does not protect against attacks, Powers, items, or deliberately created hazards.
11	Potion of Arcane Armour	4	Gain **+2 AV** until the end of the round.
12	Potion of Fire Breath	4	**Cone 4"**: All affected combatants suffer **1d6 fire damage**.

d20	Item	Cost (c)	Effect
13	Potion of Greater Healing	4	Restore **2d6 HP**.
14	Potion of Growth	3	Your melee attacks deal an additional **1 damage of that attack's primary damage type** and your melee attacks and **Reflex Attacks** may target otherwise valid enemies within **3"** until the end of the round.
15	Potion of Hill Giant's Strength	3	Gain **+3 STR** for attacks and **Checks** until the end of the round.
16	Potion of Arcane Strikes	2	Your next weapon attack this round deals **arcane damage** instead of its normal damage type and deals an additional **2 arcane damage**.
17	Potion of Rampage	3	Immediately make one melee weapon attack. This bonus attack ignores and does not count toward the multi-attack **Disadvantage** chain.
18	Potion of Recklessness	3	Your attack damage rolls deal an additional **2 damage of that attack's primary damage type** until the end of the round, but you have **-2 AV** until the end of the round.
19	Potion of Resistance	3	The next source of damage that would affect you this round deals half damage after any **Reaction** and **AD/AV** mitigation are applied, rounded down as normal.
20	Potion of Swimming	2	Gain **Swim (8")** until the end of the round.

Tier 3 Potions

d20	Item	Cost (c)	Effect
1	Acid (Hydrochloric)	5	**Thrown** 6" (Aura 1"): All affected combatants suffer **2d6 acid damage**.
2	Dragon Egg	10	Place a marker in an adjacent space. At the end of the round, it explodes in an Aura 3" for 2d6 fire damage.
3	Elixir of Health	8	Remove all negative conditions and restore 2d6 HP.
4	Oil of Invisibility	18	You become **Invisible** until the end of the round. This effect ends after your first attack, harmful Power, harmful Special Ability, **Push**, or **Trip** resolves. Attack damage rolls made while **Invisible** have **Advantage**.
5	Oil of Keen Edge	8	The weapon deals an additional **2 damage of that attack's primary damage type** until the end of the round.
6	Oil of Arcane Vestment	11	Armour gains **+2 AV** until the end of the round.
7	Potion of Ability Enhancement	9	Gain **+2** to one ability score of your choice (STR, DEX, INT, or SPI) until the end of the round.
8	Potion of Barkskin	7	Gain **+3 AV** until the end of the round.
9	Potion of Clairvoyance	9	Until the end of the round, you may draw **LOS** through **Cover Terrain** within **12"**. **Blocking Terrain** still blocks **LOS**.
10	Potion of Courage	7	Become **Immune** to **Frightened** and gain **+2 SPI** until the end of the round.
11	Potion of Displacement	8	Attacks against you have **Disadvantage** until the end of the round.
12	Potion of Evasion	8	The first harmful **Area of Effect** or **Explosion** that would affect you before the end of the round does not affect you.
13	Potion of Fire Giant's Strength	10	Gain **+5 STR** for attacks and **Checks** until the end of the round.

d20	Item	Cost (c)	Effect
14	Potion of Gaseous Form	8	Until the end of the round, you gain **Fly (8")**, may move through terrain and occupied spaces, cannot be chosen as the target of enemy attacks, Powers, or Special Abilities that require **LOS**, and are **Resistant** to all damage. You cannot attack, cast Powers, use **Block** or **Parry**, or control objectives.
15	Potion of Greater Arcane Strikes	9	Your next Power or weapon attack this round deals **arcane damage** instead of its normal damage type and deals an additional **3 arcane damage**.
16	Potion of Heroism	9	Gain **Temporary HP** = 12 until the end of the round, gain **+2** to all **Checks**, and become **Immune** to **Frightened** until the end of the round.
17	Potion of Spellward	6	The first time before the end of the round that an enemy Power, scroll, or effect from a special item targets you or includes you in its area, make a **SPI Check**. On a success, that effect does not affect you.
18	Potion of Shadow Teleportation	10	Teleport from one legal space adjacent to **Cover Terrain** to another legal unoccupied space adjacent to **Cover Terrain** within **18"**.
19	Potion of Spider Climb	5	Until the end of the round, you may move across walls and ceilings without extra movement cost and without **STR Checks** to **Climb**.
20	Potion of Superior Healing	12	Restore 3d6 HP.

Tier 4 Potions

d20	Item	Cost (c)	Effect
1	Draught of Fine Fettle	20	Restore all HP, remove all negative conditions from the target, and gain **+2** to all **Checks** until the end of the round.
2	Oil of Etherealness	19	Until the end of the round, you may move through solid terrain and occupied spaces as though they were empty. You cannot end movement inside solid terrain, inside another combatant's space, or beyond the battlefield edge. If you would, place yourself in the nearest legal space instead.
3	Oil of Greater Arcane Vestment	26	Armour gains **+4 AV** until the end of the round. Attacks cannot deal **Critical Hit** bonus damage or trigger **Critical Hit** effects against you.
4	Oil of Sharpness	22	The weapon deals an additional **4 damage of that attack's primary damage type** until the end of the round.
5	Potion of Broodguard Transformation	22	You are **Immune** to **Frightened**, are **Resistant** to **psychic** damage, gain **+4 STR**, and gain **+2 AV** until the end of the round.
6	Potion of Cloud Giant's Strength	24	Gain **+6 STR** for attacks and **Checks** until the end of the round. Your melee attacks deal an additional **2 damage of that attack's primary damage type** until the end of the round.
7	Potion of Faith Shielding	24	You are **Resistant** to damage from Powers, scrolls, and effects from special items until the end of the round. You have **Advantage** on **Checks** made to resist enemy Powers, scrolls, and effects from special items.

d20	Item	Cost (c)	Effect
8	Potion of Flying	24	Gain **Fly (12")** until the end of the round. If you moved at least 4" before attacking this round, your attacks deal an additional **2 damage of that attack's primary damage type**.
9	Potion of Immunity	34	Choose one damage type or one negative condition when you drink this potion. Until the end of the round, you are **Immune** to the chosen damage type or cannot gain the chosen condition.
10	Potion of Invisibility	24	Become **Invisible** until the end of the round. This effect ends after your first attack, harmful Power, or harmful Special Ability resolves, but does not end when you use **Push** or **Trip**. Attack damage rolls made while **Invisible** have **Advantage**.
11	Potion of Longevity	32	Gain **Temporary HP** = 12 until the end of the round and gain **Resistant** to all damage until the end of the round.
12	Potion of Polymorph	28	Choose one Monster profile with the **Beast** Special Ability and **LVL 4** or lower. Until the end of the round, your **Speed**, **Sz**, and **AV** become its printed values, you gain **Small** if that **Sz** is **S** and otherwise lose it, you gain its listed movement traits, and one listed melee attack becomes your natural weapon; add your **STR** to that attack once, and treat it as a melee weapon attack for actions, **Multiple Attacks**, and class features. The printed **AV** applies automatically under the normal AV rules; you cannot use chest armour, shields, **Block**, **Parry**, equipped weapons, or items that require Hands. Keep your own HP, Wounds, AP, NRG, ability scores, objective control, and all other rules; do not gain **Multi-Attack**, AI Steps, creature tags, or other Special Abilities.
13	Potion of Protection from Arrows	34	Gain **+4 AV** against ranged weapon attacks until the end of the round. You are **Resistant** to damage from ranged weapon attacks and harmful ranged Powers.
14	Potion of Protection from Poison	24	Remove all poison effects from yourself. Until the end of the round, you are **Immune** to **poison** and **necrotic**.
15	Potion of Rage	24	Immediately gain **+1 AP**, which must be spent during the current activation. Your melee attack damage rolls deal an additional **2 damage of that attack's primary damage type**, and you are **Immune** to **Frightened** until the end of the round.

d20	Item	Cost (c)	Effect
16	Potion of Superior Blindsight	24	Until the end of the round, within **18"** you ignore **Blinded**, may draw **LOS** through **Cover Terrain**, ignore **Cover** caused by visibility effects, and may target **Hidden** and **Invisible** combatants as though they were visible. Physical terrain and intervening combatants provide **Cover** normally, and **Blocking Terrain** still blocks **LOS**. Your attack damage rolls against those combatants gain **Advantage**.
17	Potion of Superior Darkvision	24	Until the end of the round, ignore **Cover** and visual penalties caused solely by nonmagical **Darkness** when determining **LOS** to, targeting, or resolving an effect against a combatant, object, space, or area origin within **24"** of you. This does not create **Light** or remove **Darkness**. **Magical Darkness** applies normally.
18	Potion of Superior Arcane Strikes	30	Your next **two** weapon attacks or Powers this round deal **arcane damage** instead of their normal damage type and each deals an additional **5 arcane damage**.
19	Potion of Speed	26	Immediately gain **+1 AP**, which must be spent during the current activation. Until the end of the round, gain **+3" Speed**.
20	Stone Salve	34	Remove **Immobilized**, **Stunned**, and **Prone** from the target and restore 1d6 HP.

Tier 5 Potions

d20	Item	Cost (c)	Effect
1	Oil of Superior Arcane Vestment	56	Armour gains **+6 AV** until the end of the round. Attacks cannot deal **Critical Hit** bonus damage or trigger **Critical Hit** effects against you.
2	Potion of Hope	62	Each ally within **6"** gains **Temporary HP** = 12 until the end of the round, removes 1 negative condition from themselves, and gains **Advantage** on all **Checks** until the end of the round.
3	Potion of Levitation	52	Gain **Fly (14")** until the end of the round. You may pass through enemy spaces during this movement and ignore all terrain. You may end this movement in the air; you do not fall until the end of the round.
4	Potion of Spell Circle	72	You are **Resistant** to damage from Powers, scrolls, and effects from special items until the end of the round. You are **Immune** to **psychic**, **Frightened** and **Silenced**, and have **Advantage** on **Checks** made to resist enemy Powers, scrolls, and effects from special items.
5	Potion of Recall	58	Instantly teleport to any space you previously occupied this round or to one empty space adjacent to one allied combatant within **LOS** and within **12"**. After teleporting, you may make one free attack or cast one [**1 AP**] Power.
6	Potion of Remove Curse	50	Remove **Cursed**, all other curse effects, **Frightened**, and one Wound from the target.
7	Potion of Restoration	56	Remove all negative conditions, remove 1 Wound, and restore 3d6 HP.

d20	Item	Cost (c)	Effect
8	Potion of Sanctuary	56	Gain **+3 AV**. Until you attack, cast a Power, use a Special Ability, or the round ends, enemies farther than 6" away cannot choose you as the target of attacks, Powers, or Special Abilities that require **LOS**.
9	Potion of Shadow	56	Become **Invisible** until the end of the round. While you are in **Darkness**, attack damage rolls and damaging Powers you resolve while **Invisible** deal an additional **3 damage of that effect's primary damage type**. This effect ends after your first attack, harmful Power, harmful Special Ability, **Push**, or **Trip** resolves.
10	Potion of Hrugguk	50	Your melee attacks deal an additional **3 damage of that attack's primary damage type**, and you are **Resistant** to **blunt**, **piercing**, and **slashing** until the end of the round.
11	Potion of Stone Giant's Strength	52	Gain **+7 STR** for attacks and **Checks** until the end of the round. Your melee attacks deal an additional **3 damage of that attack's primary damage type** until the end of the round.
12	Potion of Storm Giant's Strength	80	Gain **+8 STR** for attacks and **Checks** until the end of the round. Your melee attacks deal an additional **4 damage of that attack's primary damage type** and ignore **2 AV** until the end of the round.
13	Potion of Supreme Healing	66	Restore 4d6 HP and remove one negative condition.
14	Potion of Adamant Constitution	106	Gain **Temporary HP** = 12 until the end of the round, gain **+4 AV**, and become **Resistant** to all damage until the end of the round. Until the end of the round, attacks against you cannot deal **Critical Hit** bonus damage or trigger **Critical Hit** effects.
15	Potion of Titanic Strength	90	Until the end of the round, your melee attacks deal an additional **6 damage of that attack's primary damage type**, ignore **2 AV**, and may target otherwise valid enemies **2"** farther than normal with melee attacks during your activation.
16	Potion of Tremorsense	52	Detect all movement within **14"**, even through walls, until the end of the round. Targets detected this way cannot benefit from **Hidden** or **Invisible** against you.
17	Potion of Truesight	68	Until the end of the round, you ignore **Cover**, may draw **LOS** through **Cover Terrain**, and ignore maximum **LOS** distances and other visual restrictions caused by **Darkness**, fog, smoke, weather, or similar visibility effects. **Hidden**, **Invisible**, illusions, and disguise effects do not prevent you from targeting enemies within **LOS**. You still cannot target through **Blocking Terrain**. Your attack damage rolls against affected targets gain **Advantage**.
18	Potion of Ultimate Resilience	96	Remove all negative conditions from yourself. Until the end of the round, you are **Resistant** to all damage and cannot gain **Bleeding**, **Burning**, **Frightened**, **Immobilized**, **Prone**, **Silenced**, **Stunned**, or **Weakened**.

d20	Item	Cost (c)	Effect
19	Potion of Vitality	104	Remove all Wounds, restore 4d6 HP, and remove all negative conditions from the target.
20	Oil of Supreme Sharpness	70	The weapon deals an additional **6 damage of that attack's primary damage type** until the end of the round.

7.14 Poisons

Poison effects resolve as part of the attack that delivers them unless a rule says otherwise.

7.14.1 Poison Use Rules

- Applying a poison costs **[1 AP]** unless another rule says otherwise.
- A poison coats **one weapon**.
- The poison takes effect the first time an attack made with that weapon damages a target, or expires at the end of the round, whichever comes first. An attack that deals no damage, including one negated by a **Reaction**, does not trigger or consume the poison. Determine whether the attack damages the target before adding the poison's own damage.
- Only **one poison** may be active on a weapon at a time. Applying a new poison replaces the old one.
- A weapon attack can benefit from no more than one poison, oil, venom, toxin, or similar weapon-applied consumable. If more than one would apply, choose one before resolving damage.
- If an attack can affect multiple targets, choose one target before rolling damage. The poison affects only that target unless the poison says otherwise.
- A poison never affects the user unless an item or ability explicitly says so.
- A combatant that is **Immune** to **poison** ignores poison damage and any non-damage effects delivered by that poison. Damage of other types resolves normally.
- Each rarity table contains **20 entries**, numbered **1–20**, for direct selection or d20 generation.

> *Example, Poison Delivery: A Rogue attacks with a Shortsword coated in Spidermilk Venom. The target rolls their **AD**; the attack's slashing damage is reduced by **AV**, but the final damage total is still 1 or higher, so the target is damaged and the poison takes effect: they suffer an additional **1d4 poison damage**, which ignores **AV**, and their **Speed** is reduced by 2" until the end of the round. If the target had instead succeeded on a **Dodge**, the attack would deal no damage and the poison would remain on the weapon.*

Tier 1 Poisons

d20	Item	Cost (c)	Effect
1	Basic Venom	1	The weapon attack deals an additional **1d4 poison damage**.
2	Bitterroot Sap	2	The weapon attack deals an additional **1d4 poison damage**; target cannot gain HP until the end of the round.
3	Nerve Oil	2	The weapon attack deals an additional **1d4 poison damage**; target cannot use **Reactions** until the end of the round.
4	Spidermilk Venom	2	The weapon attack deals an additional **1d4 poison damage**; target's **Speed** is reduced by 2" until the end of the round.
5	Cloudcap Extract	2	The weapon attack deals an additional **1d4 poison damage**; target's **LOS** is reduced to 6" until the end of the round.
6	Sicklethorn Resin	2	The weapon attack deals an additional **1d4 poison damage**; target suffers -1 AV until the end of the round.
7	Carrion Kiss	2	The weapon attack deals an additional **1d4 poison damage**; the target suffers **-1** on **Checks** until the end of the round.
8	Crowshade Oil	2	The weapon attack deals an additional **1d4 poison damage**; target cannot **Shift** until the end of the round.
9	Feverleaf Essence	2	The weapon attack deals an additional **1d4 poison damage**; target cannot gain **Advantage** until the end of the round.
10	Mire Newt Venom	2	The weapon attack deals an additional **1d4 poison damage**; **Push** the target **1"** directly away from the attacker.
11	Rotgut Toxin	2	The weapon attack deals an additional **1d6 poison damage**.
12	Salt Widow Venom	3	The weapon attack deals an additional **1d6 poison damage**; target cannot **Climb** or **Jump** until the end of the round.
13	Ashmoth Dust	3	The weapon attack deals an additional **1d6 poison damage**; target is a **Light Source** with **Aura 1"** until the end of the round and cannot benefit from **Hidden** or **Invisible**.
14	Blackbriar Sap	3	The weapon attack deals an additional **1d6 poison damage**; the target's melee attacks deal -2 damage until the end of the round.
15	Toadspit Extract	3	The weapon attack deals an additional **1d6 poison damage**; target cannot use **Reactions** until the end of the round.
16	Hookvine Milk	3	The weapon attack deals an additional **1d6 poison damage**; until the end of the round, the target cannot use voluntary movement granted by an allied effect.
17	Pale Ichor	3	The weapon attack deals an additional **1d6 poison damage**; target loses **1" Speed** until the end of the round.
18	Grave Eel Slime	3	The weapon attack deals an additional **1d6 poison damage**; target cannot benefit from cover until the end of the round.
19	Hagthorn Resin	3	The weapon attack deals an additional **1d6 poison damage**; target cannot restore NRG until the end of the round.

d20	Item	Cost (c)	Effect
20	Greenadder Venom	3	The weapon attack deals an additional **1d6 poison damage** and **+1 additional poison damage** for each Wound the target currently has.

Tier 2 Poisons

d20	Item	Cost (c)	Effect
1	Serpent's Bite	4	The weapon attack deals an additional **2d4 poison damage**; target cannot gain HP until the end of the round.
2	Paralytic Oil	4	The weapon attack deals an additional **1d6 poison damage**; target's **Speed** becomes **0"** until the end of the round.
3	Blinding Toxin	4	The weapon attack deals an additional **1d6 poison damage**; target's **LOS** becomes 2" until the end of the round.
4	Mindfog Extract	4	The weapon attack deals an additional **2 poison damage**; target cannot use **Reactions** and suffers -1 INT and -1 SPI until the end of the round.
5	Nightshade Distillate	4	The weapon attack deals an additional **1d4 poison damage**; if the target has any AP remaining this round, they immediately lose 1 AP.
6	Crimsonroot Poison	5	The weapon attack deals an additional **2d4 poison damage**; the target's **AV** is reduced by **2** until the end of the round.
7	Seastrider Venom	4	The weapon attack deals an additional **2d4 poison damage**; target cannot **Shift** or be moved by allied effects until the end of the round.
8	Frostcap Extract	3	This poison's additional damage is **ice** instead of poison. The weapon attack deals an additional **1d4 ice damage**; target becomes **Slowed**.
9	Widow's Mercy	3	The weapon attack deals an additional **1d6 poison damage**; target cannot make **Reflex Attacks** or use **Reactions** until the end of the round.
10	Bonechip Toxin	4	The weapon attack deals an additional **1d6 poison damage**; target's attacks suffer **Disadvantage** until the end of the round.
11	Manticore Draught	4	The weapon attack deals an additional **1d6 poison damage**; if the target is already Wounded, deal an additional **1d6 poison damage**.
12	Moonadder Venom	3	The weapon attack deals an additional **1d6 poison damage**; target cannot benefit from healing until the end of the round.
13	Slytongue Resin	4	The weapon attack deals an additional **1d6 poison damage**; target cannot cast Powers until the end of the round.
14	Rotsting Gel	4	The weapon attack deals an additional **2d4 poison damage**; until the end of the round, the target suffers **-1 AV**.
15	Gloomcap Venom	3	The weapon attack deals an additional **1d6 poison damage**; target cannot draw **LOS** beyond 6" until the end of the round.
16	Ironthorn Extract	4	The weapon attack deals an additional **2d4 poison damage**; target cannot take the **Push** or **Trip** action until the end of the round.

d20	Item	Cost (c)	Effect
17	Razorbloom Toxin	4	The weapon attack deals an additional **2d4 poison damage**; target loses **1 HP** at the end of the round.
18	Pale Dream Venom	4	The weapon attack deals an additional **1d6 poison damage**; target cannot contest objectives until the end of the round.
19	Sable Mucus	4	The weapon attack deals an additional **1d6 poison damage**; target's Power and Special Ability **Checks** are made with **Disadvantage** until the end of the round.
20	Thornmantle Oil	5	The weapon attack deals an additional **2d6 poison damage**; target cannot move through allied combatants or narrow gaps until the end of the round.

Tier 3 Poisons

d20	Item	Cost (c)	Effect
1	Assassin's Essence	4	The weapon attack deals an additional **2d6 poison damage**.
2	Deathspore Resin	7	The weapon attack deals an additional **2d6 poison damage**; a non-Hero target reduced to **0 HP** by the attack is immediately removed from play. A Hero resolves being reduced to **0 HP** normally.
3	Vampiric Toxin	8	The weapon attack deals an additional **2d4 poison damage**; if the attack deals any poison damage, the attacker gains **Temporary HP** = 5 until the end of the round.
4	Wyvern Poison	4	The weapon attack deals an additional **2d6 poison damage**.
5	Deep Elf Sleep Poison	9	The weapon attack deals an additional **2d6 poison damage**. After that damage resolves, the target must pass a **SPI Check**. On a failure, the target becomes **Sleeping**.
6	Soulrot Venom	9	The weapon attack deals an additional **1d8 poison damage**; target cannot cast Powers or use Special Abilities until the end of the round.
7	Ghost Lotus	10	The weapon attack deals an additional **2d6 poison damage**; the target may move through combatants and terrain but cannot end their movement inside either, becomes **Invisible**, and cannot attack or contest objectives until the end of the round.
8	Dragonbile	10	This poison's additional damage is **acid** instead of poison. The weapon attack deals an additional **2d8 acid damage**; if the target is reduced to 0 HP, one mundane Chest or Hands item they carry is destroyed.
9	Sorrow Sap	3	The weapon attack deals an additional **1d6 poison damage**; target cannot heal until the end of the round.
10	King's Bane	10	The weapon attack deals an additional **2d6 poison damage**; the target suffers **-2** on all **Checks** until the end of the round.
11	Mindlock Venom	10	The weapon attack deals an additional **2d6 poison damage**; choose one Power the target knows of the highest Tier they know. The target cannot cast that Power until the end of the round.

d20	Item	Cost (c)	Effect
12	Gravetide Ichor	18	The weapon attack deals an additional **2d6 poison damage**; **Undead** and **Fiends** instead suffer an additional **4d6 poison damage**.
13	Raptor Venom	11	The weapon attack deals an additional **2d6 poison damage**; the attacker may immediately **Shift 3"** after the attack.
14	Hexblood Distillate	12	The weapon attack deals an additional **2d6 poison damage**; end one ongoing Power, potion, scroll, or Special Ability effect currently granting the target a bonus. Do not end conditions, passive equipped-item benefits, Summons, or permanent changes.
15	Leviathan Ink	12	The weapon attack deals an additional **2d6 poison damage**; the target's **Speed** becomes **0"**, they become **Prone** if able, and they drop from climbing surfaces.
16	Black Gale Toxin	12	The weapon attack deals an additional **2d6 poison damage**; the attacker may **Slide** the target up to **3"** in a direction of their choice.
17	Cinder Asp Venom	12	The weapon attack deals an additional **4d6 fire damage** and applies **Burning** until the end of the round.
18	Hollowheart Oil	12	The weapon attack deals an additional **2d6 poison damage**; target cannot gain bonus AP, use [**0 AP**] **Actions**, or gain free movement until the end of the round.
19	Widow Queen Venom	13	The weapon attack deals an additional **3d6 poison damage**; until the end of the round, the target cannot gain **HP, AP, NRG, AV,** or **Speed** or any bonus from an allied Power, item, or Special Ability.
20	Starved God Sap	14	The weapon attack deals an additional **2d8 poison damage**; if the target has no remaining NRG after the attack resolves, they also cannot use **Reactions** until the end of the round.

Tier 4 Poisons

d20	Item	Cost (c)	Effect
1	Basilisk Gall	18	The weapon attack deals an additional **1d6 poison damage**; the target becomes **Stunned**. Until the end of the round, the target gains **+4 AV** and cannot be moved by forced movement.
2	Chimera Venom	19	The weapon attack deals an additional **2d6 poison damage** and **2d6 fire damage**.
3	Medusa's Breath	20	The weapon attack deals an additional **2d8 poison damage**; target's **LOS** becomes **2"** and **Speed** becomes **0"** until the end of the round.
4	Drakescour Acid	22	This poison's additional damage is **acid** instead of poison. The weapon attack deals an additional **3d6 acid damage**.
5	Nightmare Extract	22	The weapon attack deals an additional **3d6 poison damage**; target cannot gain **Advantage** or bonuses granted by allied abilities until the end of the round.
6	Corpsefire Ichor	28	The weapon attack deals an additional **3d6 poison damage**; **Undead, Fiends,** and **Summons** suffer an additional **3d6 poison damage**.

d20	Item	Cost (c)	Effect
7	Mournblade Distillate	24	The weapon attack deals an additional **3d6 poison damage**; if the attack deals any poison damage, the attacker gains **Temporary HP** = 5 until the end of the round and restores 1 NRG.
8	Gorgon Resin	24	The weapon attack deals an additional **3d6 poison damage**; the target's **AV** becomes **0** until the end of the round.
9	Kraken Venom	24	The weapon attack deals an additional **3d6 poison damage**; **Pull** the target **4"** directly toward the attacker, and the target cannot willingly move away from the attacker until the end of the round.
10	Dire Widow Ichor	24	The weapon attack deals an additional **3d6 poison damage**; if the target is already Wounded, they lose all remaining AP and their **Speed** becomes **0"** until the end of the round.
11	Hollow Moon Toxin	24	The weapon attack deals an additional **3d6 poison damage**; target cannot cast or be the target of beneficial Powers until the end of the round.
12	Emperor Scorpion Venom	26	The weapon attack deals an additional **4d6 poison damage**.
13	Void Leech Sap	28	The weapon attack deals an additional **3d6 poison damage**; target loses 1d4 NRG and the attacker gains the same amount.
14	Pale Queen's Kiss	28	The weapon attack deals an additional **2d6 poison damage**. If the target is a **Hero** with at least **1 Wound** and suffers any poison damage from this item, that Hero gains 1 additional Wound.
15	Grave Orchid Distillate	28	The weapon attack deals an additional **3d6 poison damage**; if the target is reduced to 0 HP, choose one enemy within **3"** of them to suffer **1d6 poison damage**.
16	Hellmantis Toxin	30	The weapon attack deals an additional **4d6 poison damage**; target cannot use Hands items or make weapon attacks until the end of the round.
17	Moonwell Corruption	32	The weapon attack deals an additional **3d6 poison damage**; end every ongoing Power, potion, scroll, or Special Ability effect currently granting the target a bonus. Do not end conditions, passive equipped-item benefits, Summons, or permanent changes.
18	Crownbreaker Venom	32	The weapon attack deals an additional **4d6 poison damage**; target cannot contest objectives until the end of the round.
19	Leviathan Black	36	The weapon attack deals an additional **4d6 poison damage** and ignores resistance to poison damage.
20	Saintkiller Toxin	46	The weapon attack deals an additional **3d8 poison damage**; a target that knows one or more **Divine Prayers** also suffers an additional **1d8 poison damage** and cannot cast Powers until the end of the round.

Tier 5 Poisons

d20	Item	Cost (c)	Effect
1	Ichor of the Abyss	64	The weapon attack deals an additional **5d6 poison damage**.

d20	Item	Cost (c)	Effect
2	Black Lotus	52	The weapon attack deals an additional **3d8 poison damage**; if the target is reduced to 0 HP, the attacker immediately gains **+1 AP**.
3	World Serpent Venom	76	The weapon attack deals an additional **4d6 poison damage**; target cannot move, heal, or use **Reactions** for the rest of the round.
4	Moonless Kiss	60	The weapon attack deals an additional **4d6 poison damage**; the target loses all remaining AP this round. End every ongoing Power, potion, scroll, or Special Ability effect currently granting the target a bonus. Do not end conditions, passive equipped-item benefits, Summons, or permanent changes.
5	Death Angel Ichor	62	The weapon attack deals an additional **4d6 poison damage**; if the target is a Hero and is reduced to 0 HP, they cannot be returned to play this round.
6	Eclipse Extract	66	The weapon attack deals an additional **4d6 poison damage**; target's **LOS** becomes 0" and they cannot be chosen as the target of allied abilities until the end of the round.
7	Void Widow Venom	68	The weapon attack deals an additional **5d6 poison damage**; target cannot benefit from armour, shields, or Power-based protection until the end of the round.
8	Godsbane Distillate	72	The weapon attack deals an additional **4d8 poison damage**; a target that knows at least one Power also loses all NRG.
9	Grave King's Bile	96	The weapon attack deals an additional **5d6 poison damage**; all enemies within 2" of the target suffer **1d6 poison damage**.
10	Dream Eater Venom	78	The weapon attack deals an additional **4d6 poison damage**; against a **Sleeping** target, roll those dice with **Advantage**. The target cannot cast Powers or use Special Abilities until the end of the round.
11	Phoenix-Eater Toxin	80	The weapon attack deals an additional **4d6 poison damage**; target cannot be healed or resurrected until the end of the round.
12	Crown of Flies Resin	84	The weapon attack deals an additional **4d6 poison damage**; if the target has any AP remaining this round, they immediately lose 1 AP and suffer **-2** on **Checks** until the end of the round.
13	Starless Ichor	88	The weapon attack deals an additional **5d6 poison damage**; the attacker may immediately teleport **6"** after the attack resolves.
14	Krakenheart Venom	90	The weapon attack deals an additional **5d6 poison damage**; **Slide** the target up to **6"** to a legal space chosen by the attacker, and the target cannot willingly move until the end of the round.
15	False Mercy	94	The weapon attack deals an additional **4d6 poison damage**; target cannot benefit from any ally within 6" until the end of the round.
16	Tomb Sun Elixir	115	The weapon attack deals an additional **4d6 poison damage**. Against **Undead, Fiends,** and **Celestial** combatants, it also deals an additional **4d6 holy damage**.

d20	Item	Cost (c)	Effect
17	Widowmaker Supreme	130	The weapon attack deals an additional **5d6 poison damage**; if the attack is a **Critical Hit**, it deals an additional **2d6 poison damage** from this item. These additional dice do not explode.
18	Oblivion Sap	106	The weapon attack deals an additional **5d6 poison damage**; end one ongoing summon, form change, or transformation effect affecting the target.
19	Neverwake Venom	110	The weapon attack deals an additional **4d8 poison damage**; target loses all remaining AP and cannot use **Reactions** until the end of the round.
20	Ender's Draught	150	The weapon attack deals an additional **6d6 poison damage**; the target cannot heal until the end of the round. If this attack reduces a **Hero** to **0 HP**, that Hero gains 1 additional Wound after the attack resolves.

7.15 Scrolls

Scroll Rules

- Scrolls are **one-use items**.
- Scrolls exist for **Arcane Spells** and **Divine Prayers** only.
- A Hero uses a scroll with the **Read Scroll [1 AP]** action in **4.3.4**.
- Any Hero may use any scroll that Hero has equipped.
- A scroll is equipped if it is assigned to that Hero for the current adventure and is not in **Storage**.
- Using a scroll always costs **[1 AP]**, regardless of the Power or effect the scroll is based on.
- A scroll does not consume **NRG**.
- A scroll is destroyed when used, whether the **Casting Check** succeeds or fails.
- The user must make the scroll's **Casting Check**:
  - **Arcane scrolls: INT Check**
  - **Divine scrolls: SPI Check**
  - **Target number: 12**
- If the Hero would not otherwise have access to the Power on the scroll because of class, tradition, or Level restriction, make the **Casting Check** with **Disadvantage**.
- If the scroll's declared target or initial area would require one or more **Monsters** to make a **STR**, **DEX**, **INT**, or **SPI Check**, and any such Monster's **LVL** is higher than the Hero's Level, make the scroll's **Casting Check** with **Disadvantage**. Resolve those Monster Checks under **2.3**.
- On a **natural 1**, resolve the normal critical-failure consequence for that scroll type. Arcane scrolls use **Arcane Mishaps**. Divine scrolls use **Divine Rebuke**.
- On a natural **20**, the scroll succeeds as a **Critical Cast**. Treat the scroll's printed effect as the Power for the Critical Cast rules in **8.2**.
- The metal equipment restrictions in **8.2** apply to using a scroll exactly as they apply to casting a Power of that scroll's tradition.
- A scroll may be used as a **Reaction** only if its own entry is marked as a **Reaction**. It still costs **[1 AP]**.
- A Hero may use no more than **1 scroll per round**. A scroll used as a **Reaction** counts against this limit.
- **Scroll targets and geometry:** If a scroll gives a Range and refers to "the target" without stating a target count, choose **1** legal target within that Range and **LOS**. If a scroll gives a Range followed by an area, place the centre of that area within the stated Range and **LOS**. If it gives a line or cone without an origin, it originates at the scroll's user. If it gives an Aura without a centre, centre that Aura on the user. If it gives a square or another placed area without a Range, place the centre of that area within **6"** and **LOS** of the user. An area affects only the categories of combatant or object named by its entry.
- **Scroll durations:** If a scroll creates an ongoing effect and gives no duration, that effect ends at the end of the current round. This default does not replace the normal expiry of a named condition. Instantaneous effects and explicitly permanent changes are unaffected.
- Each scroll table contains **20 entries**, numbered **1–20**, for direct selection or d20 generation.
- Scroll tier maps directly to Power tier: **Tier 1 = low-tier Powers**, **Tier 2 = mid-tier Powers**, and **Tier 3 = high-tier Powers**.

> *Example, Scroll Use: A Fighter with **INT 1** uses **Read Scroll [1 AP]** with a Scroll of Arcane Salvo. The Fighter has no access to Arcane Spells, so the **Casting Check** (an **INT Check** against **12**) is made with **Disadvantage**. The Fighter rolls 14 and 9, keeps the 9, adds **INT** for a total of 10, and fails. The scroll is destroyed, no **NRG** is spent, and the **[1 AP]** is not refunded.*

Resurrection scrolls: A scroll that returns a dead Hero can return only an allied Hero who died during the current adventure and is still represented by their model or a death marker. Place each returned Hero **Prone** in that space with the HP and Wounds stated by the scroll. A resurrection scroll cannot reverse **Retirement**, **Triumph**, or a death that a scenario says cannot be reversed. If a scroll returns more than one Hero, apply these requirements separately to each Hero.

Tier 1 Arcane Scrolls

d20	Item	Cost (c)	Effect
1	Scroll of Arcane Salvo	3	Range 24". Choose **1–3** targets in range and **LOS**. Resolve three separate **1d4 + 1 arcane damage** rolls, assigning each roll to one chosen target. Each roll is a separate effect.
2	Scroll of Shield	3	**[1 AP Reaction]: Trigger:** You are chosen as the target of an attack. **Effect:** Gain **+3 AV** until the end of the round.
3	Scroll of Mage Hand	3	Interact with one eligible target within **6"**.
4	Scroll of Arcane Bolt	3	Range 20". Deal **1d8 lightning damage**.
5	Scroll of Burning Hands	3	Attack all targets in a **Cone 3"** in front of you. Deal **1d6 fire damage** to each target.
6	Scroll of Ice Ray	3	Range 18". Deal **1d6 ice damage**; target's **Speed** is reduced by 2" until the end of the round.
7	Scroll of Mirror Image	5	**[1 AP Reaction]: Trigger:** You are chosen as the target of an attack. **Effect:** Until the end of the round, attack damage rolls against you have **Disadvantage**.
8	Scroll of Mage Armour	3	Self only. Gain **+2 AV** until the end of the round.
9	Scroll of Sleep	5	Range 12". The target must pass a **SPI Check**. On a failure, the target becomes **Sleeping**.
10	Scroll of Feather Fall	2	**[1 AP Reaction]: Trigger:** You or 1 ally within **12"** would suffer HP loss or become **Prone** from falling. **Effect:** Prevent that HP loss and becoming **Prone** from that fall.
11	Scroll of Grease	2	Create a **3"×3"** square of **Difficult Terrain** and **Slippery Terrain**. **Slide** a combatant entering it **2"** directly away from the centre of that area.
12	Scroll of Fog Cloud	3	Create a 4"×4" square area of fog that provides **Cover** until the end of the round.
13	Scroll of Thunderwave	5	2"×2" square. All combatants in the area suffer **1d8 arcane damage** and are **Pushed 2"** directly away from the centre.
14	Scroll of Levitate	3	Self or ally within **6"** ignores HP loss and **Prone** caused by **Falling**, and may **Jump** up to **6"** without a **DEX Check**, until the end of the round.
15	Scroll of Expeditious Retreat	3	Self only. Gain **+3" Speed** until the end of the round; you cannot move toward enemies this activation.
16	Scroll of Arcane Step	5	Teleport to one legal unoccupied space within **LOS** and within **6"**.
17	Scroll of Lightning Lure	5	Range 12". **Pull** the target **4"** directly toward you, then deal **1d4 lightning damage**.
18	Scroll of Chromatic Orb	5	Range 18". Deal **2d6 arcane damage**.
19	Scroll of Minor Telekinesis	3	Move one unattended object up to 12".
20	Scroll of Enlarge	5	Self or one ally within **6"** gains **+1 AV** and may make melee attacks and **Reflex Attacks** against otherwise valid enemies within **3"** until the end of the round. Their melee attacks deal an additional **1d4 damage of that attack's primary damage type** until the end of the round.

Tier 2 Arcane Scrolls

d20	Item	Cost (c)	Effect
1	Scroll of Fireball	10	Range 24". 2"×2" square. Deal **3d6 fire damage** to all combatants in the area.
2	Scroll of Lightning Bolt	10	**Line 12"**. Deal **2d8 lightning damage** to all combatants in the line.

d20	Item	Cost (c)	Effect
3	Scroll of Invisibility	10	Self only. You become **Invisible** until the end of the round. This effect ends after your first attack, harmful Power, harmful Special Ability, **Push**, or **Trip** resolves.
4	Scroll of Fly	10	Self or ally within **12"** gains **Fly (12")** and ignores movement penalties from terrain until the end of the round.
5	Scroll of Spellbreak	14	**[1 AP Reaction]: Trigger:** An enemy within **12"** of you declares a **Tier 0, Tier 1, or Tier 2 Arcane Spell or Sorcery**. **Effect:** Cancel that Power before its **Casting Check**. The caster does not regain the **AP** or **NRG** spent to cast it.
6	Scroll of Blink	7	**[1 AP Reaction]: Trigger:** You are chosen as the target of an attack. **Effect:** Teleport up to **6"** to a legal unoccupied space in **LOS**. The triggering attack cannot affect you if you are no longer a legal target.
7	Scroll of Arcane Weapon	10	Self only. A weapon you hold deals **arcane damage** instead of its normal damage type until the end of the round and deals an additional **2 arcane damage**.
8	Scroll of Shatter	10	Range 24". 2"×2" square. Deal **2d8 arcane damage** to all targets and objects in the area.
9	Scroll of Gust of Wind	7	**Line 12"**. **Push** all affected targets **4"** directly away from the caster.
10	Scroll of Darkvision	10	Until the end of the round, you and up to 2 allies within **6"** ignore **Cover** and visual penalties caused solely by nonmagical **Darkness** when determining **LOS** to, targeting, or resolving an effect against a combatant, object, space, or area origin within **18"** of themselves. This does not create **Light** or remove **Darkness**. **Magical Darkness** applies normally.
11	Scroll of Hold Person	10	Range 12". The target must pass a **SPI Check**. On a failure, the target becomes **Stunned**.
12	Scroll of Arcane Shield	10	Self only. Gain **+4 AV** until the end of the round.
13	Scroll of Dispel Magic	5	End one ongoing Power or special item effect within **12"**.
14	Scroll of Web	10	Create a **2"×2" Difficult Terrain** area until the end of the round. Each combatant in the area when it appears must pass a **STR Check**. On a failure, that combatant's **Speed** becomes **0"** until the end of the round.
15	Scroll of Detect Thoughts	10	Choose one enemy within 8". Until the end of the round, that enemy cannot become **Hidden** or **Invisible** from you, and your attack damage rolls against that enemy have **Advantage**.
16	Scroll of Misty Step	10	**[1 AP Reaction]: Trigger:** You are chosen as the target of an attack or harmful effect. **Effect:** Teleport up to **8"** to a legal unoccupied space in **LOS**. The triggering attack or effect cannot affect you if you are no longer a legal target.
17	Scroll of Haste	14	Self or ally within **6"** immediately gains **+1 AP**. This AP must be spent before the end of the round.

d20	Item	Cost (c)	Effect
18	Scroll of Elemental Weapon	10	Choose fire, ice, or lightning. A weapon you hold deals that damage type instead of its normal damage type until the end of the round and deals an additional **2 damage** of that type.
19	Scroll of Spectral Hand	7	Until the end of the round, the next melee weapon attack you make may target an otherwise legal enemy within **6"**.
20	Scroll of Glyph of Warding	10	Place an arcane hazard on a surface. The first combatant to enter it before the end of the round suffers **2d6 arcane damage**, then remove the hazard.

Tier 3 Arcane Scrolls

d20	Item	Cost (c)	Effect
1	Scroll of Disintegrate	48	Range 10". Deal **8d6 arcane damage** to the target. If this damage reduces a non-Hero target to **0 HP**, remove that target from play; a Hero resolves being reduced to **0 HP** normally.
2	Scroll of Meteor Swarm	48	Place four non-overlapping **2"×2"** fire blasts anywhere within **LOS**. Each affected combatant suffers **4d6 fire damage** once, even if more than one blast would otherwise include them.
3	Scroll of Time Stop	48	Immediately gain **2 AP**. These AP must be spent during your current activation on **Move**, **Shift**, **Interact**, **Hide**, **Spot**, or **Attack**. You cannot spend this AP to **Read Scroll**, and you cannot use another scroll during this activation.
4	Scroll of Teleport	48	Teleport to one legal unoccupied space within **LOS** and within **24"**. You may bring one adjacent willing ally to a legal unoccupied space adjacent to your destination.
5	Scroll of Dominate Monster	48	Range 12". Choose one **Monster**. That Monster must pass a **SPI Check**. On a failure, you may **Slide** them up to half their **Speed** along a legal path, then make one of their listed attacks that is not **Multi-Attack** against one legal target of your choice. The Monster cannot use **Reactions** until the end of the round.
6	Scroll of Reverse Gravity	48	**4"×4"** square. Each combatant in the area is hurled upward and slammed down. That combatant must pass a **DEX Check**. On a failure, they suffer **3d6 blunt damage** and become **Prone**; on a success, they suffer half damage and do not become **Prone**. This does not change their space or use the normal **Falling** rules.
7	Scroll of Chain Lightning	48	Range 20". Up to 3 targets within 8" of each other each suffer **4d6 lightning damage**.
8	Scroll of Maze	48	Range 12". The target must pass a **SPI Check**. On a failure, the target loses **2 AP**, becomes **Immobilized**, cannot use **Reactions**, and cannot contest objectives until the end of the round. Apply the normal Monster substitute for lost AP in **9.1**.
9	Scroll of Mind Blank	48	Self only. You are **Resistant** to damage from Powers and attacks made by special items, are **Immune** to **psychic** damage, and are **Immune** to **Frightened** until the end of the round.
10	Scroll of Prismatic Spray	48	**Cone 8"**. Deal **4d6 arcane damage** to each affected target.
11	Scroll of Power Word Kill	48	Range 12". If the target has **10 HP or less**, reduce them to **0 HP**. This HP reduction cannot be reduced or prevented. Resolve being reduced to **0 HP** normally.

d20	Item	Cost (c)	Effect
12	Scroll of Arcane Gate	48	Place two linked gates in empty spaces within **18"** and **LOS** of you. Until the end of the round, a combatant adjacent to either gate may teleport to a legal unoccupied space adjacent to the other gate once per activation. This teleport costs no movement.
13	Scroll of Sunburst	60	**6"×6"** square. Each affected target must pass a **DEX Check**. On a failure, that target suffers **4d6 holy damage** and becomes **Stunned**; on a success, that target suffers half damage and does not become **Stunned**.
14	Scroll of Mass Polymorph	60	Choose up to 3 targets within **10"**. Each must pass a **SPI Check**. On a failure, that target's **Speed** becomes **3"**, they cannot use **Reactions**, and their damage rolls deal **4 less damage**, to a minimum of **0**, until the end of the round.
15	Scroll of Spell Siphon	48	Immediately cast one **Arcane Spell** of Tier 2 or lower that you know, ignoring its AP cost.
16	Scroll of Antimagic Field	48	**6"×6"** square. Combatants in the area cannot cast Powers or use scrolls. Any ongoing Power or special item Area of Effect that overlaps the area is suppressed within the overlapping area until the end of the round.
17	Scroll of Gravity Well	48	**4"×4"** square. Each combatant in the area must pass a **STR Check**. On a failure, **Pull** that combatant up to **3"** toward the centre and they become **Immobilized** until the end of the round. On a success, **Pull** that combatant up to **1"** toward the centre and they do not become **Immobilized**.
18	Scroll of Storm of Vengeance	48	**Line 12"**. Each target suffers **6d6 lightning damage**.
19	Scroll of Foresight	48	Self only. Until the end of the round, attacks against you roll their base damage dice with **Disadvantage** and your attack damage rolls have **Advantage**. Immediately gain **+1 AP**, which must be spent during the current activation.
20	Scroll of Arcane Mass Healing	60	Up to 3 Heroes within **6"** regain 3d6 HP each and remove one negative condition.

Tier 1 Divine Scrolls

d20	Item	Cost (c)	Effect
1	Scroll of Cure Wounds	3	Range 6". Restore 2d4 HP to a Hero.
2	Scroll of Bless	3	Up to 3 Heroes within 6" gain **+1** to all **Checks** until the end of the round.
3	Scroll of Armour of Faith	3	**[1 AP Reaction]: Trigger:** 1 ally within **6"** is chosen as the target of an attack. **Effect:** That ally gains **+2 AV** until the end of the round.
4	Scroll of Guiding Bolt	5	Range 12". Deal **2d6 holy damage**; the next attack damage roll against the target this round has **Advantage**.

d20	Item	Cost (c)	Effect
5	Scroll of Sanctuary	5	**[1 AP Reaction]: Trigger:** You or one ally within **6"** is chosen as the target of an attack that requires **LOS**. **Effect:** The attacker must pass a **SPI Check**. On a failure, a non-Boss attacker must choose another legal target; if none exists, the triggering attack is lost, and an AP-using attacker does not regain their cost. A **Boss** instead rolls the triggering attack's base damage dice with **Disadvantage**. Until the warded target attacks, casts a Power, uses a Special Ability, or the round ends, each enemy must pass the same Check before choosing that combatant as the target of an attack that requires **LOS**; apply the same Boss result on each failure.
6	Scroll of Create Water	2	Create up to a **6"** line of ordinary water on a surface. Choose 1 nonmagical fire or 1 vessel touched by the line: extinguish that fire or fill that vessel. The water is not terrain and has no other mechanical effect.
7	Scroll of Detect Evil and Good	2	Every **Hidden** or **Invisible Undead, Fiend,** or **Celestial** within **12"** loses those conditions.
8	Scroll of Healing Word	3	**[1 AP Reaction]: Trigger:** 1 Hero within **10"** loses HP. **Effect:** After the triggering action or effect resolves, restore **1d4 HP** to that Hero.
9	Scroll of Protection from Evil	3	Choose yourself or one ally within **6"**. Until the end of the round, Undead and Fiends roll attack damage dice with **Disadvantage** against that target, and the target has **Advantage** on **Checks** made to resist their Powers, Special Abilities, and negative conditions they apply.
10	Scroll of Bane	3	Up to 3 enemies within **10"** suffer **-2** on their next **Check** before the end of the round.
11	Scroll of Divine Favour	5	A weapon you hold gains the **Sacred** trait until the end of the round and deals an additional **1d4 holy damage**.
12	Scroll of Lesser Restoration	2	Remove one negative condition from a Hero within 6".
13	Scroll of Inflict Wounds	4	Range 6". Deal **2d4 necrotic damage**.
14	Scroll of Spiritual Weapon	3	Choose one combatant within **6"**. A spectral weapon manifests beside them and deals **1d6 + SPI holy damage** to them, then vanishes.
15	Scroll of Calm Emotions	2	All Heroes within **8"** end **Frightened** and cannot be affected by fear or rage until the end of the round.
16	Scroll of Command	3	Range 6". The target must pass a **SPI Check**. On a failure, **Slide** the target up to **3"** in a direction of your choice.
17	Scroll of Holy Light	2	Create light in an **Aura 4"** area until the end of the round.
18	Scroll of Silence	3	4"×4" square. No Powers can be cast within the area until the end of the round.
19	Scroll of Aid	5	Up to 3 Heroes within **6"** gain **Temporary HP** = 5 until the end of the round and gain **+1 AV** until the end of the round.
20	Scroll of Turn Undead	5	Each Undead within **6"** suffers **1d6 holy damage**, then must pass a **SPI Check**. On a failure, **Push** that target **6"** directly away from you, and they cannot use **Reactions** until the end of the round.

Tier 2 Divine Scrolls

d20	Item	Cost (c)	Effect
1	Scroll of Revivify	14	Return one eligible allied Hero who died this round with **1 HP** and **2 Wounds**.

d20	Item	Cost (c)	Effect
2	Scroll of Spiritual Guardians	10	**4"×4"** square. The first time each enemy enters the area before the end of the round, that enemy suffers **2d6 holy damage**.
3	Scroll of Mass Healing Word	10	Up to 3 Heroes within **6"** regain 2d4 HP each.
4	Scroll of Flame Strike	12	2"×2" square. All enemies in the area suffer **2d6 holy damage**.
5	Scroll of Beacon of Hope	10	All allies within **6"** gain **Advantage** on all **Checks** until the end of the round.
6	Scroll of Holy Smite	14	Your next melee attack this round deals **holy damage** instead of its normal damage type and deals an additional **2d8 holy damage**.
7	Scroll of Divine Shield	10	**[1 AP Reaction]: Trigger:** You or 1 adjacent Hero is chosen as the target of an attack. **Effect:** That Hero gains **+4 AV** until the end of the round.
8	Scroll of Zone of Truth	5	**10"×10"** square. Combatants in the area cannot become **Hidden** or **Invisible**. Effects from Powers, scrolls, or special items that disguise a combatant as another combatant immediately end in the area.
9	Scroll of Dispel Evil and Good	10	End one possession, curse, or hostile control effect, including **Cursed**, within **10"**. You may also end **Frightened** caused by an **Undead**, **Fiend**, or **Cursed** enemy within range.
10	Scroll of Life Transference	14	Lose up to **5 HP**; this HP loss ignores **AV** and cannot be reduced or prevented. One Hero within **6"** regains HP equal to twice the amount lost.
11	Scroll of Death Ward	14	Until the end of the round, the first time damage or HP loss would reduce you to **0 HP**, you remain at **1 HP** instead. Other effects from that source resolve normally.
12	Scroll of Guardian of Faith	12	Place one allied **Guardian Summon** in a legal unoccupied space within **6"** and **LOS**, using the **Summon Power Standard**: **AP 2**, **SPD 6"**, **Sz M**, **AV 3**, **HP 10**; **Radiant Strike: 1d8 holy damage**.
13	Scroll of Sanctuary Aura	10	Until the end of the round, all allies within **4"** gain **+3 AV**. Until an ally attacks, casts a Power, uses a Special Ability, or the round ends, enemies farther than **4"** away cannot choose that ally as the target of attacks, Powers, or Special Abilities that require **LOS**.
14	Scroll of Searing Radiance	10	**Line 4"**. Each target suffers **2d6 holy damage**, or **4d6 holy damage** if that target is Undead.
15	Scroll of Cleansing Light	10	Remove all negative conditions from all Heroes within 6".
16	Scroll of Planar Ally	14	Place one allied **Celestial Summon** in a legal unoccupied space within **6"** and **LOS**, using the **Summon Power Standard**: **AP 2**, **SPD 6"**, **Sz M**, **AV 4**, **HP 14**; **Celestial Blade: 2d6 holy damage**.
17	Scroll of Magic Circle	10	**4"×4"** square. Undead and Fiend combatants cannot enter. Each such combatant already inside immediately suffers **2d6 holy damage**, then the scroll's user **Slides** that combatant to the nearest legal space outside the area.
18	Scroll of Sanctified Strike	10	Your next melee attack this round deals **holy** damage instead of its normal damage type.
19	Scroll of Find Hazards	10	Reveal and mark all hazards in an **Aura 6"**. You may immediately resolve one marked hazard's own **Interact** procedure if that procedure exists.

d20	Item	Cost (c)	Effect
20	Scroll of Greater Turn Undead	14	Each Undead within **8"** suffers **2d6 holy damage**, then must pass a **SPI Check**. On a failure, **Push** that target **8"** directly away from you and they become **Frightened**.

Tier 3 Divine Scrolls

d20	Item	Cost (c)	Effect
1	Scroll of Heal	48	Range 6". Restore a Hero to full HP and end all negative conditions affecting that Hero.
2	Scroll of Supreme Flame Strike	48	4"×4" square. All enemies in the area suffer **7d6 holy damage**.
3	Scroll of Resurrection	48	Return one eligible allied Hero with HP equal to half their maximum, rounded down, minimum **1 HP**, and **1 Wound**.
4	Scroll of Mass Sanctuary	48	Until the end of the round, all allies within **6"** gain **+3 AV**. Until an affected ally attacks, casts a Power, uses a Special Ability, or the round ends, enemies farther than **6"** away cannot choose that ally as the target of attacks, Powers, or Special Abilities that require **LOS**.
5	Scroll of Mass Cure Wounds	48	All Heroes within **6"** regain 4d6 HP.
6	Scroll of Divine Retribution	48	Self only. The next time you would suffer damage from an enemy attack, Power or Special Ability this round, reduce that damage to 0 and the source suffers **4d6 holy damage**.
7	Scroll of Sunbeam	60	**Line 12"**. All targets suffer **4d6 holy damage** and become **Blinded**.
8	Scroll of Holy Aura	60	Allies within **6"** gain **+4 AV**, have **Advantage** on **Checks**, and are **Immune** to **Frightened** until the end of the round.
9	Scroll of Destruction	60	Range 8". Deal **8d6 necrotic damage** to the target.
10	Scroll of Mass Revivify	60	Return every eligible allied Hero who died this round with **1 HP** and **2 Wounds**.
11	Scroll of Greater Guardian of Faith	60	Place one allied **Greater Guardian Summon** in a legal unoccupied space within **6"** and **LOS**, using the **Summon Power Standard**: **AP 2**, **SPD 6"**, **Sz M**, **AV 5**, **HP 20**; **Greater Radiant Strike: 2d10 holy damage**.
12	Scroll of Pillar of Light	48	Range 24". 2"×2" square. All enemies in the area suffer **5d6 holy damage**.
13	Scroll of Avatar	48	Until the end of the round, you gain **+4 AV** and your melee attacks and **Reflex Attacks** may target otherwise valid enemies within **3"**. Immediately gain **+2 AP**; these AP must be spent before the end of the round.
14	Scroll of Spirit Host	48	Place up to two allied **Spirit Summons** in legal unoccupied spaces within **6"** and **LOS**, using the **Summon Power Standard**. Each has **AP 2**, **SPD 6"**, **Sz M**, **AV 2**, **HP 6**; **Spirit Blade: 1d8 holy damage**. The normal allied Summon limit applies.
15	Scroll of Divine Word	48	Up to 3 **Monsters** within **6"** with **6 HP or less** are reduced to **0 HP**. Other Undead, Fiends, and **Cursed** combatants in range suffer **2d8 holy damage** and become **Frightened**.
16	Scroll of Circle of Power	48	Until the end of the round, all allies within **8"** gain **+3 AV** and are **Resistant** to damage from Powers, scrolls, and effects from special items. Each affected ally also immediately ends one negative condition.

d20	Item	Cost (c)	Effect
17	Scroll of Hallowed Ground	48	**8"×8"** square. Each Undead or Fiend combatant in the area immediately suffers **4d6 holy damage**. The first time each other Undead or Fiend combatant enters the area before the end of the round, that combatant suffers the same damage.
18	Scroll of True Resurrection	60	Return one eligible allied Hero at their Max HP with **0 Wounds**.
19	Scroll of Blinding Glory	60	Each enemy within **12"** suffers **2d8 holy damage**, then must pass a **SPI Check**. On a failure, that enemy becomes **Blinded** and their **LOS** becomes **2"** until the end of the round.
20	Scroll of Judgement	60	Range 8". Deal **8d6 holy damage** to one enemy. If that enemy has **12 HP or less** before damage is rolled, they are instead reduced to **0 HP**.

7.16 Adventuring Equipment

Using an adventuring item with an activated effect costs the AP listed in its entry. If no AP cost is listed, use **Interact [1 AP]**. Passive effects function without an action while their requirements are met.

Item	Cost (c)	In-Game Effect
Bell	1	**[1 AP]:** Hang the bell on one adjacent door, container, or terrain feature. The first time a combatant opens, moves, or moves through that object, the bell rings: each **Resting** Monster Group with at least one **Monster** within **20"** of the bell immediately becomes **Awake**, then remove the bell.
Caltrops (Bag)	1	**[1 AP]:** Place a caltrop marker in your space or an adjacent space. The first enemy combatant to enter or be moved into a space within **2"** of the marker must immediately end their movement. The marker is removed at the end of the round.
Candles (5)	1	Place to create a **Light Source** with **Aura 2"** until the candle is removed or extinguished.
Chalk	1	Mark one surface or one objective token. **Interact Checks** made to locate that marked spot are made with **Advantage**.
Climbing Kit	2	Gain **+2** on **STR Checks** to **Climb**.
Crowbar	1	Gain **+2** on **STR Checks** to force open locked doors or chests.
Grappling Hook	1	Thrown up to **STR + 8"** range. Allows anchored **Rope** to be placed along the hooked route without an additional **Interact** action.
Hammer	1	Used to break objects with a **STR Check**; also functions as a d2 (B) weapon.
Healer's Kit	2	**[1 AP]:** Make an **INT Check**. On a success, an adjacent ally (or this combatant) regains **1d4 HP**. The Healer's Kit also counts as **Bandages** wherever a rule requires Bandages and is not expended when used this way.
Bandages	1	**Interact [1 AP]:** Make an **INT Check**. On a success, remove **Bleeding** from yourself or 1 adjacent ally.
Holy Water	1	**Thrown 6" (Aura 1")**: **Undead** and **Fiend** combatants in the area suffer **1d6 holy damage**. Other combatants are unaffected.
Magnifying Glass	2	Your observation-based **Interact Checks** against adjacent objects are rolled with **Advantage**.
Snare	1	**[1 AP]:** Place a snare marker in your space or an adjacent space. The first enemy combatant to enter or be moved into a space within **1"** of the marker suffers **1d4 piercing damage** and becomes **Immobilized**. The marker is then removed.
Torch	1	A carried **Light Source** with **Aura 3"** while lit. Lighting or extinguishing it costs **[0 AP]** during your activation.
Lantern (Hooded)	2	Counts as a carried or placed **Light Source** with **Aura 4"** while held or placed and unhooded. Hooding or unhooding it costs **[0 AP]** during your activation.
Lockpicks	2	**[1 AP]:** Attempt to unlock a chest or door with a **DEX Check**. The Lockpicks break permanently on a **Critical Failure**.
Tinker's Tools	2	Used for scenario **Interact** procedures involving clockwork, repairs, or mechanical devices.
Manacles	1	Use only on **Prone** or **Knocked Out** humanoid Heroes or Hirelings. If the target is conscious, they may make one **STR Check** immediately after the Manacles are applied. On a success, the Manacles are not applied. While wearing Manacles, the target cannot equip items, attack, or **Climb**. Breaking free requires **2 AP** and a **STR Check**; success destroys the Manacles.
Oil (Flask)	1	**[1 AP]:** Place an **Aura 1"** area of oil with its origin within **1"** and **LOS**. If the oil is ignited before the end of the round, each combatant in the area suffers **1d4 fire damage** and gains **Burning** until the end of the round, then remove the area.

Item	Cost (c)	In-Game Effect
Pole, 10-foot	1	**Interact** [**1 AP**]**:** Make a **DEX Check**. On a success, the listed trigger for any hazard within **2"** of the pole's end resolves against the pole instead of against you.
Rope	1	When anchored, allows **Climb** up or down along the rope. A combatant climbing along anchored Rope ignores the extra movement cost from **Climb** and makes no **STR Check** unless a rule says otherwise.
Shovel	1	**Interact** [**2 AP**]**:** Choose an origin within **1"** and **LOS**. Remove **Difficult Terrain** from the **Aura 1"** area around that origin for the remainder of the adventure. This does not remove magical, hazardous, or scenario-locked terrain effects.
Signal Whistle	1	[**1 AP**]**:** Blow the whistle. Each **Resting** Monster Group with at least one **Monster** within **36"** immediately becomes **Awake**.
Spikes, Iron (10)	1	**Interact** [**1 AP**]**:** Secure one adjacent door. A combatant with **STR 4** or higher may force a secured door open with **Interact** [**1 AP**]. Spikes may also anchor **Rope** or equipment.
Spyglass	4	When using **Spot** or making observation-based **Interact Checks** within **24"**, ignore penalties from range or **Cover**. A **Spyglass** does not remove **Cover** for attacks, damaging Powers, or harmful Special Abilities.
Waterskin	1	Consumable. [**0 AP**]**:** Declare its use to negate the listed thirst, heat, or weather-strain penalty for the rest of the adventure. Each Waterskin has **1 use**.
Arctic Gear	3	Worn. The wearer is **Immune** to ambient cold-weather damage of **1 ice damage or less per round** caused by climate effects (such as Whiteout Blizzard or Bitterly Cold weather). Does not protect against attacks.

7.17 Permanent Special Items

Permanent special items are organized by **Average Party Level (APL)** and split into **Special Weapons**, **Special Armour and Shields**, and **Special Items**. **Tier 5** items are **Legendary Artifacts**.

7.17.1 Tier Bands

Permanent special items use the APL tier bands in **7.6.2 Treasure Generation Rules**. Tier 5 permanent special items are **Legendary Artifacts**.

7.17.2 Permanent Special Item Rules

- An entry explicitly labelled **Consumable** is carried until used, is expended on use, and does not count against the **5-item** Permanent Special Item limit. Every other Permanent Special Item is **non-consumable** and remains in play until removed, lost, or destroyed by a rule that explicitly says so.
- Permanent special items may grant **passive**, **triggered**, **repeatable**, or limited-use effects, but they never use charge pools unless an entry explicitly says otherwise.
- If a permanent special item duplicates a core **Reaction** or **Action**, the item states exactly how that interaction works.
- In the **Special Armour and Shields** tables, **Chest** entries list an **AD** value. Shield entries list their full **AD/AV** profile exactly as written.
- **Tier 1 Special Items** use their own table. When a Treasure result grants a roll on a **Special Items** group for **Tiers 2–4**, use every entry of that tier and category in **7.17.3** and use **Random Determination** among the matching entries.
- **Tier 5 Legendary Artifacts** are never part of mundane market stock, mundane commissions, or mundane crafting. They may enter play only through treasure, a major campaign reward, a scenario rule, or another rule that explicitly grants one.

When a named **Special Shield** includes a mundane shield type in its name or in parentheses, it uses that mundane shield's nonmagical rules in addition to the magical rule printed below unless a specific entry says otherwise.

Tier 1 Special Armour and Shields (APL 1–2)

1–2 Pilgrim's Quilted Coat
Cost (c) 13 **Req** - **AD/AV** **Chest:** d3 AD
Rule: **DEX Pen 0**, **Max Speed 8"**. You gain **Advantage** on **Checks** made to resist the effects of weather.

3–4 Deflecting Main-Gauche
Cost (c) 14 **Req** DEX 2
AD/AV **Shield:** d4 AD against melee attacks only
Rule: Counts as both a shield and a melee weapon. Despite its size, this magical blade can intercept projectiles. When you **Block** a ranged weapon attack, it grants **+3 AV** instead of rolling its normal melee-only AD.

5–6 Vanguard's Targe
Cost (c) 11 **Req** STR 1 **AD/AV** **Shield:** d4 AD
Rule: During each **Move**, ignore the first **1"** of additional movement cost imposed by **Difficult Terrain**.

Tier 2 Special Armour and Shields (APL 3–4)

1–2 Emberguard Jack
Cost (c) 24 **Req** STR 2 **AD/AV** **Chest:** d6 AD
Rule: **DEX Pen -1**, **Max Speed 7"**. You are **Resistant** to **fire** damage and cannot gain **Burning**.

3–4 Brawler's Spiked Targe
Cost (c) 23 **Req** STR 2 **AD/AV** **Shield:** d4 AD
Rule: Melee attacks made with this shield's spike deal **1d6 piercing damage** instead of **1d4 piercing damage**, and gain the **Agile** trait.

5–6 Arrow-Catcher Round Shield
Cost (c) 24 **Req** STR 2 **AD/AV** **Shield:** d6 AD
Rule: Ranged weapon attacks made against allies within **2"** of you roll their base damage dice with **Disadvantage**.

Tier 3 Special Armour and Shields (APL 5–6)

1–2 Gravewarden Scale
Cost (c) 44 **Req** STR 3 **AD/AV** **Chest:** d8 AD
Rule: **DEX Pen -3**, **Max Speed 6"**. You are **Resistant** to **necrotic** damage. You cannot become **Cursed**. You are **Immune** to **Sleeping**.

3–4 Spell-Guard Heater Shield
Cost (c) 44 **Req** STR 3 **AD/AV** **Shield:** d8 AD
Rule: You gain **Advantage** on all **SPI Checks** and **INT Checks** made to resist the effects of enemy Powers and magic items.

5–6 Sun-Crest Kite Shield
Cost (c) 44 **Req** STR 4 **AD/AV** **Shield:** d8 AD
Rule: When an **Undead** or **Fiend** targets you with a melee attack, it suffers **1d4 holy damage** immediately after the attack resolves.

Tier 4 Special Armour and Shields (APL 7–8)

1–2 Stormwrack Plate
Cost (c) 76 **Req** STR 5 **AD/AV** **Chest:** d10 AD
Rule: **DEX Pen -4**, **Max Speed 5"**. You are **Resistant** to **lightning** damage. Enemy forced movement against you is reduced by **1"**.

3–4 Gorgon-Faced Wall Shield
Cost (c) 76 **Req** STR 4 **AD/AV** **Shield:** d8 AD
Rule: Once per round, after a non-**Total Miss** melee attack made by an enemy against you resolves, you may force them to make a **SPI Check**. On a failure, they become **Immobilized**.

5–6 Bulwark of the Ancients (Tower Shield)
Cost (c) 80 **Req** STR 5 **AD/AV** **Shield:** d10 AD
Rule: While equipped, you and all allies within **1"** of you ignore the **Cleave** and **Sweep** weapon traits.

Tier 5 Legendary Shields (APL 9–10)

1–3 The Aegis (Buckler)
Cost (c) 124 **Req** STR 1 **AD/AV** **Shield:** d4 AD, +1 AV
Rule: When an enemy scores a **Critical Hit** against you, ignore any bonus damage from the **Fatal** and **Deadly** weapon traits. The first exploding bonus die rolled against you from that **Critical Hit** is ignored.

4–6 Wall of the World (Pavise)
Cost (c) 128 **Req** STR 5 **AD/AV** **Shield:** d10 AD
Rule: You cannot be knocked **Prone** by weapon traits or weapon attacks made with non-magical weapons. Enemy forced movement against you is reduced by **2"**. While deployed, **Tier 1–2 Powers** treat it as **Blocking Terrain** for **LOS** and Areas of Effect. It remains **Cover Terrain** for every other purpose.

Tier 1 Special Weapons (APL 1–2)

1 Surestrike Sword (Longsword)
Cost (c) 26 Damage 1d8/1d10 (S)
Traits **Parrying**, **Versatile**
Rule: You may reroll any base damage die result of **1**. You must keep the second result.

2 Ember Dagger
Cost (c) 17 Damage 1d4+1 (F)
Traits **Agile**, **Finesse**, **Light**, **Thrown**
Rule: This weapon deals **fire** damage instead of **piercing**.

3 Guardian Mace
Cost (c) 8 Damage 1d6 (B) Traits **Parrying**
Rule: If you attack with this weapon, you gain **+1** to your next **AD** roll this round.

4 Rime Hatchet (Handaxe)
Cost (c) 15 Damage 1d6 (I) Traits **Light**, **Thrown**
Rule: When this attack damages a target, the target is **Pushed 1"** directly away from you.

5 Trickster's Rapier
Cost (c) 15 Damage 1d8 (P)
Traits **Agile**, **Finesse**, **Parrying**
Rule: You may use the **Parry Reaction** against **Ranged** attacks.

6 Sentinel Pike
Cost (c) 15 Damage 1d10 (P) Traits **Heavy**, **Reach**, **Trip**
Rule: If you attack a target **2"** away, the attack ignores up to **1 AV**.

7 Ironbane Maul
Cost (c) 28 Damage 1d12 (B) Traits **Fatal**, **Heavy**
Rule: This weapon ignores up to **1 AV**.

8 Elven Bow (Longbow)
Cost (c) 24 Damage 1d8 (P) Traits **Agile**, **Elven**, **Ranged**
Rule: -

9 Crushing Flail
Cost (c) 12 Damage 1d8 (B) Traits **Sweep**, **Trip**
Rule: Add **2** to your **STR or DEX Check** when you take the **Trip** action with this weapon.

10 Bloodletter Sickle
Cost (c) 7 Damage 1d6 (S) Traits **Light**, **Trip**
Rule: Deals an additional **1 damage of that attack's primary damage type** against targets that already have at least **1 Wound**.

Tier 2 Special Weapons (APL 3–4)

1 Flametongue Shortsword
Cost (c) 19 Damage 1d6 (F) Traits **Light**, **Parrying**
Rule: On a **Critical Hit**, deal an additional **1d4 fire damage**. This die does not explode.

2 Thunderous Greathammer
Cost (c) 34 Damage 1d12+1 (B) Traits **Fatal**, **Heavy**
Rule: On a **Critical Hit**, all enemies adjacent to the target are **Pushed 1"** directly away from the target.

3 Vampiric Stiletto
Cost (c) 20 Damage 1d4 (N) Traits **Deadly**, **Finesse**, **Light**
Rule: When you reduce a living combatant to **0 HP** with this weapon, you immediately gain **Temporary HP** = 3 until the end of the round.

4 Phasing Rapier
Cost (c) 22 Damage 1d8 (P)
Traits **Agile**, **Finesse**, **Parrying**
Rule: The **DEX** modifier applied to this weapon ignores the target's **AV** entirely.

5 Seeker Longbow
Cost (c) 26 Damage 1d8 (P) Traits **Agile**, **Ranged**
Rule: Attacks made with this weapon ignore the **Disadvantage** penalty from **Cover**.

6 Gorgon's Glaive
Cost (c) 17 Damage 1d10 (S) Traits **Graze**, **Reach**, **Sweep**
Rule: On a **Critical Hit**, the target's **Speed** becomes **0"** until the end of the round.

7 Silvered Sabre
Cost (c) 18 Damage 1d8 (S)
Traits **Agile**, **Finesse**, **Light**, **Parrying**
Rule: Deals an additional **2 damage of that attack's primary damage type** against **Undead** and **Lycanthropes**.

8 Magehunter Crossbow (Light Crossbow)
Cost (c) 18 Damage 1d8 (P) Traits **Ranged**, **Reload**
Rule: When this attack damages a caster, the target immediately loses **1 NRG**.

9 Windcaller Spear
Cost (c) 18 Damage 1d6/1d8 (P)
Traits **Reach**, **Thrown**, **Versatile**
Rule: Immediately after attacking with this weapon, you may **Shift 1"**.

10 Stonebreaker Pick (War Pick)
Cost (c) 29 Damage 1d8 (P) Traits **Fatal**, **Parrying**

Rule: This weapon ignores up to **2 AV**.

Tier 3 Special Weapons (APL 5–6)

1 Sunblade (Bastard Sword)
Cost (c) 54 **Damage** 1d10/1d12 (H)
Traits **Parrying**, **Versatile**
Rule: Counts as a **Light Source** with **Aura 4"**. Attacks with this weapon against **Undead** deal an additional **1d6 holy damage**.

2 Frostbrand Flamberge
Cost (c) 56 **Damage** 1d12+1 (I)
Traits **Deadly**, **Graze**, **Heavy**, **Parrying**
Rule: When this attack damages a target, the target cannot use bonus movement or free movement abilities until the end of the round.

3 Assassin's Hand Crossbow
Cost (c) 38 **Damage** 1d6 (P)
Traits **Agile**, **Light**, **Ranged**, **Reload**
Rule: If you attack a target while **Hidden**, the base damage die is automatically treated as their maximum natural value for calculating damage, but does not explode.

4 Earthshaker Maul
Cost (c) 32 **Damage** 1d12 (B) **Traits** **Fatal**, **Heavy**
Rule: **[1 AP]:** Strike the ground. Each combatant within **2"**, including you, must pass a **STR Check**. On a failure, they become **Prone**.

5 Serpent's Fangs (Dual Daggers)
Cost (c) 48 **Damage** 1d4 (Po) **Traits** **Agile**, **Finesse**, **Light**
Rule: This item is a matched pair. Equipping both daggers occupies **2 Hands** but counts as one **Permanent Special Item**. Resolve attacks with the pair using the **Light** trait. When an attack with this pair damages a living combatant, the target becomes **Poisoned [d6]**.

6 Stormcaller Composite Bow
Cost (c) 34 **Damage** 1d8 (L) **Traits** **Agile**, **Ranged**
Rule: Attacks with this weapon ignore **Cover**, range penalties, and maximum **LOS** distances caused solely by weather, **Darkness**, or another area that provides **Cover**, including **Magical Darkness**. You may draw **LOS** through **Cover Terrain** for these attacks. You still cannot target through **Blocking Terrain**.

7 Soulstealer Scythe
Cost (c) 32 **Damage** 1d10 (N) **Traits** **Graze**, **Sweep**, **Trip**
Rule: When you reduce a target to **0 HP**, you immediately gain **Temporary HP** = 5 until the end of the round.

8 Meteor Flail
Cost (c) 32 **Damage** 1d8 (F) **Traits** **Sweep**, **Trip**
Rule: On a **Critical Hit**, all enemies within **1"** of the target immediately suffer **1d6 fire damage**.

9 Blink Dagger
Cost (c) 38 **Damage** 1d4 (P)
Traits **Agile**, **Finesse**, **Light**, **Thrown**
Rule: Immediately after resolving a **Thrown** attack with this weapon, you may teleport to any unoccupied space adjacent to the target.

10 Warlord's Battleaxe
Cost (c) 38 **Damage** 1d8/1d10 (S)
Traits **Cleave**, **Parrying**, **Versatile**
Rule: While equipped, all allies within **2"** of you deal an additional **1 damage of that attack's primary damage type** with melee attacks.

Tier 4 Special Weapons (APL 7–8)

1 Keening Rapier
Cost (c) 66 **Damage** 1d8 (P)
Traits **Agile**, **Finesse**, **Parrying**
Rule: On a **Critical Hit**, roll **2** additional dice of the same size and add them to the total.

2 Sacred Avenger (Zweihander)
Cost (c) 70 **Damage** 1d12+2 (H)
Traits **Cleave**, **Fatal**, **Heavy**
Rule: Deals an additional **2d6 holy damage** against **Fiends** and **Undead**. Allies within **2"** gain **Advantage** on **SPI Checks**.

3 Shadow-Weaver Greatbow
Cost (c) 58 **Damage** 1d10 (P)
Traits **Deadly**, **Heavy**, **Ranged**
Rule: When this attack damages a target, the target must pass a **SPI Check**. On a failure, they become **Sleeping**.

4 Leviathan Halberd
Cost (c) 58 **Damage** 1d10 (S) **Traits** **Heavy**, **Reach**, **Trip**
Rule: When this attack damages a target, you may immediately **Pull** the target **2"** directly toward you.

5 Volcanic Greathammer
Cost (c) 70 **Damage** 1d12+1 (F) **Traits** **Fatal**, **Heavy**

Rule: On a **Critical Hit**, the target's armour is slagged. The target's listed **AV** is reduced by **1** for the rest of the adventure. If the target has no listed **AV**, reduce the **AV** they generate from each **AD** roll by **1** for the rest of the adventure instead.

6 Ghostblade (Estoc)
Cost (c) 68 **Damage** 1d8/1d10 (Ar)
Traits **Fatal**, **Finesse**, **Versatile**
Rule: Damage from this weapon ignores **Resistance** to arcane damage.

7 Time-Thief Baselard
Cost (c) 56 **Damage** 1d6 (S) **Traits** **Agile**, **Light**, **Parrying**
Rule: Once per activation, when you reduce an enemy to **0 HP**, you immediately regain **1 AP**.

8 Blood-Drinker Zweihander
Cost (c) 70 **Damage** 1d12+2 (S)
Traits **Cleave**, **Fatal**, **Heavy**
Rule: When you reduce a living combatant to **0 HP** with this weapon, you immediately gain **Temporary HP** = 5 until the end of the round.

9 Sky-Splitter Pike
Cost (c) 68 **Damage** 1d10 (L) **Traits** **Heavy**, **Reach**, **Trip**
Rule: On a **Critical Hit**, lightning arcs in a **4"** straight line originating from the target, in a direction you choose. All combatants in that line suffer **2d6 lightning damage**.

10 Thought-Eater Scourge
Cost (c) 58 **Damage** 1d8 (Ps)
Traits **Agile**, **Finesse**, **Graze**, **Sweep**
Rule: When this attack damages a caster, the target loses **1 NRG** and you regain **1 NRG**.

Tier 5 Legendary Artifact Weapons (APL 9–10)

1 Sirrach's Tooth (Zweihander)
Cost (c) 124 **Damage** 1d12+2 (N)
Traits **Cleave**, **Fatal**, **Heavy**
Rule: A target of a non-**Total Miss** attack with this weapon cannot gain **HP** until the end of their next activation. When you reduce an enemy to **0 HP**, gain **Advantage** on your next attack damage roll or **Check** before the end of your next activation.

2 Mordain's Hammer (War Maul)
Cost (c) 126 **Damage** 1d12 (B) **Traits** **Fatal**, **Heavy**
Rule: Ignores up to **3 AV**. On a **Critical Hit**, the target immediately loses **1 AP** and is knocked **Prone**.

3 The Sun-Eater (Greatbow)
Cost (c) 128 **Damage** 1d10 (H)
Traits **Deadly**, **Heavy**, **Ranged**
Rule: Deals **holy** damage. On a **Critical Hit**, the target also suffers **1d6 necrotic damage** and an additional **2d10 holy damage**.

4 Whisper (Stiletto)
Cost (c) 124 **Damage** 1d4 (P)
Traits **Deadly**, **Finesse**, **Light**
Rule: If you attack a target while **Hidden**, that attack deals an additional **2 damage of that attack's primary damage type** and ignores up to **2 AV**. A melee attack with this weapon against a **Sleeping** target ignores all **AV**.

5 The World-Breaker (Claymore)
Cost (c) 128 **Damage** 1d12 (S)
Traits **Cleave**, **Graze**, **Heavy**
Rule: **[1 AP]:** Destroy one terrain piece, door, or wall segment within your melee distance, leaving its area as **Difficult Terrain**.

6 The Returning Spear of Salttide (Spear)
Cost (c) 126 **Damage** 1d6/1d8 (L)
Traits **Reach**, **Thrown**, **Versatile**
Rule: **Thrown** attacks with this weapon ignore **Cover**, but still require **LOS**. After each **Thrown** attack resolves, this weapon instantly teleports back to your hand and becomes available for other uses. It can make only one **Thrown** attack per activation and is never lost because of a **Total Miss** or **Critical Failure**.

7 Maelthorn's Chain (Hook-and-Chain)
Cost (c) 124 **Damage** 1d6 (F)
Traits **Agile**, **Entangle**, **Reach**, **Trip**
Rule: A target made **Immobilized** by this weapon's **Entangle** trait suffers **2d6 fire damage** at the end of the round and cannot become **Hidden** or **Invisible**.

8 The Hollow Crown's Edge (Longsword)
Cost (c) 124 **Damage** 1d8/1d10 (S)
Traits **Deadly**, **Parrying**, **Versatile**
Rule: The first time each round you would be reduced below **1 HP** while you still have at least **1 AP** remaining, you are reduced to **1 HP** instead and lose all remaining **AP**.

9 Void-Weaver (Quarterstaff)
Cost (c) 122 **Damage** 1d6 (Ar) **Traits** **Parrying**, **Trip**

Rule: While this artifact is equipped, all **Arcane Spells** you cast cost **1 less NRG**, and you may reroll one natural **1** on a **Casting Check** for an **Arcane Spell**.

10 The Sevenfold Star (Throwing Cross)
Cost (c) 124 Damage 1d6 (Ar)
Traits **Agile**, **Deadly**, **Thrown**
Rule: **Thrown** attacks with this weapon have **Range 12"**. After each **Thrown** attack resolves, it returns to your hand and becomes available for other uses. It can make only one **Thrown** attack per activation and is never lost because of a **Total Miss** or **Critical Failure**. On a **Critical Hit**, choose up to two other enemies within **3"** of the target; each suffers **1d6 arcane damage**.

Tier 5 Legendary Artifact Armour and Shields (d20)

1 Sunforged Full Plate
Equipment Type Chest AD/AV d12+5 STR 8 DEX -
INT - SPI - DEX Pen -5 Max Speed 5" Cost (c) 128
Description: You are **Resistant** to **fire** and **holy**. You are a **Light Source** with **Aura 4"**, and enemies cannot become **Hidden** while within it.

2 Frostheart Full Plate
Equipment Type Chest AD/AV d12+5 STR 8 DEX -
INT - SPI - DEX Pen -5 Max Speed 5" Cost (c) 128
Description: You are **Resistant** to **ice**. You have **Ice Glide**. After a non-**Total Miss** melee attack against you resolves, the attacker becomes **Slowed**.

3 Thunderlord Plate
Equipment Type Chest AD/AV d12+5 STR 8 DEX -
INT - SPI - DEX Pen -5 Max Speed 5" Cost (c) 128
Description: You are **Resistant** to **lightning** and **arcane**. You cannot become **Silenced**, and Powers cannot **Push**, **Pull**, or **Slide** you.

4 Nightshroud Armour
Equipment Type Chest AD/AV d12+2 STR - DEX 7
INT 4 SPI - DEX Pen -2 Max Speed 8" Cost (c) 120
Description: While you are in **Darkness**, your **Hide distance** is **0"**. While you are in **Darkness**, gain **+2 AV**. When you take the **Shift** action while in **Darkness**, you may **Shift 2"** instead of **1"**.

5 Saint's Chain of Glory
Equipment Type Chest AD/AV d12+5 STR 7 DEX -
INT - SPI 4 DEX Pen -5 Max Speed 5" Cost (c) 130
Description: You are **Resistant** to **holy**. You cannot become **Cursed**. The first time each round an **Undead** or **Fiend** would damage you, reduce that damage to **0**.

6 Archsage Vestments
Equipment Type Chest AD/AV d12+2 STR - DEX 7
INT 4 SPI - DEX Pen -2 Max Speed 8" Cost (c) 124
Description: Gain **+2** to **Casting Checks**, are **Resistant** to damage from Powers, and gain **+2** on **Checks** made to resist enemy Powers.

7 Adamant Sentinel Plate
Equipment Type Chest AD/AV d12+5 STR 8 DEX -
INT - SPI - DEX Pen -5 Max Speed 5" Cost (c) 132
Description: You are **Resistant** to **blunt**. Attacks against you cannot deal **Critical Hit** bonus damage or trigger **Critical Hit** effects.

8 Hawkflight Harness
Equipment Type Chest AD/AV d12+2 STR - DEX 7
INT - SPI 4 DEX Pen -2 Max Speed 8" Cost (c) 120
Description: Gain **Fly (12")** and become **Immune** to **Prone**.

9 Dragonlord Bulwark
Equipment Type Hands AD/AV +6 STR 8 DEX - INT -
SPI - DEX Pen -5 Max Speed 5" Cost (c) 120
Description: While using **Block**, you are **Resistant** to **fire**, **ice**, and **acid**.

10 Glory Aegis
Equipment Type Hands AD/AV +6 STR 7 DEX - INT -
SPI 4 DEX Pen -4 Max Speed 5" Cost (c) 120
Description: While using **Block**, you are **Resistant** to **holy**.

11 Stormkeeper's Wall
Equipment Type Hands AD/AV +6 STR 8 DEX - INT -
SPI - DEX Pen -5 Max Speed 5" Cost (c) 120
Description: While using **Block**, you are **Resistant** to **lightning** and **arcane**.

12 Cloak of Infinite Night
Equipment Type Back AD/AV +1 STR - DEX 7 INT 4
SPI - DEX Pen - Max Speed - Cost (c) 116
Description: Gain **+1 AV**. While you are in **Darkness**, your **Hide distance** is **0"**, and nonadjacent enemies cannot remove your **Hidden** with **Spot**.

13 Adamantine Wall
Equipment Type Hands AD/AV +6 STR 8 DEX - INT -
SPI - DEX Pen -5 Max Speed 5" Cost (c) 126

Description: While using **Block**, attacks cannot deal **Critical Hit** bonus damage or trigger **Critical Hit** effects against you.

14 Sacred Bulwark of Saints
Equipment Type Hands **AD/AV** +6 **STR** 7 **DEX** - **INT** - **SPI** 4 **DEX Pen** -4 **Max Speed** 5" **Cost (c)** 122
Description: While using **Block**, you are **Resistant** to damage from attacks, Powers, and Special Abilities made by Undead, Fiends, and **Cursed** combatants. You have **Advantage** on **Checks** made to resist their Powers, Special Abilities, and negative conditions.

15 Mantle of the Phoenix
Equipment Type Back **AD/AV** +1 **STR** - **DEX** 7 **INT** - **SPI** 4 **DEX Pen** - **Max Speed** - **Cost (c)** 116
Description: Gain **+1 AV**. You are **Resistant** to **fire**. At the end of each round, restore 1 HP.

16 Cloak of Infernal Embers
Equipment Type Back **AD/AV** +1 **STR** - **DEX** 7 **INT** - **SPI** 4 **DEX Pen** - **Max Speed** - **Cost (c)** 118
Description: Gain **+1 AV**. After a non-**Total Miss** melee attack against you resolves, the attacker suffers **4 fire damage**.

17 Frostcloak of Immortals
Equipment Type Back **AD/AV** +1 **STR** - **DEX** 7 **INT** - **SPI** 4 **DEX Pen** - **Max Speed** - **Cost (c)** 118
Description: Gain **+1 AV**. After a non-**Total Miss** melee attack against you resolves, the attacker suffers **4 ice damage**.

18 Mantle of the Stormlord
Equipment Type Back **AD/AV** +1 **STR** - **DEX** 7 **INT** - **SPI** 4 **DEX Pen** - **Max Speed** - **Cost (c)** 120
Description: Gain **+1 AV**. After a non-**Total Miss** melee attack against you resolves, the attacker suffers **4 lightning damage**.

19 Cloak of Divine Life
Equipment Type Back **AD/AV** +1 **STR** - **DEX** 7 **INT** - **SPI** 4 **DEX Pen** - **Max Speed** - **Cost (c)** 120
Description: Gain **+1 AV**. At the end of each round, restore 2 HP.

20 Cloak of Eternity
Equipment Type Back **AD/AV** +1 **STR** - **DEX** 7 **INT** - **SPI** 4 **DEX Pen** - **Max Speed** - **Cost (c)** 124
Description: Gain **+1 AV** and **+4 Max HP**. At the end of each round, restore 1 HP.

Tier 1 Special Items (APL 1–2)

1 Witchglass Lenses
Equipment Type Head **STR** - **DEX** 1 **INT** - **SPI** - **Cost (c)** 13
Description: Your ranged weapon attacks ignore **Cover** against targets within **8"**.

2 Deadhand Gauntlets
Equipment Type Arms **STR** 2 **DEX** - **INT** - **SPI** - **Cost (c)** 14
Description: When you take the **Trip** action, you may target a combatant up to **1 Sz** larger than you. When your **Push** succeeds, increase its distance by **1"**.

3 Gravebell Gorget
Equipment Type Neck **STR** - **DEX** - **INT** - **SPI** - **Cost (c)** 14
Description: The first time each round an enemy scores a **Critical Hit** against you, ignore the universal **Critical Hit** rider for that attack's primary damage type. Exploding bonus dice and other **Critical Hit** effects apply normally.

4 Grave-Step Anklets
Equipment Type Feet **STR** - **DEX** 2 **INT** - **SPI** - **Cost (c)** 15
Description: Once during each of your activations, immediately after you resolve a melee weapon attack, you may **Shift 1"**.

5 Cinder-Nail Clasp
Equipment Type Back **STR** - **DEX** - **INT** - **SPI** - **Cost (c)** 15
Description: Once per round, when a weapon attack you make scores a **Critical Hit** and damages an enemy, that enemy gains **Burning**.

6 Frost Bailiff's Signet
Equipment Type Ring **STR** - **DEX** - **INT** - **SPI** - **Cost (c)** 15
Description: Once per round, when a weapon attack you make damages an enemy, you may **Push** or **Pull** that enemy **1"**.

7 Chime of the Quiet Hour
Equipment Type Hands **STR** - **DEX** - **INT** - **SPI** 2 **Cost (c)** 16
Description: **[1 AP]:** While held, each enemy within **4"** must pass a **SPI Check**. **Failure:** That enemy gains **Silenced**.

8 Hanged Man's Knucklebone
Equipment Type Waist **STR** - **DEX** - **INT** - **SPI** -
Cost (c) 17
Description: Increase your maximum **Luck** by **1**.

9 Wode-Iron Pilgrim Badge
Equipment Type Back **STR** - **DEX** - **INT** - **SPI** 1
Cost (c) 18
Description: At the start of each round, choose **fire**, **ice**, or **lightning**. You are **Resistant** to the chosen damage type until the end of the round.

10 Last Tithe Cord
Equipment Type Waist **STR** - **DEX** - **INT** - **SPI** 2
Cost (c) 19
Description: Once per adventure, when an ally within **6"** would be reduced to **0 HP**, they remain at **1 HP** instead.

Tier 5 Legendary Artifacts (d20)

1 Boots of the Infinite Gale
Equipment Type Feet **STR** - **DEX** 8 **INT** - **SPI** -
Cost (c) 118
Description: Increase your **Speed** by **4"** while worn. During each **Move**, ignore the first **2"** of additional movement cost imposed by **Difficult Terrain**.

2 Ring of Invincibility
Equipment Type Ring **STR** - **DEX** - **INT** - **SPI** 8
Cost (c) 128
Description: Gain **+1 AV** against all attacks. At the start of each round, choose **1** of the following damage types: **acid**, **arcane**, **fire**, **ice**, **lightning**, **necrotic**, **poison**, **psychic**, or **holy**. You are **Resistant** to the chosen type until the end of the round.

3 Amulet of Transcendence
Equipment Type Neck **STR** - **DEX** - **INT** - **SPI** 8
Cost (c) 124
Description: +2 to **SPI Checks**. **SPI Checks** are made with **Advantage**.

4 Belt of the Titans
Equipment Type Waist **STR** 8 **DEX** - **INT** - **SPI** -
Cost (c) 124
Description: +1 STR; forced movement against you is reduced by **2"**; your melee attacks deal an additional **1 damage of that attack's primary damage type**.

5 Cloak of Supreme Invisibility
Equipment Type Back **STR** - **DEX** 8 **INT** - **SPI** -
Cost (c) 126
Description: **[1 AP]:** Become **Invisible** until the end of the round. This effect ends after your first attack, harmful Power, harmful Special Ability, **Push**, or **Trip** resolves.

6 Bracers of Annihilation
Equipment Type Arms **STR** 8 **DEX** - **INT** - **SPI** -
Cost (c) 124
Description: Melee attacks deal an additional **2 damage of that attack's primary damage type**.

7 Lenses of True Vision
Equipment Type Head **STR** - **DEX** - **INT** 8 **SPI** -
Cost (c) 124
Description: You ignore **Cover**, may draw **LOS** through **Cover Terrain**, and ignore maximum **LOS** distances and other visual restrictions caused by **Darkness**, fog, smoke, weather, or similar visibility effects. **Hidden**, **Invisible**, illusions, and disguise effects do not prevent you from targeting enemies within **36"**. You still cannot target through **Blocking Terrain**.

8 Amulet of Immortality
Equipment Type Neck **STR** 4 **DEX** - **INT** - **SPI** 7
Cost (c) 124
Description: +5 Max HP. Attacks cannot deal **Critical Hit** bonus damage or trigger **Critical Hit** effects against you. You cannot be removed from play by an effect unless you are first reduced to 0 HP.

9 Gloves of Legendary Evasion
Equipment Type Arms **STR** - **DEX** 8 **INT** - **SPI** -
Cost (c) 124
Description: Gain **Advantage** and **+4** on **DEX Checks** to escape or avoid Areas of Effect. After you take the **Hide** action, take the **Shift** action, or succeed on one such **Check**, you may **Shift 2"**.

10 Lantern of Ultimate Nullification
Equipment Type Hands **STR** - **DEX** - **INT** 8 **SPI** -
Cost (c) 126
Description: **[1 AP]:** While held, end one ongoing Power or special item effect affecting a target or area within **18"**. After resolving that effect, **Hidden** and **Invisible** enemies within **8"** of the lantern lose those conditions and cannot regain them until the end of the round.

11 Chime of Ultimate Warding
Equipment Type Hands **STR** - **DEX** - **INT** - **SPI** 8
Cost (c) 126
Description: **[1 AP]:** While held, each ally within **10"** gains **+1 AV**, gains **Advantage** on **Checks** made to resist enemy Powers and special item effects, and ends **1 negative condition.** These benefits last until the end of the round.

12 Brooch of Supreme Invulnerability
Equipment Type Back **STR** - **DEX** - **INT** - **SPI** 8
Cost (c) 124
Description: Attacks cannot deal **Critical Hit** bonus damage or trigger **Critical Hit** effects against you. You are **Immune** to **Bleeding** and **Burning**.

13 Anklet of True Freedom
Equipment Type Feet **STR** - **DEX** 8 **INT** - **SPI** -
Cost (c) 120
Description: You ignore **Difficult Terrain.** Terrain, weather, and forced movement cannot reduce your **Speed** or cause you to become **Immobilized** or **Prone**. This does not prevent damage or other effects from those sources.

14 Lenses of Apex Mastery
Equipment Type Head **STR** - **DEX** - **INT** 8 **SPI** -
Cost (c) 122
Description: **INT Checks** are made with **Advantage**, ignore visual penalties, and gain **+2** to **Casting Checks**.

15 Charm of Epic Luck
Equipment Type Neck **STR** - **DEX** - **INT** - **SPI** 8
Cost (c) 128
Description: Gain **+2 Luck**. Rerolls made by spending **Luck Points** are made with **Advantage** and ignore **Disadvantage**.

16 Ring of Perfect Will
Equipment Type Ring **STR** - **DEX** - **INT** - **SPI** 8
Cost (c) 126
Description: You are **Immune** to **Frightened**, **Sleeping**, and **psychic** damage.

17 Sash of Ultimate Mastery
Equipment Type Waist **STR** - **DEX** - **INT** 8 **SPI** -
Cost (c) 126
Description: +1 to **Casting Checks**. Once per round, one **Casting Check** you make is rolled with **Advantage**.

18 Amulet of Perfect Endurance
Equipment Type Neck **STR** 7 **DEX** - **INT** - **SPI** 4
Cost (c) 126
Description: Forced movement cannot move you. You cannot become **Prone** or **Bleeding**. You ignore damage, HP loss, AP loss, and penalties caused by ambient weather or scenario fatigue effects.

19 Boots of the Limitless Leap
Equipment Type Feet **STR** - **DEX** 8 **INT** - **SPI** -
Cost (c) 124
Description: During a **Move**, you may **Jump** up to **10"** without a **DEX Check**. After jumping at least **4"**, your next melee attack this round deals an additional **3 damage of that attack's primary damage type**.

20 Ring of Absolute Regeneration
Equipment Type Ring **STR** - **DEX** - **INT** - **SPI** 8
Cost (c) 128
Description: At the end of each round, restore 2 HP.

7.17.3 Named Special Items and Artifacts

Tier 2 Special Item

Hollow Crown's Seal | Cost: **20c** | Req: **INT 2** | Equipment: Neck
A clay disc stamped with a face that has been deliberately removed from it. It is warm to the touch. It should not be warm.

Effect: When you make a **Check** to resist the effects of a Construct's Special Ability, make that **Check** with **Advantage**. Once per adventure, when a Construct Monster targets you with an attack or Special Ability, you may spend **[0 AP]** to hold up the Seal. The triggering attack or Special Ability is negated. If that Monster is not a **Boss**, their activation ends.

Tier 3 Special Item

Hollow Crown's Sigil | Cost: **40c** | Req: **INT 3, SPI 2** | Equipment: Neck
The seal of a sovereign whose name was removed from all records before the Fall. Constructs in the Ashlands sometimes pause when they see it. Some of them bow.

Effect: You gain **Advantage** on **Checks** to resist Construct Special Abilities. Once per adventure, when you are adjacent to an Ashlands Construct Monster that has not yet activated this round, you may spend **[1 AP]** and display the Sigil. If that Monster is a **Boss**, they cannot use **AI Step** abilities before the end of their next activation, and their first attack damage roll before the end of that activation is made with **Disadvantage**. Otherwise, that Monster does not activate this round. The Monster cannot target you with attacks or Special Abilities until the end of the round.

Tier 4 Special Item

The Hollow Crown's Writ | Cost: **68c** | Req: **INT 4, SPI 3** | Equipment: Hands

A sealed document written in a language no living scholar reads fluently, bearing a seal that has no face. Some Ashland constructs still answer to it. Others, less reassuringly, do not.

Effect: Once per adventure, when you are adjacent to a Construct Monster, you may spend **[2 AP]** to issue a command using the Writ. That Monster cannot use **AI Step** abilities before the end of their next activation, and their first attack damage roll before the end of that activation is made with **Disadvantage**. They cannot target you with attacks until the start of your next activation. The Writ may target any Construct Monster, not only Ashlands Constructs.

Tier 5 Legendary Artifact

The Hollow Crown | Cost: **126c** | Req: **INT 7, SPI 4** | Equipment: Head

The crown of the last sovereign of the fallen empires. No personal name survives. The statues that wore it have no faces. Its tomb has never been found. You have found its crown. This is not the same thing, and the distinction matters, but perhaps not yet.

Effect: While wearing The Hollow Crown, you gain the following:

- Each Construct and Undead Monster that begins their activation within **6"** of you cannot use **AI Step** abilities before the end of that activation, and their first attack damage roll during that activation is made with **Disadvantage**.
- Once per round, when a Construct or Undead damages you, you may spend **[0 AP]** to issue a Decree. If that combatant is a Monster, they become **Stunned** until the end of the round unless they are **Immune** to it. Otherwise, they must pass an **INT Check** or become **Stunned** until the end of the round.
- Once per adventure, you may spend **[2 AP]** to issue an **Imperial Command**. Each non-Boss Construct and Undead within **8"** immediately moves up to their **Speed** directly away from you and cannot make attacks, cast harmful Powers, or use harmful Special Abilities until the end of the round. Each affected **Boss** instead immediately moves up to their **Speed** directly away from you, cannot use **AI Step** abilities before the end of their next activation, and makes their first attack damage roll before the end of that activation with **Disadvantage**.
- You are **Resistant** to necrotic damage.
- **Carrying Cost:** While wearing The Hollow Crown, you suffer **-1 SPI**.

Tier 3 Special Item

Kest's Iron Reliquary | Cost: **40c** | Req: **SPI 3** | Equipment: Neck

Mordain Kest was a warlord-exorcist who bound Monsters into iron reliquaries and forced ghosts to testify in court. Their reliquaries still surface in Ashland ruins, usually warm to the touch and never empty. This one is warm. Something pushes against the inside of the latch when you hold it in the dark.

Effect: Once per adventure, when you are adjacent to an enemy and spend **[1 AP]**, you may open the reliquary and release the bound spirit within. That enemy suffers **2d8 necrotic damage**, then must pass a **SPI Check** against **12**. **Failure:** They become **Frightened** until the end of their next activation. After use, the reliquary is empty until the next adventure, when it is

found to contain something again. It is always warm. Additionally, while you wear Kest's Iron Reliquary you may spend **[1 AP]** to end **Cursed** on yourself or one ally within **2"**.

Tier 2 Special Weapon

Cael's Brand | Cost: **20c** | Damage: 1d6 (H) | Traits: **Light**, **Parrying** | Req: **SPI 2** | Equipment: Hands (Weapon, 1 Hand)
A short blade stamped with a bridge-and-flame crest. The Sable Watch teaches that the saint smiled as the fire took them. Older songs say they screamed. The blade remembers both versions.

Effect: While wielding Cael's Brand, when you are attacked by an **Undead** or **Fiend** while occupying a chokepoint (a space with at least two opposing pieces of **Impassable Terrain** or **Blocking Terrain**, a doorway, or a bridge), that attacker suffers **1d4 holy damage** after their attack resolves.

Tier 3 Special Weapon

Cael's Vigil Blade | Cost: **39c** | Damage: 1d8 (H) | Traits: **Parrying** | Req: **STR 3, SPI 3** | Equipment: Hands (Weapon, 1 Hand)
The blade is engraved with a gate on one face and a fire on the other. Which side faces the enemy when you draw it is said to tell you whether tonight is a night for holding or burning.

Effect: While wielding Cael's Vigil Blade, if you did not voluntarily move during your last activation (you held your ground), your first attack this activation deals an additional **1d6 holy damage**. Against **Undead** and **Fiends**, this bonus damage increases to **1d8 holy damage**.

Tier 4 Special Weapon

Saint Cael's Burning Seal | Cost: **72c** | Damage: 1d10 (H) | Traits: **Parrying** | Req: **STR 4, SPI 4** | Equipment: Hands (Weapon, 1 Hand)
A sword whose blade runs hot when drawn near the dead. The inscription along the fuller reads, in Old Tongue: "I stood here. This is where I stood." The bridge it was named for is ash. The blade remains.

Effect: This weapon deals **holy** damage. While wielding Saint Cael's Burning Seal, once per adventure when you are within **2"** of a scenario-marked threshold, bridge, ford, gate, or archway and you apply **AV** or use **Parry** against an **Undead** or **Fiend**, you may treat that roll as its maximum possible value without rolling. Additionally, **Undead** and **Fiends** that attack you while you are within **2"** of such a threshold suffer **1d6 holy damage** after their attack resolves. While wielding Saint Cael's Burning Seal you may spend **[1 AP]** to end **Cursed** on yourself or one ally within **2"**.

Tier 5 Legendary Weapon

The Burning Bridge | Cost: **128c** | Damage: 2d8 (H) | Traits: **Cleave**, **Parrying** | Req: **STR 5, SPI 8** | Equipment: Hands (Weapon, 2 Hands)
The last thing Saint Cael of the Broken Gate held before the bridge went down. The Sable Watch has a relic they claim is this weapon. Three other institutions make the same claim. This one is warm. The others have never been tested.

Effect: This weapon deals **holy** damage. Against **Undead** and **Fiends**, it deals an additional **2d6 holy damage**.

Once per adventure, you may invoke **The Burning Bridge**. Spend **[2 AP]** while adjacent to any threshold, bridge, ford, gate, or archway. Until the end of the round, when an **Undead** or **Fiend Monster** attempts to move through or past that threshold, their movement ends before crossing it. If that Monster is not a **Boss**, their activation also ends. A non-Monster Undead or Fiend must pass a **SPI Check** against **16** or have their movement end before crossing the threshold and their activation end. You suffer **1d6 holy damage** when you invoke this ability. This damage cannot be reduced below **1**.

Critical Hit: On a **Critical Hit**, the target is also **Stunned** until the end of their next activation.

Tier 2 Special Item

Vane's Marginal Notes | Cost: **19c** | Req: **INT 2** | Equipment: Hands (Consumable supplement)
Handwriting that matches no living scribe appears in the margins of scrolls that have been near this

document. The notes are always useful. They are always in blood.

Effect: Apply Vane's Marginal Notes to one **Arcane Scroll** during the **Town Phase** or before the adventure begins. That Scroll's **Casting Check** gains **+2**. The Marginal Notes are consumed when the Scroll is used. A new set of notes may be purchased between adventures.

Tier 3 Special Item

Vane's Annotated Grimoire | Cost: **39c** | Req: **INT 3** | Equipment: Hands

A grimoire with marginalia in blood. The handwriting belongs to no living scribe. Some pages have been annotated after the book was sealed. The ink is fresh and the pages are dry.

Effect: While holding this Grimoire, once per adventure when you cast an **Arcane Spell**, you may declare Vane's manner before making its **Casting Check**. Treat the **Casting Check** total as **4 higher**. A modified total of **20 or higher** is a **Critical Cast** unless the casting die is a natural **1**. After the casting finishes resolving, lose **1d4 HP** unless the casting die was a natural **20**; this HP loss cannot be reduced.

Tier 4 Special Item

Vane's Blood-Written Tome | Cost: **68c** | Req: **INT 5, SPI 2** | Equipment: Hands

The tome writes itself. New formulae appear overnight in handwriting that is almost, but not quite, the bearer's own. The ink is always red. You have checked.

Effect: While holding this Tome, you gain **+2** to all **Casting Checks** for **Arcane Spells**.

Once per adventure, when you cast an **Arcane Spell** that requires a **Casting Check**, you may write the formula in your own blood before casting. Spend **2d4 HP** (not reduced by **AV**). If you do, treat the **Casting Check** as an automatic **Critical Cast**, regardless of the die result. This overrides a natural **1** and causes no **Arcane Mishap**. You cannot use this ability if the **HP** cost would reduce you to **0 HP**.

Tier 5 Legendary Artifact

Vane's Iron Cage | Cost: **124c** | Req: **INT 8** | Equipment: Hands (Must be held; occupies both hands)

The cage in which Ysolde Vane was drowned. Their body was never recovered. The cage was found floating upright in an empty harbour three years after the execution. The door was locked from the inside.

Effect: While holding Vane's Iron Cage, you gain the following:

- All **Arcane Spells** you cast cost **2 less NRG**.
- You gain **+3** to all **Casting Checks** for **Arcane Spells**.
- Once per adventure, you may invoke **Vane's Formula**. Spend **[2 AP]** and any amount of HP you choose (minimum **1 HP**, not reduced by AV). For each **2 HP** spent, one **Arcane Spell** effect you choose currently affecting the battlefield is extended by **1 round**. A single spell's duration may be extended by a maximum of **3 rounds** per invocation.
- **Carrying Cost:** While holding the Cage, you suffer **-2 SPI**. The cage is cold. It is always cold. Something inside it occasionally pushes against the bars.

Tier 2 Special Item

Salttide's Toll Token | Cost: **20c** | Req: **DEX 2** | Equipment: Neck

A coin with a ship on one face and a body on the other. Sailors who run the salt-coast at low winter tide leave one of these at the water's edge. It is considered insurance.

Effect: Once per adventure, immediately after you deal damage that reduces a Monster to **0 HP**, you may claim a **Toll**. That Monster's **Coin Value** is increased by **(2 + (4 × APL)) Coins** for the purposes of this adventure's final count. This bonus is noted and paid out during the **Aftermath Phase**.

Tier 3 Special Item

Salttide's Ledger | Cost: **40c** | Req: **INT 3, DEX 2** | Equipment: Hands

A ledger that updates itself. Every enemy defeated in your presence is recorded, with a column for what they owe. Edrava Salttide fed their enemies to the tide and called it a balance settled. The ledger agrees.

Effect: Once per adventure, you may mark one enemy at the start of your activation (spend **[0 AP]**). When that enemy is defeated for the first time this adventure, their **Coin Value** is doubled for the purposes of this adventure's final count.

Tier 4 Special Item

Salttide's Tide-Curse | Cost: **70c** | Req: **DEX 4, SPI 3** | Equipment: Neck
A carved bone amulet that smells of salt even in the desert. Edrava Salttide paid druids to curse every harbour that refused their ships. The druids are gone. The curse is not.

Effect: Once per round, when you deal damage to an enemy, you may spend **[0 AP]** to invoke the Tide-Curse. That enemy must pass a **STR Check** against **12**. **Failure: Push** that enemy **3"** directly away from you, and they become **Slowed** until the end of their next activation. If the enemy suffers a **Collision**, they become **Prone**.

Tier 5 Legendary Artifact

Salttide's Counting Stone | Cost: **126c** | Req: **DEX 7, INT 4** | Equipment: Neck
The stone Edrava Salttide used to count ships that should have paid their toll. Sailors still see them at low winter tide, counting. The stone counts everything now. It remembers every debt. It is very patient.

Effect: While wearing Salttide's Counting Stone:

- At the start of each round, you count. Every enemy defeated since the start of the adventure is noted. For each **5** enemies defeated by your party, you gain **+1** to your next attack damage roll or **Check**, stacking to a maximum of **+5**. This bonus resets to **0** after it is applied.
- Once per adventure, you may invoke **The Counting**. Spend **[1 AP]**. Every enemy currently on the battlefield is marked. The next time each marked enemy is defeated this adventure, their **Coin Value** is increased by **50%** for the purposes of the final count.
- When damage or **HP** loss reduces you to **0 HP** while you wear the Stone, you may spend **[0 AP]** before rolling on the **Injuries Table** to invoke **The Tide's Price**. One enemy within **6"** of you immediately suffers necrotic damage equal to the **HP** you had immediately before the triggering damage or **HP** loss. Then roll on the **Injuries Table** normally.

Tier 2 Special Item

Old Wode's Tithe-Bundle | Cost: **20c** | Req: **SPI 2** | Equipment: Hands (Consumable)
A bundle of twigs, dried flowers, and grey wool tied with a cord of antler-leather. Greythorn foresters leave them at standing stones each autumn. The forest has never rejected one.

Effect: Once per adventure, spend **[1 AP]** to place the Tithe-Bundle at a terrain feature (a tree, stone, or natural landmark) within **1"** of you. Until the end of the round, Monsters do not target you with attacks or Special Abilities unless you attack them first. This effect ends immediately if you attack any Monster. The Bundle is consumed on use.

Tier 3 Special Weapon

Old Wode's Iron-Shod Staff | Cost: **39c** | Damage: 1d6 (B) | Traits: **Parrying**, **Trip** | Req: **STR 2, SPI 3** | Equipment: Hands (Weapon, 2 Hands)
An iron-shod walking staff that has been struck against standing stones. Three times. The strikes are still there. Three dents in the iron cap, each one slightly warmer than the rest of the metal.

Effect: Once per adventure, when you are adjacent to a standing stone, ancient tree, or natural terrain landmark, you may strike it three times as part of your activation (spend **[2 AP]**). Make a **SPI Check** against **12**. **Success:** All allied combatants within **6"** of you heal **1d6 HP** and gain **+1** to their next **SPI Check** this adventure. **Failure:** No effect. The strikes were not answered.

Tier 4 Special Item

The Antlered Path Seal | Cost: **70c** | Req: **SPI 5, INT 3** | Equipment: Neck

A disc of antler-bone stamped with a path that does not end at either edge. Old Wode's agreement with the Greenmark was never written down. This seal is as close as it gets. The forest recognizes it. This is either reassuring or alarming depending on how deep you are.

Effect: While wearing the Antlered Path Seal:

- You and allies within **3"** of you ignore **Difficult Terrain** on terrain tagged **Natural**. Constructed or hazard-created **Difficult Terrain** is not affected.
- Once per adventure, when a Forest creature (any Monster with the **Beast**, **Plant**, or **Fey** tag, or any Greenmark bestiary entry) targets you or an adjacent ally with an attack or Special Ability, you may spend **[0 AP]** to display the Seal. The triggering attack or Special Ability is negated, and that Monster does not target you or your adjacent allies again this round. If that Monster is not a **Boss**, their activation ends.

Tier 5 Legendary Artifact

The Three-Strike Staff | Cost: **126c** | Damage: 1d8 (B) | Traits: **Parrying**, **Reach**, **Trip** | Req: **STR 3, SPI 8** | Equipment: Hands (Weapon, 2 Hands)

Old Wode of the Antlered Path struck the standing stones three times at the end of the first post-Fall winter and returned with the agreement under which the Greenmark accepts Greythorn's autumn tithe. The agreement has never been written down. The forest has never broken it. This is the staff. The dents are there. The iron cap is still warm.

Effect: This weapon deals **blunt** damage.

- When you attack with the Three-Strike Staff, any **Beast**, **Plant**, or **Fey Monster** targeted by a non-**Total Miss** attack becomes **Frightened** until the end of their next activation.
- Once per adventure, you may **Strike the Ground** three times (spend **[3 AP]** while not **Engaged**). Make a **SPI Check** against **14**. **Success:** The ground itself answers. For the remainder of the adventure, all natural **Difficult Terrain** on the battlefield is cleared. Each **Beast**, **Plant**, and **Fey** Monster within **12"** becomes **Stunned** until the end of the round unless they are **Immune** to it. Allied combatants within **6"** immediately heal **2d6 HP**. **Failure:** The ground does not answer. The staff grows cold until the end of the adventure.

Tier 2 Special Item

Vial of Iron-Vein Blood | Cost: **20c** | Req: **SPI 2** | Equipment: Hands (Consumable)

A sealed iron vial of Karnessa Iron-Vein's blood. The blood does not dry. The vial is cold. Karnessa's surviving line is said to be born with iron filings in their teeth and a tendency to bleed black under moonlight. This vial was given willingly. Probably.

Effect: Once per adventure, spend **[1 AP]** and apply the blood to a threshold, door, wall section, or terrain feature within **1"**. Until the end of the round, non-Boss Monsters cannot willingly pass through that terrain feature, destroy it, or target anything through or past it. The vial is consumed on use.

Tier 3 Special Item

Karnessa's Iron Seal | Cost: **40c** | Req: **SPI 3, INT 2** | Equipment: Neck

An iron disc bearing the mark of a sealed vault. Karnessa Iron-Vein pressed their seal into the vault that had begun to leak something through its walls. The vault has held. The seal still smells of what it was keeping in.

Effect: Once per adventure, when a Summon you control would be reduced to **0 HP**, you may spend **[0 AP]** to press Karnessa's Seal against

them. That Summon is instead set to **1 HP**. Additionally, while wearing this Seal, you gain **+1 SPI** on **Checks** made to resist the effects of **Undead** and **Fiend** Special Abilities.

Tier 4 Special Weapon

The Iron-Vein Blade | Cost: **70c** | Damage: 1d8 (P) | Traits: **Finesse**, **Parrying** | Req: **DEX 4, SPI 3** | Equipment: Hands (Weapon, 1 Hand)
A blade forged from iron filings extracted from the Iron-Vein bloodline's marrow. It bleeds black under moonlight. In sunlight it is merely iron. At night it is something older than iron.

Effect: This weapon deals **piercing** damage. Against **Undead** and **Fiends**, it deals an additional **1d6 necrotic damage**.

Once per adventure, when you damage an **Undead** or **Fiend** with this weapon, you may invoke the **Iron-Vein Sealing**. If the target is a **Monster**, they cannot use **AI Step** abilities before the end of their next activation. Otherwise, the target must pass a **SPI Check** against **14** or cannot use Special Abilities until the end of their next activation. Their movement and attacks are unaffected.

Tier 5 Legendary Artifact

Karnessa's Binding | Cost: **126c** | Req: **SPI 7, INT 4** | Equipment: Neck
The thing that leaked through the vault walls when Karnessa Iron-Vein sealed it is not described in any surviving record. The seal held. That is what the records say. The records say it with the tone of people who are very grateful and do not intend to investigate further. Karnessa's Binding is the principle of that seal made portable. It is cold. It is always cold.

Effect: While wearing Karnessa's Binding:

- You are **Immune** to necrotic damage and **Resistant** to psychic damage.
- Once per round, when an **Undead** or **Fiend Monster** within **6"** uses a Special Ability, you may spend **[0 AP]** to issue a **Binding**. That Special Ability is negated. If that Monster is not a **Boss**, their activation ends.
- Once per adventure, you may invoke **The Iron-Vein Seal** (spend **[3 AP]**). Choose one **Undead** or **Fiend Monster** within **6"**. If the target is a **Boss**, they cannot use **AI Step** abilities before the end of their next activation, and their first attack damage roll before the end of that activation is made with **Disadvantage**. Otherwise, that Monster becomes **Immobilized** and cannot use Special Abilities for the remainder of the adventure, their **Coin Value** is reduced to **0**, and at the end of the adventure they are removed permanently and cannot return through any Special Ability.

Tier 2 Special Item

Bell-Shard Charm | Cost: **20c** | Req: **SPI 2** | Equipment: Neck
A fragment of a bell recovered from a buried tower. The fragment rings faintly in the presence of the dead, though no clapper remains. Parties that descend into the deepest crypts are not always asked, on return, whether they heard anything.

Effect: This item functions as an early warning system. When any **Undead** Monster becomes **Awake** within **12"** of you, the Charm chimes. You immediately become aware of that Monster's approximate location and that their Wake-Up condition has been met. You may then take a **[0 AP Reaction]**, even outside your activation, to make an **INT Check** against **12**. This Check does not require the Monster to be **Hidden** or in your **LOS**. On a success, the Monster loses **Hidden**, if applicable, and you know their exact position until the end of the round. Additionally, you gain **+1 SPI** on **Checks** made to resist **Frightened** from **Undead** sources.

Tier 3 Special Weapon

The Iron Knell-Maul | Cost: **39c** | Damage: 1d10 (B) | Traits: **Fatal**, **Heavy** | Req: **STR 4** | Equipment: Hands (Weapon, 2 Hands)
A war-maul whose head is cast from bell-metal. It rings when it strikes bone. Every Bastion's chapel records contain at least one account of a bell ringing underground during the Fall. The Knell-Maul answers that ring.

Effect: This weapon deals **blunt** damage. Against **Undead**, it deals an additional **1d6 holy damage**.

When this weapon scores a **Critical Hit** against an **Undead** Monster, that Monster cannot use a Special Ability that would return them to play or prevent them from being removed from play at **0 HP** until the end of the round. If the Monster is reduced to **0 HP** while this condition is active, they cannot revive this adventure.

Tier 4 Special Item

The Echoing Aegis | Cost: **70c** | Req: **STR 3, SPI 4** | Equipment: Hands (Shield)
AD: d8
A round shield whose face is cast in the shape of a bell. When struck, it rings. The sound carries further than it should, through walls and stone and closed doors, into places where it should not be heard. Something hears it anyway.

Effect: This shield functions as a standard shield with **d8 AD**.

Once per adventure, when an attack would reduce you to **0 HP**, you may invoke the **Echoing Bell** as a **[0 AP Reaction]**. The shield rings. You are reduced to **1 HP** instead. Every **Undead Monster** on the battlefield becomes **Stunned** until the end of the round and cannot use a Special Ability that would return them to play or prevent them from being removed from play at **0 HP** for the remainder of the adventure.

Tier 5 Legendary Artifact

The Bell's Tongue | Cost: **128c** | Req: **SPI 8** | Equipment: Hands
No surviving record describes this item clearly. The accounts that come closest describe a clapper removed from a very old bell, cold as iron left in a winter river, that rings without being struck. The Voice Beneath the Bells is mentioned in all six Bastions' folk songs. No grave has ever been found. The Bell's Tongue has no provenance. It has always existed. It has always been cold.

Effect: While holding The Bell's Tongue:

- You are **Immune** to **Frightened** and to the **Heard the Song** condition.
- Each **Undead Monster** within **6"** of you at the start of the Monster Phase cannot target you with attacks or Special Abilities this round.
- Once per round, when an **Undead** Monster within **6"** uses a Special Ability that would return them to play or prevent them from being removed from play at **0 HP**, you may spend **[0 AP]**. The Bell rings. That ability fails.
- Once per adventure, spend **[2 AP]** to ring The Bell's Tongue fully. Every **Undead Monster** on the battlefield cannot use a Special Ability that would return them to play or prevent them from being removed from play at **0 HP** for the remainder of the adventure. Each affected non-Boss Monster is then reduced to **0 HP**. A **Boss** is not reduced to **0 HP** by this effect. After this ability is used, The Bell's Tongue goes silent for the remainder of the adventure and grants no further benefits.

8.

Powers and Traditions

In the Dying Lands, magic is not a gift; it is a symptom of a broken world. To cast a spell is to reach into the cracks of reality and pull something volatile through, a transaction that always leaves a stain. The common folk know better than to trust it, having learned to fear its touch through generations of curses, twisted omens, and localized catastrophe. Sensible people cling to the safety of timber walls and the comforting heft of cold iron. But the desperate, the greedy, and the doomed recognize that surviving the ruins often requires bargaining with forces that transcend the swing of a blade.

Though the empires that once codified magic are ash, the Five Traditions survived the Fall; each scarred, perilous, and profoundly changed.

Arcane Spells are the hollow inheritance of the old world. Wizards are less miracle-workers than they are magical scavengers, piecing together forbidden principles from half-burned grimoires and the silent, dust-choked observatories where their predecessors still sit slumped in death. Their craft is a cold calculus of arcane formulae and unstable geometry. While Bastions tolerate them for their sheer utility, wizards are rarely loved, and are invariably blamed the moment a working leaks or the dead begin to walk.

Divine Prayers are whispered into a largely empty sky. The old saints remain in the chapel rolls, but they answer fitfully, if they answer at all. A priest capable of calling down a true working is a rarity; famous enough to command reverence and terrifying enough to be feared. The faithful fracture over the silence: some preach that the gods retreated in disgust at an unnameable insult, while others insist mortal souls simply lack the worthiness to be heard. Regardless of the doctrine, divine magic is a desperate plea for a miracle, fuelled by fanatical devotion and answered only in blood and light.

Druidic Rituals pulse with a terrifying, untamed vitality. Unlike the crumbling arcane or the silent divine, the magic of the wild has only grown more ferocious since the Fall. Druids commune with the encroaching forests, the choking bogs, and the violent storms. Their oldest circles do not mourn the dying world; instead, they teach that the earth is merely shedding mortal civilization like dead skin, and they act as the ruthless midwives to this violent rebirth.

Sorceries represent the most volatile and treacherous path to power, demanding a terrible intimacy with corruption. Some sorcerers are twisted by exposure to irradiated ruin-sites, while others suffer from ancestral wounds reopening generations later, or strike infernal pacts in their darkest, most desperate hours. They wield raw, unrefined destruction, paying for their output in their own blood. Hanged in the streets of Sablekeep and treated with extreme caution everywhere else, sorcerers are living conduits of the world's sickness.

Psychic Abilities remain the rarest, strangest, and least understood of the traditions. Psions do not study their power; they survive it. Their minds are cracked open by the long, suffocating pressure of sunken crypts, exposure to thought-eater nests, or sheer proximity to the alien things sleeping beneath the Undermarches. They emerge from the dark hearing the jagged thoughts of everyone around them. They are rarely hunted with the same religious fervour as sorcerers, but they are never trusted, for no one welcomes a person who can weaponize a memory or peel back the privacy of a skull.

8.1 Powers and Traditions Overview

A **Power** is any supernatural effect that uses the casting rules in this section. Arcane Spells, Divine Prayers, Druidic Rituals, Sorceries, and Psychic Abilities are all Powers.

There are five primary traditions of Power in Heraldry:

- **Arcane Spells:** The product of disciplined study, formulae, sigils, and precise control over raw magical force. Wizards are the foremost practitioners. Tricksters also gain limited Arcane access, most often illusion and utility effects.
- **Divine Prayers:** Sacred invocations granted by a god, saint, patron power, or unshakable devotion. Clerics and Paladins heal, bless, shield, and smite through faith.
- **Druidic Rituals:** Primal rituals drawn from wilderness, beasts, weather, growth, decay, and the old powers of the natural world. Druids and Rangers call on this tradition.
- **Sorceries:** Innate, unstable, and often inherited power. Sorcerers force magic into being through will, instinct, and blood, even when control slips.
- **Psychic Abilities:** Disciplined mental force focused into telepathy, telekinesis, disruption, insight, and denial. Psions wield power through intellect and concentration rather than formula or prayer.

Unless a rule says otherwise, all Powers require the expenditure of **AP** and **NRG**. Only **Heroes** and **Hirelings** make **Casting Checks** using ability scores. **Monsters**, items, hazards, and scenario effects follow their own rules.

Tradition Summary

Tradition	Usual Casting Score	Failure Model	Metal Equipment Restriction	Distinctive Rule
Arcane Spells	**INT**	Natural **1** fails and triggers **Arcane Mishaps**; non-critical totals of **11 or lower** fail	Metal Chest armour, weapons, and shields	May use **Empower** when a Power says so
Divine Prayers	**SPI**	Natural **1** fails and triggers **Divine Rebuke**; non-critical totals of **11 or lower** fail	None	Emphasizes healing, wards, and smiting
Druidic Rituals	**SPI**	Natural **1** fails and triggers **Primal Backlash**; non-critical totals of **11 or lower** fail	Metal Chest armour, weapons, and shields	Emphasizes terrain, beasts, weather, and primal control
Sorceries	**SPI**	Always resolves; failed Checks apply **Blood Price**, and critical failure triggers **Sorcerous Backlash**	Metal Chest armour	Emphasizes volatility, blood cost, and burst power
Psychic Abilities	Usually **INT**	Natural **1** fails and triggers **Psychic Feedback**; non-critical totals of **11 or lower** fail	None	Emphasizes force, denial, and repositioning

The **Elven** exceptions and complete metal equipment rules appear in **8.2**.

Power Navigation

These tables are navigation aids. They do not create new Power categories, keywords, or role tags.

Tradition	Primary Class Access	Full Power List
Arcane Spells	**Wizard**, **Trickster**	**8.3**
Divine Prayers	**Cleric**, **Paladin**	**8.4**
Sorceries	**Sorcerer**	**8.5**
Druidic Rituals	**Druid**, **Ranger**	**8.6**
Psychic Abilities	**Psion**	**8.7**

Tier	Usual Use in Play	Notes
Tier 0	Minor effects and baseline magical actions	Costs [**1 AP, 0 NRG**] by default unless a Power says otherwise.
Tier 1+	Stronger tradition Powers	Use the cost, range, target, duration, and effect listed in the Power entry.

Random Power Selection: To select a Power randomly from a Tier 1, Tier 2, or Tier 3 list, roll **1d20** and use the matching entry. Tier 0 cantrip lists do not support random selection.

8.2 Casting Powers

The following rules apply to all Powers unless a more specific rule says otherwise.

Metal Equipment and Traditions

A Hero cannot cast an **Arcane Spell** or **Druidic Ritual** while metal Chest armour, a metal weapon, or a metal shield is equipped. A Hero cannot cast a **Sorcery** while metal Chest armour is equipped. **Divine Prayers** and **Psychic Abilities** have no metal equipment restriction.

For these restrictions, Chest armour with the **Elven** quality and weapons with the **Elven** trait do not count as metal. Metal equipment is defined in **7.2**.

These restrictions apply to every method of casting a Power and to using a scroll of that Power's tradition.

Power Entry Format

Each Power entry lists the information needed to resolve that Power. When present, entry fields appear in this order: **Trigger**, **Range**, **Target** or **Area**, declaration restrictions, **Effect**, non-default duration, Power-specific **Critical Cast**, then **Empower**. Omitted fields use the following defaults:

- **Range and LOS:** Unless the entry has **Range: Self**, has **Range: Global**, or explicitly ignores **LOS**, each target, area origin, or point chosen for the Power must be within its listed range and in the caster's **LOS**. A placed area may extend beyond that range after its origin is placed. An Area of Effect cannot penetrate **Blocking Terrain** or a solid floor, roof, or platform, as described in **2.7**.
- **Targets:** Resolve a listed target Check separately for each target. If a single damage expression affects multiple combatants, roll it once unless the Power says otherwise. Resolve any such shared damage roll using the shared-roll procedure in **2.7.3**, even if the Power is not an Area of Effect. If a single healing expression affects multiple combatants, roll it once unless the Power says otherwise, then apply the result separately to each combatant.
- **Trigger:** A Power with a **Trigger** is a Reaction and follows **4.5 Reactions** unless its entry says otherwise. Unless a Power says it resolves after the triggering Power, a Reaction triggered by a Power being declared or cast resolves after the caster pays all costs and confirms legality, but before the **Casting Check**.
- **Duration:** Apply **Power Durations** below when an ongoing effect gives no duration.

Powers and Monsters

A **Monster** never makes a **STR**, **DEX**, **INT**, or **SPI Check**. Whenever a hostile Power instructs a **Monster** to make one of those Checks, the Power's failed-Check effect applies automatically unless the **Monster** is **Immune** to it. If that Monster's **LVL** is higher than the caster's Level, make the Power's **Casting Check** with **Disadvantage**.

If a Power would make a **Monster** lose AP, gain AP, or pay an AP cost, use the **Monster** substitute in **9.1** unless that Power gives the Monster a different specific result.

Universal Casting Sequence

1. **Declare the Power.** Choose the Power you are using, confirm that the caster meets the metal equipment restrictions above, and choose a legal target, area origin, or point within range and **LOS** if the Power requires one. If the caster is prohibited from casting that Power or no legal choice exists, the Power cannot be declared and no cost is paid.
2. **Spend AP and NRG.** Pay the listed AP and NRG cost immediately.
3. **Confirm legality.** Verify the declared target, area origin, or point against **Declared State** before rolling.
4. **Make the Casting Check.** If the Power would require a **Monster** to make a Check to resist, avoid, or end its effect, and that **Monster's LVL** is higher than your Level, make this **Casting Check** with **Disadvantage**, as stated in **2.3 Ability Checks**. Roll **1d20 + INT** for Arcane Spells and most Psychic Abilities, or **1d20 + SPI** for Divine Prayers, Druidic Rituals, and Sorceries unless a specific Power says otherwise.
5. **Resolve the result.**
   - **Natural 1: Critical Failure.** For Arcane Spells, Divine Prayers, Druidic Rituals, and Psychic Abilities, the Power fails and the caster suffers the appropriate tradition backlash. For Sorceries, the Sorcery still resolves, the caster pays **Blood Price** if required, and the caster suffers **Sorcerous Backlash**.
   - **Natural 20:** Critical Cast. The Power succeeds and gains a Critical Cast bonus.
   - **Other result with a total of 11 or lower:** Failure. For Arcane Spells, Divine Prayers, Druidic Rituals, and Psychic Abilities, the Power fails and has no effect. For Sorceries, the Sorcery still resolves and the caster pays **Blood Price**.
   - **Other result with a total of 12 or higher:** Success. Resolve the Power's effects.
6. **Resolve target Checks.** After the **Casting Check** succeeds, or after a Sorcery resolves despite failure, resolve each target **Check** at the point stated by the Power and before applying any effect that depends on that **Check**.

A Power's **NRG** cost cannot be reduced below **1 NRG** unless its printed cost is **0 NRG** or the reducing rule states a lower minimum.

Sorceries always resolve unless a specific rule says otherwise. A Sorcery uses one **Casting Check**. That same roll determines whether the Sorcery critically casts, whether **Blood Price** applies, and whether **Sorcerous Backlash** occurs.

Power Durations

If a Power creates an ongoing effect and gives no duration, that effect ends at the end of the current round. This default does not replace a named condition's core expiry; use the condition entry in **Section 5.9** unless the Power explicitly overrides it. A **Summon** uses the duration stated by their rule, or the default Summon duration in **Section 2.5.1**, and is not removed by this paragraph. Instantaneous effects and explicitly permanent changes are unaffected.

Weather Shifts: A Power whose name begins **Weather Shift** suppresses, but does not erase, the adventure's persistent Weather or Cavern Condition. It normally lasts until the end of the current round; if a **Critical Cast** or another rule explicitly extends that duration, it lasts until the stated later endpoint. Use only the most recently resolved **Weather Shift**; a later one replaces an earlier one. When the Weather Shift ends, the underlying persistent Weather or Cavern Condition resumes. A **Weather Shift** changes only weather effects. Terrain, **Darkness**, Powers, items, and scenario effects remain in force unless that Power explicitly says otherwise.

Critical Casts

A natural **20** on the casting die is a **Critical Cast**.

Unless the Power gives its own Critical Cast rider, apply the first relevant result below:

- **Damaging Power:** Add one extra base damage die to one damage roll made by the Power. Use the die size and damage type of the first listed base damage die in that roll's damage expression. If the Power deals fixed damage and has no printed damage die, add **1d4** of the Power's first listed damage type instead.
- **Healing Power:** Restore an additional **1d6 HP** to one affected target.
- **Buff, ward, or protection Power:** Increase one printed **AV**, mitigation, **Check**, or **Speed** bonus by **+1**; or extend an end-of-current-round duration to the end of the following round. This option cannot increase **AP**, **NRG**, damage, healing, maximum statistics, dice count, die size, or target count.
- **Movement, summoning, or control Power:** Choose one applicable bonus: increase one listed movement or forced-movement distance by **2"**; increase the Power's Range by **2"**; affect **1 additional legal target**; or extend a duration that would end at the end of the current round until the end of the following round. A Power that creates one or more **Summons** does not create an additional **Summon** unless its own Critical Cast rule says so. If none of these bonuses applies, the Critical Cast grants no additional effect.

A single **Casting Check** can never grant more than one Critical Cast bonus.

Powers and Critical Hits

A damaging Power scores a **Critical Hit** when any retained base damage die shows its maximum value. Resolve exploding bonus dice normally. The first damage type listed in that damage expression is its primary damage type; apply only that type's universal **Critical Hit** rider unless the Power says otherwise. A Power cannot become a **Total Miss** because of its base damage dice. Its success or failure is determined only by its **Casting Check** unless the Power says otherwise.

Bonus AP Effect Limit

During each round, a combatant may benefit from only one **Power or scroll effect** that grants **AP**, refunds **AP**, or reduces an **AP** cost. This limit applies regardless of when the effect is used. A later effect still resolves, but its AP-granting, AP-refunding, or AP-reducing part is ignored for that combatant.

Summon Power Standard

When a Power creates one or more **Summons**, first remove each **Summon** that caster already controls from an earlier casting of the same Power. Then place each new **Summon** in a legal unoccupied space in **LOS** within the Power's range. The normal **Summon** limit still applies.

Unless the Power says otherwise, each placed Summon takes one activation immediately after the caster's activation ends. If the Power resolves outside the caster's activation, each placed Summon instead takes one activation immediately after the current activation ends. If no activation is in progress, each placed Summon takes one activation immediately after the Power resolves. These immediate Summon activations are exceptions to normal alternating activation. That activation is the Summon's only activation that round. If the Power creates multiple Summons, the caster's controller chooses their activation order and resolves each activation completely before the next begins. Each Summon gains their full listed AP immediately; if they have no listed AP, they have the default **2 AP** from **2.5**.

If a Summon's attack profile printed in a Power includes **INT** or **SPI**, use the caster's corresponding score when that Power resolves. Record that value for the Summon's duration. This does not grant the Summon an ability score.

Empower

Some Powers list one or more **Empower** options in the format **[Empower X NRG]:** followed by a modified effect.

To use an **Empower** option:

- declare the **Empower** option when you declare the Power, before paying any cost,
- pay the **Empower** option's listed **NRG** cost in addition to the Power's normal **NRG** cost,
- resolve the Power with the **Empower** option's modified effect.

A caster may apply only one **Empower** option per cast unless that Power says otherwise. A caster cannot apply an **Empower** option if they cannot pay its full **NRG** cost.

Empower options are part of the same casting and use the same **Casting Check**. **Critical Cast** bonuses, tradition backlash, and **Blood Price** apply normally and do not stack with the **Empower** modification beyond what each rule states.

A scroll, item, or rule that grants a Power without spending **NRG** does not allow that Power's **Empower** options unless the rule explicitly says so.

Sorceries do not use **Empower** options unless the Sorcery prints its own **Empower** option.

Tier 0 Powers

Tier 0 Powers are minor magical strikes, tricks, and wards. They are weaker than Tier 1–3 Powers, but they are always available to the classes that know them.

- If a class grants **Tier 0** Powers, that Hero always knows the **three Tier 0 Powers** listed for that class in their tradition section.
- Tier 0 Powers do **not** count against a Hero's known Tier 1–3 Powers.
- Unless a Tier 0 Power says otherwise, it costs **1 AP** and **0 NRG**.
- Damaging Tier 0 Powers use their listed base damage die and follow all normal damage rules for their tradition unless a specific Power says otherwise.
- When a class gains **Caster Supremacy**, their damaging Tier 0 Powers roll one additional base damage die of that Power's normal base damage die type.

Known Powers

Heraldry Skirmish does not use Power preparation. A Hero may cast any Power they know if they have the required AP, NRG, legal target, and tradition access.

Use the following rules unless a class entry or other specific rule says otherwise:

- A Hero begins with the Powers listed in their ancestry, class, and Level 1 class entry.
- A Hero that gains Tier 0 Powers knows all three Tier 0 Powers listed for their class and cannot replace them unless a rule explicitly says otherwise.
- When a class table says **Learn 1 new Power**, choose one Power from a tier that Hero can currently access.
- When a Hero gains access to a new tier, they may learn Powers from that tier and all lower tiers of the same tradition.
- Whenever a Hero levels up, they may replace one known Tier 1–3 Power with another Power of the same tradition from a tier they can access.
- A Hero cannot know the same Power more than once unless a rule says otherwise.
- Scrolls, tomes, relics, research, and Town Phase actions may grant or teach additional Powers when a rule says so.

Tradition Access by Class

The class entries and **6.13 Universal Class Progression** are authoritative, but the following shorthand applies:

A Power's printed damage, healing, and mitigation expression is complete. Add an ability score only when that expression prints the score, and add it only once.

- **Wizard / Trickster:** Arcane Spells. **Casting Check** uses **INT**.
- **Cleric / Paladin:** Divine Prayers. **Casting Check** uses **SPI**.
- **Druid / Ranger:** Druidic Rituals. **Casting Check** uses **SPI**.
- **Sorcerer:** Sorceries. **Casting Check** uses **SPI**. That same **Casting Check** determines whether **Blood Price** applies.
- **Psion:** Psychic Abilities. **Casting Check** uses **INT**.

Scroll use is governed by **Read Scroll [1 AP]** in **4.3.4** and **7.15 Scrolls**. A Hero does not need class or Level access to attempt a scroll, but lack of access imposes **Disadvantage** on the scroll's **Casting Check**.

Arcane Mishaps (Arcane Spells and Arcane Scroll Use)

On a natural **1** while casting an Arcane Spell or using an Arcane scroll, roll **1d6**:

1. **Feedback:** The caster suffers **1d4 arcane damage** for each Power Tier. A Tier 0 Power causes no damage from this result.
2. **Energy Drain:** The caster loses **1d4 additional NRG**.
3. **Wild Spark:** The Power fails and a harmless magical display erupts in an **Aura 3"**.
4. **Mental Scramble:** The caster becomes **Stunned**.
5. **Spell Collapse:** AP is spent, NRG is spent, and the Power fails with no further effect.
6. **Arcane Rebound:** The Power fails. If its unempowered effect could legally target the caster, resolve that effect against the caster. Otherwise, it has no further effect.

Divine Rebuke (Divine Prayers and Divine Scroll Use)

On a natural **1** while casting a Divine Prayer or using a Divine scroll, roll **1d6**:

1. **Silence of Faith:** The Divine Prayer fails and the caster cannot cast Divine Prayers again this round.
2. **Scourging Light:** The caster loses **1d4 HP** as holy backlash. This HP loss cannot be reduced by AV or AD.
3. **Burden of Doubt:** The caster becomes **Weakened**.
4. **Spent Devotion:** The caster loses **1 additional NRG**.
5. **Faltering Voice:** The caster becomes **Silenced**.
6. **Harsh Omen:** Choose one ally within **3"**. That ally suffers **-1** on their next **Check** this round. If no ally is in range, this result has no further effect.

Primal Backlash (Druids, Rangers)

On a natural **1** while casting a Druidic Ritual, roll **1d6**:

1. **Thornlash:** The caster suffers **1d4 piercing damage**.
2. **Mudbound:** The caster becomes **Slowed**.
3. **Nature Rejects the Plea:** The Ritual fails and its NRG is lost.
4. **Wild Cry:** All Beasts within **6"** immediately awaken and become hostile if neutral.
5. **Sapping Chill:** At the start of the caster's next activation, they lose **1 AP**, minimum **0**.
6. **Elemental Spill:** Place a marker adjacent to the caster. It creates **Aura 1" Dangerous Terrain** until the end of the round. Its hazard deals **1d4 damage** of the failed Ritual's primary damage type. If the Ritual has no damage type, the hazard deals **1d4 piercing damage** instead.

Sorcerous Backlash (Sorcerers)

Sorceries always resolve unless a specific rule says otherwise. When a Sorcerer casts a Sorcery, their **Casting Check** is also their **Blood Price Check**. On a success, the Sorcery resolves normally. On a failure, the Sorcery still resolves, but the caster immediately loses HP equal to the listed **Blood** value as **Blood Price**. If the Sorcerer rolls a natural **1** on that same casting die, roll **1d6** on the table below as well:

1. **Uncontrolled Surge:** After the Sorcery resolves, the caster becomes **Weakened**.
2. **Physical Toll:** The caster loses an additional **1d4 HP** for each Sorcery Tier. A Tier 0 Sorcery causes no additional HP loss from this result. This HP loss is part of the same **Blood Price** instance as the failed casting.
3. **Energy Overload:** The caster loses **1d6 additional NRG**.
4. **Chaotic Echo:** For the next Power cast within **10"** this round, treat a natural **2** on its **Casting Check** as a failed Check, but not a **Critical Failure**. A natural **1** remains a **Critical Failure**. Resolve the tradition's normal failure effect.
5. **Warped Step:** After the Sorcery resolves, **Slide** the caster **1d4"** using **Random Direction** in **10.1**.
6. **Mark of Chaos:** The caster's next casting **Check** this round is made with **Disadvantage**.

Psychic Feedback (Psions)

On a natural **1** while using a Psychic Ability, roll **1d6**:

1. **Migrainic Shock:** The caster suffers **1d4 psychic damage**.
2. **Nosebleed Focus Loss:** The caster loses **1 additional NRG**.
3. **Mental Static:** The caster becomes **Stunned**.
4. **Thought Slip:** The ability fails and the caster cannot use the same ability again this round.
5. **Backwash:** The caster loses **Hidden** and cannot become **Hidden** again this round.
6. **Psychic Whiplash:** One ally within **3"** suffers **1 psychic damage**. If no ally is in range, this result has no further effect.

> *Example, Casting: A Wizard with **INT +3** declares **Arcane Bolt** against a Ghoul **12"** away. The Power costs **2 AP** and **1 NRG**, so both are spent first. The Wizard then rolls **1d20 + 3** and gets a natural **20** for a total of **23**. The Power succeeds as a **Critical Cast**. Arcane Bolt therefore deals its normal damage plus one extra damage die because it is a damaging Power. If the Wizard had rolled a natural **1** instead, the Power would have failed and an **Arcane Mishap** would have been rolled immediately.*

8.3 Arcane Spells

Arcane Core Rules:

- Arcane Spells follow **8.2 Casting Powers**.
- Arcane Spells may use their printed **Empower** options.

Tier 0 Arcane Cantrips: Wizard

1. Arcane Dart **[1 AP, 0 NRG]**

- **Range:** 12"
- **Target:** 1 combatant
- **Effect:** Deal **1d4 arcane damage**.
- **Critical Cast:** You may immediately **Shift 1"**.

2. Mage Hand **[1 AP, 0 NRG]**

- **Range:** 8"
- **Target:** 1 unsecured object, unlocked door, lever, latch, or similar small interactable element
- **Effect: Interact** with the target within **8"**. This can open or close an unlocked door, pull a lever, lift or place one unsecured object, or perform a similar **Interact** effect at range. This can never deal damage, make an attack, or complete an objective unless that objective explicitly allows **Mage Hand**.

3. Spark Ward **[1 AP, 0 NRG]**

- **Range:** Self
- **Target:** Self
- **Effect:** Add **+3 AV** the next time you apply **AV** this round.

Tier 0 Arcane Cantrips: Trickster

1. Glamour Shard **[1 AP, 0 NRG]**

- **Range:** 2"
- **Target:** 1 combatant
- **Effect:** Deal **1d6 + INT arcane damage** and then **Shift 2"**.

2. False Footing **[1 AP, 0 NRG]**

- **Range:** 2"
- **Target:** 1 enemy in **LOS**
- **Effect:** The target must pass a **DEX Check** or become **Prone**.

3. Stage Smoke **[1 AP, 0 NRG]**

- **Range:** 6"
- **Target:** 1 point in space
- **Effect:** Create an **Aura 2"** area of smoke that provides **Cover** until the end of the round.

Tier 1 Arcane Spells (d20)

The first lessons any surviving academy still teaches: force, fire, and the manipulation of what the eye reports. Apprentices roll for what their masters had time to pass on.

1. Arcane Salvo **[2 AP, 2 NRG]**

- **Range:** 24"
- **Target:** 1–3 combatants
- **Effect:** Resolve three separate damage instances. Each instance deals **1d4 + 2 arcane damage**. Assign those damage instances among targets in range. Add your **INT** score once to the total damage dealt by this Power, distributed among targets as you choose.
- **[Empower 1 NRG]:** Resolve **1** additional damage instance (**4 damage instances total**).

2. Arcane Bolt **[2 AP, 1 NRG]**

- **Range:** 20"
- **Target:** 1 combatant
- **Effect:** Deal **1d12 + INT lightning damage**.
- **[Empower 1 NRG]:** Increase the die to **2d8**.

3. Burning Hands **[2 AP, 2 NRG]**

- **Range:** 3"
- **Area: Cone 3"**
- **Effect:** Deal **1d6 + INT fire damage** to all enemies in the cone.
- **[Empower 1 NRG]:** Area becomes a **Cone 6"**.

4. Ice Ray **[2 AP, 1 NRG]**

- **Range:** 18"
- **Target:** 1 combatant
- **Effect:** Deal **1d10 + INT ice damage** and reduce the target's **Speed** by **3"** until the end of the round.
- **[Empower 1 NRG]: Speed** reduction becomes **5"**.

5. Force Push **[2 AP, 2 NRG]**

- **Range:** 12"
- **Target:** 1 combatant
- **Effect: Push** the target **2"** directly away. On a **Collision**, they suffer **1d4 + INT arcane damage**.
- **[Empower 1 NRG]:** The **Push** distance becomes **4"**.

6. Arcane Mark **[1 AP, 1 NRG]**

- **Range:** 20"
- **Target:** 1 combatant
- **Effect:** Mark target until the end of the round. The next damage instance against them deals an additional **2 arcane damage**.
- **[Empower 1 NRG]:** The next damage instance deals an additional **1d4 arcane damage** instead.

7. Spell Shield **[1 AP Reaction, 1 NRG]**

- **Trigger:** You are targeted by a Power
- **Range:** Self
- **Effect:** Reduce damage dealt by the triggering Power by **2 × INT**, to a minimum of **0**.

8. Feather Fall **[1 AP Reaction, 1 NRG]**

- **Trigger:** A combatant in range would suffer HP loss or become **Prone** from falling
- **Range:** 12"
- **Effect:** Prevent all HP loss and becoming **Prone** from that fall.

9. Grease **[1 AP, 1 NRG]**

- **Range:** 18"
- **Area:** 2"×2" square
- **Effect:** The area is **Slippery Terrain** until the end of the round.

10. Energize **[1 AP, 1 NRG]**

- **Range:** 6"
- **Target:** 1 ally (or self)
- **Effect:** Target immediately gains **+1 AP**.
- **[Empower 1 NRG]:** Target instead immediately gains **+2 AP**.

11. Static Field **[1 AP, 1 NRG]**

- **Range:** 12"
- **Target:** 1 combatant
- **Effect:** Deal **1d4 + INT lightning damage**. The target must pass an **INT Check**, or they cannot use **Reactions** until the end of the round.

12. Lull **[2 AP, 3 NRG]**

- **Range:** 1"
- **Target:** 1 enemy combatant
- **Effect:** Target must pass a **SPI Check**. On a failure, the target becomes **Sleeping**.
- **[Empower 1 NRG]:** Also target one additional enemy within **3"** of the first target. Resolve that target's **SPI Check** separately.

13. Shield Pulse **[1 AP Reaction, 2 NRG]**

- **Trigger:** A source is declared that would deal damage to you
- **Range:** Self
- **Effect:** Reduce the triggering source's damage against you by **1d6 + INT**, to a minimum of **0**. Then gain **+1 AV** until the end of the round.

14. Mana Siphon **[2 AP, 0 NRG]**

- **Range:** 12"
- **Target:** 1 combatant with NRG
- **Effect:** Target loses 1 NRG (minimum 0). You gain 1 NRG (up to your maximum).
- **[Empower 1 NRG]:** If the target lost **NRG** from this Power, they lose **1 additional NRG** and you gain **1 additional NRG**, up to your maximum.

15. Phase Step **[1 AP, 0 NRG]**

- **Range:** Self
- **Effect:** Teleport up to **6"** to a legal unoccupied space in **LOS**. You cannot be placed adjacent to an enemy.

16. Arcane Ward **[1 AP, 1 NRG]**

- **Range:** 12"
- **Target:** 1 ally (or self)
- **Effect:** Target gains **+2 AV** until the end of the round.
- **[Empower 1 NRG]:** **AV** bonus becomes **+3**.

17. Disrupt Focus **[1 AP, 1 NRG]**

- **Range:** 18"
- **Target:** 1 combatant
- **Effect:** If the target is a **Monster**, they cannot use any **AI Step** abilities before the end of their next activation. Any other target must pass an **INT Check** or lose **1 AP** immediately (minimum 0).

18. Arcane Snare **[2 AP, 1 NRG]**

- **Range:** 12"
- **Target:** 1 combatant
- **Effect:** Target must pass a **DEX Check** or become **Immobilized**.

19. Mage Armour **[1 AP, 0 NRG]**

- **Range:** Self
- **Effect:** Gain **+2 AV** until the end of the round.
- **[Empower 1 NRG]:** Also gain **Temporary HP** = **5** until the end of the round.

20. Spell Lance **[2 AP, 1 NRG]**

- **Range:** 24"
- **Target:** 1 combatant
- **Effect:** Deal **1d12 + INT arcane damage**. Ignore **Cover**.

Tier 2 Arcane Spells (d20)

Beyond the apprentice work lie the spells that bent the old empire's wars. Each was copied from a library that has since burned.

1. Fireball **[2 AP, 5 NRG]**

- **Range:** 24"
- **Area:** 4"×4" square
- **Effect:** Deal **3d6 + INT fire damage** to all enemies in the area.
- **[Empower 2 NRG]:** Increase the damage to **4d6 + INT fire damage**.

2. Lightning Line **[2 AP, 4 NRG]**

- **Range:** 20"
- **Area:** 1" wide line
- **Effect:** Deal **2d6 + INT lightning damage** to all enemies touched by the area.
- **[Empower 1 NRG]:** Line length becomes **24"**.

3. Ice Prison **[2 AP, 3 NRG]**

- **Range:** 12"
- **Target:** 1 combatant
- **Effect:** Target must pass a **STR Check** or become **Immobilized**. While **Immobilized**, the first time they spend AP this round they suffer **1d8 + INT ice damage**.
- **[Empower 1 NRG]:** If the target fails the **STR Check**, they also lose **1 AP** immediately.

4. Web Field **[1 AP, 0 NRG]**

- **Range:** 18"
- **Area:** 4"×4" square
- **Effect:** The area is **Difficult Terrain** until the end of the round. Any combatant that starts their activation in the area must pass a **STR Check** or their **Speed** becomes **0"** until the end of the round.

5. Dispel **[1 AP, 0 NRG]**

- **Range:** 20"
- **Target:** 1 ongoing Power effect or conjured zone/wall
- **Effect:** End one ongoing Power effect within range.
- **[Empower 1 NRG]:** End **2** ongoing Power effects within range (choose separately).

6. Arcane Barrier **[2 AP, 2 NRG]**

- **Range:** 18"
- **Area:** 6" long, 1" thick wall
- **Effect:** Wall blocks movement and **LOS** until the end of the round.
- **[Empower 1 NRG]:** Wall length becomes **8"**.

7. Haste **[1 AP, 1 NRG]**

- **Range:** 12"
- **Target:** 1 ally
- **Effect:** Target gains **+2" Speed** until the end of the round and immediately gains **+1 AP**. This AP must be spent before the end of the round.
- **[Empower 1 NRG]:** **Speed** bonus becomes **+4"**.

8. Shatter **[2 AP, 4 NRG]**

- **Range:** 24"
- **Area:** 4"×4" square
- **Effect:** Deal **2d8 + INT lightning damage** to combatants in the area. Deal **3d8 + INT lightning damage** to unattended objects in the area.
- **[Empower 1 NRG]:** Combatants in the area are also **Pushed 2"** directly away from the centre.

9. Phantom Strike **[2 AP, 2 NRG]**

- **Range:** 12"
- **Target:** 1 combatant and 1 legal unoccupied destination in your **LOS** within **1"** of that combatant
- **Effect:** Teleport to the chosen destination, then deal **2d8 + INT arcane damage** to the target.

10. Invisibility Veil **[1 AP, 2 NRG]**

- **Range:** Self
- **Effect:** You are **Invisible** until the end of the round. This effect ends after your first attack, harmful Power, harmful Special Ability, **Push**, or **Trip** resolves.

11. Spellbreak **[1 AP Reaction, 3 NRG]**

- **Trigger:** A combatant in range declares a **Tier 0, Tier 1, or Tier 2 Arcane Spell or Sorcery**
- **Range:** 18"
- **Effect:** Cancel the Power before its **Casting Check**. The caster does not regain the AP or NRG spent to cast it.

12. Arcane Aegis **[1 AP Reaction, 3 NRG]**

- **Trigger:** A source is declared that would deal damage to you
- **Range:** Self
- **Effect:** Reduce the triggering source's damage against you by **1d8 + INT**, to a minimum of **0**.
- **[Empower 1 NRG]:** After reducing damage, gain **+1 AV** until the end of the round.

13. Blink **[1 AP Reaction, 1 NRG]**

- **Trigger:** You are targeted by an attack
- **Range:** Self
- **Effect:** Teleport up to **4"** to a legal unoccupied space in **LOS**. The triggering attack cannot affect you if you are no longer a legal target.

14. Chain Spark **[2 AP, 2 NRG]**

- **Range:** 18"
- **Target:** Up to 3 combatants
- **Effect:** Deal **2d6 + INT lightning damage** to the primary target. Then deal **2d4 + INT lightning damage** to up to two additional targets, each within **4"** of the previous target.
- **[Empower 1 NRG]:** Add **1** additional secondary target (up to **3** secondaries total).

15. Sleep **[2 AP, 3 NRG]**

- **Range:** 12"
- **Target:** 1 combatant
- **Effect:** Target must pass a **SPI Check**. On a failure, the target becomes **Sleeping**.
- **[Empower 1 NRG]:** Also target a second combatant within **4"** of the first; resolve its Check separately.

16. Mana Shield **[2 AP, 3 NRG]**

- **Range:** 12"
- **Target:** 1 ally
- **Effect:** Target gains **Temporary HP** = 12 until the end of the round.

17. Gravity Knot **[2 AP, 2 NRG]**

- **Range:** 18"
- **Area:** 2"×2" square
- **Effect:** Combatants in the area become **Slowed**. The first time each combatant leaves the area this round, they suffer **1d6 + INT arcane damage**.
- **[Empower 1 NRG]:** Area becomes **4"×4"**.

18. Elemental Conversion **[1 AP, 1 NRG]**

- **Range:** Self
- **Effect:** Choose fire, ice, or lightning. Until the end of the round, your Arcane Spell damage uses that type.

19. Arcane Overload **[2 AP, 3 NRG]**

- **Range:** 18"
- **Target:** 1 combatant
- **Effect:** Deal **3d8 + INT arcane damage**. You suffer **1d4 arcane damage**.

20. Arcane Momentum **[0 AP, 1 NRG]**

- **Range:** Self
- **Effect:** Until the end of the round, the next **Tier 1 Arcane Spell** you cast costs **1 less AP**, to a minimum of **1 AP**. You still pay its normal **NRG** cost.
- **[Empower 1 NRG]:** That **Tier 1** Power also costs **1 less NRG**, to a minimum of **0 NRG**.

Tier 3 Arcane Spells (d20)

These are the spells the towers killed to keep. What a wizard recovers at this tier, they recover from ash, ciphers, and the dead.

1. Meteor Impact **[3 AP, 7 NRG]**

- **Range:** 24"
- **Area:** 4"×4" square
- **Effect:** Deal **4d6 + INT fire damage** and **2d6 arcane damage** to all enemies in the area.
- **[Empower 1 NRG]:** Increase the fire damage to **5d6 + INT**.

2. Chain Lightning **[3 AP, 8 NRG]**

- **Range:** 20"
- **Target:** Up to 3 combatants
- **Effect:** Deal **4d6 + INT lightning damage** to the primary target. Then deal **3d6 + INT lightning damage** to two additional targets, each within **6"** of the previous target.
- **[Empower 1 NRG]:** Add a fourth target within **6"** of the third (**3d6 + INT lightning damage**).

3. Disintegrate **[3 AP, 8 NRG]**

- **Range:** 18"
- **Target:** 1 combatant
- **Effect:** Deal **6d8 + INT arcane damage** to the target. If the target is reduced to 0 HP, they cannot be restored to any HP value, returned to play, or brought out of **Knocked Out** until the end of the round.
- **[Empower 1 NRG]:** If the target survives, they must pass a **SPI Check** or lose **2 AP** immediately, minimum **0**.

4. Time Break **[1 AP, 0 NRG]**

- **Range:** Self
- **Effect:** Immediately gain **2 AP**. These AP must be spent during your current activation. At the start of your next activation, you lose **1 AP**, minimum **0**. **Time Break** can be cast only once per round.

5. Antimagic Zone **[3 AP, 2 NRG]**

- **Range:** 18"
- **Area:** 6"×6" square
- **Effect:** Until the end of the round, Powers cannot be cast from within the zone, and ongoing Power effects are suppressed while inside.

6. Gravity Well **[3 AP, 5 NRG]**

- **Range:** 18"
- **Area:** 4"×4" square
- **Effect:** All combatants in the area are **Pulled 2"** toward the centre. A combatant that suffers a **Collision** suffers **2d6 + INT arcane damage**.
- **[Empower 1 NRG]:** The **Pull** distance becomes **4"**.

7. Arcane Cataclysm **[3 AP, 7 NRG]**

- **Range:** Self
- **Area:** 8"×8" square centred on you
- **Effect:** Deal **4d8 + INT arcane damage** to all enemies in the area. You suffer **1d8 arcane damage**.

8. Dominate Beast **[2 AP, 1 NRG]**

- **Range:** 12"
- **Target:** 1 **Monster** with **Beast**
- **Effect:** During the target's next activation this round, you choose their legal movement, attacks, and attack targets. You cannot force them to leave the battlefield or enter **Dangerous Terrain**. If they have already activated this round, this Power has no effect and its NRG cost is still spent.
- **[Empower 1 NRG]:** The controlled **Monster** gains **+2" Speed** during that activation.

9. Absolute Spellbreak **[2 AP Reaction, 3 NRG]**

- **Trigger:** A combatant in range declares a Power
- **Range:** 24"
- **Effect:** Cancel the Power before its **Casting Check**. The caster does not regain AP spent to cast it. If the cancelled Power was **Tier 3**, refund its caster all NRG spent on that Power except **1 NRG**. Otherwise, do not refund its NRG.

10. Foresight **[1 AP Reaction, 6 NRG]**

- **Trigger:** You fail a d20 **Check**, or an enemy rolls a natural 20 on a **Casting Check** or d20 **Check** targeting you
- **Range:** Self
- **Effect:** Reroll that d20. The second result stands, even if worse.

11. Storm of Annihilation **[3 AP, 6 NRG]**

- **Range:** 24"
- **Area:** 1" wide line
- **Effect:** Deal **6d6 + INT lightning damage** to all enemies touched by the area.
- **[Empower 1 NRG]:** Each enemy damaged by the Power is also **Pushed 2"** directly away from the line's centreline.

12. Rift Step **[2 AP, 1 NRG]**

- **Range:** Self
- **Effect:** Teleport up to 18". You may be placed adjacent to an enemy.

13. Reality Warp **[3 AP, 4 NRG]**

- **Range:** 18"
- **Target:** 1 combatant
- **Effect:** Target must pass a **SPI Check**. On a failure, **Teleport** them to a legal unoccupied space within **8"** of their current position and your **LOS**; you choose the destination. Then they suffer **2d6 + INT arcane damage**.
- **[Empower 1 NRG]:** The maximum Teleport distance becomes **12"**.

14. Arcane Gate **[2 AP, 1 NRG]**

- **Range:** 18"
- **Target:** 2 points
- **Effect:** Place two linked gates within range; each must be in **LOS** and occupy an empty space. Until the end of the round, a combatant adjacent to either gate may teleport to a legal unoccupied space adjacent to the other gate once per activation. This teleport costs no movement.

15. Prismatic Burst **[3 AP, 6 NRG]**

- **Range:** 18"
- **Area:** 4"×4" square
- **Effect:** Roll **1d6** to determine the damage type: **1:** fire; **2:** ice; **3:** lightning; **4:** arcane; **5:** psychic; **6:** holy. Deal damage of the determined type equal to **4d8 + INT** to all enemies in the area. Damage dealt by **Prismatic Burst** ignores **Resistant** to the rolled damage type.
- **[Empower 1 NRG]:** Roll twice and choose the damage type.

16. Mind Shatter **[3 AP, 4 NRG]**

- **Range:** 18"
- **Target:** 1 combatant
- **Effect:** Deal **4d8 + INT psychic damage**. Target must pass a **SPI Check** or lose 2 AP immediately (minimum 0).

17. Arcane Dominion **[2 AP, 3 NRG]**

- **Range:** Self
- **Effect:** Until the end of the round, your Powers cost **1 less AP**, to a minimum of **1 AP**, and your Power damage rolls deal an additional **1d6 arcane damage**.
- **[Empower 1 NRG]:** You also gain **+2 AV** until the end of the round.

18. Vacuum Sphere **[3 AP, 4 NRG]**

- **Range:** 18"
- **Area:** 4"×4" square
- **Effect:** Deal **3d6 + INT arcane damage** to all enemies in the area. Affected enemies cannot use **Reactions** until the end of the round. The first time each affected enemy leaves the area this round, they suffer **1d6 + INT arcane damage**.
- **[Empower 1 NRG]:** Area becomes **6"×6"**.

19. Null Lance **[2 AP, 7 NRG]**

- **Range:** 24"
- **Target:** 1 combatant
- **Effect:** Deal **5d8 + INT arcane damage** and end one ongoing Power effect on the target, if any.

20. Chrono Reversal **[2 AP Reaction, 5 NRG]**

- **Trigger:** You or an ally within range would be reduced to 0 HP, and no other Reaction has modified how the triggering action or effect resolves against that combatant
- **Range:** 12"
- **Effect:** That combatant is instead set to **1 HP**, and immediately teleports **3"** to a legal unoccupied space in **LOS**. They then become **Slowed** and cannot use **Reactions** until the end of the round.
- **[Empower 1 NRG]:** The combatant also gains **Temporary HP** = **12** until the end of the round.

8.4 Divine Prayers

Divine Core Rules:

- Divine Prayers follow **8.2 Casting Powers**. Resolve healing and other tradition-specific effects exactly as printed.

Tier 0 Orisons: Cleric

1. Sacred Spark **[1 AP, 0 NRG]**
- **Range:** 10"
- **Target:** 1 combatant
- **Effect:** Deal **1d4 holy damage**.
2. Sign of Warding **[1 AP, 0 NRG]**
- **Range:** 6"
- **Target:** Self or 1 ally
- **Effect:** The target gains **+1 AV** the next time they apply **AV** this round.
3. Lantern of Faith **[1 AP, 0 NRG]**
- **Range:** 10"
- **Target:** 1 point in space
- **Effect:** An **Aura 5"** area around the target point becomes **Light** until the end of the round. **Hidden** enemies in that area immediately lose **Hidden**.

Tier 0 Orisons: Paladin

1. Oathspark **[1 AP, 1 NRG]**
- **Range:** 1"
- **Target:** 1 combatant
- **Effect:** Deal **1d6 + SPI holy damage**.
2. Steadfast Word **[1 AP, 1 NRG]**
- **Range:** 3"
- **Target:** Self or 1 ally
- **Effect:** Remove **Frightened** from the target and let the target immediately **Stand** for **0 AP** if they are **Prone**.
3. Mark of Challenge **[1 AP, 1 NRG]**
- **Range:** 6"
- **Target:** 1 enemy in **LOS**
- **Effect:** Until the end of the round, the target's attack damage rolls against any ally other than you are made with **Disadvantage**.

Tier 1 Divine Prayers (d20)

The plainest mercies the surviving faiths can still call down: light, mending, and the courage to stand one more round.

1. Sacred Flame **[1 AP, 2 NRG]**
- **Range:** 24"
- **Target:** 1 combatant
- **Effect:** Deal **1d10 + SPI holy damage**.
2. Guiding Light **[2 AP, 2 NRG]**
- **Range:** 18"
- **Target:** 1 combatant
- **Effect:** Deal **1d8 + SPI holy damage**. The next attack damage roll against the target has **Advantage** until the end of the round.
3. Healing Touch **[1 AP, 1 NRG]**
- **Range:** 1"
- **Target:** 1 ally (or self)
- **Effect:** The target regains **1d10 + SPI HP**.
4. Blessing **[1 AP, 1 NRG]**
- **Range:** 12"
- **Target:** Up to 2 allies
- **Effect:** Each target gains **+1** to their next **Check** before the end of the round.
5. Armour of Faith **[1 AP, 1 NRG]**
- **Range:** 12"
- **Target:** 1 ally (or self)
- **Effect:** Target gains **+2 AV** until the end of the round.
6. Smite **[1 AP, 2 NRG]**
- **Range:** Self
- **Effect:** Until the end of the round, your next melee damage instance deals an additional **1d8 + SPI holy damage**.
7. Sanctuary **[2 AP, 2 NRG]**
- **Range:** 12"
- **Target:** 1 ally (or self)
- **Effect:** Until the end of the round, whenever an enemy declares an attack against the warded ally, that enemy makes a **SPI Check** after paying any cost but before resolving the attack. On a failure, a non-Boss enemy must choose another legal target. If no other legal target exists, the attack is lost and its costs are not refunded. A **Boss** instead rolls the triggering attack's base damage dice with **Disadvantage**.
8. Turn the Unholy **[2 AP, 1 NRG]**

- **Range:** 6"
- **Target:** All **Undead** and **Fiend** combatants in range
- **Effect:** Each target must pass a **SPI Check**. On a failure, a non-Boss target cannot move closer to any enemy and cannot make melee attacks until the end of the round. A **Boss** instead cannot use **AI Step** abilities before the end of their next activation, and their first attack damage roll before the end of that activation is made with **Disadvantage**.

9. Censure **[1 AP Reaction, 1 NRG]**

- **Trigger:** A visible enemy in range declares a Power
- **Range:** 12"
- **Effect:** The triggering Power's **Casting Check** suffers **-3**.

10. Divine Guard **[1 AP Reaction, 2 NRG]**

- **Trigger:** An ally in range is targeted by an attack
- **Range:** 6"
- **Effect:** That ally gains **+2 AV** against the triggering attack.

11. Purify **[2 AP, 1 NRG]**

- **Range:** 6"
- **Target:** 1 ally
- **Effect:** End one negative condition affecting the target (examples: **Burning**, **Cursed**, **Poisoned [dX]**, **Immobilized**, or **Stunned**). If multiple apply, choose one.

12. Consecrated Ground **[1 AP, 1 NRG]**

- **Range:** 12"
- **Area:** 2"×2" square
- **Effect:** Until the end of the round, allies in the area gain **+1 AV** and **+1** to **Checks**.

13. Radiant Step **[1 AP, 1 NRG]**

- **Range:** Self
- **Effect:** Teleport up to 6" to a legal unoccupied space in **LOS**. You cannot be placed adjacent to an enemy.

14. Hymn of Courage **[1 AP, 0 NRG]**

- **Range:** 12"
- **Target:** Up to 4 allies
- **Effect:** Until the end of the round, targets remove **Frightened**, are **Immune** to **Frightened**, and gain **+1** to **SPI Checks**.

15. Judgement **[1 AP, 2 NRG]**

- **Range:** 18"
- **Target:** 1 combatant
- **Effect:** Deal **1d4 + SPI holy damage**. If the target is below max HP after damage, they must pass a **SPI Check**, or lose 1 AP immediately (minimum 0).

16. Lightbind **[1 AP, 0 NRG]**

- **Range:** 12"
- **Target:** 1 combatant
- **Effect:** Target must pass a **DEX Check** or their **Speed** is reduced by **4"** until the end of the round.

17. Warding Sigil **[2 AP, 1 NRG]**

- **Range:** 12"
- **Target:** 1 ally
- **Effect:** Until the end of the round, the first time the target would take damage, reduce it by **1d6 + SPI**, to a minimum of **0**.

18. Dawnbolt **[1 AP, 3 NRG]**

- **Range:** 24"
- **Target:** 1 combatant
- **Effect:** Deal **1d8 + SPI holy damage**. Ignore **Cover**.

19. Mercy **[1 AP, 1 NRG]**

- **Range:** 12"
- **Target:** 1 ally
- **Effect:** The target removes **Prone** and may immediately **Shift 2"**. This **Shift** cannot move them adjacent to an enemy.

20. Vow of Focus **[0 AP, 1 NRG]**

- **Range:** Self
- **Effect:** Until the end of the round, the next **Tier 1** or higher **Divine Prayer** you cast costs **1 less AP**, to a minimum of **1 AP**, and **1 less NRG**, to a minimum of **1 NRG**.

Tier 2 Divine Prayers (d20)

Prayers answered less often and at greater cost. The gods that remain are listening, but they are tired, and they keep accounts.

1. Radiant Burst **[2 AP, 4 NRG]**

- **Range:** 18"
- **Area:** 4"×4" square
- **Effect:** Deal **2d4 + SPI holy damage** to all enemies in the area.

2. Searing Lance **[2 AP, 3 NRG]**

- **Range:** 24"
- **Target:** 1 combatant
- **Effect:** Deal **3d6 + SPI holy damage**.

3. Spirit Shackles **[1 AP, 2 NRG]**

- **Range:** 12"
- **Target:** 1 combatant
- **Effect:** Target must pass a **STR Check** or become **Immobilized**.

4. Beacon of Resolve **[2 AP, 2 NRG]**

- **Range:** 12"
- **Target:** Up to 3 allies
- **Effect:** Each target gains **Temporary HP** = 12 until the end of the round.

5. Mass Healing Word **[1 AP, 1 NRG]**

- **Range:** 12"
- **Target:** Up to 3 allies
- **Effect:** Each target regains **1d4 + SPI HP**.

6. Divine Smite **[1 AP, 4 NRG]**

- **Range:** Self
- **Effect:** Until the end of the round, your next melee damage instance deals an additional **2d6 + SPI holy damage**.

7. Circle of Protection **[2 AP, 1 NRG]**

- **Range:** 12"
- **Area:** 4"×4" square
- **Effect:** Until the end of the round, allies in the area gain **+2 AV** against ranged weapon attacks and against blunt, piercing, or slashing damage dealt by Powers.

8. Blinding Radiance **[2 AP, 3 NRG]**

- **Range:** 18"
- **Area:** 2"×2" square
- **Effect:** Enemies in the area suffer **1d6 + SPI holy damage** and must pass a **SPI Check** or their attack damage rolls are made with **Disadvantage** until the end of the round.

9. Rebuke the Profane **[1 AP Reaction, 7 NRG]**

- **Trigger:** An enemy in range casts a Power, uses a scroll, or declares a Special Ability
- **Range:** 18"
- **Effect:** After the triggering Power, scroll, or Special Ability resolves, that enemy suffers **2d6 + SPI holy damage**.

10. Aegis Intercession **[1 AP Reaction, 6 NRG]**

- **Trigger:** An ally in range is chosen as the target of a source that deals damage
- **Range:** 6"
- **Effect:** Reduce the triggering source's damage against that ally by **2d6 + SPI**, to a minimum of **0**.

11. Holy Stride **[1 AP, 2 NRG]**

- **Range:** 12"
- **Target:** 1 ally (or self)
- **Effect:** Target teleports up to 8" to a legal unoccupied space in **LOS**.

12. Purging Flame **[2 AP, 4 NRG]**

- **Range:** 18"
- **Target:** 1 combatant
- **Effect:** Deal **2d6 + SPI fire damage**. Before resolving damage, the target loses all **Temporary HP**.

13. Oath of Vengeance **[2 AP, 3 NRG]**

- **Range:** 18"
- **Target:** 1 enemy
- **Effect:** Until the end of the round, the first time the target is damaged, they suffer an additional **1d8 + SPI holy damage** and their **Speed** is reduced by **2"**.

14. Banish Weakness **[1 AP, 2 NRG]**

- **Range:** 12"
- **Target:** 1 enemy
- **Effect:** Target must pass a **SPI Check** or lose 2 AP immediately (minimum 0).

15. Consecrate Weapon **[1 AP, 1 NRG]**

- **Range:** 6"
- **Target:** 1 ally's weapon
- **Effect:** Until the end of the round, that weapon deals an additional **1d6 holy damage**.

16. Luminous Wall **[2 AP, 3 NRG]**

- **Range:** 18"
- **Area:** 6" long, 1" thick wall
- **Effect:** Blocks **LOS** until the end of the round. The first time each enemy passes through, they suffer **1d6 + SPI holy damage**.

17. Guardian Angel **[1 AP, 3 NRG]**

- **Range:** 12"
- **Target:** 1 ally
- **Effect:** Until the end of the round, the first time the ally would be reduced to 0 HP, they are instead set to 1 HP and gain **Temporary HP** = 12 until the end of the round.

18. Prayer of Stillness **[2 AP, 2 NRG]**

- **Range:** 12"
- **Area:** 4"×4" square
- **Effect:** Until the end of the round, enemies in the area cannot use **Reactions** and cannot gain bonus AP.

19. Sunbrand **[2 AP, 4 NRG]**

- **Range:** 24"
- **Target:** 1 combatant
- **Effect:** Deal **3d6 + SPI holy damage**. **Hidden** and **Invisible** do not prevent you from choosing the target or drawing **LOS** to it for this Power. Other **LOS** restrictions still apply.

20. Benediction **[2 AP, 2 NRG]**

- **Range:** 12"
- **Target:** Up to 2 allies
- **Effect:** Until the end of the round, each target's next damage roll from a weapon or Power deals an additional **2 damage of that source's primary damage type**, and each target gains **Temporary HP** = 5 until the end of the round.

Tier 3 Divine Prayers (d20)

At this height a prayer is not asked but demanded, and something always answers. Whether it is the god prayed to is a question the devout do not raise aloud.

1. Divine Wrath **[3 AP, 7 NRG]**

- **Range:** 18"
- **Area:** 6"×6" square
- **Effect:** Deal **4d8 + SPI holy damage** to all enemies in the area.

2. Heaven's Spear **[3 AP, 10 NRG]**

- **Range:** 24"
- **Area:** 1" wide line
- **Effect:** Deal **5d6 + SPI holy damage** to all enemies touched by the area.

3. Spirit Guardians **[3 AP, 4 NRG]**

- **Range:** Self
- **Area:** Aura 6"
- **Effect:** Until the end of the round, the first time each enemy starts their activation in the Aura or enters it, that enemy suffers **2d6 + SPI holy damage**.

4. Mass Heal **[3 AP, 2 NRG]**

- **Range:** 12"
- **Target:** Up to 4 allies
- **Effect:** Each target regains **2d8 + SPI HP**.

5. Resurrection Light **[3 AP, 3 NRG]**

- **Range:** 6"
- **Target:** 1 ally at 0 HP
- **Effect:** Target is set to **1 HP**, is no longer **Knocked Out**, removes **Prone**, and may immediately **Shift 2"**. This **Shift** cannot move them adjacent to an enemy. **Resurrection Light** does not remove the Wound gained from being reduced to **0 HP**.

6. Judgement of Chains **[3 AP, 7 NRG]**

- **Range:** 18"
- **Target:** 1 combatant
- **Effect:** Deal **4d8 + SPI holy damage**. Target must pass a **STR Check** or become **Immobilized**.

7. Purifying Inferno **[3 AP, 8 NRG]**

- **Range:** 18"
- **Area:** 4"×4" square
- **Effect:** Deal **4d4 + SPI fire damage** to all enemies in the area. Each affected **Monster** cannot use any **AI Step** abilities before the end of their next activation. Each other affected enemy loses **1 AP** immediately (minimum 0).

8. Holy Cathedra **[3 AP, 2 NRG]**

- **Range:** 12"
- **Area:** 4"×4" square
- **Effect:** Until the end of the round, allies in the area gain **+2 AV** and **+2** to **Checks**.

9. Miraculous Intercession **[2 AP Reaction, 6 NRG]**

- **Trigger:** An ally in range would be reduced to 0 HP, and no other Reaction has modified how the triggering action or effect resolves against that ally
- **Range:** 12"
- **Effect:** That ally is instead set to 1 HP and gains **Temporary HP** = 12 until the end of the round.

10. Atonement **[2 AP Reaction, 3 NRG]**

- **Trigger:** You fail a d20 **Check**, or an enemy rolls a natural 20 on a **Casting Check** or d20 **Check** targeting you
- **Range:** Self
- **Effect:** Reroll that d20. The second result stands, even if worse.

11. Sunburst **[3 AP, 7 NRG]**

- **Range:** 18"
- **Area:** 6"×6" square
- **Effect:** All enemies in the area suffer **4d4 + SPI holy damage**. Each enemy must then pass a **SPI Check**. On a failure, a non-Monster enemy cannot take the **Attack**, **Push**, or **Trip** actions until the end of the round. A **Monster** resolves the failed-Check effect automatically under **2.3**: they cannot use any **AI Step** abilities before the end of their next activation, and their first attack damage roll before the end of that activation is made with **Disadvantage**.

12. Banish the Profane **[3 AP, 5 NRG]**

- **Range:** 12"
- **Target:** 1 **Monster** with **Undead** or **Fiend**
- **Effect:** Remove them from the battlefield until the end of the round. While removed, they cannot activate, be targeted, or affect the battlefield, and they retain their ongoing effects. They then return to their starting position or the nearest legal unoccupied space. **Boss Monsters** are not removed; instead, they cannot use **AI Step** abilities before the end of their next activation, and their first attack damage roll before the end of that activation is made with **Disadvantage**.

13. Radiant Dominion **[2 AP, 3 NRG]**

- **Range:** Self
- **Effect:** Until the end of the round, your Divine Prayers cost **1 less AP**, to a minimum of **1 AP**, and your Divine Prayer damage rolls deal an additional **1d6 holy damage**.

14. Unbreakable Vow **[3 AP, 2 NRG]**

- **Range:** 12"
- **Target:** 1 ally
- **Effect:** Until the end of the round, the ally is immune to forced movement and cannot have their AP reduced.

15. Seraphic Strike **[3 AP, 6 NRG]**

- **Range:** 18"
- **Target:** 1 combatant and 1 legal unoccupied destination in your **LOS** within **1"** of that combatant
- **Effect:** Teleport to the chosen destination, then deal **5d6 + SPI holy damage** to the target.

16. Edict of Silence **[3 AP, 3 NRG]**

- **Range:** 18"
- **Area:** 4"×4" square
- **Effect:** Until the end of the round, enemies in the area cannot cast **Tier 1–3** Powers.

17. Hammer of Dawn **[3 AP, 9 NRG]**

- **Range:** 24"
- **Target:** 1 combatant
- **Effect:** Deal **6d6 + SPI holy damage**. If the target is a **Monster**, they suffer an additional **1d6 holy damage**.

18. Angelic Bulwark **[3 AP, 5 NRG]**

- **Range:** 12"
- **Target:** Up to 2 allies
- **Effect:** Until the end of the round, each target gains **+3 AV** and **Temporary HP** = 8 until the end of the round.

19. Chains of Mercy **[3 AP, 4 NRG]**

- **Range:** 18"
- **Area:** 4"×4" square
- **Effect:** Enemies in the area must pass a **SPI Check** or their **Speed** becomes **0"** until the end of the round. Allies in the area regain **1d6 + SPI HP**.

20. Final Verdict **[3 AP, 7 NRG]**

- **Range:** 18"
- **Target:** 1 combatant
- **Effect:** Deal **4d8 + SPI holy damage**. If the target is below half HP after damage, they lose **1 AP** immediately (minimum **0**).

8.5 Sorceries

Sorcery Core Rules:

- Sorceries follow **8.2 Casting Powers** and the **Blood Price** rules below.
- **Automatic Casting and Blood Price:** Sorceries always resolve unless a specific rule says otherwise. When you cast a Sorcery, make one **Casting Check** using **1d20 + SPI** against **12**. That same roll is also the **Blood Price Check**. On a success, the Sorcery resolves normally. On a failure, the Sorcery still resolves, but you immediately lose HP equal to the listed **Blood** value as **Blood Price**.
- **Blood Price** is HP loss, not a damage type. It ignores **AV**, **AD**, **Resistance**, **Immune**, **Vulnerable**, **Block**, **Dodge**, **Parry**, and all **Reactions**. It can reduce the caster to **0 HP**, causes **Knocked Out** and **Wounds** normally, and triggers rules that trigger when the caster loses HP.
- **Volatile Nature:** Sorcery emphasizes unstable power, self-harm risk, burst damage, and reckless tempo. Sorceries do not use **Empower** options unless the Sorcery prints its own **Empower** option.

Tier 0 Sorceries: Sorcerer

1. Ember Pulse **[1 AP, 0 NRG, Blood: 1]**

- **Range:** 8"
- **Target:** 1 combatant
- **Effect:** Deal **1d4 fire damage**.

2. Blood Flicker **[1 AP, 0 NRG, Blood: 1]**

- **Range:** Self
- **Target:** Self
- **Effect:** Teleport up to **2"** to a legal space in **LOS**. Movement made by this Power does not trigger **Reflex Attack**.

3. Hex Glare **[1 AP, 0 NRG, Blood: 1]**

- **Range:** 8"
- **Target:** 1 enemy in **LOS**
- **Effect:** The target must pass a **SPI Check** or become **Blinded**.

Tier 1 Sorceries (d20)

Sorcery does not study. It bleeds. These first workings cost little blood and never fail, which is how they teach the unwary to want more.

1. Chaos Bolt **[2 AP, 1 NRG, Blood: 1]**

- **Range:** 20"
- **Target:** 1 combatant
- **Effect:** Choose **fire**, **ice**, **lightning**, or **arcane**. Deal **1d12 + SPI** damage of that type.

2. Hexflare **[1 AP, 1 NRG, Blood: 1]**

- **Range:** 18"
- **Target:** 1 combatant
- **Effect:** Deal **1d8 + SPI fire damage**. If the target is below max HP after damage, they lose **1 AP** immediately, to a minimum of **0 AP**.

3. Crackling Jolt **[1 AP, 2 NRG, Blood: 1]**

- **Range:** 18"
- **Target:** 1 combatant
- **Effect:** Deal **1d6 + SPI lightning damage** and **Push** the target **1"** directly away from you.

4. Razorwind **[1 AP, 4 NRG, Blood: 1]**

- **Range:** 18"
- **Area:** 4"×2" rectangle
- **Effect:** Deal **1d6 + SPI slashing damage** to all enemies in the area.

5. Bloodspark **[1 AP, 2 NRG, Blood: 1]**

- **Range:** 18"
- **Target:** 1 combatant
- **Effect:** Deal **1d10 + SPI lightning damage**. If you fail the **Casting Check** for this Power, its **Blood Price** HP loss increases by **+1** (total **2**).

6. Scorch Step **[1 AP, 2 NRG, Blood: 1]**

- **Range:** Self
- **Effect:** Teleport up to **6"** to a legal unoccupied space in **LOS**. Choose up to two enemies within **1"** of either your starting space or destination; each chosen enemy suffers **1d4 + SPI fire damage**.

7. Shardburst **[1 AP, 2 NRG, Blood: 1]**

- **Range:** 12"
- **Area:** 2"×2" square
- **Effect:** Deal **1d4 + SPI piercing damage** to all enemies in the area.

8. Warp Nudge **[1 AP, 1 NRG, Blood: 1]**

- **Range:** 12"
- **Target:** 1 combatant
- **Effect:** Target must pass a **SPI Check** or be teleported **3"** to a legal unoccupied space in **LOS** chosen by you. This teleportation cannot place them adjacent to an enemy.

9. Feral Surge **[1 AP, 2 NRG, Blood: 1]**

- **Range:** Self
- **Effect:** Until the end of the round, your next damage roll from a weapon or Power deals an additional **1d6 damage of that source's primary damage type**.

10. Dark Mantle **[1 AP, 2 NRG, Blood: 1]**

- **Range:** Self
- **Effect:** Until the end of the round, ranged attacks against you roll their base damage dice with **Disadvantage**.

11. Unstable Shield **[1 AP Reaction, 2 NRG, Blood: 1]**

- **Trigger:** You are targeted by an attack
- **Range:** Self
- **Effect:** Gain **+2 AV** against the triggering attack. If the triggering attack is a **Total Miss**, the attacker suffers **1d4 + SPI arcane damage**.

12. Spiteful Reprisal **[1 AP Reaction, 1 NRG, Blood: 1]**

- **Trigger:** A combatant in range declares an attack or harmful effect that would affect you
- **Range:** 12"
- **Effect:** After the triggering action or effect resolves, if it damaged you, that combatant suffers **1d8 + SPI psychic damage**.

13. Ember Net **[1 AP, 0 NRG, Blood: 1]**

- **Range:** 12"
- **Target:** 1 combatant
- **Effect:** The target must pass a **DEX Check** or their **Speed** becomes **0"** until the end of the round.

14. Frigid Grasp **[1 AP, 4 NRG, Blood: 1]**

- **Range:** 12"
- **Target:** 1 combatant
- **Effect:** Deal **1d6 + SPI ice damage**. If this damages the target, they must pass a **STR Check**, or they cannot use **Reactions** until the end of the round.

15. Vacuum Pop **[1 AP, 2 NRG, Blood: 1]**

- **Range:** 18"
- **Target:** 1 combatant
- **Effect:** Deal **1d4 + SPI arcane damage**. Ignore **Cover**.

16. Arcane Hunger **[1 AP, 0 NRG, Blood: 1]**

- **Range:** 12"
- **Target:** 1 combatant with NRG
- **Effect:** Target loses 1 NRG (minimum 0). You gain **Temporary HP** = 5 until the end of the round.

17. Wild Cast **[0 AP, 0 NRG, Blood: 1]**

- **Range:** Self
- **Effect:** Until the end of the round, your next Sorcery costs **1 less NRG**, to a minimum of **0 NRG**. You lose **1 HP** when you cast **Wild Cast**, regardless of the **Casting Check** result. This HP loss is not reduced by **AV**. **Wild Cast** can be cast only once per round.

18. Sunder Will **[1 AP, 2 NRG, Blood: 1]**

- **Range:** 18"
- **Target:** 1 combatant
- **Effect:** Target must pass an **INT Check** or their attack damage rolls are made with **Disadvantage** until the end of the round.

19. Inferno Flicker **[1 AP, 1 NRG, Blood: 1]**

- **Range:** 18"
- **Target:** 1 combatant
- **Effect:** Deal **1d4 + SPI fire damage**. If this damages the target, you may **Shift 2"**. This **Shift** cannot move you adjacent to an enemy.

20. Summon Cinder Imp **[1 AP, 2 NRG, Blood: 1]**

- **Range:** 6" (Place 1 **Summon**)
- **Effect:** Place a Cinder Imp using the **Summon Power Standard**.
- **Summon (Cinder Imp): SPD 8" | Sz S | AV 0 | HP 4**
- **Special Ability: Small.**
- **Claw: 1d6 + SPI fire damage**.

Tier 2 Sorceries (d20)

The price climbs with the power. A sorcerer who reaches this tier has already learned what their veins are worth and decided it a fair trade.

1. Volatile Fireball **[2 AP, 3 NRG, Blood: 2]**

- **Range:** 24"
- **Area:** 4"×4" square
- **Effect:** Deal **3d4 + SPI fire damage** to all enemies in the area.

2. Chain Shock **[2 AP, 3 NRG, Blood: 2]**

- **Range:** 20"
- **Target:** Up to 3 combatants
- **Effect:** Deal **2d6 + SPI lightning damage** to the primary target. Then deal **2d4 + SPI lightning damage** to up to two additional targets, each within **6"** of the previous target.

3. Soul Burn **[2 AP, 3 NRG, Blood: 2]**

- **Range:** 18"
- **Target:** 1 combatant
- **Effect:** Deal **2d8 + SPI psychic damage**. You lose 1 AP immediately (minimum 0).

4. Shatterwave **[2 AP, 3 NRG, Blood: 2]**

- **Range:** 18"
- **Area:** 4"×4" square
- **Effect:** All enemies in the area suffer **2d8 + SPI lightning damage** and are **Pushed 2"** directly away from the centre.

5. Frost Coffin **[2 AP, 3 NRG, Blood: 2]**

- **Range:** 12"
- **Target:** 1 combatant
- **Effect:** Target must pass a **STR Check** or become **Immobilized**. While **Immobilized**, they suffer **1d6 + SPI ice damage** the first time they spend AP this round.

6. Rift Jab **[2 AP, 4 NRG, Blood: 2]**

- **Range:** 12"
- **Target:** 1 combatant and 1 legal unoccupied destination in your **LOS** within **1"** of that combatant
- **Effect:** Teleport to the chosen destination, then deal **2d6 + SPI arcane damage** to the target.

7. Vital Surge **[1 AP, 0 NRG, Blood: 2]**

- **Range:** Self
- **Effect:** Immediately gain **+2 AP**. You lose **2 HP** when you cast **Vital Surge**, regardless of the **Casting Check** result. This HP loss is not reduced by **AV**. **Vital Surge** can be cast only once per round.
- **[Empower 1 NRG]:** Reduce this Power's **Blood Price** by **1**.

8. Overcharge **[2 AP, 4 NRG, Blood: 3]**

- **Range:** Self
- **Effect:** Until the end of the round, your Sorcery damage rolls deal an additional **1 damage of that Sorcery's primary damage type**.

9. Stormskin **[1 AP, 2 NRG, Blood: 1]**

- **Range:** 12"
- **Target:** 1 ally (or self)
- **Effect:** Target gains **+2 AV** and cannot be moved by **Push** or **Pull** until the end of the round.

10. Black Flame **[2 AP, 3 NRG, Blood: 2]**

- **Range:** 18"
- **Target:** 1 combatant
- **Effect:** Deal **3d6 + SPI fire damage**. If the target is a **Monster**, they also cannot use any **AI Step** abilities before the end of their next activation.

11. Spite Barrier **[1 AP Reaction, 5 NRG, Blood: 2]**

- **Trigger:** A source is declared that would deal damage to you
- **Range:** Self
- **Effect:** Reduce the triggering source's damage against you by **2d6 + SPI**, to a minimum of **0**. After the triggering source resolves, its source combatant suffers **1d6 + SPI arcane damage** if they are within **6"** of you.

12. Null Blink **[1 AP Reaction, 3 NRG, Blood: 2]**

- **Trigger:** You are targeted by an attack
- **Range:** Self
- **Effect:** Teleport up to **6"** to a legal unoccupied space in **LOS**. The triggering attack cannot affect you if you are no longer a legal target. The nearest enemy within **6"** suffers **1d6 + SPI arcane damage**.

13. Chaos Field **[2 AP, 2 NRG, Blood: 2]**

- **Range:** 18"
- **Area:** 4"×4" square
- **Effect:** Enemies in the area must pass an **INT Check**. A **Monster** resolves the failed-Check effect automatically under **2.3** and cannot use any **AI Step** abilities before the end of their next activation. Each other enemy that fails immediately loses **1 AP**, minimum **0**.

14. Heat Mirage **[2 AP, 3 NRG, Blood: 2]**

- **Range:** 18"
- **Area:** 4"×4" square
- **Effect: LOS** through the area is blocked until the end of the round. The first time each enemy starts their activation in the area this round, that enemy suffers **1d6 + SPI fire damage**.

15. Gravity Lash **[2 AP, 2 NRG, Blood: 2]**

- **Range:** 18"
- **Target:** 1 combatant
- **Effect: Pull** the target **4"** directly toward you. If they end adjacent to any combatant, they and one adjacent combatant of your choice each suffer **1d6 + SPI arcane damage**.

16. Wicked Haste **[2 AP, 1 NRG, Blood: 2]**

- **Range:** 12"
- **Target:** 1 ally
- **Effect:** Target gains **+4" Speed** until the end of the round and immediately gains **+1 AP**. This AP must be spent before the end of the round.

17. Shardstorm **[2 AP, 3 NRG, Blood: 2]**

- **Range:** 18"
- **Area:** 4"×4" square
- **Effect:** Deal **2d6 + SPI piercing damage** to all enemies in the area.

18. Mindhook **[2 AP, 3 NRG, Blood: 2]**

- **Range:** 12"
- **Target:** 1 combatant
- **Effect:** Target must pass a **SPI Check**. On a failure, **Slide** them **3"** toward their nearest enemy, stopping before they would become adjacent to that enemy. You choose among tied nearest enemies.

19. Summon Rift Hound **[2 AP, 4 NRG, Blood: 2]**

- **Range:** 6" (Place 1 **Summon**)
- **Effect:** Place a Rift Hound using the **Summon Power Standard**.
- **Summon (Rift Hound): SPD 10" | Sz M | AV 0 | HP 7**
- **Bite: 2d6 + SPI arcane damage**. If **Bite** damages a target, that target cannot use **Reactions** until the end of the round. A combatant can be affected by this effect only once per round.

20. Element Roulette **[2 AP, 2 NRG, Blood: 2]**

- **Range:** 20"
- **Target:** 1 combatant
- **Effect:** Roll **1d4** for damage type: **1 fire**, **2 ice**, **3 lightning**, **4 arcane**. Deal **3d6 + SPI** damage of the rolled type.

Tier 3 Sorceries (d20)

The workings here do not care whether the caster survives them. Sorcerers who command this tier are counted among the things other people pray against.

1. Catastrophe Sphere **[2 AP, 5 NRG, Blood: 4]**

- **Range:** 24"
- **Area:** 6"×6" square
- **Effect:** Deal **4d6 + SPI arcane damage** to all enemies in the area.

2. Storm Cascade **[2 AP, 8 NRG, Blood: 4]**

- **Range:** 24"
- **Target:** Up to 4 combatants
- **Effect:** Deal **4d6 + SPI lightning damage** to the primary target. Then deal **3d6 + SPI lightning damage** to each additional target within **6"** of the previous target.

3. Infernal Rain **[2 AP, 4 NRG, Blood: 2]**

- **Range:** 24"
- **Area:** 6"×6" square
- **Effect:** Deal **3d6 + SPI fire damage** to all enemies in the area.

4. Absolute Shatter **[2 AP, 6 NRG, Blood: 4]**

- **Range:** 18"
- **Area:** 6"×6" square
- **Effect:** All enemies in the area suffer **4d8 + SPI lightning damage** and are **Pushed 4"** directly away from the centre.

5. Rift Rend **[2 AP, 6 NRG, Blood: 4]**

- **Range:** 18"
- **Target:** 1 combatant
- **Effect:** Deal **5d8 + SPI arcane damage**. If the target is a **Monster**, they are also teleported up to **6"** to a legal unoccupied space in **LOS** chosen by you. This teleportation cannot place them adjacent to an enemy.

6. Bloodstorm **[2 AP, 5 NRG, Blood: 2]**

- **Range:** 18"
- **Area:** 4"×4" square
- **Effect:** Deal **3d6 + SPI psychic damage** to all enemies in the area. You gain **Temporary HP** = 8 until the end of the round.

7. Overload Apex **[2 AP, 6 NRG, Blood: 6]**

- **Range:** Self
- **Effect:** Until the end of the round, your Sorcery damage rolls deal an additional **1d6 damage of that Sorcery's primary damage type**.

8. Time Fracture **[2 AP, 1 NRG, Blood: 3]**

- **Range:** 18"
- **Target:** 1 combatant
- **Effect:** The target must pass an **INT Check**. On a failure, apply the first result that is possible: if the target is currently activating, end that activation immediately; otherwise, if the target has an activation remaining this round, skip their next activation this round. If neither result is possible, the Power has no effect and its costs remain spent. **Time Fracture** can remove no more than one activation from the target.

9. Dominion of Sparks **[1 AP, 4 NRG, Blood: 3]**

- **Range:** Self
- **Effect:** Until the end of the round, whenever you deal lightning damage, you may **Push** the damaged target **2"** directly away from you.

10. Warp Communion **[1 AP, 1 NRG, Blood: 1]**

- **Range:** Self
- **Effect:** Until the end of the round, your Powers cost **1 less AP**, to a minimum of **1 AP**. The first time you cast another Power after **Warp Communion** resolves this round, you immediately gain **+1 AP**. This AP must be spent before the end of the round.

11. Final Reprisal **[1 AP Reaction, 6 NRG, Blood: 4]**

- **Trigger:** You would be reduced to **0 HP**, and no other Reaction has modified how the triggering action or effect resolves against you
- **Range:** Self
- **Effect:** You are instead set to **1 HP**, and all enemies within **6"** suffer **3d6 + SPI arcane damage**.

12. Vengeful Mirror **[1 AP Reaction, 4 NRG, Blood: 3]**

- **Trigger:** A combatant in range declares a Power
- **Range:** 12"
- **Effect:** Cancel that Power before its **Casting Check**. The caster suffers **3d6 + SPI psychic damage**.

13. Gravity Collapse **[2 AP, 7 NRG, Blood: 4]**

- **Range:** 18"
- **Area:** 6"×6" square
- **Effect:** All combatants in the area are **Pulled 3"** toward the centre immediately and suffer **3d6 + SPI arcane damage**. A combatant that suffers a **Collision** suffers an additional **1d6 arcane damage**.

14. Soul Sunder **[2 AP, 6 NRG, Blood: 4]**

- **Range:** 18"
- **Target:** 1 combatant
- **Effect:** Deal **5d8 + SPI psychic damage**. Target must pass a **SPI Check** or lose 2 AP immediately (minimum 0).

15. Starfire Lance **[2 AP, 6 NRG, Blood: 4]**

- **Range:** 24"
- **Target:** 1 combatant
- **Effect:** Deal **6d6 + SPI holy damage**. Ignore **Cover**.

16. Chaos Dominion **[2 AP, 0 NRG, Blood: 2]**

- **Range:** 18"
- **Area:** 4"×4" square
- **Effect:** Enemies in the area must pass a **SPI Check** or be unable to use **Reactions** and unable to gain bonus AP until the end of the round.

17. Summon Void Djinn **[2 AP, 7 NRG, Blood: 4]**

- **Range:** 6" (Place 1 **Summon**)
- **Effect:** Place a Void Djinn using the **Summon Power Standard**.
- **Summon (Void Djinn): SPD 8" | Sz L | AV 1 | HP 9**
- **Void Rend: 3d6 + SPI arcane damage**. The first combatant **Void Rend** damages this round loses **1 NRG**, to a minimum of **0**.

18. Ashen Vortex **[2 AP, 5 NRG, Blood: 4]**

- **Range:** 18"
- **Area:** 6"×6" square
- **Effect: LOS** through the area is blocked until the end of the round. Enemies in the area suffer **2d6 + SPI fire damage**, and their attack damage rolls are made with **Disadvantage** until the end of the round.

19. Meteor Line **[2 AP, 5 NRG, Blood: 4]**

- **Range:** 24"
- **Area:** 1" wide line
- **Effect:** Deal **5d6 + SPI fire damage** to all enemies touched by the area.

20. Collapse to Zero **[2 AP, 6 NRG, Blood: 6]**

- **Range:** 18"
- **Target:** 1 combatant
- **Effect:** Deal **6d8 + SPI arcane damage**. You lose all remaining AP immediately after resolving this Power.

8.6 Druidic Rituals

Druidic Core Rules:

- Druidic Rituals follow **8.2 Casting Powers**.
- **Summon Attacks:** Druidic Ritual **Summons** use their own listed attacks.
- **Druidic Identity:** Druidic Rituals emphasize combatants, terrain, and weather, and can steer neutral Monster Groups without requiring them to make **Checks**.

Tier 0 Ranger Minor Rituals

1. Thorn Shot **[1 AP, 1 NRG]**

- **Range:** 12"
- **Target:** 1 combatant
- **Effect:** Deal **1d8 + SPI piercing damage**. The target must pass a **STR Check**, or be **Pulled 1"** directly toward you.

2. Trail Sign **[1 AP, 1 NRG]**

- **Range:** 8"
- **Target:** 1 point on the ground
- **Effect:** An **Aura 3"** area centred on that point becomes **Difficult Terrain** until the end of the round.

3. Falcon Eye **[1 AP, 1 NRG]**

- **Range:** Self
- **Target:** Self
- **Effect:** Your next ranged attack this round ignores penalties from **Cover**.

Tier 0 Druidic Minor Rituals

1. Vine Lash **[1 AP, 0 NRG]**

- **Range:** 4"
- **Target:** 1 combatant
- **Effect:** Deal **1d8 + 1 piercing damage**. The target must pass a **STR Check** or be **Pulled 1"** directly toward you.

2. Verdant Touch **[1 AP, 0 NRG]**

- **Range:** 1"
- **Target:** Self or 1 ally
- **Effect:** Remove **Bleeding**, **Burning**, or **Poisoned [dX]** from the target. The target gains **2 Temporary HP** until the end of the round.

3. Pebble Ward **[1 AP, 0 NRG]**

- **Range:** 6"
- **Target:** Self or 1 ally
- **Effect:** The target gains **+3 AV** the next time they apply **AV** this round.

Tier 1 Druidic Rituals (d20)

The oldest circles teach these first: the small agreements with root, weather, and beast that the Greenmark still honours.

1. Thorn Dart **[2 AP, 2 NRG]**

- **Range:** 18"
- **Target:** 1 combatant
- **Effect:** Deal **1d10 + SPI piercing damage**.

2. Thorn Lash **[2 AP, 2 NRG]**

- **Range:** 12"
- **Target:** 1 combatant
- **Effect:** Deal **1d8 + SPI piercing damage**. **Pull** the target **2"** directly toward you.

3. Entangling Roots **[1 AP, 1 NRG]**

- **Range:** 18"
- **Area:** 4"×4" square
- **Effect:** Enemies in the area must pass a **STR Check** or their **Speed** becomes **0"** until the end of the round.

4. Ironbark **[1 AP, 1 NRG]**

- **Range:** 12"
- **Target:** 1 ally (or self)
- **Effect:** Target gains **+1 AV** until the end of the round.

5. Regrowth **[2 AP, 1 NRG]**

- **Range:** 12"
- **Target:** 1 ally
- **Effect:** The target regains **1d10 + SPI HP**.

6. Fog Bank **[1 AP, 0 NRG]**

- **Range:** 18"
- **Area:** 4"×4" square
- **Effect: LOS** is blocked through the area until the end of the round.

7. Mud Patch **[1 AP, 0 NRG]**

- **Range:** 18"
- **Area:** 5"×5" square
- **Effect:** The area is **Difficult Terrain** and **Slippery Terrain** until the end of the round.

8. Weather Shift: Blue Skies **[1 AP, 1 NRG]**

- **Range:** Global
- **Effect:** The active Weather becomes **Blue Skies**: suppress all penalties and effects from Weather or a Cavern Condition, and ranged weapon attacks gain **+2" Range**. Smoke, **Darkness**, terrain, Powers, items, and scenario effects are unchanged.

9. Summon Sprite **[2 AP, 2 NRG]**

- **Range:** 6" (Place 1 **Summon**)
- **Effect:** Place a Sprite using the **Summon Power Standard**.
- **Summon (Sprite): SPD 8" | Sz S | AV 0 | HP 3**
- **Special Abilities: Small**; **Fly (8").**
- **Needle (Range 12"): 1d4 piercing damage**. If the target is within **6"** and this attack damages them, they have **Disadvantage** on attack damage rolls until the end of the round.

10. Predator's Focus **[2 AP, 1 NRG]**

- **Range:** 12"
- **Target:** 1 ally
- **Effect:** The target's next weapon damage roll deals an additional **1d6 damage of that attack's primary damage type** before the end of that target's next activation.

11. River's Veil **[1 AP, 1 NRG]**

- **Range:** 12"
- **Target:** 1 ally (or self)
- **Effect:** The next ranged attack against the target before the end of the round rolls its base damage dice with **Disadvantage**.

12. Gust **[1 AP, 2 NRG]**

- **Range:** 18"
- **Target:** 1 combatant
- **Effect: Push** the target **4"** directly away. On a **Collision**, they suffer **1d4 + SPI blunt damage**.

13. Earthen Spike **[2 AP, 2 NRG]**

- **Range:** 18"
- **Target:** 1 combatant
- **Effect:** Deal **1d8 + SPI piercing damage**. Target must pass a **DEX Check** or become **Prone**.

14. Tanglefoot **[1 AP, 0 NRG]**

- **Range:** 12"
- **Target:** 1 combatant
- **Effect:** Target must pass a **STR Check** or their **Speed** becomes **0"** until the end of the round.

15. Primal Reflex **[1 AP Reaction, 1 NRG]**

- **Trigger:** You are targeted by an attack
- **Range:** Self
- **Effect:** Gain **+2 AV** against the triggering attack, then **Shift 2"**.

16. Nature's Grasp **[1 AP Reaction, 2 NRG]**

- **Trigger:** An enemy moves within range
- **Range:** 12"
- **Effect:** That enemy must pass a **DEX Check** or stop moving immediately and suffer **1d4 + SPI piercing damage**.

17. Seedbomb **[2 AP, 2 NRG]**

- **Range:** 18"
- **Area:** 2"×2" square
- **Effect:** Deal **1d8 + SPI poison damage** to enemies in the area.

18. Summon Burrow Badger **[2 AP, 2 NRG]**

- **Range:** 6" (Place 1 **Summon**)
- **Effect:** Place a Burrow Badger using the **Summon Power Standard**.
- **Summon (Badger): SPD 6" | Sz S | AV 1 | HP 5**
- **Special Ability: Small.**
- **Bite: 1d6 piercing damage**. If **Bite** damages a target, that target's **Speed** is reduced by **2"** until the end of the round.

19. Bramble Ward **[2 AP, 2 NRG]**

- **Range:** 12"
- **Target:** 1 ally
- **Effect:** The first time an enemy damages the target with a melee attack this round, the attacker suffers **1d6 + SPI piercing damage**.

20. Wild Step **[1 AP, 2 NRG]**

- **Range:** Self
- **Effect:** Use **Move** to move up to **6"**. This movement ignores **Difficult Terrain** and does not trigger **Reflex Attack**.

Tier 2 Druidic Rituals (d20)

Here the rituals stop asking the wild for favours and begin speaking its language. The forest answers in kind, and not always gently.

1. Call Lightning **[2 AP, 3 NRG]**

- **Range:** 24"
- **Target:** 1 combatant
- **Effect:** Deal **3d6 + SPI lightning damage**.

2. Thorn Burst **[2 AP, 4 NRG]**

- **Range:** 18"
- **Area:** 4"×4" square
- **Effect:** Deal **2d10 + SPI piercing damage** to enemies in the area.

3. Spike Growth **[2 AP, 2 NRG]**

- **Range:** 18"
- **Area:** 4"×4" square
- **Effect:** The first time each enemy enters the area or starts their activation in it this round, that enemy suffers **1d8 + SPI piercing damage**.

4. Wall of Vines **[2 AP, 3 NRG]**

- **Range:** 18"
- **Area:** 6" long, 1" thick wall
- **Effect:** Until the end of the round, the wall blocks movement and **LOS**. The first time each enemy touches the wall this round, that enemy suffers **1d6 + SPI slashing damage**.

5. Winter Bite **[2 AP, 3 NRG]**

- **Range:** 18"
- **Target:** 1 combatant
- **Effect:** Deal **2d8 + SPI ice damage** and reduce the target's **Speed** by **4"** until the end of the round.

6. Quicksand **[1 AP, 1 NRG]**

- **Range:** 18"
- **Area:** 4"×4" square
- **Effect:** The area is **Difficult Terrain** until the end of the round. Enemies that start their activation in the area have **Speed** reduced by **4"** until the end of that activation.

7. Renewal **[2 AP, 2 NRG]**

- **Range:** 12"
- **Area:** Aura 6" from a point you can see
- **Effect:** All allies within **6"** of that point regain **1d8 + SPI HP**.

8. Pack Hunt **[1 AP, 1 NRG]**

- **Range:** 12"
- **Area:** Aura 6" from a point you can see
- **Effect:** All allies within **6"** of that point gain **+2" Speed** and deal an additional **1 damage of that attack's primary damage type** on weapon attacks until the end of the round.

9. Spore Cloud **[2 AP, 4 NRG]**

- **Range:** 18"
- **Area:** 4"×4" square
- **Effect:** Enemies in the area suffer **1d6 + SPI poison damage**, and their attack damage rolls are made with **Disadvantage** until the end of the round.

10. Weather Shift: Downpour **[2 AP, 2 NRG]**

- **Range:** Global
- **Effect:** The active Weather becomes **Downpour**: fire damage rolls are reduced by **1d6**, to a minimum of **0**, and lightning damage rolls deal an additional **1d4 lightning damage**.

11. Stone Shell **[1 AP, 1 NRG]**

- **Range:** Self
- **Effect:** Gain **+2 AV** until the end of the round.

12. Roots of Retaliation **[1 AP Reaction, 2 NRG]**

- **Trigger:** An enemy declares a melee attack against you
- **Range:** Self
- **Effect:** After the triggering attack resolves, if it damaged you, the triggering enemy's **Speed** becomes **0"** until the end of the current activation, or until the end of the round if no activation is in progress.

13. Nature's Intercept **[1 AP Reaction, 3 NRG]**

- **Trigger:** An ally in range is targeted by an attack
- **Range:** 6"
- **Effect:** That ally gains **+2 AV** against the triggering attack. After the attack resolves, **Push** the attacker **2"** directly away from that ally.

14. Summon Dire Wolf **[2 AP, 3 NRG]**

- **Range:** 6" (Place 1 **Summon**)
- **Effect:** Place a Dire Wolf using the **Summon Power Standard**.
- **Summon (Dire Wolf): SPD 8" | Sz M | AV 0 | HP 7**
- **Bite: 1d8 piercing damage**. If **Bite** damages a target, that target's **Speed** is reduced by **2"** until the end of the round.

15. Summon Great Hawk **[2 AP, 3 NRG]**

- **Range:** 12" (Place 1 **Summon**)
- **Effect:** Place a Great Hawk using the **Summon Power Standard**.
- **Summon (Hawk): SPD 12" | Sz L | AV 0 | HP 5**
- **Special Ability: Fly (12").**
- **Rake: 1d6 slashing damage**. If **Rake** damages a target, that target cannot use **Reactions** until the end of the round. A combatant can be affected by this effect only once per round.

16. Summon Thornwight **[2 AP, 4 NRG]**

- **Range:** 6" (Place 1 **Summon**)
- **Effect:** Place a Thornwight using the **Summon Power Standard**.
- **Summon (Thornwight): SPD 5" | Sz M | AV 1 | HP 8**
- **Barbed Club: 2d6 blunt damage**. If **Barbed Club** damages a target, **Push** that target **2"** directly away from the Thornwight.

17. Monster Lure **[1 AP, 1 NRG]**

- **Range:** 12"
- **Target:** 1 neutral Monster Group marker
- **Effect:** When that group activates this round, replace its **Primary Target** priority with the nearest enemy combatant within **12"** of the marker. This replaces the standard AI target priorities in **9.5** until that activation ends. If no enemy is within **12"**, the group uses its normal AI script.

18. Beast Pacification **[1 AP, 1 NRG]**

- **Range:** 12"
- **Target:** 1 neutral Monster Group marker whose group contains only **Monsters** with **Beast**
- **Effect:** That group cannot make attacks unless it takes damage this round.

19. River Surge **[2 AP, 1 NRG]**

- **Range:** 18"
- **Area:** 4"×4" square
- **Effect:** Each enemy in the area must pass a **DEX Check**. On a failure, that enemy is **Pushed 4"** directly away from the area's centre and becomes **Prone**.

20. Wild Dominion **[2 AP, 5 NRG]**

- **Range:** Self
- **Effect:** Until the end of the round, your Druidic Ritual damage rolls deal an additional **1d6 damage of that Power's primary damage type**, and your Druidic Ritual healing rolls restore an additional **1d6 HP**.

Tier 3 Druidic Rituals (d20)

At this tier a druid no longer borrows from the living world. They become a clause in its oldest contract, and the world keeps its terms.

1. Tempest Strike **[3 AP, 5 NRG]**

- **Range:** 24"
- **Target:** 1 combatant
- **Effect:** Deal **5d6 + SPI lightning damage**.

2. Earthshaker **[2 AP, 6 NRG]**

- **Range:** 18"
- **Area:** 6"×6" square
- **Effect:** Enemies in the area suffer **4d6 + SPI blunt damage** and must pass a **DEX Check** or become **Prone**.

3. Weather Shift: Blizzard **[2 AP, 4 NRG]**

- **Range:** Global
- **Effect:** The active Weather becomes **Blizzard**: non-flying combatants suffer **-2" Speed**, ranged weapon attacks and non-area damaging ranged Powers against targets beyond **12"** roll their base damage dice with **Disadvantage**, and ice damage rolls deal an additional **1d6 ice damage**.

4. Volcano Bloom **[2 AP, 6 NRG]**

- **Range:** 18"
- **Area:** 4"×4" square
- **Effect:** Deal **3d8 + SPI fire damage** to all combatants in the area.

5. Primeval Barrier **[2 AP, 4 NRG]**

- **Range:** 18"
- **Area:** 8" long, 1" thick wall
- **Effect:** Until the end of the round, the wall blocks movement and **LOS**. The first time each enemy touches it this round, that enemy suffers **2d6 + SPI piercing damage**.

6. Greater Renewal **[2 AP, 5 NRG]**

- **Range:** 12"
- **Area:** Aura 6" from a point you can see
- **Effect:** All allies within **6"** of that point regain **2d8 + SPI HP**.

7. Avatar of the Wild **[2 AP, 4 NRG]**

- **Range:** Self
- **Effect:** Until the end of the round, gain **+2 AV** and **+2" Speed**, and your melee damage rolls deal an additional **1d8 damage of that attack's primary damage type**.

8. Storm Shelter **[1 AP Reaction, 5 NRG]**

- **Trigger:** A damaging Area of Effect is declared that would affect 1 or more allies within **6"** of a point you can see in range
- **Range:** 12"
- **Effect:** Reduce the triggering Area of Effect's damage against each ally within **6"** of that point by **2d8 + SPI**.

9. Vengeance of Thorns **[1 AP Reaction, 5 NRG]**

- **Trigger:** An enemy declares an attack or harmful effect that would affect you
- **Range:** Self
- **Effect:** After the triggering action or effect resolves, if it damaged you, the triggering enemy suffers **3d6 + SPI piercing damage** and is **Pushed 2"** directly away from you.

10. Summon Bear Guardian **[2 AP, 6 NRG]**

- **Range:** 6" (Place 1 **Summon**)
- **Effect:** Place a Bear Guardian using the **Summon Power Standard**.
- **Summon (Bear): SPD 6" | Sz M | AV 1 | HP 10**
- **Maul: 2d8 slashing damage**. If **Maul** damages a target, **Push** that target **2"** directly away from the Bear Guardian.

11. Summon Treant **[2 AP, 6 NRG]**

- **Range:** 6" (Place 1 **Summon**)
- **Effect:** Place a Treant using the **Summon Power Standard**.
- **Summon (Treant): SPD 4" | Sz H | AV 2 | HP 12**
- **Slam: 2d6 blunt damage**. While an allied **Hero** or **Hireling** is within **2"** of the Treant, that ally gains **+2 AV**.

12. Summon Carrion Hounds **[2 AP, 6 NRG]**

- **Range:** 12" (Place 2 **Summons**)
- **Effect:** Place two Carrion Hounds using the **Summon Power Standard**. Each Hound must be within **3"** of a chosen point in range.
- **Summon (Hound, Each): SPD 8" | Sz M | AV 1 | HP 5**
- **Bite: 2d6 piercing damage**. A Carrion Hound cannot make more than 1 **Bite** attack during the same activation. If **Bite** damages a target, that target cannot use **Reactions** until the end of the round. A combatant can be affected by this effect only once per round.

13. Weather Shift: Galefront **[2 AP, 5 NRG]**

- **Range:** Global
- **Effect:** The active Weather becomes **Galefront**: ranged weapons suffer **-2" Range**, to a minimum of **6"**; **Push** effects move their targets an additional **2"**; and any combatant that ends movement adjacent to a terrain feature other than the ground or surface they occupy must pass a **DEX Check** or become **Prone**.

14. Weather Shift: Heat Haze **[2 AP, 3 NRG]**

- **Range:** Global
- **Effect:** The active Weather becomes **Heat Haze**: targets beyond **12"** have **Cover**; fire damage rolls deal an additional **1d6 fire damage**; and ice damage rolls are reduced by **1d6**, to a minimum of **0**.

15. Monster Stampede **[2 AP, 4 NRG]**

- **Range:** 18"
- **Target:** 1 neutral Monster Group marker
- **Effect:** Resolve each **Monster** in that group separately. If a Monster can see no enemy, they do not move or deal damage from this Power. Otherwise, determine the nearest enemy that Monster can see using the normal Monster AI tie-breakers, then move the Monster up to **6"** toward that enemy. After all of these moves, each Monster within **1"** of the enemy chosen for them deals **1d6 + SPI blunt damage** to that enemy. The group still activates normally later this round.

16. Beast Commander **[2 AP, 4 NRG]**

- **Range:** 12"
- **Target:** 1 neutral Monster Group marker whose group contains only **Monsters** with **Beast**
- **Effect:** During that group's next activation this round, you choose its legal movement, attacks, and attack targets. You cannot force a **Monster** to leave the battlefield or enter **Dangerous Terrain**. If the group has already activated this round, this Power has no effect and its NRG cost is still spent.

17. Maelstrom **[2 AP, 5 NRG]**

- **Range:** 18"
- **Area:** 6"×6" square
- **Effect:** Enemies in the area suffer **3d6 + SPI blunt damage** and are **Pulled 3"** toward the centre. A combatant that suffers a **Collision** suffers an additional **1d6 blunt damage**.

18. Wildfire Ring **[1 AP, 6 NRG]**

- **Range:** Self
- **Area:** 6"×6" square centred on you
- **Effect:** The first time each enemy crosses into or out of the area this round, that enemy suffers **3d8 + SPI fire damage**. An enemy can suffer this damage only once per round. Allies are not affected.

19. Verdant Dominion **[1 AP, 6 NRG]**

- **Range:** Self
- **Effect:** Until the end of the round, your Druidic Ritual damage rolls deal an additional **1d8 damage of that Power's primary damage type**, and your Druidic Ritual healing rolls restore an additional **1d8 HP**.

20. Nature's Silence **[2 AP, 5 NRG]**

- **Range:** 18"
- **Area:** 6"×6" square
- **Effect:** Each enemy in the area must pass a **SPI Check**. On a failure, a non-Boss enemy cannot use Powers, use Special Abilities, or use **Reactions** until the end of the round. A **Boss** instead cannot use **AI Step** abilities before the end of their next activation, and their first attack damage roll before the end of that activation is made with **Disadvantage**.

8.7 Psychic Abilities

Psychic Core Rules:

- Psychic Abilities follow **8.2 Casting Powers**.

Tier 0 Psychic Techniques: Psion

1. Mind Needle **[1 AP, 0 NRG]**

- **Range:** 10"
- **Target:** 1 combatant
- **Effect:** Deal **1d6 psychic damage**.

2. Telekinetic Hand **[1 AP, 0 NRG]**

- **Range:** 6"
- **Target:** 1 unsecured, non-objective object, latch, lever, or similar small interactable element
- **Effect:** Move the target up to **2"**, open or close it if legal, or place one unattended item from within range into an adjacent space. This can never deal damage. **Telekinetic Hand** cannot manipulate Treasure Chests, traps, scenario objective markers, carried objective items, equipped items, locked objects, or any object that requires an **Interact Check** unless a rule explicitly allows it.

3. Thought Barrier **[1 AP, 0 NRG]**

- **Range:** 6"
- **Target:** Self or 1 ally
- **Effect:** The target gains **+2** on their next **SPI** or **INT Check** made to resist a Power before the end of the round.

Tier 1 Psychic Abilities (d20)

The first disciplines of the unquiet mind: to push, to read, to hold a thought steady where the world wants it scattered.

1. Mind Spike **[2 AP, 1 NRG]**

- **Range:** 18"
- **Target:** 1 combatant
- **Effect:** Deal **1d10 + INT psychic damage**.

2. Telekinetic Push **[1 AP, 1 NRG]**

- **Range:** 12"
- **Target:** 1 combatant
- **Effect: Push** the target **4"** directly away. On a **Collision**, they suffer **1d8 + INT psychic damage**.

3. Telekinetic Pull **[1 AP, 1 NRG]**

- **Range:** 12"
- **Target:** 1 combatant
- **Effect: Pull** the target **3"** directly toward you.

4. Neural Jolt **[1 AP, 2 NRG]**

- **Range:** 18"
- **Target:** 1 combatant
- **Effect:** Deal **1d6 + INT psychic damage**. If the target is a **Monster**, they cannot use any **AI Step** abilities before the end of their next activation. Any other target must pass an **INT Check** or lose **1 AP** immediately (minimum 0).

5. Precognition **[1 AP, 0 NRG]**

- **Range:** Self
- **Effect:** Gain **+1** to one **Check** you make before the end of the round.

6. Psychic Veil **[1 AP, 1 NRG]**

- **Range:** Self
- **Effect:** Until the end of the round, you and allied combatants within **4"** of you have **Cover**.

7. Thought Snare **[1 AP, 1 NRG]**

- **Range:** 14"
- **Target:** 1 combatant
- **Effect:** Target must pass a **SPI Check** or their **Speed** becomes **0"** until the end of the round.

8. Mind Link **[1 AP, 1 NRG]**

- **Range:** 12"
- **Target:** 1 ally
- **Effect:** Until the end of the round, that ally gains **+1** to **Checks**. When that ally attacks, ignore penalties from **Cover** and **Darkness**. **Hidden** and **Invisible** do not prevent that ally from choosing a target they could otherwise draw **LOS** to, and the attack ignores **Disadvantage** caused only by those conditions. Terrain and other **LOS** restrictions still apply.

9. Focus Transfer **[1 AP, 1 NRG]**

- **Range:** 12"
- **Target:** 1 ally
- **Effect:** That ally immediately gains **+1 AP**. You do not lose additional AP beyond the AP spent to cast this Power.

10. Psychic Static **[2 AP, 2 NRG]**

- **Range:** 12"
- **Area:** 4"×4" square
- **Effect:** Enemies in the area must pass a **SPI Check** or lose **1 AP** immediately and cannot use **Reactions** until the end of the round.

11. Deflection **[1 AP Reaction, 1 NRG]**

- **Trigger:** You are chosen as the target of an attack
- **Range:** Self
- **Effect:** Reduce the triggering attack's damage against you by **1d8 + INT**, to a minimum of **0**. If this reduces the damage to **0**, you may **Shift 3"** after the attack resolves.

12. Synaptic Backlash **[1 AP Reaction, 2 NRG]**

- **Trigger:** A combatant in range declares an attack or harmful effect that would affect you
- **Range:** 12"
- **Effect:** After the triggering action or effect resolves, if it damaged you, that combatant suffers **1d6 + INT psychic damage**.

13. Astral Step **[1 AP, 0 NRG]**

- **Range:** Self
- **Effect:** Teleport up to 6" to a legal unoccupied space in **LOS**. You cannot be placed adjacent to an enemy.

14. Mental Scramble **[2 AP, 1 NRG]**

- **Range:** 18"
- **Target:** 1 combatant
- **Effect:** Target must pass an **INT Check** or their attack damage rolls are made with **Disadvantage** until the end of the round.

15. Empathic Mend **[1 AP, 1 NRG]**

- **Range:** 12"
- **Target:** 1 ally (or self)
- **Effect:** The target regains **1d10 + INT HP**.

16. Reality Pin **[1 AP, 1 NRG]**

- **Range:** 12"
- **Target:** 1 combatant
- **Effect:** The target must pass a **SPI Check**, or they cannot be teleported and cannot be moved by forced movement effects until the end of the round.

17. Threat Sense **[1 AP, 2 NRG]**

- **Range:** Self
- **Effect:** Until the end of the round, the first time you would take damage, reduce it by **2d6 + INT**, to a minimum of **0**.

18. Lapse **[1 AP, 1 NRG]**

- **Range:** 12"
- **Target:** 1 combatant
- **Effect:** If the target is a **Monster**, they cannot use any **AI Step** abilities and roll their first attack damage before the end of their next activation with **Disadvantage**. Any other target must pass a **SPI Check** or they cannot spend **AP** on attacks until the end of the round.

19. Mind Rend **[2 AP, 1 NRG]**

- **Range:** 18"
- **Target:** 1 combatant
- **Effect:** Deal **1d4 + INT psychic damage**. If the target is a **Monster**, they also cannot use any **AI Step** abilities before the end of their next activation.

20. Anchor Thought **[1 AP, 1 NRG]**

- **Range:** 12"
- **Target:** 1 ally
- **Effect:** Until the end of the round, that ally is **Immune** to **Frightened** and cannot have their AP reduced.

Tier 2 Psychic Abilities (d20)

Deeper into the self than most minds are built to go. Each ability here leaves a mark the psion learns to hide.

1. Psychic Lance **[2 AP, 3 NRG]**

- **Range:** 24"
- **Target:** 1 combatant
- **Effect:** Deal **3d8 + INT psychic damage**.

2. Telekinetic Slam **[2 AP, 2 NRG]**

- **Range:** 12"
- **Target:** 1 combatant
- **Effect: Slide** the target **4"** in a direction you choose. On a **Collision**, they suffer **2d8 + INT arcane damage**.

3. Mass Push **[2 AP, 1 NRG]**

- **Range:** 12"
- **Area:** 4"×4" square
- **Effect:** All enemies in the area are **Pushed 3"** directly away from the centre.

4. Waking Dream **[2 AP, 3 NRG]**

- **Range:** 12"
- **Target:** 1 combatant
- **Effect:** Target must pass a **SPI Check**. On a failure, the target becomes **Sleeping**.

5. Clairvoyant Sweep **[2 AP, 0 NRG]**

- **Range:** Self
- **Area:** Aura 12"
- **Effect:** Until the end of the round, you may see and target **Hidden** and **Invisible** combatants within **12"** as though they had neither condition. Normal geometric **LOS** and other targeting requirements still apply. Combatants seen this way remain visible to you even if they would otherwise regain **Hidden** or **Invisible** this round.

6. Neural Drain **[2 AP, 4 NRG]**

- **Range:** 18"
- **Target:** 1 combatant
- **Effect:** Deal **2d10 + INT psychic damage**. You immediately gain **+1 AP**.

7. Ego Whip **[1 AP, 2 NRG]**

- **Range:** 18"
- **Target:** 1 combatant
- **Effect:** Target must pass an **INT Check** or lose 2 AP immediately (minimum 0).

8. Shared Reflex **[1 AP, 1 NRG]**

- **Range:** 12"
- **Target:** Up to 2 allies
- **Effect:** Until the end of the round, each target gains **+2 AV** against ranged attacks.

9. Temporal Skew **[1 AP, 3 NRG]**

- **Range:** 20"
- **Target:** 1 combatant
- **Effect:** Target must pass a **SPI Check**. On a failure, apply the first result that is possible: if the target is currently activating, end that activation immediately; otherwise, if the target has an activation remaining this round, skip their next activation this round. If neither result is possible, the Power has no effect and its costs remain spent. **Temporal Skew** can remove no more than one activation from the target.

10. Psychic Field **[1 AP, 1 NRG]**

- **Range:** 18"
- **Area:** 4"×4" square
- **Effect:** Enemies in the area have **Disadvantage** on **Checks** until the end of the round.

11. Reflex Override **[1 AP Reaction, 1 NRG]**

- **Trigger:** You are targeted by an attack
- **Range:** Self
- **Effect:** Teleport up to **6"** to a legal unoccupied space in **LOS**. The triggering attack cannot affect you if you are no longer a legal target.

12. Counterthrust **[1 AP Reaction, 2 NRG]**

- **Trigger:** An enemy ends movement within 1" of you
- **Range:** 12"
- **Effect:** That enemy suffers **2d6 + INT psychic damage** and is **Pushed 2"** directly away from you.

13. Astral Anchor **[2 AP, 1 NRG]**

- **Range:** 18"
- **Target:** 1 combatant
- **Effect:** Target cannot teleport and cannot become **Invisible** until the end of the round.

14. Mind Control **[1 AP, 1 NRG]**

- **Range:** 12"
- **Target:** 1 combatant
- **Effect:** Target must pass a **SPI Check**. On a failure, if the target first resolves voluntary movement during their next activation this round, you choose that movement's legal path. You cannot make the path leave the battlefield or enter **Dangerous Terrain**. After that movement, the target acts normally. If the target does not resolve voluntary movement during that activation, this effect ends with no further result. If the target is a **Hero**, **Hireling**, or allied **Summon** with no AP remaining, **Mind Control** has no effect and the Power's NRG cost is still spent.

15. Kinetic Barrier **[2 AP, 1 NRG]**

- **Range:** 12"
- **Target:** 1 ally
- **Effect:** Until the end of the round, reduce the first damage instance the target would take by **2d8 + INT**, to a minimum of **0**.

16. Psychometric Surge **[2 AP, 1 NRG]**

- **Range:** Self
- **Effect:** Until the end of the round, your psychic damage rolls deal an additional **1d6 psychic damage**.

17. Mind Scour **[2 AP, 3 NRG]**

- **Range:** 18"
- **Area:** 3"×3" square
- **Effect:** Deal **2d10 + INT psychic damage** to enemies in the area. Affected enemies cannot use **Reactions** until the end of the round.

18. Grav Shift **[2 AP, 2 NRG]**

- **Range:** 18"
- **Area:** 4"×4" square
- **Effect:** Enemies in the area become **Slowed**. The first time each enemy leaves the area this round, they suffer **1d8 + INT arcane damage**.

19. Pain Mirror **[2 AP, 2 NRG]**

- **Range:** 12"
- **Target:** 1 ally
- **Effect:** Until the end of the round, the first time the ally takes damage from an enemy, that enemy suffers **1d8 + INT psychic damage**.

20. Psychic Renewal **[2 AP, 2 NRG]**

- **Range:** 12"
- **Target:** 1 ally (or self)
- **Effect:** The target gains **Temporary HP** = 12 until the end of the round and removes **Prone**.

Tier 3 Psychic Abilities (d20)

At this tier the boundary between thought and world thins to nothing. What the psion imagines, the battlefield is briefly obliged to believe.

1. Brain Burst **[3 AP, 7 NRG]**

- **Range:** 18"
- **Target:** 1 combatant
- **Effect:** Deal **5d10 + INT psychic damage**.

2. Telekinetic Crush **[3 AP, 7 NRG]**

- **Range:** 12"
- **Target:** 1 combatant
- **Effect:** The target must pass a **STR Check**. On a failure, they suffer **4d8 + INT arcane damage** and become **Immobilized**. On a success, they suffer **1d8 + INT arcane damage**.

3. Mass Domination **[3 AP, 2 NRG]**

- **Range:** 12"
- **Target:** Up to 2 combatants
- **Effect:** Each target must pass a **SPI Check** separately. On a failure, during a non-Boss target's next activation this round, you choose their legal movement path and the legal targets of their attacks, Powers, and Special Abilities. The target otherwise chooses actions or follows its AI normally. You cannot force the target to leave the battlefield or enter **Dangerous Terrain**. A **Boss** instead cannot use **AI Step** abilities before the end of their next activation, and their first attack damage roll before the end of that activation is made with **Disadvantage**. If a target has already activated this round, this Power has no effect against that target.

4. Psychic Tempest **[3 AP, 7 NRG]**

- **Range:** 18"
- **Area:** 6"×6" square
- **Effect:** All enemies in the area suffer **4d8 + INT psychic damage**, and their attack damage rolls are made with **Disadvantage** until the end of the round.

5. Astral Displacement **[3 AP, 2 NRG]**

- **Range:** 18"
- **Target:** 1 combatant
- **Effect:** The target must pass a **SPI Check**. On a failure, remove them from the battlefield until the end of the round. While removed, they cannot activate, be targeted, contest or score objectives, or affect the battlefield. They retain carried items, objective markers, conditions, and ongoing effects. They then return to their starting position or the nearest legal unoccupied space. A **Boss** is not removed on a failure; instead, during that Boss's next activation this round, they cannot resolve **AI Steps**, and their first attack rolls its base damage dice with **Disadvantage**. If that Boss has no activation remaining this round, the Power has no effect against them.

6. Mind Fortress **[3 AP, 1 NRG]**

- **Range:** Self
- **Area:** Aura 6"
- **Effect:** Allies in the Aura gain **+2 AV** and **+2** to **SPI Checks** until the end of the round.

7. Neural Collapse **[3 AP, 3 NRG]**

- **Range:** 18"
- **Target:** 1 combatant
- **Effect:** Target must pass an **INT Check** or lose all remaining AP immediately.

8. Reality Shear **[3 AP, 5 NRG]**

- **Range:** 18"
- **Area:** 4"×4" square
- **Effect:** All enemies in the area suffer **2d6 + INT arcane damage**, then each is teleported up to **3"** to a legal unoccupied space in **LOS** chosen by you. Resolve each enemy separately. This teleportation cannot place them adjacent to an enemy.

9. Absolute Stillness **[3 AP, 2 NRG]**

- **Range:** 18"
- **Target:** 1 combatant
- **Effect:** If the target is a **Boss**, they cannot use **AI Step** abilities before the end of their next activation, and their first attack damage roll before the end of that activation is made with **Disadvantage**. Otherwise, the target must pass a **SPI Check** or cannot move, cannot attack, and cannot use **Reactions** until the end of the round.

10. Fated Dodge **[2 AP Reaction, 3 NRG]**

- **Trigger:** You are chosen as the target of an attack
- **Range:** Self
- **Effect:** The triggering attack deals no damage and applies no effects to you.

11. Psychic Reversal **[2 AP Reaction, 3 NRG]**

- **Trigger:** A combatant in range is chosen as the target of a source that deals damage
- **Range:** 12"
- **Effect:** Reduce the triggering source's damage against that combatant by **3d6 + INT**, to a minimum of **0**. The source combatant then suffers psychic damage equal to the amount reduced, to a maximum of **12**. If the source has no source combatant on the battlefield, no retaliatory damage is dealt.

12. Mind Rend Volley **[3 AP, 4 NRG]**

- **Range:** 24"
- **Target:** Up to 3 combatants
- **Effect:** Each target suffers **4d6 + INT psychic damage**.

13. Gravity Singularity **[3 AP, 7 NRG]**

- **Range:** 18"
- **Area:** 6"×6" square
- **Effect:** All combatants in the area are **Pulled 3"** toward the centre immediately and suffer **3d6 + INT arcane damage**. A combatant that suffers a **Collision** suffers an additional **1d6 arcane damage**.

14. Synaptic Flood **[3 AP, 2 NRG]**

- **Range:** 18"
- **Area:** 6"×6" square
- **Effect:** Enemies in the area must pass a **SPI Check** or cannot use **Reactions** and cannot gain bonus AP until the end of the round.

15. Command the Moment **[3 AP, 3 NRG]**

- **Range:** 12"
- **Target:** 1 allied **Hero**, **Hireling**, or **Summon**
- **Effect:** The target immediately takes an activation, even if they already activated this round. This effect does not refresh or grant AP; the target uses only the AP they currently have. After this immediate activation, mark the target as having activated this round. They cannot activate again this round.

16. Astral Sever **[3 AP, 5 NRG]**

- **Range:** 18"
- **Target:** 1 combatant
- **Effect:** Deal **4d8 + INT psychic damage**. End 1 ongoing Power or special-item effect affecting the target under **7.2**.

17. Perfect Focus **[3 AP, 2 NRG]**

- **Range:** Self
- **Effect:** Until the end of the round, you gain **+2** to all **Checks** and **+2 AV**. You immediately gain **+1 AP**. This AP must be spent before the end of the round.

18. Thoughtstorm Lance **[2 AP, 6 NRG]**

- **Range:** 24"
- **Area:** 1" wide line
- **Effect:** Deal **4d8 + INT psychic damage** to all enemies touched by the area.

19. Mindbreak Mark **[3 AP, 2 NRG]**

- **Range:** 18"
- **Target:** 1 combatant
- **Effect:** Until the end of the round, the first time the target takes damage, they also lose **2 AP** immediately, minimum **0**, and cannot use **Reactions** until the end of the round.

20. Total Recall **[3 AP, 5 NRG]**

- **Range:** 12"
- **Target:** 1 allied combatant
- **Effect:** The target regains **2d8 + INT HP**. Until the end of the round, the target rolls their next d20 **Check**, including a **Casting Check**, with **Advantage**.

9.

Monsters

Beyond the Bastions, the world is no longer governed by mortal law. Roads, courts, borders, shrines, and markets have been replaced by hunger, territory, instinct, old commands, and powers that survived the Fall better than humankind did. The creatures encountered in the Dying Lands are not interruptions to an expedition; they are the present owners of the world. Some are beasts made clever by scarcity, some are the dead still obeying ruined offices, some are mortals remade by pact, curse, rot, or worship, and some are older than the kingdoms whose bones they now inhabit. Each climate teaches its inhabitants a different form of cruelty, and each has produced creatures that use that cruelty as law. To enter the wilds is not to wander into empty land. It is to trespass.

9.1 Monster Stat Profile

Each Monster entry uses a compact stat profile for fast reference.

- **Name:** The **Monster's** common name.
- **Role:** The **Monster's** encounter-building role. Role tags have no mechanical effect unless a rule explicitly says otherwise.
- **HP:** The **Monster's** listed **Max HP**. A Monster begins with current **HP** equal to this value unless a rule says otherwise.
- **AV:** The **Monster's** fixed Armour Value against **blunt**, **piercing**, and **slashing** damage from any source.
- **SPD:** The **Monster's** Speed in inches. Special movement types are written as **Fly (X")**, **Climb (X")**, **Swim (X")**, or **Burrow (X")**.
- **LVL:** The **Monster's** threat rating. A Monster Group's total **LVL** is used when building encounters.
- **CV:** The number of coins awarded if the **Monster** is slain or otherwise defeated, unless a rule says otherwise. When a party-controlled combatant, Power, item, or effect reduces a **Monster** to **0 HP** or otherwise defeats them, that party collects the **Monster's** CV. If no party-controlled source defeats the Monster, no party collects that CV unless a rule says otherwise. Collected Monster CV counts toward that party's final Coin Value. In competitive play, it is secured when the adventure ends unless a scenario says otherwise. In solo or cooperative play, it remains unbanked until the outcome-grade rules in **10.5.11** secure it.
- **Sz:** The **Monster's Size**: **S, M, L,** or **H**, determining their footprint under **Size and Footprints** in **2.6**. A Monster with **Sz S** also has the **Small** Special Ability.
- **AI Steps:** Numbered AI priorities, triggers, and special activation instructions. This field is omitted when the Monster has none; the Monster then uses the **Standard Monster AI Script** without an AI Step.
- **Attacks:** The **Monster's** listed attack or attacks. Monsters do not use ability scores and do not add **STR**, **DEX**, **INT**, or **SPI** to damage.
- **Special Abilities:** The **Monster's** special rules. Repeated common abilities are defined in **9.6.** Unique or rare abilities are written directly in the stat block.

Monsters never make Checks, as described in **2.3 Ability Checks**.

A listed Monster attack follows the normal **Attack Sequence** in **5.2.** It permits every Reaction that is legal for its range, damage types, and other effects. Damage dealt by an **AI Step** or Special Ability without a listed attack is not an attack and permits **Dodge** only if that rule allows evasion; **Block** remains legal against applicable **blunt**, **piercing**, or **slashing** damage, and **AV** applies normally.

Unless a stat block says otherwise, a Monster:

- does **not** use AP,
- resolves their activation by following the **Monster** AI rules in **Section 9.5**,
- does not take Reactions,
- does not use ability scores,
- and is removed from play when reduced to **0 HP**.

If a rule would make a **Monster** lose AP, gain AP, or pay an AP cost, the **Monster** ignores that AP change. Instead, during their next activation, they cannot use **AI Step** abilities, and the first attack damage roll they make before the end of that activation is made with **Disadvantage.** A rule that gives a **Monster** a different specific result, such as the **blunt Critical Hit** rider, uses that result instead.

Monsters do not suffer Wounds and never roll on the Injuries Table.

9.2 Determining Monsters for an Adventure

Scenarios determine which Monsters appear. When a scenario instructs you to generate Monsters randomly, use the tables in **9.8**.

Unless a scenario says otherwise, generate and group Monsters during setup, before deployment. Give each group a starting position and Guard Point.

9.3 Monster Placement and Initial State

Each Monster Group is placed during scenario setup as directed by the scenario.

Unless a scenario says otherwise:

- a Monster Group begins **Resting**,
- each Monster Group begins with a **Guard Point**,
- and each monster in the group begins within **3"** of their group's starting point.

A scenario normally assigns a Guard Point to each group. If it does not, use the following default:

1. the nearest objective, chest, ritual site, exit, shrine, relic, or similar scenario landmark,
2. otherwise the nearest major terrain feature designated by the scenario,
3. otherwise the group's starting position.

Resolve exact ties with **Random Determination**.

A Guard Point is the location a Monster Group defends, patrols around, or returns toward when they have no valid target.

Default Monster allegiance: Unless a scenario says otherwise, all neutral Monster Groups are allied to one another and hostile to every party combatant. They do not target, become **Engaged** with, or wake because of allied Monsters. A Monster or Group that is **hostile to all** treats every other combatant, including Monsters from other Groups, as an enemy. Monsters in the same Group remain allied to one another unless a rule explicitly says otherwise.

9.4 Monster Waking and Activation State

A Monster Group is either **Resting** or **Awake**.

- **Resting:** The group does not activate and only wakes when a wake-up rule is met.
- **Awake:** The group activates during the Monster Phase.

Unless a scenario or stat block says otherwise, a **Resting** group becomes **Awake** if any of the following occurs:

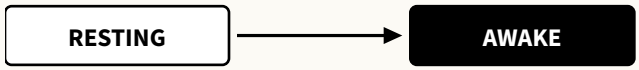
- an enemy moves within **6"**,
- a visible enemy enters the group's **LOS** within **12"**,
- the group suffers damage,
- an **Explosion**, collapsing terrain, or an effect that a rule describes as loud occurs within **6"**,
- or a scenario rule wakes it.

The **6"** movement trigger does not require **LOS**. A **Hidden** enemy trips that trigger only while within their **Hide distance** of the group, and remains **Hidden** after the group wakes unless a rule reveals them. The **12" LOS** trigger requires a visible enemy; a **Hidden** or **Invisible** enemy does not wake a **Resting** group through that trigger unless a rule makes that enemy visible to the group.

Once a group becomes **Awake**, it remains **Awake** for the rest of the adventure.

A **Monster Group states (9.3, 9.4)**

Setup (9.3): a Monster Group begins **Resting** unless the scenario says otherwise, has a Guard Point, and each Monster begins within 3" of the group's starting point.



any wake-up trigger

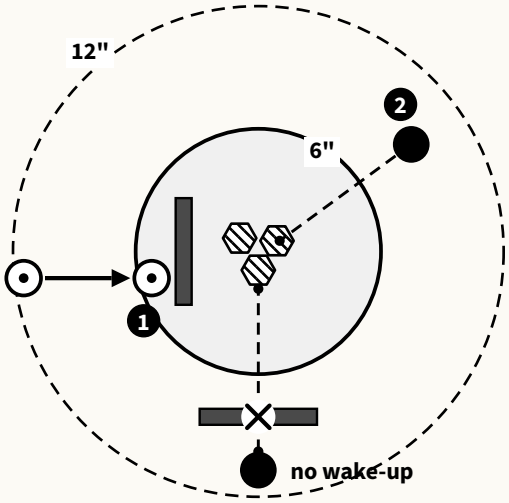
Resting: does not activate; wakes only when a wake-up rule is met. **Awake:** activates in the Monster Phase and stays Awake for the rest of the adventure.

Wake-up triggers (unless a scenario or stat block says otherwise)

1. An enemy moves within 6". No LOS needed.
2. A visible enemy enters the group's LOS within 12".
3. The group suffers damage.
4. An Explosion, collapsing terrain or a loud effect occurs within 6".
5. A scenario rule wakes it.

A **Hidden** enemy trips the 6" trigger only while within its Hide distance of the group (2" unless a rule changes it) and does not wake a Resting group through the 12" LOS trigger.

B **Wake-up by distance and LOS (9.4)**



1. moves within 6": wakes, although Blocking Terrain stands between
2. visible, within 12" with LOS: wakes

× on a sight line: LOS blocked. Third enemy: outside 6", no LOS.
Schematic — not to scale

Key Monster Group · Party A enemy · Party B enemy · Blocking Terrain · sight line · enemy movement

FIG-10. A Monster Group begins Resting and becomes Awake for the rest of the adventure when a trigger occurs: an enemy moving within 6" (no LOS needed), a visible enemy entering LOS within 12", damage, a loud event within 6", or a scenario rule (see 9.4).

9.5 Universal Monster AI Principles

Monsters must act neutrally, quickly, and reproducibly. Monsters do **not** use AP. Instead, each monster activates by following the script below from top to bottom. Resolve the first valid instruction and then end that **Monster's** activation unless a rule explicitly says otherwise. **AI Step 1**, **AI Step 2**, and similar labels are Monster AI procedure labels only. They are not movement terms and are unrelated to **Shift**.

AI Terms at a Glance

- **Primary Target:** The enemy the **Monster** is currently trying to attack, move toward, or affect.
- **Target Priority:** A Scenario-Specific Monster may list a **Target Priority** before its numbered **AI Steps**. Apply that priority when determining its **Primary Target**. If no listed target is valid, use the normal Monster target priorities. A **Target Priority** modifies target selection only; it is not a numbered AI Step and does not end the Monster's activation.
- **Visible enemy:** For Monster AI, an enemy within the **Monster's** perception range to whom the Monster can currently draw **LOS** and whom no rule prevents the Monster from seeing.
- **Legal firing position:** A legal space from which the **Monster** can make their listed ranged attack against their **Primary Target**.
- **If able:** Follow that instruction only if the **Monster** can satisfy it fully without breaking a more specific rule.
- **Recharge X-Y:** If that ability has already been used during the adventure, roll **1d6** at the start of that **Monster's** activation. On a result of **X-Y** on the d6, the ability becomes available again. Otherwise it remains spent for that activation. A given Recharge ability cannot be used more than once per round unless a rule explicitly says otherwise.

A. Core AI Rules

- Monsters act during the **Monster Phase**.
- **Awake** Monster Groups activate during the **Monster Phase** as described in **Section 3.4**. Within an activating Group, use **3.4.2** to determine which Monster activates next when no rule sets their order.
- Unless a scenario says otherwise, neutral Monster Groups treat other neutral Monster Groups as allies and every party combatant as an enemy. A Monster that is **hostile to all** treats every other combatant as an enemy.
- Monsters do not open chests, pick up coins, complete objectives, or use battlefield interactions unless a scenario or stat block explicitly tells them to do so.
- Monsters never choose a target for tactical advantage to one player over another. They follow priority alone.
- **Unassigned Choices:** A **Monster** uses an optional ability whenever its trigger conditions are met. When a **Monster** rule requires a target and does not name one, select the target using **Target Priorities and Tie-Breakers**. If a Monster rule requires any other free choice and no scenario rule assigns that choice, use **Random Determination** among the legal options.
- **Created Monsters:** A named bestiary Monster placed by a Monster rule is a Monster reinforcement, not a **Summon**, unless that rule says otherwise. They inherit the creating Monster's allegiance, join the creating Monster's Group, begin **Awake**, and cannot activate until the next **Monster Phase** unless the creating rule explicitly says otherwise. They yield **0 CV** and cannot trigger a reward for being defeated unless a scenario says otherwise. Place them in a legal unoccupied space; if no legal space satisfies the placement rule, do not place them. A Monster placed by a scenario rule instead uses **Monsters Placed After Setup** in **Section 10**.

B. Perception

Unless a rule says otherwise, monsters:

- are aware in all directions,
- have a default perception range of **12"**,
- use normal **LOS** rules,
- and treat **Hidden** enemies within a listed special sense range as valid targets only if a rule explicitly says so.

A **Hidden** enemy is not a visible enemy for Monster AI target selection unless a rule reveals them or lets the **Monster** treat them as visible. An **Invisible** enemy follows the **Invisible** condition rules and is not chosen as a **Primary Target** unless the **Monster** has a rule that makes that target legal. **Darkvision**, **Blindsight**, **Echolocation**, **Tremorsense**, and similar senses extend a Monster's perception range to their listed range. An explicit target range in an AI Step or Special Ability extends the Monster's perception to that range for that rule only.

C. Standard Monster AI Script

When a monster activates, first determine their **Primary Target**, applying any **Target Priority** printed in a Scenario-Specific Monster's **AI Steps** before the normal target priorities. Then evaluate the following instructions in order. Re-determine the **Primary Target** if it ceases to be legal. The **Monster** executes the **first valid instruction** and ignores the rest unless a rule explicitly says they continue.

1. **AI Step Abilities:** If the **Monster** has one or more listed AI Step abilities, evaluate those AI Step abilities as described in **AI Step Abilities** below. If the Monster has no listed AI Step abilities, or none of those triggers are met, proceed to step 2.
2. **Engaged:** If the **Monster** is **Engaged**, they attack the enemy they are currently **Engaged** with. If they are **Engaged** with more than one enemy, they attack the one with the lowest current HP. If two or more of those enemies are tied on lowest current HP, resolve the tie using **Target Priorities and Tie-Breakers**, beginning at **Most Recent Attacker**. Use **Multi-Attack** if it is listed. Otherwise, use a legal melee attack, or a legal ranged attack if the Monster has no legal melee attack. Use **Random Determination** among multiple legal attacks of the required type.
3. **Visible Target:** If the **Monster** is not **Engaged** but has one or more visible enemies, they move toward their **Primary Target**. If they become **Engaged** during that movement, they attack as described in step 2. If they have a ranged attack and can attack without becoming **Engaged**, they instead move to the nearest legal firing position by **Movement Priorities** and attack. Use **Multi-Attack** if it provides a legal ranged sequence; otherwise, use **Random Determination** among their legal ranged attacks.
4. **Search:** If no enemy is visible but a **Hidden** enemy is within **12"** and **LOS** of the **Monster**, that enemy's controller makes a **DEX Check.** On a failure, that enemy loses **Hidden**. If more than one **Hidden** enemy is within **12"** and **LOS**, apply this to the nearest, resolving ties by **Target Priorities and Tie-Breakers**. The **Monster's** activation then ends.
5. **No Visible Target:** If no enemy is visible and no **Search** is available, the **Monster** moves toward their Guard Point, objective, patrol route, or scenario-directed destination by **Movement Priorities**.

Unless a **Monster** rule explicitly says otherwise, resolving a valid AI Step instruction ends that **Monster's** activation.

Before the steps: determine the Primary Target, applying any Target Priority printed in a Scenario-Specific Monster's AI Steps first; otherwise it is the nearest visible enemy (9.5 E). Re-determine it if it ceases to be legal. The Monster executes the **first valid instruction** and ignores the rest unless a rule says they continue. Monsters do not use AP.

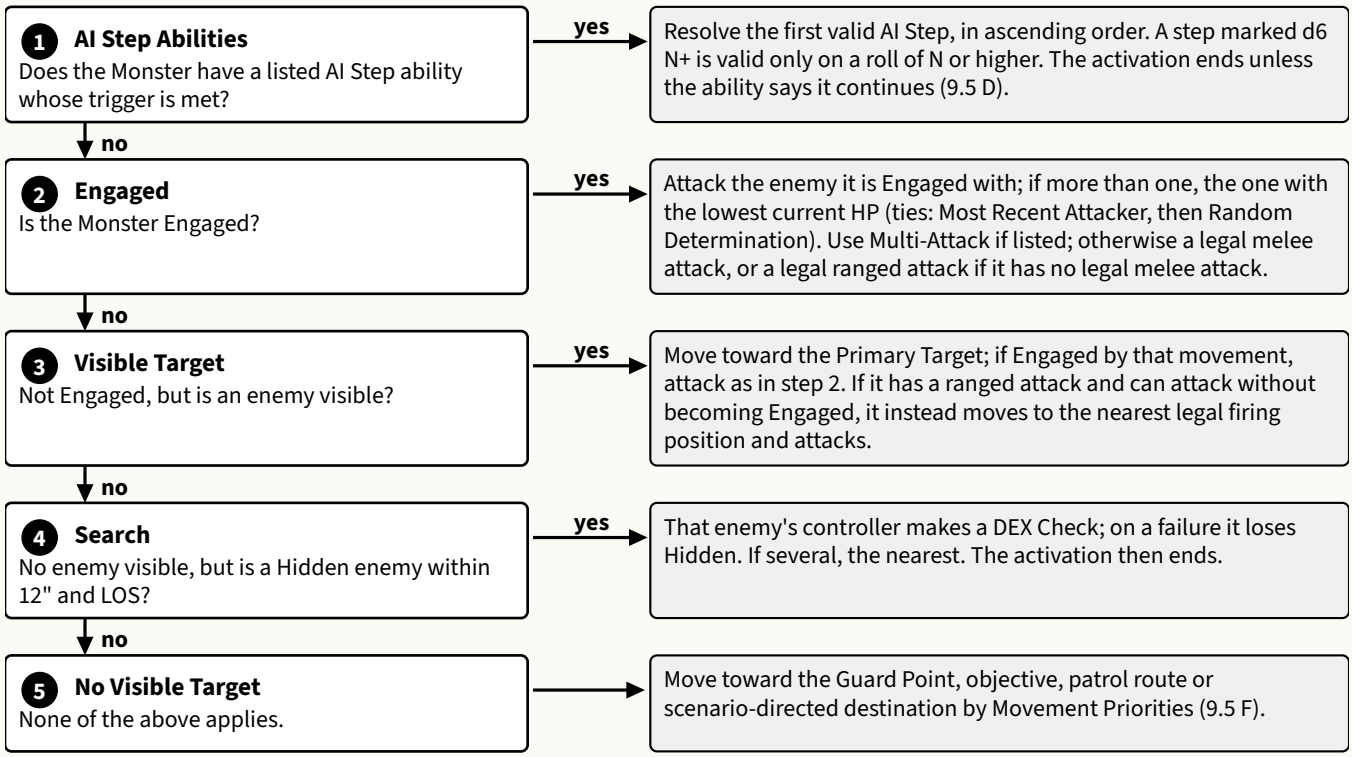


FIG-11. The Standard Monster AI Script: a Monster executes the first valid instruction and its activation then ends. Each instruction is tried only if the one above it does not apply (see 9.5 C).

D. AI Step Abilities

A Monster may have one or more numbered **AI Step** abilities (**AI Step 1**, **AI Step 2**, and upward), listed in ascending priority order. Not every Monster has AI Steps; if a Monster has none, skip this part of the script and proceed with standard Monster AI. When a Monster with AI Steps activates, evaluate them in ascending numerical order. If an AI Step is marked **on d6 N+**, roll **1d6** when that step is evaluated; the step is valid only on a result of **N** or higher. An AI Step is otherwise valid only if its trigger is met and every required target, route, attack, and placement is legal. The first valid AI Step resolves, and the activation ends unless that ability explicitly says it continues. Remaining AI Steps are not evaluated once a valid AI Step has resolved.

E. Target Priorities and Tie-Breakers

Unless a rule says otherwise, a monster's **Primary Target** is the nearest visible enemy. A **Hidden** or **Invisible** enemy is not a visible enemy unless a rule makes that enemy visible or otherwise legal for that **Monster**. Whenever the AI script results in two or more equally valid targets, such as when two enemies are exactly the same distance away or when two **Engaged** enemies have the exact same current HP, resolve the tie using the following hierarchy in descending order:

1. **Lowest Current HP:** The tied enemy with the lowest current HP.
2. **Most Recent Attacker:** The tied enemy that most recently caused HP damage or HP loss to that **Monster**.
3. **Random Determination:** If still tied, use **Random Determination** in **2.6.3** among the tied targets.

When Monster AI places an Area of Effect, choose a legal placement that covers the greatest number of enemies. Among tied placements, choose one that covers the fewest allied combatants, then one that includes the **Primary Target**, then determine randomly among the remaining legal placements.

F. Movement Priorities

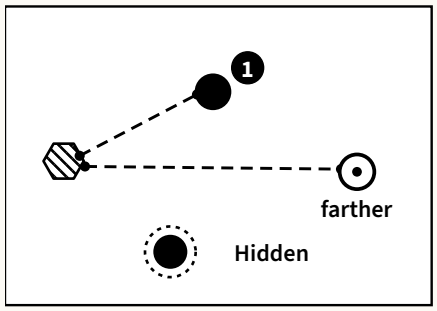
When moving toward a target, a monster:

1. takes the shortest legal route,
2. among equally short legal routes, avoids hazardous terrain if possible,
3. ends in the nearest legal position from which they can attack or threaten the target.

If a Monster has more than one movement mode, use the legal movement mode and route that brings them closest to the required destination. If multiple options bring them equally close, use the shortest route, then determine randomly among any remaining tied options.

Blocked Route: If no legal route lets the **Monster** reach a position this activation from which it may attack its **Primary Target**, but a legal route lets it reach a position this activation from which it may attack another visible enemy, the **Monster** changes its **Primary Target** to the nearest such enemy, resolving ties by **Target Priorities and Tie-Breakers**, and continues its activation against that new **Primary Target**.

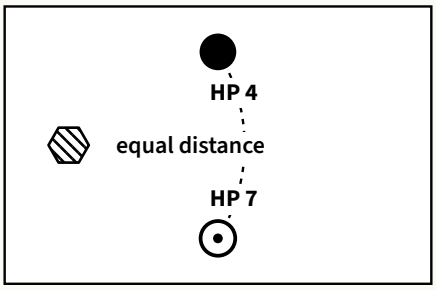
A **Primary Target (9.5 E)**



1 Primary Target: the nearest visible enemy. The Hidden enemy is nearer but is not a visible enemy, so it is not chosen. Monsters follow priority alone and never favour one player over another (9.5 A).

Schematic — not to scale

B **Ties (9.5 E)**



Example HP values.

1. **Lowest current HP** — HP 4 is chosen

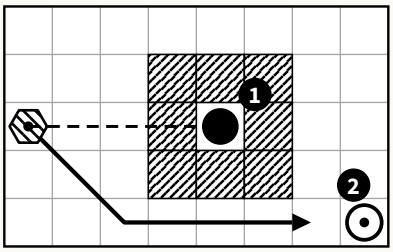
still tied

2. **Most Recent Attacker** — the tied enemy that most recently caused HP damage or HP loss to this Monster

still tied

3. **Random Determination** — among the tied targets (2.6.3)

C **Blocked Route (9.5 F)**



1 The nearest visible enemy cannot be attacked this activation: Impassable Terrain does not block LOS, but closes every route to it for this melee Monster. **2** A legal route reaches another visible enemy, which becomes the new Primary Target.

Movement Priorities (9.5 F): (1) shortest legal route; (2) among equally short routes, avoid hazardous terrain if possible; (3) end in the nearest legal position from which the Monster can attack or threaten the target.

Key Monster · Party A · Party B · Impassable Terrain · sight line · movement · 1 step

FIG-12. Primary Target is the nearest visible enemy; equal candidates are separated by lowest current HP, then Most Recent Attacker, then Random Determination. If the Primary Target cannot be reached, the nearest reachable visible enemy becomes the new Primary Target (see 9.5 E and 9.5 F).

If no visible enemy can be reached and attacked this activation, the **Monster** moves as far as its **Speed** allows along the shortest legal route toward its **Primary Target**, routing around **Impassable Terrain**, **Blocking Terrain**, enemy combatants, and any other space it cannot legally enter or occupy, and does not attack. If the **Monster** has a ranged attack but cannot reach a legal firing position this activation, it instead moves as far as its **Speed** allows along the shortest legal route toward the nearest legal firing position and does not attack. Its activation then ends.

If no legal route exists toward any visible enemy or toward any legal firing position, the **Monster** uses the **No Visible Target** instruction.

A ranged monster with blocked **LOS** cannot make that ranged attack. They must move toward the nearest legal firing position if one can be identified, or follow the next valid AI instruction if no legal firing position exists.

G. Scenario Overrides

A stat block, boss rule, or special ability may override part of this script. Scenario-specific target selection and other scenario-specific Monster AI must be printed in that **Scenario-Specific Monster's AI Steps**. Scenario rules may still establish states, allegiance, deployment, objectives, or triggers that the Monster's AI then references. Follow the more specific rule where an explicit exception remains.

9.6 Universal Special Abilities (SA) List

This section is the authoritative text for every Special Ability listed here. A **Monster** stat block may list an ability by name or restate it in shortened form as a reminder. If a stat block reminder and this section differ, this section is authoritative.

- **Acid Blood (dX):** When this **Monster** suffers HP damage from a melee weapon attack, the attacker suffers **dX acid damage** after the triggering attack resolves.
- **Acid Spit (XdY, Range X"):** Deal the listed acid damage. If Acid Spit is printed as an attack, it follows the normal ranged-attack Reaction rules. If it is printed as a Special Ability, it allows **Dodge** only when that entry explicitly says so.
- **Amphibious:** This **Monster** ignores **Difficult Terrain** from **Shallow Water** and **Deep Water**, moves across **Deep Water** at full Speed, and ignores the attack, **STR Check**, and **DEX Check Disadvantage** caused by swimming.
- **Aura (effect, X"):** Any enemy that enters or begins their activation within the listed Aura suffers the listed effect.
- **Beast:** This **Monster** is a natural or giant animal. Beast-targeting rules affect this **Monster**. The tag has no other effect by itself.
- **Blindsight (9"):** Within **9"**, this **Monster** ignores **Blinded**, may draw **LOS** through **Cover Terrain**, ignores **Cover** caused by visibility effects, and treats **Hidden** and **Invisible** enemies as visible. Physical terrain and intervening combatants provide **Cover** normally. **Blocking Terrain** still blocks **LOS**.
- **Brachiation:** This **Monster** ignores **Difficult Terrain** and climbs at full Speed.
- **Burrow (X"):** This **Monster** may move through earth, soil, sand, mud, snow, or another terrain feature that explicitly permits **Burrow**, at the listed speed. They cannot Burrow through worked stone, metal, wood, open water, or structures. They must end this movement in a legal position.
- **Charge:** If this **Monster** moves at least **4"** in a straight line toward an enemy and then attacks that enemy, the attack deals an additional **1d6 damage** of its primary damage type.
- **Climb (X"):** This **Monster** climbs at the listed Speed, ignores **Climb Checks**, and may climb surfaces without handholds or footholds.
- **Construct:** This **Monster** is **Immune** to **Poisoned [dX]**, **Bleeding**, **Frightened**, **Weakened**, and **Sleeping**.
- **Darkvision (9"):** This **Monster** ignores **Cover** and visual penalties caused solely by non-magical **Darkness** when determining **LOS** to, targeting, or resolving an effect against a combatant, object, space, or area origin within the listed range of this Monster. **Darkvision** does not create **Light**, remove **Darkness**, or ignore **Hidden** or **Invisible**. **Magical Darkness** applies normally unless another rule says otherwise.
- **Earth Glide:** This **Monster** may move through natural stone or earth as if using Burrow. They must end movement in a legal space unless a rule says otherwise.
- **Echolocation (9").** Functions as **Blindsight (9")** but is lost while this **Monster** is **Silenced** or unable to make sound.
- **Ethereal / Etherealness:** This **Monster** may move through mundane solid objects up to **1"** thick and ignores normal terrain while doing so. Unless a rule says otherwise, they cannot end movement inside a solid object.
- **Evasive:** Melee attacks against this **Monster** roll their base damage dice with **Disadvantage**.
- **Fearless:** This **Monster** is **Immune** to **Frightened**.
- **Fey:** This **Monster** is a creature of the old courts and wild places. Fey-targeting rules affect this **Monster**.
- **Fiend:** This **Monster** is **Immune** to **Poisoned [dX]** and **Frightened**; **Resistant:** fire.
- **Fly (X"):** This **Monster** moves through the air at the listed Speed and ignores ground terrain while airborne. They must end this movement in a legal position.
- **Frightful Presence (X"):** An enemy non-Monster combatant that starts their activation within the listed range of this **Monster** must pass a **SPI Check** or become **Frightened**.

- **Heavy:** This **Monster** is **Immune** to forced movement.
- **Ice Glide:** This **Monster** ignores **Slippery Terrain** and **Difficult Terrain** caused by ice, snow, or frost. They do not need to make **DEX Checks** to resist falling **Prone** on ice-based terrain. **Ice Glide** does not provide any benefit on terrain that is not ice-based.
- **Immune (type, source, or condition):** This **Monster** suffers no damage or effect from the listed type, source, or condition.
- **Incorporeal:** This **Monster** is **Resistant** to non-magical weapon damage and can move through other models and terrain. They cannot end their movement inside terrain or another model.
- **Keen Senses (9"):** A combatant within **9"** of this **Monster** and in its **LOS** cannot become **Hidden**, and loses **Hidden** if they already have it. A **Resting** group that contains this **Monster** wakes on the **6"** movement trigger even from a **Hidden** enemy.
- **Light Aversion:** While in **Light**, this **Monster** rolls the attack's base damage dice with **Disadvantage** unless a more specific rule says otherwise.
- **Lycanthrope:** This **Monster** is a shapeshifter and is **Resistant** to non-magical, non-silvered weapon damage. **Holy** damage ignores this **Resistance**. Lycanthrope-targeting rules affect this **Monster**.
- **Multi-Attack:** This **Monster** makes the listed attacks during their attack step, in the order written. Each listed attack is a separate attack, damage source, and trigger for **Reactions**. Select a target for each attack using the attack sequence's stated priority, or the normal Monster target priorities if none is stated. Unless the sequence says otherwise, multiple attacks may target the same enemy. Skip an attack if it has no legal target; this does not end the remaining sequence.
- **Nimble:** After making an attack, this **Monster** uses **Shift 1"** toward the nearest **Cover Terrain**, avoiding hazards.
- **Pack Tactics:** This **Monster's** attacks roll their base damage dice with **Advantage** while at least one other allied combatant is within the attack's melee distance of the target.
- **Plant:** This **Monster** is a plant or fungal creature. Combatants with the **Plant** tag are **Immune** to **Poisoned [dX]** and **Bleeding**. Plant-targeting rules affect this **Monster**.
- **Poison (effect):** When the listed attack damages a target or when the listed trigger occurs, apply the listed poison effect.
- **Pounce:** If this **Monster** moves at least **4"** straight toward a target before attacking, the attack's base damage dice are rolled with **Advantage**. If the attack deals damage, the target must pass a **STR Check** or become **Prone**.
- **Reach X:** This **Monster** may make melee attacks against otherwise valid targets within **X"** instead of their normal melee distance.
- **Regenerate (X):** At the start of the Monster Phase, this **Monster** regains **X HP** unless a listed condition prevents that healing.
- **Rend:** If this **Monster** damages the same target with two or more listed attacks during one activation, apply the listed bonus damage or effect.
- **Resistant (type or source):** This **Monster** halves damage from the listed type or source, rounded down as normal.
- **Siege Monster:** This **Monster** deals double damage to terrain features, structures, objective markers, and other objects that have HP.
- **Small:** This Monster has **Sz S** and uses the universal **Small** rules under **Size and Footprints** in **2.6**.
- **Stalwart:** This **Monster** ignores **Critical Hit** effects from melee attackers.
- **Standing Leap (X"):** This **Monster** may **Jump** up to **X"** during their movement without making a **DEX Check**. Each **1"** jumped this way costs **1"** of movement instead of **2"**.
- **Still Form:** While this **Monster** is **Resting**, treat them as scenery rather than a Monster. Place them openly on the battlefield. The normal movement and visible-enemy wake-up triggers do not apply to them. They become **Awake** and cease to be scenery when they attack, suffer damage, or an enemy ends an activation within **3"** of them with **LOS** to them.
- **Superior Darkvision (9"):** Functions as **Darkvision (9")**, and also ignores **Cover** and visual penalties caused by **Magical Darkness**.

- **Swallow Whole:** When the listed attack damages a target or when the listed damage trigger occurs, the target is swallowed. Remove the swallowed target from the battlefield and mark them as swallowed by that **Monster**. A swallowed target is **Immobilized**, **Blinded**, cannot become **Hidden**, cannot draw **LOS**, cannot be targeted by outside attacks or Powers, cannot attack, cannot cast Powers, cannot use Special Abilities, cannot **Interact**, cannot **Spot**, and cannot take **Reactions**. They drop any carried objective in the space they occupied when swallowed. At the end of each round, they suffer the listed automatic damage. A swallowed combatant that uses AP remains eligible to activate while swallowed if they otherwise meet the requirements in **3.3 Party Phase**. Unless the specific **Monster** gives a different escape rule, the swallowed target may spend **1 AP** during their activation to make a **STR** or **DEX Check**. On a success, place them **Prone** adjacent to the swallowing **Monster** in the nearest legal space. If the swallowing **Monster** is **Knocked Out**, removed, or killed, place all swallowed targets **Prone** adjacent to them in the nearest legal spaces before removing the **Monster**.
- **Swim (X"):** This **Monster** swims across **Shallow Water** and **Deep Water** at the listed **Swim** speed. They ignore movement penalties, movement **Checks**, **Difficult Terrain**, and attack, **STR Check**, and **DEX Check Disadvantage** caused by water or swimming. Swimming remains surface movement and does not change elevation.
- **Terror Aura (X"):** This ability functions as **Frightful Presence (X")**.
- **Tireless:** This **Monster** cannot be made **Slowed** or **Stunned**.
- **Trample:** If this **Monster** moves through or over a target as allowed by their rule, that target suffers the listed damage or effect.
- **Tremorsense (9"):** While this **Monster** and an enemy are in contact with the same continuous ground surface within the listed range, this **Monster** treats that enemy as visible. **Impassable Terrain** and **Blocking Terrain** still block movement but do not block this sense.
- **Undead:** This **Monster** is **Immune** to **Poisoned [dX]**, **Bleeding**, **Frightened**, and **Sleeping**.
- **Unyielding Form:** This **Monster** cannot be pushed, pulled, knocked **Prone**, or transformed unless a rule explicitly says it affects Constructs, Siege Monsters, or **Monsters** with this ability.
- **Venom:** When this **Monster's** melee attack damages a target, that target must pass a **STR Check** or become **Poisoned [d4]**.
- **Vulnerable (type or source):** This **Monster** doubles damage from the listed type or source after mitigation.
- **Wallcrawler:** This **Monster's** listed **Speed** applies equally to vertical surfaces. They may move along walls and ceilings without spending additional movement for **Climb** and without making **STR Checks** to **Climb**. They cannot be knocked **Prone** while clinging to a vertical or overhanging surface.
- **Web (X"):** Offensive ranged ability. When this attack damages a target, the target becomes **Immobilized** until they escape as stated in the rule.

Interpreting Monster Special Abilities

Use the following rules whenever a **Monster** Special Ability does not restate them:

- If an SA says it triggers at **AI Step 1 of the Monster AI Script**, resolve it before the **Monster's** normal move or attack.
- If an SA consists only of a standing rule or modifier and has no trigger or script step, it is passive.
- If an SA has a trigger such as **when targeted**, **when damaged**, **when this attack damages a target**, or **at the start of the Monster Phase**, it resolves only when that trigger occurs.
- If an SA has no trigger or script step and directs the **Monster** to resolve an attack or other effect, it is an activation option. Unless it says it is additional, it replaces the **Monster's** normal attack for that activation.
- If an SA gives the **Monster** a choice between multiple legal targets and no more specific target rule is written, use the normal **Monster** targeting priorities from **Section 9.5**.
- If an SA says a **Monster** may take an option and no printed condition decides that choice, the **Monster** takes the option whenever the option's requirements are met.
- If an activated SA directs movement and does not say that movement is additional, it replaces the **Monster's** normal movement for that activation.
- If an SA applies forced movement, resolve it using **4.4.6 Forced Movement**.
- If the condition's core entry gives an expiry rule, use that rule. Otherwise, if an SA creates or applies a condition and no duration is listed, that condition lasts **until the end of the round**.
- If an SA would still be ambiguous after applying these defaults, use the narrower interpretation.

9.7 The Bestiary

This section lists every Monster a party may face, organized by Climate, followed by the Bosses of solo and cooperative play. Each entry gives a description, a stat line, and the Monster's attacks and abilities.

Reading a Stat Line

A Monster's stat line lists **HP, AV, SPD, LVL, CV,** and **Sz** in that order. See **9.1 Monster Stat Profile** for the authoritative definitions.

Monster Roles

Every Monster fills a Role on the battlefield, named in brackets after its name. A Role is an encounter-building label and has no mechanical effect unless a rule explicitly says otherwise. It is a promise about how the Monster fights, so that a single glance tells a party what kind of trouble has woken up.

- **Minion:** The rank and file of the dark places. A Minion falls to a single clean blow, but they never come alone, and a tide of them can pull down a hero who treats them lightly.
- **Soldier:** The dependable line-holder, trading blow for blow. A Soldier is the honest yardstick of a fair fight, neither glass nor wall.
- **Skirmisher:** A darting, circling threat that strikes and slips away before the answer lands. A Skirmisher trades armour for speed and is deadliest in a pack that never holds still.
- **Cannon:** A fragile engine of sudden violence. A Cannon can fell a hero in a single dreadful moment, then shatter the instant a blade reaches them. Strike them first or pay the price.
- **Brute:** A slow avalanche of muscle and hide. A Brute soaks up punishment and grinds a party down over many rounds, though they rarely end a hero in one stroke.
- **Controller:** A bender of the battlefield, ruling through fear, venom, snare, and summoned horror rather than the weight of their arm. Their danger is the shape of the fight they force upon you.
- **Elite:** A small war given a single body. An Elite duels a seasoned hero as an equal and shrugs off scattered blows; only focused, concerted effort will bring one down. Their kind are rare and terrible, and seldom seen in numbers.

Entry Structure

Each Monster entry is laid out in the order the Monster acts, so it can be read from top to bottom during play:

1. **Name and Role.** The Monster's name, with their battlefield Role in brackets.
2. **Description.** A short passage of lore and physical description, set in italics.
3. **Stat Line.** The table of HP, AV, SPD, LVL, CV, and Sz described above.
4. **AI Steps.** If the Monster has them, their numbered AI Steps appear here. When the Monster activates, they follow the Monster AI rules and attempt each AI Step in order. A step marked (on d6 N+) is attempted only if a d6 rolled for it shows N or higher.
5. **Attacks.** The Monster's attacks. If they have the Multi-Attack ability, that ability is listed first, since it governs how the attacks below it are made.
6. **Special Abilities.** The Monster's remaining abilities. Movement abilities, such as **Fly** or **Climb**, are always listed first.

Many Monsters share common abilities. A stat block may print their full rules or list them by name; **9.6 Universal Special Abilities** is authoritative.

Greenmark Bestiary

Giant Tarantula [Skirmisher]

A hand-span of bristled legs around a body the size of a war helm, the giant tarantula stalks the Greenmark's leaf litter on stilted, deliberate steps. Its fangs weep a venom that turns a victim's muscles to wet rope. It spins no snares, preferring to run prey down and pin it where it falls. Foragers keep one eye on the canopy, because the largest specimens hunt from above and drop.

HP	AV	SPD	LVL	CV	Sz
9	0	6"	1	1c	S

Attacks

- **Bite:** 1d6 + 2 piercing damage.

Special Abilities

- **Small.**
- **Beast.**
- **Wallcrawler:** This Monster's listed **Speed** applies equally to vertical surfaces. They may move along walls and ceilings without spending additional movement for **Climb** and without making **STR Checks** to **Climb**. They cannot be knocked **Prone** while clinging to a vertical or overhanging surface.
- **Venom:** When this Monster's melee attack damages a target, that target must pass a **STR Check** or become **Poisoned [d4]**.
- **Standing Leap (6").**
- **Tremorsense (9").**

Goblin [Minion]

Knee-high, green-grey, and all elbows and malice, goblins infest the Greenmark's ruined steadings in chittering mobs. Each carries a notched blade and a sling of river stones, and not one will hold a line once the fight turns against it. Singly they are cowards; in numbers they are a tide. Greythorn's gatewardens read goblin-sign in the chewed bones left along the road.

HP	AV	SPD	LVL	CV	Sz
6	0	6"	1	1c	S

Attacks

- **Jagged Blade:** 1d4 slashing damage.
- **Short Sling: Ranged 8"**, 1d4 + 1 blunt damage.

Special Abilities

- **Small.**
- **Nimble:** After making an attack, they use **Shift 1"** toward the nearest **Cover Terrain**, avoiding hazards.
- **Darkvision (9").**

Beastman [Minion]

All fur and grievance, a beastman is a hunched man-shape topped with the head of a goat or boar, its hands ending in black claws. They run the forest edge in warbands, raiding for meat and metal, and there is nothing in them that will parley. They were among the first things the burning years shaped, and they have bred true down every generation since.

HP	AV	SPD	LVL	CV	Sz
6	0	6"	1	1c	M

Attacks

- **Claws:** 1d6 slashing damage.

Special Abilities

- **Ravage:** If this Monster begins their activation **Engaged**, they make two **Claws** attacks against the nearest **Engaged** enemy, then their activation ends.

Bandit [Soldier]

Not every threat in the Greenmark has claws. Bandits are deserters, broken tithe-collectors, and folk the Bastions could no longer feed, gathered under whichever of them is cruellest that season. They favour shortbows from cover and blades up close, and they fight dirtiest against anything already bleeding. A full purse or a good pauldron is reason enough.

HP	AV	SPD	LVL	CV	Sz
16	1	6"	2	3c	M

Attacks

- **Shortsword:** 1d6 + 3 slashing damage.
- **Shortbow: Ranged 12"**, 1d6 + 2 piercing damage.

Special Abilities

- **Dirty Fighting:** This Monster's attacks deal **+2 damage** against **Prone**, **Stunned**, or **Immobilized** targets.

Satyr Reveler [Controller]

Goat-legged and laurel-crowned, the satyr reveler capers at the edge of the firelight, piping on something that was never carved from wood. The music is the weapon: it floods a listener with borrowed terror or walks them gently into the dark. Satyrs were fey once, before the long silence soured them, and their revels end now in shallow graves.

HP	AV	SPD	LVL	CV	Sz
15	1	7"	2	4c	M

AI Steps

- **Lulling Pipes (AI Step 1, on d6 4+):** If not **Engaged**, the nearest visible enemy within **8"** must pass a **SPI Check** or become **Sleeping**. This Monster then ends their activation.

Attacks

- **Curved Knife:** 1d6 + 2 slashing damage.

Special Abilities

- **Fey:** This **Monster** is a creature of the old courts and wild places. Fey-targeting rules affect this **Monster**.
- **Fleet:** After resolving an attack or **Lulling Pipes**, they use **Shift 2"** toward the nearest **Cover Terrain**, avoiding hazards.
- **Resistant:** arcane.

Briarling [Minion]

A knot of animate thornwood the size of a hound, the briarling scuttles on root-claws with a low, dry rustle, and bursts in a spray of barbed splinters when it is cut down. They cluster in the deep groves the Antlered Warden keeps, spent freely as the forest's first and least-mourned line. Fire is the only sure answer to them.

HP	AV	SPD	LVL	CV	Sz
9	1	5"	2	3c	M

Attacks

- **Thorn Claws:** 1d6 + 1 piercing damage.

Special Abilities

- **Plant: Immune** to **Poisoned [dX]** and **Bleeding**.
- **Root Snag:** When **Thorn Claws** damages a target, that target must pass a **STR Check** or become **Slowed**.
- **Thorn Burst:** When reduced to 0 HP, each combatant adjacent to this Monster suffers **1d4 piercing damage**.

Dire Wolf [Skirmisher]

Bigger than a pony at the shoulder, scarred and yellow-eyed, the dire wolf works the Greenmark in coordinated packs, cutting prey from the herd with grim patience. One is dangerous; a pack is a sentence on any lone traveller. They take the slow, the young, and the foolish, in that order. Greythorn's outriders do not ride alone in wolf season.

HP	AV	SPD	LVL	CV	Sz
15	1	8"	2	3c	M

Attacks

- **Bite:** 1d8 + 2 piercing damage.

Special Abilities

- **Beast.**
- **Pack Tactics:** This Monster's attacks roll their base damage dice with **Advantage** while at least one other allied combatant is within the attack's melee distance of the target.
- **Takedown:** If this Monster moves at least **4"** before a **Bite** that damages a target, that target must pass a **STR Check** or become **Prone**.
- **Keen Senses (9").**
- **Pounce.**

Orc [Soldier]

Broad as a doorway and built around a greataxe, the orc is the Greenmark's most disciplined raider, grey-skinned and heavy-jawed, its lower tusks jutting above a wall of shields. Where beastmen break, orcs hold their formation. A warband takes a steading methodically, gate by gate, and savours the hard fight more than the loot it wins.

HP	AV	SPD	LVL	CV	Sz
21	1	6"	3	6c	M

AI Steps

- **Bloodlust (AI Step 1):** If a visible enemy has a legal route, this Monster moves their full Speed toward the visible enemy with the lowest current HP, then makes their attacks if able. If no visible enemy has a legal route, this step is invalid.

Attacks

- **Greataxe:** 1d10 + 1 slashing damage.

Special Abilities

- **Charge:** If this **Monster** moves at least **4"** in a straight line toward an enemy and then attacks that enemy, the attack deals an additional **1d6 damage** of its primary damage type.
- **Savage Critical:** On a melee **Critical Hit**, this attack rolls one extra base damage die of the same type.
- **Darkvision (9").**

Bugbear [Soldier]

Seven feet of shaggy, long-armed menace with a flat face and fur the colour of dead bracken, the bugbear moves through the undergrowth in a silence it has no right to. It strikes from arm's reach before its quarry knows it is there, rising out of cover with a spiked morningstar already swinging. It much prefers the ambush to the open fight. Where bugbears lair, goblins serve as their terrified scouts.

HP	AV	SPD	LVL	CV	Sz
21	1	6"	3	6c	M

AI Steps

- **Lurk (AI Step 1):** If this Monster is not **Hidden** and meets the conditions to become **Hidden** by taking **Hide** in **4.3.2**, they become **Hidden**, then continue their activation normally.
- **Ambusher (AI Step 2):** If this Monster is **Hidden**, they move into **Reach** of the nearest visible enemy and make a **Morningstar** attack that deals an additional **1d8 piercing damage**, then end their activation.

Attacks

- **Morningstar:** 1d10 + 2 piercing damage.

Special Abilities

- **Long-Limbed:** This Monster's melee attacks have **Reach**.
- **Keen Senses (9").**

Harpy [Cannon]

Half-mortal and half-carrion-bird, the harpy nests in the Greenmark's broken towers and sings travellers off the road and into its talons. The song is a lure that no resolve fully shakes. Up close it is filth and hooked claws, shrieking as it rakes. Its hunger is older than the Fall, and it was never once satisfied.

HP	AV	SPD	LVL	CV	Sz
16	1	4"	3	6c	M

AI Steps

- **Diving Snatch (AI Step 1, on d6 4+):** If not **Engaged**, this Monster moves up to their Fly Speed to the nearest visible enemy, makes a **Talons** attack, and, if that attack damages the target, **Slides** them **4"** using **Random Direction** in **10.1**. This Monster then ends their activation.

Attacks

- **Talons:** 1d8 + 1 slashing damage.

Special Abilities

- **Fly (8").**

Goblin Shaman [Controller]

Hung with fetishes of bone and crow-feather, the goblin shaman is the one goblin its own kind fears more than the enemy. It hangs behind the mob and spits hexes that wither courage and rot resolve. Its magic is small and spiteful, scavenged from older powers it does not begin to understand. Kill it, and the warband's nerve tends to break with it.

HP	AV	SPD	LVL	CV	Sz
19	1	6"	3	8c	S

AI Steps

- **Spiteful Hex (AI Step 1):** If not **Engaged**, the nearest visible enemy within **12"** suffers the **Hex Bolt** attack; if that target is damaged, they also become **Weakened** until the end of the round. This Monster then ends their activation.

Attacks

- **Gnarled Staff:** 1d6 + 1 blunt damage.
- **Hex Bolt: Ranged 12"**, 1d8 + 1 necrotic damage.

Special Abilities

- **Small.**
- **Resistant:** arcane.
- **Darkvision (9").**

Bandit Captain [Elite]

The bandit captain held a real commission once, or says so often enough to be believed. Armoured in looted mail and barking orders a crew will actually follow, they turn a rabble into something that fights like soldiers. They parry the first blow, answer the second, and spend their underlings freely to keep their own skin whole. Greythorn carries a standing bounty on three of them by name.

HP	AV	SPD	LVL	CV	Sz
32	2	6"	4	15c	M

AI Steps

- **Press the Advantage (AI Step 1, on d6 4+):** The allied Bandit nearest to this Monster immediately makes one free attack against the nearest enemy within range. This Monster then continues their activation normally.

Attacks

- **Longsword:** 1d10 + 4 slashing damage.
- **Heavy Crossbow: Ranged 18"**, 1d10 + 3 piercing damage.

Special Abilities

- **Stalwart:** This **Monster** ignores **Critical Hit** effects from melee attackers.
- **Dirty Fighting:** This Monster's attacks deal **+2 damage** against **Prone**, **Stunned**, or **Immobilized** targets.

Dire Bear [Brute]

The dire bear is the Greenmark grown teeth, a shaggy mountain of muscle that stands twice a man's height and swats deadwood aside to reach whatever it has smelled. It mauls with both forepaws and finishes with a bite that splits shields. Hunters who corner one rarely walk home. It bears no malice; it is only enormous, and always hungry.

HP	AV	SPD	LVL	CV	Sz
33	2	7"	4	12c	L

AI Steps

- **Maul Down (AI Step 1):** Moves to the nearest visible enemy and attacks; against a **Prone** target their attacks roll their base damage dice with **Advantage**.

Attacks

- **Multi-Attack:** Makes one **Bite** attack and one **Claws** attack during their attack step.
- **Bite:** 1d10 piercing damage.
- **Claws:** 1d8 slashing damage.

Special Abilities

- **Beast.**
- **Overbear:** If both attacks damage the same target, that target must pass a **STR Check** or become **Prone**.
- **Resistant:** piercing.
- **Keen Senses (9").**

Blood Ape [Soldier]

Slab-shouldered and crimson-furred, the blood ape knuckles through the high canopy and drops onto anything that bleeds. It fights in a building frenzy, both fists hammering faster as its own wounds mount, so the redder it grows the harder it hits. They hold the upper branches of the deep Greenmark and suffer no rival to share them.

HP	AV	SPD	LVL	CV	Sz
33	2	6"	5	17c	M

AI Steps

- **Beat the Chest (AI Step 1, on d6 4+):** If this Monster is at or below half their **Max HP**, they make their **Pummel** attacks against the nearest **Engaged** enemy with **Advantage** this activation. Otherwise, they act normally.

Attacks

- **Multi-Attack:** Makes two **Pummel** attacks during their attack step.
- **Pummel:** 1d8 blunt damage.

Special Abilities

- **Beast.**
- **Climb (6").**
- **Frenzy:** While this Monster is at or below half their **Max HP**, each **Pummel** attack rolls one additional base damage die.
- **Brachiation:** Ignores **Difficult Terrain** and climbs at full Speed.
- **Standing Leap (6").**
- **Pounce.**
- **Keen Senses (9").**

Gorebeak Bear [Brute]

Body of a bear, head and foreclaws of a great owl, the gorebeak is a stitched-together horror of the deep wood, its hooked beak punching clean through plate. It pins prey with raking claws and worries at the gap until something gives. Whether the burning years made these or merely woke them, the foresters cannot agree. The argument is no comfort to the pinned.

HP	AV	SPD	LVL	CV	Sz
38	2	7"	5	20c	L

AI Steps

- **Charging Gore (AI Step 1):** Moves their full Speed in a straight line toward the nearest visible enemy; if they end **Engaged**, their **Goring Beak** attack this activation deals an additional **1d8 piercing damage**.

Attacks

- **Multi-Attack:** Makes one **Goring Beak** attack and one **Claws** attack during their attack step.
- **Goring Beak:** 1d10 piercing damage.
- **Claws:** 1d8 slashing damage.

Special Abilities

- **Charge:** If this **Monster** moves at least **4"** in a straight line toward an enemy and then attacks that enemy, the attack deals an additional **1d6 damage** of its primary damage type.
- **Pin:** If both attacks damage the same target in one activation, that target must pass a **STR Check** or become **Immobilized** until the end of the round.
- **Pounce.**
- **Keen Senses (9").**

Ogre [Brute]

Twice a man's height and slope-shouldered, an ogre is a slab of grey muscle and gut bound in stitched hides. It claims a ford or a narrow run between the trees and takes a toll of all that try to pass. It does not count coin. It counts the heavy, bright things its last few meals were carrying, and swings a tree-trunk club to collect more.

HP	AV	SPD	LVL	CV	Sz
46	3	4"	6	31c	L

Attacks

- **Great Club:** 1d12 + 2 blunt damage.

Special Abilities

- **Sweeping Blow:** On a **Critical Hit**, the nearest other combatant adjacent to this Monster suffers **1d8 blunt damage**.
- **Heavy: Immune** to forced movement.

Dryad Grovewarden [Controller]

Bark-skinned and crowned in living branches, a dryad grovewarden is the will of an old tree given a shape that can walk and a grudge it can hold. It steps between trunks as though they were doorways and binds intruders in grasping root. The Antlered Warden's tithe keeps most groves quiet. Where it goes unpaid, the grovewardens stir.

HP	AV	SPD	LVL	CV	Sz
40	2	6"	7	40c	M

AI Steps

- **Binding Roots (AI Step 1, on d6 4+):** If not **Engaged**, the visible enemy nearest to this Monster within **10"** must pass a **STR Check** or become **Immobilized**, and their space becomes **Difficult Terrain** until the end of the round. This Monster then ends their activation.
- **Thorn Volley (AI Step 2, on d6 4+):** The visible enemy nearest to this Monster within **10"** suffers **2d6 piercing damage**. This Monster then continues their activation normally.

Attacks

- **Entangling Staff:** 1d10 + 2 blunt damage. When this attack damages a target, that target must pass a **STR Check** or become **Slowed**.

Special Abilities

- **Fey:** This **Monster** is a creature of the old courts and wild places. Fey-targeting rules affect this **Monster**.
- **Plant: Immune** to **Poisoned [dX]** and **Bleeding**.

Forest Troll [Brute]

Gangling, moss-slick, and stinking of the bog-edge, the forest troll is all reaching arms and a mouth of broken tusks. Its wounds knit shut before the blood has dried, and only fire or acid puts one down to stay. It is stupid, relentless, and forever hungry. Greythorn's woodcutters carry oil for exactly one reason.

HP	AV	SPD	LVL	CV	Sz
62	4	6"	8	54c	L

Attacks

- **Multi-Attack:** Makes one **Rending Claws** attack and one **Bite** attack during their attack step.
- **Rending Claws:** 1d12 slashing damage.
- **Bite:** 1d10 piercing damage.

Special Abilities

- **Rend:** If both attacks damage the same target during one activation, that target must pass a **STR Check** or become **Bleeding**.
- **Regenerate:** At the start of the Monster Phase, they regain **5 HP** unless they suffered **fire** or **acid** damage since the end of their last activation.
- **Vulnerable:** fire.

Werewolf [Elite]

A haunted villager by day, a hunched grey killer at the turning of need, the werewolf carries an old curse in its blood. Mundane steel slides from its hide; only silver and magic bite true. It strikes from the treeline and is gone before the screaming stops, then circles back for the wounded. Every bitten survivor is tomorrow's werewolf.

HP	AV	SPD	LVL	CV	Sz
61	3	8"	9	80c	M

AI Steps

- **Run Down (AI Step 1):** Moves their full Speed toward the nearest visible **Bleeding** enemy, or the nearest visible enemy if none are **Bleeding**, then makes their attacks.

Attacks

- **Multi-Attack:** Makes one **Rending Claws** attack and one **Savage Bite** attack during their attack step.
- **Rending Claws:** 1d12 slashing damage.
- **Savage Bite:** 1d12 piercing damage. When this attack damages a target, that target must pass a **STR Check** or become **Bleeding**.

Special Abilities

- **Lycanthrope:** This **Monster** is **Resistant** to non-magical, non-silvered weapon damage. **Holy** damage ignores this **Resistance**.
- **Scent of Blood:** Against a **Bleeding** target, this Monster's base damage dice are rolled with **Advantage**.
- **Keen Senses (9").**
- **Immune:** Bleeding.
- **Vulnerable:** holy.

Green Dragon [Elite]

Apex predator of the Greenmark and its oldest liar, the green dragon is a serpentine tyrant the colour of deep moss, spine-crested, its breath a rolling, corrosive poison. It does not rampage; it manipulates, ruling a swathe of forest through fear and bargain. Lesser things bring it tribute in exchange for being spared a while longer.

HP	AV	SPD	LVL	CV	Sz
78	6	6"	10	106c	H

AI Steps

- **Poison Breath (AI Step 1, on d6 5+):** Place a **Cone 5"** from this Monster to cover the most enemy combatants possible. Each affected combatant must pass a **DEX Check** or suffer **4d8 poison damage** (half on a success). This Monster then ends their activation.

Attacks

- **Multi-Attack:** Makes one **Bite** attack and two **Claws** attacks during their attack step.
- **Bite:** 1d12 piercing damage.
- **Claws:** 1d10 slashing damage.

Special Abilities

- **Fly (12").**
- **Frightful Presence:** An enemy non-Monster combatant that starts their activation within **6"** of this Monster must pass a **SPI Check** or become **Frightened**.
- **Resistant:** poison.
- **Immune:** Frightened.

Ashlands Bestiary

Undead Warrior [Minion]

The Ashlands never disbanded its legions; it merely let them die unburied. An undead warrior is a skeleton or half-rotted corpse in the rusted kit of the old empire, still holding the post it was set to generations back. It fights in ragged ranks, shield to shield, mindless but drilled by sheer habit. There are always more of them in the ash.

HP	AV	SPD	LVL	CV	Sz
6	0	5"	1	1c	M

Attacks

- **Notched Blade:** 1d6 slashing damage.

Special Abilities

- **Undead: Immune** to **Poisoned [dX]**, **Bleeding**, **Frightened**, and **Sleeping**.
- **Shield Wall:** While adjacent to another allied Undead, this Monster has **+1 AV**.
- **Immune:** poison.
- **Darkvision (9").**

Undead Crossbowman [Cannon]

Behind the shambling battle-line stand the crossbowmen, dead marksmen cranking warped windlasses with fleshless fingers. They loose in volleys at whatever their soldiers have fixed in place, and their bolts seek the gaps in armour with horrible patience. They do not tire, flinch, or lose their nerve. Only their bolts run out, eventually.

HP	AV	SPD	LVL	CV	Sz
7	0	5"	1	3c	M

Attacks

- **Crossbow: Ranged 16"**, 1d6 + 3 piercing damage.

Special Abilities

- **Undead: Immune** to **Poisoned [dX]**, **Bleeding**, **Frightened**, and **Sleeping**.
- **Focused Volley:** Against a target within **8"** that is **Engaged** by an allied Undead, this attack's base damage die is rolled with **Advantage**.
- **Immune:** poison.
- **Darkvision (9").**

Ghoul [Minion]

Grey, gaunt, and hook-clawed, a ghoul is what hunger makes of a corpse that would not lie still. It lopes in packs through the Ashlands' tombs, and its bite carries a paralytic rot that stiffens the limbs. Ghouls take the living and the freshly dead alike, and they are clever enough to cut off the straggler. They were people once, before the long famine that came after the cities burned.

HP	AV	SPD	LVL	CV	Sz
10	1	6"	2	3c	M

Attacks

- **Claws:** 1d6 + 1 slashing damage.
- **Bite:** 1d6 piercing damage. When this attack damages a target, that target must pass a **STR Check** or become **Slowed**.

Special Abilities

- **Undead: Immune** to **Poisoned [dX]**, **Bleeding**, **Frightened**, and **Sleeping**.
- **Pack Tactics:** This Monster's attacks roll their base damage dice with **Advantage** while at least one other allied combatant is within the attack's melee distance of the target.
- **Immune:** poison.
- **Keen Senses (9").**

Possessed Corpse [Minion]

Not all the Ashlands' dead rose by design. A possessed corpse is a body worn by something that crept in from the dark between worlds, lurching on borrowed legs toward a wrong, jerking purpose. Its grip does not tire, and it bursts in a reek of corruption when it finally falls. Whatever rides it does not speak. It only reaches.

HP	AV	SPD	LVL	CV	Sz
9	1	5"	2	3c	M

Attacks

- **Slam:** 1d6 + 1 blunt damage.

Special Abilities

- **Undead: Immune** to **Poisoned [dX]**, **Bleeding**, **Frightened**, and **Sleeping**.
- **Carrion Burst:** When reduced to 0 HP, the nearest combatant within **2"** must pass a **STR Check** or become **Poisoned [d4]**.
- **Immune:** poison.
- **Vulnerable:** fire.

Ember Skull [Cannon]

A single charred head wreathed in green flame, the ember skull drifts the ruins on a cold updraft of malice, lighting the dark with its own hateful glow. It spits gouts of fire at the living from beyond their reach. Old grimoires name them the failed apprentices of the empire's pyromancers, kept burning by their final spite. Snuff the flame and the skull drops inert.

HP	AV	SPD	LVL	CV	Sz
14	0	4"	3	6c	S

Attacks

- **Multi-Attack:** Makes two **Fire Ray** attacks during their attack step against the two nearest visible enemies within range.
- **Fire Ray: Ranged 10"**, 1d6 + 2 fire damage.

Special Abilities

- **Small.**
- **Fly (8").**
- **Undead: Immune** to **Poisoned [dX]**, **Bleeding**, **Frightened**, and **Sleeping**.
- **Light Source (Aura 2").**
- **Resistant:** fire.
- **Vulnerable:** ice.

Wererat [Skirmisher]

Where the Ashlands meet the old sewers and undercrofts, the wererat thrives, a hunched, plague-grey shapeshifter scurrying between man and rat-thing. It bites, then skitters back into the dark, leaving filth-fever in every wound. Mundane blades barely mark it. One wererat is a nuisance; a nest of them is an outbreak.

HP	AV	SPD	LVL	CV	Sz
19	1	7"	3	6c	S

Attacks

- **Rusted Blade:** 1d6 + 4 slashing damage.
- **Bite:** 1d4 + 2 piercing damage. When this attack damages a target, that target must pass a **STR Check** or become **Poisoned [d4]**.

Special Abilities

- **Small.**
- **Lycanthrope:** This **Monster** is **Resistant** to non-magical, non-silvered weapon damage. **Holy** damage ignores this **Resistance**.
- **Skitter:** After making an attack, they use **Shift 2"** toward the nearest **Cover Terrain**, avoiding hazards.
- **Keen Senses (9").**

Spectre [Controller]

Grief and rage with the body burned away, a spectre drifts the Ashlands trailing the manner of its death. It passes through wall and armour alike, and its touch drinks the warmth and the years out of the living. Steel finds nothing to bite; only silver and magic answer. The ruined city is thick with them, each one a question that was never answered.

HP	AV	SPD	LVL	CV	Sz
18	0	4"	3	8c	M

Attacks

- **Draining Touch:** 1d8 necrotic damage. When this attack damages a target, that target's Max HP is reduced by the damage dealt until the end of the adventure.

Special Abilities

- **Fly (8").**
- **Incorporeal:** This **Monster** is **Resistant** to non-magical weapon damage and can move through other models and terrain. They cannot end their movement inside terrain or another model.
- **Undead: Immune** to **Poisoned [dX]**, **Bleeding**, **Frightened**, and **Sleeping**.
- **Immune:** poison.
- **Vulnerable:** holy.
- **Darkvision (9").**

Undead Sentinel [Soldier]

They guarded the empire's gates in life and they guard the rubble of them in death, towering dead men in tower-shield and reach-halberd. A sentinel plants itself in a breach and will not be shifted, lending its iron stillness to the lesser dead around it. It does not pursue. It only holds, forever, a line that fell centuries ago.

HP	AV	SPD	LVL	CV	Sz
27	2	4"	4	11c	M

AI Steps

- **Hold the Wall (AI Step 1):** If an allied Undead is within **3"**, skip movement and attack the nearest enemy in **Reach**. Otherwise, advance on the nearest visible enemy and attack.

Attacks

- **Tower Halberd: Reach**, 1d10 + 2 slashing damage.

Special Abilities

- **Undead: Immune** to **Poisoned [dX]**, **Bleeding**, **Frightened**, and **Sleeping**.
- **Stalwart:** This **Monster** ignores **Critical Hit** effects from melee attackers.
- **Guardian Stance:** While this Monster has not moved during their activation, allied Undead within **3"** gain **+1 AV**.
- **Immune:** poison.
- **Darkvision (9").**

Undead Champion [Soldier]

Raised from the largest corpses the Ashlands could muster, the undead champion is a slab of dead muscle swinging a maul of fused bone. Each blow lands with siege-engine weight and rattles whatever stands beside the thing it struck. It is slow, single-minded, and almost impossible to put off its feet. Where it walks, the lesser dead come on in its wake.

HP	AV	SPD	LVL	CV	Sz
27	2	4"	4	11c	M

Attacks

- **Great-Axe:** 1d12 slashing damage.

Special Abilities

- **Undead: Immune** to **Poisoned [dX]**, **Bleeding**, **Frightened**, and **Sleeping**.
- **Sweeping Blow:** On a **Critical Hit**, the nearest other combatant adjacent to this Monster suffers **1d6 blunt damage**.
- **Heavy: Immune** to forced movement.
- **Immune:** poison.
- **Darkvision (9").**

Gargoyle [Skirmisher]

By daylight a gargoyle is nothing but one more of the empire's stone guardians, perched and patient on a broken cornice. Let prey stray beneath, and the stone splits into claws and a biting maw. Its hide turns aside all but the heaviest blow. The Ashlands bristle with statues, and not every statue is one.

HP	AV	SPD	LVL	CV	Sz
29	2	5"	5	16c	M

AI Steps

- **Dive (AI Step 1):** Uses their **Fly** Speed to reach the nearest visible enemy not already **Engaged** with an ally, then attacks.

Attacks

- **Multi-Attack:** Makes one **Claws** attack and one **Bite** attack during their attack step.
- **Claws:** 1d8 slashing damage.
- **Bite:** 1d8 piercing damage.

Special Abilities

- **Fly (8").**
- **Still Form:** While **Resting**, treat this Monster as scenery until they attack, suffer damage, or an enemy ends an activation within **3"** of them with **LOS** to them. See **9.6**.
- **Immune:** poison, Bleeding, Sleeping.

Stone Sentinel [Brute]

A faceless construct of the old empire, the stone sentinel grinds forward on legs of carved granite and pounds with fists like falling masonry. It feels nothing and fears nothing, and it stops only when it is shattered. The empire raised thousands to guard halls that no longer stand. They guard them still.

HP	AV	SPD	LVL	CV	Sz
34	2	4"	5	20c	M

AI Steps

- **Guard Post (AI Step 1):** Move to remain within **3"** of the nearest allied Monster and attack the nearest enemy in **Reach**. If no ally is on the battlefield, advance on the nearest visible enemy.

Attacks

- **Multi-Attack:** Makes two **Giant Stone Sword** attacks during their attack step.
- **Giant Stone Sword: Reach**, 1d6 + 3 blunt damage.

Special Abilities

- **Construct: Immune** to **Poisoned [dX]**, **Bleeding**, **Frightened**, **Weakened**, and **Sleeping**.
- **Unyielding Form:** This **Monster** cannot be pushed, pulled, knocked **Prone**, or transformed unless a rule explicitly says it affects Constructs, Siege Monsters, or **Monsters** with this ability.
- **Tireless:** Cannot be made **Slowed** or **Stunned**.
- **Immune:** poison, psychic.
- **Earth Glide.**
- **Siege Monster.**

Minotaur [Elite]

Bull-headed and giant, the minotaur stalks the Ashlands' labyrinthine ruins and never once loses its way among the fallen streets. It charges head-down to gore and trample, then wades in with a greataxe. Its senses cut clean through smoke and shadow, so no ambush takes it in its own maze. Old maps mark its haunts with a single horned skull.

HP	AV	SPD	LVL	CV	Sz
43	3	7"	6	36c	L

AI Steps

- **Gore Rush (AI Step 1, on d6 4+):** Moves their full Speed in a straight line toward the nearest visible enemy; if they end **Engaged**, they make a free **Goring Horns** attack that, on damage, forces a **STR Check** or the target is **Pushed 2"** and becomes **Prone**. This Monster then continues their activation normally.

Attacks

- **Greataxe:** 1d12 + 2 slashing damage.
- **Goring Horns:** 1d8 + 5 piercing damage.

Special Abilities

- **Charge:** If this **Monster** moves at least **4"** in a straight line toward an enemy and then attacks that enemy, the attack deals an additional **1d6 damage** of its primary damage type.
- **Labyrinthine Sense:** An attack made against this Monster by a **Hidden** combatant gains no **Hidden** benefit.
- **Immune:** Frightened.
- **Darkvision (9").**

Night Hag [Controller]

A withered crone of the between-places, the night hag slips into the waking world to feed on fear and curse the sleeping. Their claws leave a wound that festers, and when a fight turns against them they step half into the ether and are gone. They bargain, they lie, and they curse the young from the shadows. The Ashlands' long nights are their hunting ground.

HP	AV	SPD	LVL	CV	Sz
35	2	6"	6	29c	M

AI Steps

- **Nightmare Curse (AI Step 1):** If not **Engaged**, the visible enemy nearest to this Monster within **12"** must pass a **SPI Check** or become **Cursed**. A **Sleeping** target makes this Check with **Disadvantage.** This Monster then continues their activation normally.
- **Ethereal Step (AI Step 2, on d6 5+):** If this Monster is at or below half their **Max HP**, they become **Incorporeal** until the end of the round and move their full Speed toward the nearest battlefield edge. This Monster then ends their activation.

Attacks

- **Cursed Claws:** 1d10 + 2 slashing damage. When this attack damages a target, that target becomes **Cursed**.

Special Abilities

- **Resistant:** arcane.

Forsaken Archer [Cannon]

The Forsaken were the empire's finest, sworn to an oath that outlived the flesh that swore it. A forsaken archer draws a cursed longbow with a dead marksman's precision, and its arrows leave a clinging curse where they strike. Smoke and shadow do not trouble its aim. It serves Captain Veyr still, exactly as it once swore it would.

HP	AV	SPD	LVL	CV	Sz
26	1	5"	6	27c	M

AI Steps

- **Mark the Cursed (AI Step 1):** Makes their **Cursed Longbow** attack against the nearest visible **Cursed** enemy within range, or the nearest visible enemy if none are **Cursed**.

Attacks

- **Cursed Longbow: Ranged 20"**, 3d10 piercing damage. When this attack damages a target, that target becomes **Cursed**.

Special Abilities

- **Undead: Immune** to **Poisoned [dX]**, **Bleeding**, **Frightened**, and **Sleeping**.
- **Deadeye:** This Monster ignores **Cover** provided by **Cover Terrain**, **Darkness**, or another area that provides **Cover**.
- **Hateful Volley:** Against a **Cursed** target, this attack's base damage dice are rolled with **Advantage**.
- **Darkvision (9").**

Forsaken Knight [Soldier]

Dead chivalry in spectral plate, the forsaken knight advances through the ash with a flamberge wreathed in grave-light. It parries with a lifetime's drill written into bone and cannot be slowed or turned aside. Bound by an oath it can no longer recall, it follows Veyr's banner into every fight. Its honour has curdled into compulsion.

HP	AV	SPD	LVL	CV	Sz
38	3	5"	6	26c	M

Attacks

- **Flamberge:** 1d12 + 3 slashing damage.

Special Abilities

- **Undead: Immune** to **Poisoned [dX]**, **Bleeding**, **Frightened**, and **Sleeping**.
- **Stalwart:** This **Monster** ignores **Critical Hit** effects from melee attackers.
- **Doomed Advance:** Ignores **Difficult Terrain** and cannot be made **Slowed**.
- **Darkvision (9").**

Forsaken Duelist [Skirmisher]

Faster than a dead thing has any right to be, the forsaken duelist fights with a single flashing rapier and a fencer's lethal economy. It waits for a blade to commit, slips the strike, and answers through the opening. In life it was the empire's finest fencer; in death it is the same, only tireless. Veyr keeps the duelists close, for they punish every misjudged swing.

HP	AV	SPD	LVL	CV	Sz
40	2	6"	7	36c	M

AI Steps

- **Duelist's Thrust (AI Step 1):** If this Monster starts their activation **Engaged** with an enemy, they attack that enemy with **Rapier** for 1d8 + 4 piercing damage.

Attacks

- **Multi-Attack:** Makes two **Rapier** attacks during their attack step.
- **Rapier:** 1d8 slashing damage.

Special Abilities

- **Undead: Immune** to **Poisoned [dX]**, **Bleeding**, **Frightened**, and **Sleeping**.
- **Evasive:** Melee attacks against this Monster roll their base damage dice with **Disadvantage**.
- **Counterthrust:** When an enemy's melee attack against this Monster is a **Total Miss**, they make an immediate **Rapier** attack against that enemy for 1d8 + 4 piercing damage.
- **Darkvision (9").**

Basilisk [Elite]

Heavy and eight-legged and the size of an ox, the basilisk drags itself through the Ashlands' rubble behind a gaze that turns flesh slowly to stone. Meet its eyes and the stiffening starts, the limbs first, then the rest. Even its blood petrifies whatever it touches. The ruins are dotted with its leavings, statues of the surprised, caught mid-stride.

HP	AV	SPD	LVL	CV	Sz
48	2	4"	7	45c	M

AI Steps

- **Petrifying Gaze (AI Step 1):** The visible enemy nearest to this Monster within **6"** must pass a **SPI Check**. On a failure, the target becomes **Immobilized** until the end of their next activation. On a **Critical Failure**, the target instead becomes **Stunned**, gains **+4 AV**, and is immune to forced movement until the end of their next activation. This Monster then continues their activation normally.

Attacks

- **Bite:** 1d12 + 4 piercing damage.

Special Abilities

- **Petrifying Blood:** A combatant that deals melee damage to this Monster must pass a **STR Check** or become **Slowed** until the end of the round.
- **Resistant:** poison.
- **Immune:** Frightened.
- **Tremorsense (9").**

Ashen Revenant [Elite]

An ashen revenant is a corpse-warrior in fire-blackened plate, risen with one purpose welded into its bones: to kill the thing that killed it. It hunts that grudge across the Ashlands with tireless focus, and struck down it claws upright again to land a final blow. Cross its path and you become the grudge. It does not stop until you do.

HP	AV	SPD	LVL	CV	Sz
60	4	6"	8	61c	M

AI Steps

- **Relentless Hunter (AI Step 1):** Moves toward and attacks the enemy that most recently damaged them, if a legal path and target exist; otherwise they target the nearest visible enemy.

Attacks

- **Grave Cleaver:** 1d12 + 6 slashing damage.

Special Abilities

- **Undead: Immune** to **Poisoned [dX]**, **Bleeding**, **Frightened**, and **Sleeping**.
- **Vengeful Rise:** The first time this Monster is reduced to 0 HP, they instead remain at **1 HP** and immediately make one free **Grave Cleaver** attack.
- **Immune:** poison, Silenced.
- **Vulnerable:** holy.
- **Resistant:** fire.
- **Darkvision (9").**

Iron Golem [Brute]

The empire's master-smiths forged iron golems to outlast the dynasty, and in that one task they grimly succeeded. A towering automaton of riveted black iron, it shrugs off blade and spell alike and answers with piledriver fists. Magic washes from its plates; edged steel skids away. It guards a throne whose claimant is centuries of dust.

HP	AV	SPD	LVL	CV	Sz
71	4	4"	9	74c	L

Attacks

- **Multi-Attack:** Makes two **Iron Slam** attacks during their attack step.
- **Iron Slam:** 1d10 blunt damage.

Special Abilities

- **Construct: Immune** to **Poisoned [dX]**, **Bleeding**, **Frightened**, **Weakened**, and **Sleeping**.
- **Unyielding Form:** This **Monster** cannot be pushed, pulled, knocked **Prone**, or transformed unless a rule explicitly says it affects Constructs, Siege Monsters, or **Monsters** with this ability.
- **Immutable: Resistant:** slashing and piercing damage.
- **Tireless:** Cannot be made **Slowed** or **Stunned**.
- **Immune:** poison, psychic.
- **Siege Monster.**

Lich [Elite]

A lich is an archmage who refused death and paid for the refusal in everything that made them human. A desiccated sorcerer-king in mouldering finery, they command the Ashlands' dead with a gesture and loose blasts of soul-rending necrosis. Destroy the body and they re-form, so long as the hidden phylactery endures. The empire fell. Its worst survivor did not.

HP	AV	SPD	LVL	CV	Sz
73	4	5"	10	106c	M

AI Steps

- **Soul Blast (AI Step 1, on d6 5+):** Place an **Aura 4"** area with its origin on a point within **18"** and **LOS**, using the normal Monster area-placement priorities. Each affected combatant must pass a **SPI Check** or suffer **5d8 necrotic damage** (half on a success). This Monster then ends their activation.
- **Grave Bolt (AI Step 2):** If **Soul Blast** did not occur, the visible enemy nearest to this Monster within **18"** suffers **3d8 + 4 necrotic damage**. This Monster then ends their activation.

Attacks

- **Withering Touch: Reach**, 1d10 + 4 necrotic damage. When this attack damages a target, roll **1d6**; on a **6**, that target becomes **Cursed**.

Special Abilities

- **Fly (6").**
- **Undead: Immune** to **Poisoned [dX]**, **Bleeding**, **Frightened**, and **Sleeping**.
- **Resistant:** arcane, necrotic, ice.
- **Vulnerable:** holy.
- **Darkvision (9").**

Undermarches Bestiary

Kobold [Minion]

Knee-high reptilian scavengers with dull scales and dingy picks, kobolds are the Undermarches' scuttling vermin-folk. One alone is nothing; a chittering mob of them, dragging traps and loosing slings from the dark, is a real danger. They know every tunnel and trust not one. Where a single kobold shows itself, a whole warren is watching.

HP	AV	SPD	LVL	CV	Sz
6	0	6"	1	1c	S

Attacks

- **Mining Pick:** 1d4 piercing damage.
- **Sling: Ranged 6"**, 1d4 + 1 blunt damage.

Special Abilities

- **Small.**
- **Pack Tactics:** This Monster's attacks roll their base damage dice with **Advantage** while at least one other allied combatant is within the attack's melee distance of the target.
- **Darkvision (9").**
- **Nimble:** After making an attack, they use **Shift 1"** toward the nearest **Cover Terrain**, avoiding hazards.

Cave Goblin [Minion]

Paler and blinder than their forest cousins, cave goblins have gone so long without sun that their eyes are wide black pools. They jab with jagged spears and bolt at the first hint of a losing fight. They infest the upper deep in nervous packs. A cave goblin's first instinct is to flee toward more cave goblins.

HP	AV	SPD	LVL	CV	Sz
6	0	6"	1	1c	S

Attacks

- **Jagged Spear:** 1d6 piercing damage.

Special Abilities

- **Small.**
- **Darkvision (9").**
- **Nimble:** After making an attack, they use **Shift 1"** toward the nearest **Cover Terrain**, avoiding hazards.
- **Light Aversion.**

Giant Bat [Minion]

Leathery-winged and wider than a man is tall, the giant bat navigates the lightless depths by shrieks no living ear can catch. It harries intruders in swooping passes, biting and wheeling away before the answer lands. Torchlight only draws more of them. Whole colonies hang in the upper caverns, and they wake all at once.

HP	AV	SPD	LVL	CV	Sz
6	0	4"	1	1c	L

Attacks

- **Bite:** 1d6 piercing damage.

Special Abilities

- **Beast.**
- **Fly (8").**
- **Echolocation (9").** Functions as **Blindsight (9")** but is lost while this **Monster** is **Silenced** or unable to make sound.

Vaultfang [Cannon]

A vaultfang clings to the cavern roof as a flawless imitation of a stalactite, a mottled cone of stone-hard chitin, and it waits. When something passes beneath, it drops, driving its single barbed point clean through helm and skull. It is a living spear that falls exactly once. Few who survive a low ceiling here ever walk easy under one again.

HP	AV	SPD	LVL	CV	Sz
7	0	1"	1	3c	M

AI Steps

- **Plummet (AI Step 1):** If an enemy is directly below this Monster, they make a **Drop** attack and are then removed from play. Otherwise, they do not activate.

Attacks

- **Drop:** 2d6 + 3 piercing damage. This attack may only target a combatant directly below this Monster.

Special Abilities

- **Climb (1").**
- **Ceiling Ambush:** Represent this Monster with an overhead marker centred on a legal ground position. The marker does not occupy space or block movement. Use its ground position for distance, **LOS**, Areas of Effect, and targeting. A combatant is directly below this Monster when the combatant's space overlaps that marker: their spaces overlap in **Tabletop Mode**, or they occupy at least one of the same squares in **Grid Mode**.
- **Still Form:** While **Resting**, treat this Monster as scenery until they attack, suffer damage, or an enemy ends an activation within **3"** of them with **LOS** to them. See **9.6**.

Giant Centipede [Skirmisher]

Many-segmented and as long as a spear, the giant centipede pours over cave walls on a hundred legs, mandibles dripping a venom that locks the muscles solid. It hunts by vibration in the lightless dark. A bite swells black within minutes. Its shed husks carpet the floors of the oldest tunnels.

HP	AV	SPD	LVL	CV	Sz
15	1	7"	2	3c	S

Attacks

- **Venomous Bite:** 1d6 + 3 piercing damage.

Special Abilities

- **Small.**
- **Beast.**
- **Climb (7").**
- **Venom:** When this Monster's melee attack damages a target, that target must pass a **STR Check** or become **Poisoned [d4]**.
- **Tremorsense (9").**

Noxcloth [Controller]

The noxcloth hangs from the cavern roof like a fold of black leather the size of a flung cloak, no different from shadow until it drops to smother. It wraps a victim's head and crushes, blind itself but needing no eyes in the dark it brings with it. With a gout of unnatural gloom it can snuff a torch outright. Of all the things that wait on the deep's ceilings, it is the one to fear most.

HP	AV	SPD	LVL	CV	Sz
15	1	3"	2	4c	L

AI Steps

- **Smother (AI Step 1, on d6 4+):** This Monster moves their full Speed toward the nearest visible enemy and makes a **Crush** attack; if that attack damages their target, the target is **Blinded** until the end of the round. This Monster then ends their activation.

Attacks

- **Crush:** 1d6 + 1 blunt damage.

Special Abilities

- **Fly (6").**
- **Blindsight (9").**

Troglodyte [Soldier]

Grey, crested, and degenerate, troglodytes are reptilian cave-dwellers whose skin shifts colour to vanish against bare stone. They reek so violently that the stench alone sickens the unready. They hunt in clutches, claws first, fading in and out of the rock. Their territory announces itself by smell long before anything is seen.

HP	AV	SPD	LVL	CV	Sz
16	1	6"	2	3c	M

AI Steps

- **Lurk (AI Step 1):** If this Monster is not **Hidden** and meets the conditions to become **Hidden** by taking **Hide** in **4.3.2**, they become **Hidden**, then continue their activation normally.

Attacks

- **Multi-Attack:** Makes two **Claw** attacks during their attack step.
- **Claw:** 1d6 + 1 slashing damage.

Special Abilities

- **Stench (Aura 1"):** An enemy that starts their activation within the Aura must pass a **STR Check** or become **Poisoned [d4]**.
- **Resistant:** poison.
- **Light Aversion.**
- **Darkvision (9").**

Giant Black Widow [Controller]

Glossy-black and the size of a war-hound, the giant black widow squats in a cathedral of its own webbing, the telltale crimson mark on its swollen back. It flings strands to snare prey from across a chamber, then closes to deliver a venom that stops the heart cold. They are the Broodmother's lesser daughters, and they spin the most lethal traps below.

HP	AV	SPD	LVL	CV	Sz
19	1	7"	3	8c	S

AI Steps

- **Web (AI Step 1, on d6 4+):** The visible enemy nearest to this Monster within **8"** must pass a **DEX Check** or become **Immobilized**. This Monster then continues their activation normally.

Attacks

- **Bite:** 1d8 + 1 piercing damage.

Special Abilities

- **Small.**
- **Beast.**
- **Climb (7").**
- **Lethal Venom:** When **Bite** damages a target, that target must pass a **STR Check** or become **Poisoned [d6]**.
- **Resistant:** poison.
- **Tremorsense (9").**

Gloomspore Jelly [Brute]

A translucent grey ooze the size of a cart, the gloomspore jelly creeps over every surface and dissolves whatever it engulfs. Slashing only splits it, and it feels neither pain nor fear. Destroyed at last, it bursts in a cloud of soporific spores. It leaves the tunnels behind it scoured clean and faintly glistening.

HP	AV	SPD	LVL	CV	Sz
26	2	3"	3	8c	M

Attacks

- **Pseudopod:** 1d6 + 3 acid damage.

Special Abilities

- **Climb (3").**
- **Ooze: Immune** to **Poisoned [dX]**, **Bleeding**, and **Frightened**; ignores **Difficult Terrain**.
- **Spore Burst:** When reduced to 0 HP, each combatant within **2"** must pass a **STR Check** or become **Sleeping**.
- **Immune:** poison, Bleeding, Sleeping, psychic.
- **Vulnerable:** fire.
- **Acid Blood (1d4).**
- **Blindsight (9").**

Troglodyte Shaman [Controller]

The troglodyte shaman daubs itself in glowing fungus and mutters to things that dwell below even the deep. It calls up reeking clouds and spiteful hexes to soften prey for the clutch. Its magic is primitive but real, and older than any empire that ever named it. The other troglodytes give way before it, and so should anything wise.

HP	AV	SPD	LVL	CV	Sz
19	1	6"	3	8c	M

AI Steps

- **Debilitating Hex (AI Step 1):** If not **Engaged**, the visible enemy nearest to this Monster within **8"** suffers the **Hex Bolt** attack; if damaged, that target also has **Disadvantage** on their next attack's damage roll. This Monster then ends their activation.

Attacks

- **Bone Club:** 1d6 + 2 blunt damage.
- **Hex Bolt: Ranged 8"**, 1d8 + 1 poison damage.

Special Abilities

- **Darkvision (9").**
- **Light Aversion.**

Vault Ooze [Brute]

Near-invisible and wall to wall, a vault ooze is a cube of acidic slime that fills a corridor and sweeps it clean of everything that ever breathed. The unwary walk straight in and are engulfed, dissolving while still aware of it. It moves in eerie silence, betrayed only by a faint shimmer. The neatest tombs in the deep were swept out by these.

HP	AV	SPD	LVL	CV	Sz
33	2	3"	4	12c	M

AI Steps

- **Creep and Engulf (AI Step 1):** Moves their full Speed toward the nearest visible enemy that is not already swallowed, then makes their **Pseudopod** attack.

Attacks

- **Pseudopod:** 1d8 + 2 acid damage.

Special Abilities

- **Ooze: Immune** to **Poisoned [dX]**, **Bleeding**, and **Frightened**; ignores **Difficult Terrain**.
- **Engulf:** When **Pseudopod** damages a target, that target must pass a **DEX Check** or be swallowed using the **Swallow Whole** rules, suffering **1d6 acid damage** at the end of each round until they escape. This Monster may hold only one swallowed target at a time.
- **Transparent:** This Monster begins **Hidden** and does not lose **Hidden** because they lack **Cover** or an enemy is nearby. They lose **Hidden** when they attack, suffer damage, or are revealed by **Spot**.
- **Immune:** poison, Bleeding, Sleeping, psychic.
- **Acid Blood (1d4).**
- **Blindsight (9").**

Vrymk [Skirmisher]

A writhing tangle of stone-grey tentacles around a cruel hooked beak, no broader than a crouching man, the vrymk clings to cavern walls until prey wanders close. Camouflaged against the rock, it lashes out with rubbery arms and hauls the catch to its maw. It hunts by patience and ambush rather than speed. Anyone who hears a wet, slithering rasp from a bare wall has already been seen.

HP	AV	SPD	LVL	CV	Sz
25	1	6"	4	11c	M

AI Steps

- **Lurk (AI Step 1):** If this Monster is not **Hidden** and meets the conditions to become **Hidden** by taking **Hide** in **4.3.2**, they become **Hidden**, then continue their activation normally.
- **Ambush from Stone (AI Step 2):** If this Monster is **Hidden**, they move to the nearest visible enemy and their attacks this activation roll their base damage dice with **Advantage**, then they make their attacks.

Attacks

- **Multi-Attack:** Makes one **Tentacles** attack and one **Beak** attack during their attack step.
- **Tentacles:** 1d6 + 1 blunt damage.
- **Beak:** 1d4 + 1 piercing damage.

Special Abilities

- **Climb (6").**
- **Tremorsense (9").**
- **Light Aversion.**

Deep Elf Warrior [Skirmisher]

The deep elves quit the surface ages before the Fall and have curdled, in the dark, into something coldly beautiful and merciless. A deep elf warrior fights with poisoned hand-crossbow and finesse blade, seeing perfectly in a lightlessness that blinds everything else. They raid the upper deep for slaves and for sport. Mercy was a surface weakness they bred out long ago.

HP	AV	SPD	LVL	CV	Sz
30	2	6"	5	16c	M

Attacks

- **Shortsword:** 1d8 + 4 piercing damage.
- **Hand Crossbow: Ranged 8"**, 1d6 + 3 piercing damage. When this attack damages a target, that target must pass a **STR Check** or become **Poisoned [d4]**.

Special Abilities

- **Superior Darkvision (9").**
- **Evasive:** Melee attacks against this Monster roll their base damage dice with **Disadvantage**.

Deep Elf Priest [Controller]

Robed in black silk and bone fetishes, a deep elf priest serves the spider-gods of the deep. It wreathes its enemies in conjured darkness and bends their wills with a single spoken command. From the shadow it has made, scourge in hand, it drives the warriors forward. Its faith is cruelty refined into ritual.

HP	AV	SPD	LVL	CV	Sz
35	2	6"	6	29c	M

AI Steps

- **Umbral Veil (AI Step 1, on d6 4+):** Place an **Aura 3"** area of magical **Darkness** with its origin on a visible point within **10"**, using the normal Monster area-placement priorities. The area blocks **LOS** until the end of the round. This Monster then continues their activation normally.
- **Compelling Word (AI Step 2):** If **Engaged**, the **Engaged** enemy with the highest **Max HP** must pass a **SPI Check** or immediately **Shift 3"** directly away and cannot move closer to this Monster before the end of the round. This Monster then ends their activation.

Attacks

- **Scourge: Reach**, 1d8 + 3 slashing damage.

Special Abilities

- **Superior Darkvision (9").**

Gloom Hulk [Brute]

Beetle-backed and the size of a bull, the gloom hulk is a digger armed with great scything claws and four eyes that scramble the mind of anything that meets them. It burrows through solid rock to erupt beneath its prey. Its gaze leaves victims reeling and helpless where they stand. More than one collapsed gallery in the deep is its doing.

HP	AV	SPD	LVL	CV	Sz
52	4	5"	7	42c	L

AI Steps

- **Disorienting Gaze (AI Step 1):** Each enemy within **6"** and **LOS** of this Monster must pass an **INT Check** or become **Stunned**. This Monster then continues their activation normally.

Attacks

- **Multi-Attack:** Makes one **Mandibles** attack and two **Claws** attacks during their attack step.
- **Mandibles:** 1d10 piercing damage.
- **Claws:** 1d8 slashing damage.

Special Abilities

- **Burrow (3").**

Cryptstrangler [Controller]

A cryptstrangler passes for a stalagmite taller than a man until its strands uncoil, a stony predator that flings sticky tendrils across a chamber, reels in the catch, and bites it through. It can sit motionless for years between meals. The tendrils come from angles no one expects, faster than anything that still should move. Not every silent column down here is only stone.

HP	AV	SPD	LVL	CV	Sz
40	2	2"	7	40c	L

Attacks

- **Multi-Attack:** Makes two **Reeling Tendril** attacks and one **Bite** attack during their attack step.
- **Reeling Tendril: Ranged 8"**, 1d6 blunt damage. When this attack damages a target, that target must pass a **DEX Check** or be **Pulled 4"** toward this Monster and become **Immobilized**.
- **Bite:** 1d10 piercing damage.

Special Abilities

- **Climb (2").**
- **Still Form:** While **Resting**, treat this Monster as scenery until they attack, suffer damage, or an enemy ends an activation within **3"** of them with **LOS** to them. See **9.6**.
- **Reel and Devour:** Against an **Immobilized** target, this Monster's **Bite** rolls its base damage die with **Advantage**.

Elder Vrymk [Elite]

Where lesser vrymk lurk as ambushers, the eldest of a brood swells to monstrous size. It is a knot of stone-grey tentacles thick as a man's leg, gathered around a beak that shears clean through plate. It no longer hunts alone; the smaller kin gather to its silent direction and drag prey within its reach. A tunnel scoured of every other living thing is its larder.

HP	AV	SPD	LVL	CV	Sz
60	4	6"	8	61c	L

AI Steps

- **Direct the Brood (AI Step 1):** If an allied Vrymk or Vaultfang is on the battlefield, this Monster moves to the nearest legal position they can reach that places them within **6"** of the greatest number of those allies, then makes their attacks against the nearest enemy in **Reach**, if able. If no such ally is on the battlefield, this step is invalid.

Attacks

- **Multi-Attack:** Makes two **Crushing Tentacles** attacks and one **Rending Beak** attack during their attack step.
- **Crushing Tentacles:** 1d8 blunt damage. When this attack damages a target, that target must pass a **STR Check** or be **Pulled 2"** toward this Monster.
- **Rending Beak:** 1d10 piercing damage.

Special Abilities

- **Climb (6").**
- **Cave Tyrant:** Allied Vrymk and Vaultfang within **6"** of this Monster roll their base damage dice with **Advantage**.
- **Tremorsense (9").**
- **Immune:** Frightened.
- **Light Aversion.**

Evil Eye [Elite]

A floating orb of leathery flesh ruled by one great central eye and crowned with writhing eyestalks, the evil eye spits a different doom from each lesser eye. It drifts the deep wrapped in an aura that unmakes magic outright. No two of its glares do the same thing twice. It regards every other living thing as a competitor to be erased.

HP	AV	SPD	LVL	CV	Sz
64	3	4"	8	59c	L

AI Steps

- **Eye Rays (AI Step 1):** The visible enemy nearest to this Monster within **10"** is struck by a ray determined by **1d4**. **1:** Pass a **SPI Check** or become **Immobilized**. **2:** Pass a **SPI Check** or become **Frightened**. **3:** Suffer **3d8 arcane damage**; a **DEX Check** halves it. **4:** Pass a **STR Check** or be **Pushed 4"** directly away and become **Prone**. This Monster then continues their activation normally.

Attacks

- **Bite:** 1d10 + 2 piercing damage.

Special Abilities

- **Fly (4").**
- **Antimagic Cone:** At the start of this Monster's activation, if they have a visible enemy, they project a **Cone 10"** using the straight line from this Monster to the nearest visible enemy as its centreline. The cone remains fixed in that position until the end of the round; it does not move with this Monster. Until the end of the round, a Power or scroll effect cannot be declared by a caster within the cone, cannot choose a target, area origin, or point within the cone, and cannot be declared if the sight line from its caster to its target, area origin, or point crosses the cone. Resolve the cone's area using **2.7.3**.
- **Immune:** Frightened, Silenced.
- **Resistant:** arcane.
- **Blindsight (9").**

Burrowmaw [Brute]

An armour-plated horror the size of a wagon, the burrowmaw has a blunt head and a maw that splits its whole face open. It swims through solid stone and erupts beneath its prey in a shower of rubble. It senses footfalls through the rock and leaps the last span with its jaws spread wide. The stone trembles faintly before it surfaces, and that is the only warning anyone gets.

71	4	7"	9	74c	L

AI Steps

- **Surface Ambush (AI Step 1, on d6 4+):** Moves their full Speed, using **Burrow** if able, to end **Engaged** with the nearest visible enemy and makes a **Bite** that deals an additional **1d12 piercing damage**; the target must pass a **STR Check** or become **Prone**. This Monster then ends their activation.

Attacks

- **Bite:** 1d12 + 4 piercing damage.

Special Abilities

- **Burrow (7").**
- **Tremorsense (9").**

Thought-Eater [Elite]

A robed, four-tentacled humanoid with an octopus's head, the thought-eater wears grey, slick skin and white, pupilless eyes. It feeds on living minds, and a single psychic blast drops a whole party to their knees. It can seize a victim's will and turn them on their own friends. It schemes in the dark beneath the dark, and to meet one is to feel it already reading you.

HP	AV	SPD	LVL	CV	Sz
73	4	6"	10	106c	M

AI Steps

- **Mind Blast (AI Step 1, on d6 5+):** Place a **Cone 8"** from this Monster to cover the most enemy combatants possible. Each affected enemy must pass an **INT Check** or suffer **3d6 psychic damage** and become **Stunned**. This Monster then ends their activation.
- **Dominate (AI Step 2):** If **Mind Blast** did not occur, the nearest visible enemy within **12"** that is not **Engaged** with this Monster must pass a **SPI Check**. On a failure, that combatant replaces their next activation by moving up to their Speed toward their nearest ally by the shortest legal route, then making one legal melee attack against that ally if able. Determine randomly among multiple legal melee attacks. That activation then ends. This Monster ends their current activation.

Attacks

- **Multi-Attack:** Makes two **Tentacles** attacks during their attack step against the nearest visible enemy.
- **Tentacles:** 1d8 psychic damage. When this attack damages a target, that target must pass an **INT Check** or become **Sleeping**.

Special Abilities

- **Immune:** Frightened, Silenced.
- **Resistant:** psychic.
- **Blindsight (9").**

Pale City Bestiary

Frozen Skeleton [Minion]

Rimed in blue frost, a sword welded to its hand by ice, a frozen skeleton is one of the Pale City's countless dead, still standing the post it was given. It guards avenues that have not seen a living census in centuries. The cold preserves it whole; it will hold that post when the last warm thing in the world goes out. There are always more under the snow.

HP	AV	SPD	LVL	CV	Sz
6	0	5"	1	1c	M

Attacks

- **Ice-Rimed Sword:** 1d6 slashing damage.

Special Abilities

- **Undead: Immune** to **Poisoned [dX]**, **Bleeding**, **Frightened**, and **Sleeping**.
- **Ice Glide:** This **Monster** ignores **Slippery Terrain** and **Difficult Terrain** caused by ice, snow, or frost. They do not need to make **DEX Checks** to resist falling **Prone** on ice-based terrain.
- **Immune:** poison.
- **Vulnerable:** blunt.

Snow Goblin [Minion]

Gaunt and white-furred, snow goblins den in the Pale City's drifts and tunnels, ambushing out of the whiteout with frost-edged knives. They are invisible against the snow until the moment they move. Cowardly and quick, they strip the frozen dead and bolt from any honest fight. The blizzard hides both their approach and their retreat.

HP	AV	SPD	LVL	CV	Sz
6	0	6"	1	1c	S

AI Steps

- **Lurk (AI Step 1):** If this Monster is not **Hidden** and meets the conditions to become **Hidden** by taking **Hide** in **4.3.2**, they become **Hidden**, then continue their activation normally.

Attacks

- **Frost Knife:** 1d4 slashing damage.
- **Sling: Ranged 8"**, 1d4 + 1 blunt damage.

Special Abilities

- **Small.**
- **Resistant:** ice.
- **Darkvision (9").**

Ratkin Scavenger [Minion]

The ratkin are a verminous rat-folk that boiled up into the Pale City when the long winter first came down. The scavengers are their lowest caste, scrawny twitching things in matted grey fur, darting through the ruins to strip anything not frozen to the ground. They swarm, they scurry, and they rarely stand to fight. Where the scavengers pick, the warren is never far behind.

HP	AV	SPD	LVL	CV	Sz
6	0	6"	1	1c	S

Attacks

- **Rusty Knife:** 1d4 slashing damage.

Special Abilities

- **Small.**
- **Pack Tactics:** This Monster's attacks roll their base damage dice with **Advantage** while at least one other allied combatant is within the attack's melee distance of the target.
- **Scurry:** After making an attack, they use **Shift 2"** toward the nearest **Cover Terrain**, avoiding hazards.
- **Keen Senses (9").**

Tundra Wolf [Skirmisher]

White-coated and built for the killing cold, the tundra wolf pads across ice that would betray a heavier foot. It runs in packs that herd prey into the open, where the wind does half the killing. Its bite carries the chill of the Pale City itself. Travellers who hear no howling are in the gravest danger of all.

HP	AV	SPD	LVL	CV	Sz
15	1	8"	2	3c	M

Attacks

- **Bite:** 1d8 + 3 piercing damage.

Special Abilities

- **Beast.**
- **Pack Tactics:** This Monster's attacks roll their base damage dice with **Advantage** while at least one other allied combatant is within the attack's melee distance of the target.
- **Ice Glide:** This **Monster** ignores **Slippery Terrain** and **Difficult Terrain** caused by ice, snow, or frost. They do not need to make **DEX Checks** to resist falling **Prone** on ice-based terrain.
- **Keen Senses (9").**
- **Resistant:** ice.
- **Pounce.**

Ratkin Warrior [Soldier]

A hunched, spear-wielding rat-man in scavenged scraps of plate, the ratkin warrior fights shoulder to shoulder behind a bristling wall of points. Alone it falters; in a shield-rank it holds. The warren feeds them forward in chittering blocks. They die easily and breed faster than they die.

HP	AV	SPD	LVL	CV	Sz
16	1	6"	2	3c	S

Attacks

- **Notched Spear:** 1d6 + 3 piercing damage.

Special Abilities

- **Small.**
- **Pack Tactics:** This Monster's attacks roll their base damage dice with **Advantage** while at least one other allied combatant is within the attack's melee distance of the target.
- **Shield Wall:** While adjacent to an allied Ratkin, this Monster has **+1 AV**.

White Court Guard [Soldier]

The White Court is the Pale City's undead nobility, and the guard is its rank and file: a frost-armoured corpse bearing a reach-halberd, moving with the cold discipline of a court that never once adjourned. They lock shields across the frozen avenues and advance by the old drill. Death only made them more obedient.

HP	AV	SPD	LVL	CV	Sz
16	1	5"	2	3c	M

Attacks

- **Court Halberd: Reach**, 1d8 + 2 slashing damage.

Special Abilities

- **Undead: Immune** to **Poisoned [dX]**, **Bleeding**, **Frightened**, and **Sleeping**.
- **Ice Glide:** This **Monster** ignores **Slippery Terrain** and **Difficult Terrain** caused by ice, snow, or frost. They do not need to make **DEX Checks** to resist falling **Prone** on ice-based terrain.
- **Stalwart:** This **Monster** ignores **Critical Hit** effects from melee attackers.

Ratkin Seer [Controller]

Draped in icicle-charms and half-mad, the ratkin seer spits frost-hexes that sap the warmth and the will from its enemies. It hangs behind the warriors, croaking prophecy and curse in the same breath. Its magic is scavenged and unreliable, but a hex that lands at the wrong moment still kills. The warren treats its ravings as law.

HP	AV	SPD	LVL	CV	Sz
19	1	6"	3	8c	S

AI Steps

- **Plague Murmur (AI Step 1):** If not **Engaged**, the visible enemy nearest to this Monster within **10"** suffers the **Frost Hex** attack; if damaged, that target also becomes **Weakened** until the end of the round. This Monster then ends their activation.

Attacks

- **Bone Staff:** 1d6 + 1 blunt damage.
- **Frost Hex: Ranged 10"**, 1d8 + 1 ice damage.

Special Abilities

- **Small.**
- **Resistant:** arcane.

Frost Ghoul [Minion]

A ghoul frozen and reborn in the Pale City's cold, its claws sheathed in killing frost and its hunger undimmed, the frost ghoul hunts in packs through the snow-choked streets. It drags down the living to feed. The cold that should still it only whets its appetite. It does not slow, and it does not stop while anything warm remains.

HP	AV	SPD	LVL	CV	Sz
13	1	6"	3	4c	M

Attacks

- **Frozen Claws:** 1d6 + 1 slashing damage.
- **Bite:** 1d4 piercing damage.

Special Abilities

- **Undead: Immune** to **Poisoned [dX]**, **Bleeding**, **Frightened**, and **Sleeping**.
- **Pack Tactics:** This Monster's attacks roll their base damage dice with **Advantage** while at least one other allied combatant is within the attack's melee distance of the target.
- **Immune:** poison.
- **Keen Senses (9").**

White Court Archer [Cannon]

From the frozen balconies of the dead city, white court archers loose volleys of ice-fletched arrows, dead marksmen whose aim outlasted the flesh that learned it. They mass their fire on whatever the soldiers have pinned. The cold steadies their hands more surely than any living discipline could. Their quivers never empty.

HP	AV	SPD	LVL	CV	Sz
14	0	5"	3	6c	M

Attacks

- **Frostbow: Ranged 18"**, 1d10 + 5 piercing damage.

Special Abilities

- **Undead: Immune** to **Poisoned [dX]**, **Bleeding**, **Frightened**, and **Sleeping**.
- **Ice Glide:** This **Monster** ignores **Slippery Terrain** and **Difficult Terrain** caused by ice, snow, or frost. They do not need to make **DEX Checks** to resist falling **Prone** on ice-based terrain.
- **Focused Volley:** Against a target within **8"** that is **Engaged** by an allied White Court Monster, this attack's base damage die is rolled with **Advantage**.

Blackfire Hound [Skirmisher]

Cold black flame guttering along its spine, the blackfire hound is a charred beast-shape that leaves a trail of smouldering ash across the snow. Its bite burns with a fire no ordinary frost-ward will stop. They course in packs through the Pale City's ruins, herding prey onto their own burning trails. The snow hisses where they pass.

HP	AV	SPD	LVL	CV	Sz
25	1	8"	4	11c	M

Attacks

- **Black Flame Bite:** 1d8 + 4 piercing damage + 1d4 fire damage.

Special Abilities

- **Pack Tactics:** This Monster's attacks roll their base damage dice with **Advantage** while at least one other allied combatant is within the attack's melee distance of the target.
- **Unholy Flame:** This Monster's fire damage is not reduced by **Resistance** or **Immune:** fire.
- **Ember Trail:** When this Monster moves at least **4"** in a straight line, place a **1"-diameter** fire hazard centred on the last point they leave. In **Grid Mode**, mark the last square they leave instead. The hazard lasts until the end of the round; a combatant that enters it suffers **1d4 fire damage**.
- **Keen Senses (9").**
- **Resistant:** fire.

Ice Wraith [Cannon]

A knife of frozen malice given a drifting, translucent shape, the ice wraith is the spirit of someone who froze to death in the Pale City and never forgave it. Its touch saps warmth and thickens the blood to sludge. Steel passes clean through; only silver and magic bite. It haunts the coldest avenues, hungry for the heat of anything still living.

HP	AV	SPD	LVL	CV	Sz
18	1	4"	4	11c	M

Attacks

- **Frost Touch:** 3d8 ice damage. When this attack damages a target, that target must pass a **SPI Check** or become **Slowed**.

Special Abilities

- **Fly (8").**
- **Incorporeal:** This **Monster** is **Resistant** to non-magical weapon damage and can move through other models and terrain. They cannot end their movement inside terrain or another model.
- **Undead: Immune** to **Poisoned [dX]**, **Bleeding**, **Frightened**, and **Sleeping**.
- **Ice Glide:** This **Monster** ignores **Slippery Terrain** and **Difficult Terrain** caused by ice, snow, or frost. They do not need to make **DEX Checks** to resist falling **Prone** on ice-based terrain.
- **Immune:** ice, poison.
- **Darkvision (9").**

White Court Sentinel [Brute]

A greatshield-bearing corpse-knight, the white court sentinel is the dead nobility's bodyguard, planting itself before its lords and refusing to give ground. It lends its frozen resolve to the soldiers around it and weathers blows that would shatter a lesser guardian. It will not pursue and will not break. It only endures, as the court endures.

HP	AV	SPD	LVL	CV	Sz
31	2	4"	4	13c	M

AI Steps

- **Form the Line (AI Step 1):** If an allied White Court Monster is within **3"**, skip movement and attack the nearest enemy in **Reach**. Otherwise, advance on the nearest visible enemy and attack.

Attacks

- **Greatshield Bash:** 1d8 + 3 blunt damage.

Special Abilities

- **Undead: Immune** to **Poisoned [dX]**, **Bleeding**, **Frightened**, and **Sleeping**.
- **Ice Glide:** This **Monster** ignores **Slippery Terrain** and **Difficult Terrain** caused by ice, snow, or frost. They do not need to make **DEX Checks** to resist falling **Prone** on ice-based terrain.
- **Stalwart:** This **Monster** ignores **Critical Hit** effects from melee attackers.
- **Guardian Stance:** While this Monster has not moved during their activation, allied White Court Monsters within **3"** gain **+1 AV**.

Ice Elemental [Controller]

A lurching figure of living glacier, jagged and groaning, the ice elemental freezes the ground it crosses and the limbs it lands upon. Its slamming fists lock muscle solid in an instant. Fire is its bane; frost means nothing to it. The Pale City's deep cold breeds them where the ice grows thick enough to dream.

HP	AV	SPD	LVL	CV	Sz
29	2	5"	5	18c	L

Attacks

- **Multi-Attack:** Makes two **Ice Slam** attacks during their attack step.
- **Ice Slam:** 1d8 ice damage.

Special Abilities

- **Freezing Touch:** When **Ice Slam** damages a target, that target must pass a **STR Check** or become **Slowed**.
- **Ice Glide:** This **Monster** ignores **Slippery Terrain** and **Difficult Terrain** caused by ice, snow, or frost. They do not need to make **DEX Checks** to resist falling **Prone** on ice-based terrain.
- **Immune:** ice, poison, Bleeding, Sleeping.
- **Vulnerable:** fire.

Fallen Paladin [Elite]

Holy oath turned to grave-frost, the fallen paladin is an undead knight in defiled plate, radiating an aura that withers the courage of all who come near. Its flamberge carries a necrotic chill, and despair leaks off it the way cold leaks off ice. It guards the Pale City's blackest chapels. Whatever vow it broke in life, it keeps a darker one now.

HP	AV	SPD	LVL	CV	Sz
45	3	5"	6	36c	M

AI Steps

- **Oathbreaker's Charge (AI Step 1):** Moves their full Speed toward the nearest visible enemy, then attacks; the **Aura of Despair** affects every enemy they pass within **4"** of during this move.

Attacks

- **Defiled Flamberge:** 1d12 + 5 slashing damage + 1d6 necrotic damage.

Special Abilities

- **Undead: Immune** to **Poisoned [dX]**, **Bleeding**, **Frightened**, and **Sleeping**.
- **Stalwart:** This **Monster** ignores **Critical Hit** effects from melee attackers.
- **Aura of Despair:** An enemy that starts their activation within **4"** must pass a **SPI Check** or become **Weakened** until the end of the round.
- **Resistant:** necrotic, ice.
- **Vulnerable:** holy.
- **Darkvision (9").**

Werebear [Brute]

In the Pale City's frozen wilds prowls the werebear, a hulking man-beast of white fur and ruinous strength, damned kin to the werewolf but built to maul rather than skirmish. It strikes with both paws and a bone-cracking bite, and hurls grown men aside. Mundane weapons barely part its hide. A single one can break a war-band.

HP	AV	SPD	LVL	CV	Sz
40	3	6"	6	31c	L

Attacks

- **Multi-Attack:** Makes two **Claws** attacks and one **Bite** attack during their attack step.
- **Claws:** 1d10 slashing damage.
- **Bite:** 1d12 piercing damage. When this attack damages a target, **Push** that target **2"** directly away.

Special Abilities

- **Lycanthrope:** This **Monster** is **Resistant** to non-magical, non-silvered weapon damage. **Holy** damage ignores this **Resistance**.
- **Keen Senses (9").**

White Court Executioner [Elite]

The white court executioner carries out sentences the living court passed centuries ago, a towering headsman whose frost-rimed axe seeks the weakest throat on the field. It strides past the hale to reach the wounded and ends them with grim efficiency. The court's justice did not die with the court. It only grew patient.

HP	AV	SPD	LVL	CV	Sz
51	4	5"	7	48c	M

AI Steps

- **Sentence Carried (AI Step 1):** If a visible enemy has a legal route, this Monster moves toward and attacks the visible enemy with the lowest current HP. If no visible enemy has a legal route, this step is invalid.

Attacks

- **Headsman's Axe:** 1d12 + 6 slashing damage + 1d6 ice damage.

Special Abilities

- **Undead: Immune** to **Poisoned [dX]**, **Bleeding**, **Frightened**, and **Sleeping**.
- **Ice Glide:** This **Monster** ignores **Slippery Terrain** and **Difficult Terrain** caused by ice, snow, or frost. They do not need to make **DEX Checks** to resist falling **Prone** on ice-based terrain.
- **Execution:** Against a target at or below half their **Max HP**, this Monster's base damage dice are rolled with **Advantage**.
- **Resistant:** ice.
- **Vulnerable:** fire.

Frost Wyvern [Elite]

A lesser cousin of the great dragons, the frost wyvern is a winged reptile the colour of dirty ice, a venom-and-frost sting whipping at the end of its tail. It stoops from the white sky to harry and poison, then climbs out of reach before the answer comes. It is cunning rather than wise. The Pale City's frozen peaks are crowded with their roosts.

HP	AV	SPD	LVL	CV	Sz
60	4	4"	8	61c	L

AI Steps

- **Stoop (AI Step 1):** Uses their **Fly** Speed to reach the nearest visible enemy not already **Engaged** with an ally, then makes their attacks.

Attacks

- **Multi-Attack:** Makes one **Bite** attack and one **Tail Stinger** attack during their attack step.
- **Bite:** 1d10 + 1 piercing damage.
- **Tail Stinger:** 1d8 + 1 piercing damage + 1d6 ice damage.

Special Abilities

- **Fly (12").**
- **Venom:** When this Monster's melee attack damages a target, that target must pass a **STR Check** or become **Poisoned [d4]**.
- **Resistant:** ice.
- **Immune:** Frightened.
- **Vulnerable:** fire.

Gelid Fiend [Brute]

The Pale City's frozen law keeps advocates that were never born under any sun. A gelid fiend is summoned and bound into the cold, a towering devil of blue-white ice and cruel geometry, its hide a lattice of frozen carapace. It raises walls of ice to pen its quarry and enforces judgements no mortal court would dare to sign. It does not tire, bargain, or relent, and the cold around it is the cold of a sentence already handed down.

HP	AV	SPD	LVL	CV	Sz
39	4	6"	8	53c	L

AI Steps

- **Wall of Ice (AI Step 1, on d6 5+):** If not **Engaged**, create a **6"** wall of ice up to **3"** high, positioned to separate the most enemy combatants from this Monster. It blocks movement and **LOS** until the end of the round. This Monster then continues their activation normally.

Attacks

- **Multi-Attack:** Makes one **Ice Glaive** attack and one **Tail** attack during their attack step.
- **Ice Glaive: Reach**, 2d8 piercing damage + 1d6 ice damage.
- **Tail: Reach**, 1d10 blunt damage. When this attack damages a target, that target must pass a **STR Check** or become **Prone**.

Special Abilities

- **Fiend: Immune** to **Poisoned [dX]** and **Frightened**; **Resistant:** fire.
- **Immune:** ice, fire, poison.

Frost Giant [Elite]

Twice a man's height and blue-skinned, the frost giant goes armoured in glacier-ice and brings a greataxe down like an avalanche. It hurls boulders to scatter foes before it closes the distance. The Pale City's oldest streets were built to its scale, by something, for reasons no one living recalls. It rules the high drifts as a king.

HP	AV	SPD	LVL	CV	Sz
69	4	7"	9	80c	H

Attacks

- **Greataxe:** 2d8 slashing damage + 1d6 ice damage.
- **Thrown Boulder: Ranged 12"**, 2d6 + 2 blunt damage.

Special Abilities

- **Immune:** ice, Frightened.
- **Ice Glide:** This **Monster** ignores **Slippery Terrain** and **Difficult Terrain** caused by ice, snow, or frost. They do not need to make **DEX Checks** to resist falling **Prone** on ice-based terrain.
- **Avalanche Throw:** When **Thrown Boulder** damages a target, that target must pass a **STR Check** or be **Pushed 2"** and become **Prone**.
- **Vulnerable:** fire.
- **Siege Monster.**

White Dragon [Elite]

The Pale City's frozen sovereign, the white dragon is a feral, ice-crusted wyrm whose breath flash-freezes whatever it touches. Less cunning than its kin but no less lethal, it is pure predatory cold given wings and an appetite. It nests in the highest spire and suffers the White Court about it as courtiers. When it descends, the city's eternal winter only deepens.

HP	AV	SPD	LVL	CV	Sz
78	6	6"	10	106c	H

AI Steps

- **Frost Breath (AI Step 1, on d6 5+):** Place a **Cone 5"** from this Monster to cover the most enemy combatants possible. Each affected combatant must pass a **DEX Check** or suffer **4d8 ice damage** and become **Slowed** (half damage and no **Slowed** on a success). This Monster then ends their activation.

Attacks

- **Multi-Attack:** Makes one **Bite** attack and two **Claws** attacks during their attack step.
- **Bite:** 1d12 piercing damage + 1d6 ice damage.
- **Claws:** 1d10 slashing damage.

Special Abilities

- **Fly (12").**
- **Immune:** ice, Frightened.
- **Frightful Presence:** An enemy non-Monster combatant that starts their activation within **6"** of this Monster must pass a **SPI Check** or become **Frightened**.
- **Vulnerable:** fire.

Sun-Drowned Bestiary

Fire Beetle [Minion]

Hard-shelled and the size of a dog, the fire beetle carries a ruddy inner heat that lights the tomb-passages it infests. It snaps with burning mandibles and bursts into a gout of flame when crushed. Tomb-robbers prize its glands for their steady light. The beetles prize the tomb-robbers for their meat.

HP	AV	SPD	LVL	CV	Sz
6	0	5"	1	1c	S

Attacks

- **Mandibles:** 1d4 piercing damage.

Special Abilities

- **Small.**
- **Beast.**
- **Burrow (3").**
- **Light Source (Aura 1").**
- **Death Flare:** When this Monster is reduced to 0 HP, the nearest combatant adjacent to them suffers **1d4 fire damage**.
- **Resistant:** fire.

Imp [Skirmisher]

Knee-high and bat-winged, a barbed venomous tail lashing behind it, the imp flits about the Sun-Drowned tombs as the spiteful servant of darker things. It darts in to sting and wheels away cackling, untroubled by the desert's heat or its own infernal fire. Alone it is more nuisance than threat. It is also a herald of worse to come.

HP	AV	SPD	LVL	CV	Sz
9	0	4"	1	1c	S

Attacks

- **Stinger:** 1d4 + 3 piercing damage. When this attack damages a target, that target must pass a **STR Check** or become **Poisoned [d4]**.

Special Abilities

- **Small.**
- **Fly (8").**
- **Fiend: Immune** to **Poisoned [dX]** and **Frightened**; **Resistant:** fire.
- **Resistant:** fire.
- **Darkvision (9").**

Skeleton Warrior [Minion]

A skeleton warrior stands at the post it was set in the year of its death, a sun-bleached frame in the corroded bronze of a priest-king's guard. It still holds the weapon it carried in life, waiting on an order that has not come in centuries. When intruders breach the sealed courts the order arrives at last, and the bones remember their drill. There are always more, ranked in the dark behind it.

HP	AV	SPD	LVL	CV	Sz
6	0	5"	1	1c	M

Attacks

- **Burial Blade:** 1d6 slashing damage.

Special Abilities

- **Undead: Immune** to **Poisoned [dX]**, **Bleeding**, **Frightened**, and **Sleeping**.
- **Immune:** poison.
- **Vulnerable:** blunt.

Corpsehound [Skirmisher]

Jackal-headed and quick, the corpsehound runs the dunes between man and beast, hunting the Sun-Drowned's caravans in loping packs. It strikes hardest off a running start, scimitar in one hand and slavering jaws beneath. They serve the tomb-courts as scouts and trackers. By the time the laughter reaches you, the pack already has your scent.

HP	AV	SPD	LVL	CV	Sz
15	1	7"	2	3c	M

Attacks

- **Scimitar:** 1d6 + 3 slashing damage.
- **Bite:** 1d4 + 2 piercing damage.

Special Abilities

- **Pack Tactics:** This Monster's attacks roll their base damage dice with **Advantage** while at least one other allied combatant is within the attack's melee distance of the target.
- **Loping Gait:** When this Monster moves at least **4"** before attacking, their first attack rolls its base damage die with **Advantage**.
- **Keen Senses (9").**

Gnoll [Soldier]

Hyena-headed, rangy, and ruled by a bottomless hunger, gnolls sweep out of the Sun-Drowned wastes to fall on anything weaker than themselves. A gnoll that drops a victim grows frenzied and surges straight on to the next. They take slaves and meat and leave the bones in the sand. Their cackling carries for miles in the dry air.

HP	AV	SPD	LVL	CV	Sz
16	1	6"	2	3c	M

Attacks

- **Spear:** 1d6 + 3 piercing damage, **Thrown 6"**.
- **Longbow: Ranged 18"**, 1d8 + 2 piercing damage.

Special Abilities

- **Rampage:** When this Monster reduces an enemy to **0 HP**, they immediately **Shift 3"** toward the nearest enemy, avoiding hazards.
- **Keen Senses (9").**

Giant Scorpion [Soldier]

The size of a cart and banded in chitin plate, the giant scorpion bears two crushing pincers and a venom-dripping sting arched above its back. It buries itself in the dunes and erupts beneath whatever walks over it. Its venom liquefies a body from within. The Sun-Drowned's sands hide thousands of them, each one waiting on a footfall.

HP	AV	SPD	LVL	CV	Sz
12	1	6"	2	3c	M

Attacks

- **Multi-Attack:** Makes two **Pincers** attacks and one **Tail Sting** attack during their attack step.
- **Pincers:** 1d6 blunt damage.
- **Tail Sting:** 1d6 piercing damage.

Special Abilities

- **Beast.**
- **Venom:** When this Monster's melee attack damages a target, that target must pass a **STR Check** or become **Poisoned [d4]**.
- **Tremorsense (9").**

Skeleton Archer [Cannon]

The archers of the priest-king tombs stand in alcoves carved to fit them, bows still strung after centuries. The arrows have not rotted; some things are kept by intention, others by spite. They loose in disciplined volleys at whatever the skeleton warriors have engaged. Their aim is exactly as good as it was the day they died.

HP	AV	SPD	LVL	CV	Sz
11	0	5"	2	3c	M

Attacks

- **Tomb Bow: Ranged 18"**, 1d10 + 4 piercing damage.

Special Abilities

- **Undead: Immune** to **Poisoned [dX]**, **Bleeding**, **Frightened**, and **Sleeping**.
- **Focused Volley:** Against a target within **8"** that is **Engaged** by an allied Undead, this attack's base damage die is rolled with **Advantage**.
- **Immune:** poison.
- **Vulnerable:** blunt.

Mummy [Controller]

A priest-king's preserved corpse risen in wrath, the mummy comes bound in resin-soaked wrappings and trailing the dread of a dead god's authority. Its touch lays a withering curse, and the mere sight of it can root a victim in terror. Fire is its one true fear. It guards a tomb whose treasures it will not share, not even now.

HP	AV	SPD	LVL	CV	Sz
19	1	4"	3	8c	M

AI Steps

- **Dread Gaze (AI Step 1, on d6 4+):** If not **Engaged**, the visible enemy nearest to this Monster within **6"** must pass a **SPI Check** or become **Frightened**. This Monster then continues their activation normally.

Attacks

- **Rotting Fist:** 1d8 + 1 blunt damage. When this attack damages a target, that target must pass a **STR Check** or become **Cursed**.

Special Abilities

- **Undead: Immune** to **Poisoned [dX]**, **Bleeding**, **Frightened**, and **Sleeping**.
- **Immune:** poison.
- **Vulnerable:** fire.
- **Darkvision (9").**

Skeletal Beast [Skirmisher]

The bound remains of some great desert predator, the skeletal beast is a charging framework of fang and claw with nothing left in it to slow it down. It runs prey to ground across the open sand and tears with bony jaws. No flesh means no fatigue and no fear. The tomb-courts loose them like hounds.

HP	AV	SPD	LVL	CV	Sz
25	1	8"	4	11c	M

AI Steps

- **Run Down (AI Step 1):** Moves their full Speed in a straight line toward the nearest visible enemy; if they end **Engaged**, their **Bone Jaws** attack this activation rolls its base damage die with **Advantage**.

Attacks

- **Multi-Attack:** Makes one **Bone Jaws** attack and one **Raking Claws** attack during their attack step.
- **Bone Jaws:** 1d10 piercing damage.
- **Raking Claws:** 1d6 slashing damage.

Special Abilities

- **Undead: Immune** to **Poisoned [dX]**, **Bleeding**, **Frightened**, and **Sleeping**.
- **Charge:** If this **Monster** moves at least **4"** in a straight line toward an enemy and then attacks that enemy, the attack deals an additional **1d6 damage** of its primary damage type.
- **Immune:** poison.
- **Vulnerable:** blunt.

Wind Elemental [Skirmisher]

A howling spiral of desert air turned malevolent, the wind elemental is a near-invisible vortex that flings sand and bodies with equal ease. It buffets foes off their feet and is barely troubled by ordinary weapons. It haunts the open wastes where the Sun-Drowned's storms are born. You hear it long before the sand begins to bite.

HP	AV	SPD	LVL	CV	Sz
25	1	6"	4	11c	L

Attacks

- **Multi-Attack:** Makes two **Gust Slam** attacks during their attack step.
- **Gust Slam:** 1d6 + 1 blunt damage.

Special Abilities

- **Fly (10").**
- **Buffet:** When **Gust Slam** damages a target, that target must pass a **STR Check** or be **Pushed 2"**.
- **Resistant:** non-magical weapon damage.
- **Immune:** poison, Bleeding, Sleeping.

Desert Naga [Controller]

A great serpent with an almost-human face and the patient cunning of something very old, the desert naga coils among the tomb-pillars. It spits venom from a distance and crushes what comes close, hexing the strong to leave them weak. The priest-kings kept them as guardians and oracles. They guard still. They no longer answer.

HP	AV	SPD	LVL	CV	Sz
25	1	6"	4	12c	L

AI Steps

- **Hexscale (AI Step 1):** If not **Engaged**, the visible enemy nearest to this Monster within **10"** suffers the **Venom Spit** attack; if damaged, that target must pass a **SPI Check** or become **Sleeping**. This Monster then continues their activation normally.

Attacks

- **Constricting Coils:** 1d8 + 2 blunt damage. When this attack damages a target, that target must pass a **STR Check** or become **Immobilized** until the end of the round.
- **Venom Spit: Ranged 10"**, 1d6 + 3 poison damage.

Special Abilities

- **Tremorsense (9").**
- None.

Fire Elemental [Cannon]

A roaring man-shape of living flame, white-hot at the core and shedding embers at the edges, the fire elemental sets alight everything it touches and scorches whatever strikes it. Water and ice are its only checks; the desert sun is its cradle. It draws a trail of cinders across the tomb-floors. To lay hands on it is to burn.

HP	AV	SPD	LVL	CV	Sz
21	1	8"	5	18c	L

Attacks

- **Multi-Attack:** Makes two **Touch** attacks during their attack step.
- **Touch:** 1d6 + 3 fire damage.

Special Abilities

- **Fire Form:** After a melee attack damages this Monster, the attacker suffers **1d6 fire damage**.
- **Immune:** fire, poison, Bleeding, Sleeping.
- **Vulnerable:** ice.

Giant Skeleton [Brute]

A looming framework of fused bone twice a man's height, the giant skeleton is what remains of something that was never entirely natural and is far less so now. It moves with grinding deliberation, sweeping aside anything in its path with fists like falling masonry. Tomb-city carvings show its kind kneeling before the priest-kings; none show them standing. Whatever it was raised to guard, it guards it still.

HP	AV	SPD	LVL	CV	Sz
38	2	7"	5	20c	L

Attacks

- **Multi-Attack:** Makes two **Massive Bone Fist** attacks during their attack step.
- **Massive Bone Fist:** 1d8 blunt damage.

Special Abilities

- **Undead: Immune** to **Poisoned [dX]**, **Bleeding**, **Frightened**, and **Sleeping**.
- **Bone Avalanche:** When this Monster is reduced to 0 HP, each combatant adjacent to them must pass a **DEX Check** or suffer **1d8 blunt damage**.
- **Immune:** poison.
- **Vulnerable:** blunt.

Medusa [Elite]

A serpent-haired figure whose gaze turns the living slowly to stone, the medusa lurks among the statues that were once its admirers. It fights with blade and venomous snake-hair, but its eyes are what fill the tomb-galleries with permanent witnesses. The priest-kings cursed its kind, or rewarded them; the tales cannot agree. Their victims cannot say.

HP	AV	SPD	LVL	CV	Sz
42	2	6"	6	36c	M

AI Steps

- **Petrifying Gaze (AI Step 1):** The visible enemy nearest to this Monster within **6"** must pass a **SPI Check**. On a failure, the target becomes **Immobilized** until the end of their next activation. On a **Critical Failure**, the target instead becomes **Stunned**, gains **+4 AV**, and is immune to forced movement until the end of their next activation. This Monster then continues their activation normally.

Attacks

- **Multi-Attack:** Makes one **Shortsword** attack and one **Snake Hair** attack during their attack step.
- **Shortsword:** 1d6 piercing damage.
- **Snake Hair:** 1d4 piercing damage. When this attack damages a target, that target must pass a **STR Check** or become **Poisoned [d6]**.

Special Abilities

- **Immune:** Frightened, Blinded.
- **Resistant:** poison.
- None.

Tomb Necromancer [Controller]

The necromancers of the Sun-Drowned were the tombs' original administrators, robed officials who chose preservation over death and never gave up their posts. A tomb necromancer is a withered figure in the faded regalia of a dead bureaucracy, raising the buried to enforce statutes no living court remembers. It withers the living with a gesture and calls up the dead to fill the gaps in its ranks. Everything it administers belongs to a world that ended.

HP	AV	SPD	LVL	CV	Sz
35	2	5"	6	29c	M

AI Steps

- **Raise the Court (AI Step 1, on d6 4+):** Once per adventure, place **1 Skeleton Warrior** adjacent to this Monster. They are **Awake**. This Monster then continues their activation normally.
- **Wither (AI Step 2):** If not **Engaged**, the visible enemy nearest to this Monster within **12"** suffers **2d8 + 2 necrotic damage**; a **SPI Check** halves it. This Monster then ends their activation.

Attacks

- **Court Staff:** 1d8 blunt damage + 1d6 necrotic damage. When this attack damages a target, roll **1d6**; on a **6**, that target becomes **Cursed**.

Special Abilities

- **Resistant:** arcane.
- **Darkvision (9").**

Tomb Guardian [Soldier]

A faceless construct of gilded stone and ritual, the tomb guardian was built to defend the priest-kings' seals and is tireless in that one duty. It plants itself at a threshold, lends its iron resolve to the dead around it, and cannot be hurried or frightened. It has held one doorway for a thousand years. It will hold it for a thousand more.

HP	AV	SPD	LVL	CV	Sz
38	3	4"	6	26c	M

AI Steps

- **Hold the Seal (AI Step 1):** Move to the nearest objective marker or allied Undead within **6"** that can be reached, then attack the nearest enemy in **Reach**. If neither exists, advance on the nearest visible enemy.

Attacks

- **Ceremonial Glaive: Reach**, 1d10 + 4 slashing damage.

Special Abilities

- **Construct: Immune** to **Poisoned [dX]**, **Bleeding**, **Frightened**, **Weakened**, and **Sleeping**.
- **Unyielding Form:** This **Monster** cannot be pushed, pulled, knocked **Prone**, or transformed unless a rule explicitly says it affects Constructs, Siege Monsters, or **Monsters** with this ability.
- **Stalwart:** This **Monster** ignores **Critical Hit** effects from melee attackers.
- **Tireless:** Cannot be made **Slowed** or **Stunned**.
- **Immune:** poison.
- **Darkvision (9").**

Brass Golem [Brute]

A burnished automaton glowing with the trapped heat of the forge-rites that made it, the brass golem hammers with fists that sear on contact. Fire cannot harm it; it is fire's own child. The Sun-Drowned's wealthiest tombs are sealed behind these. They do not rust, tire, or reason.

HP	AV	SPD	LVL	CV	Sz
52	4	5"	7	42c	M

AI Steps

- **Advance (AI Step 1):** If a visible enemy has a legal route, this Monster moves their full Speed toward the visible enemy with the highest current HP, then attacks if able. If no visible enemy has a legal route, this step is invalid.

Attacks

- **Multi-Attack:** Makes two **Scorching Fist** attacks during their attack step.
- **Scorching Fist:** 1d10 blunt damage + 1d6 fire damage.

Special Abilities

- **Construct: Immune** to **Poisoned [dX]**, **Bleeding**, **Frightened**, **Weakened**, and **Sleeping**.
- **Unyielding Form:** This **Monster** cannot be pushed, pulled, knocked **Prone**, or transformed unless a rule explicitly says it affects Constructs, Siege Monsters, or **Monsters** with this ability.
- **Immune:** fire.
- **Immune:** poison, psychic.
- **Siege Monster.**

Manticore [Elite]

A monstrous fusion of lion's body, bat's wings, and a man's leering face, the manticore flicks volleys of iron spikes from its lashing tail. It waits where the dune-road narrows and rains barbs on whatever it has trapped. It savours a meal that begged first. The Sun-Drowned's loneliest trails are its larder.

HP	AV	SPD	LVL	CV	Sz
60	3	7"	8	59c	L

AI Steps

- **Sky Hunter (AI Step 1, on d6 4+):** If not **Engaged** and the nearest visible enemy is more than **6"** away, this Monster makes one **Tail Spikes** attack against that enemy, then moves up to half their **Fly** Speed. This Monster then ends their activation.

Attacks

- **Multi-Attack:** Makes two **Claws** attacks during their attack step, or one **Tail Spikes** attack against each of the three nearest visible enemies within range.
- **Claws:** 1d8 + 1 slashing damage.
- **Tail Spikes: Ranged 12"**, 1d8 piercing damage.

Special Abilities

- **Impaling Spikes:** When **Tail Spikes** damages a target, that target suffers **Bleeding**.
- **Fly (10").**
- **Immune:** Frightened.
- **Pounce.**

Demon [Elite]

A horned fiend the colour of cooling iron, wreathed in a flame that clings without consuming it, the demon clawed its way into the Sun-Drowned through some tomb-breached ward. It hews with a hooked glaive and looses surges of fire that pay no heed to armour. Those near it feel their courage drain away. Something summoned it once, and that something is almost certainly dead by now.

HP	AV	SPD	LVL	CV	Sz
68	5	7"	9	86c	H

AI Steps

- **Hellfire Surge (AI Step 1, on d6 5+):** Place an **Aura 3"** area with its origin on a point within **10"** and **LOS**, using the normal Monster area-placement priorities. Each affected combatant must pass a **DEX Check** or suffer **3d8 fire damage** (half on a success). This Monster then ends their activation.

Attacks

- **Multi-Attack:** Makes one **Hooked Glaive** attack and one **Claws** attack during their attack step.
- **Hooked Glaive: Reach**, 1d12 slashing damage.
- **Claws:** 1d8 slashing damage.

Special Abilities

- **Fiend: Immune** to **Poisoned [dX]** and **Frightened**; **Resistant:** fire.
- **Terror Aura (4"):** An enemy that starts their activation within **4"** of this Monster must pass a **SPI Check** or become **Frightened**.
- **Resistant:** fire, necrotic.
- **Immune:** Frightened.
- **Vulnerable:** holy.
- **Darkvision (9").**

Blue Dragon [Elite]

The Sun-Drowned's apex tyrant, the blue dragon is a horned, sand-scaled wyrm that burrows beneath the dunes and erupts amid its prey in a lance of lightning. Vain and territorial, it rules a swathe of desert and the tomb-courts caught within it. It hoards beneath the sand and surfaces only to feed or to punish. The static before its breath raises every hair on the body.

HP	AV	SPD	LVL	CV	Sz
78	6	6"	10	106c	H

AI Steps

- **Lightning Breath (AI Step 1, on d6 5+):** Place a **1"-wide line, 16" long** from this Monster to cover the most enemy combatants possible. Each affected combatant must pass a **DEX Check** or suffer **4d8 lightning damage** (half on a success). This Monster then ends their activation.

Attacks

- **Multi-Attack:** Makes one **Bite** attack and two **Claws** attacks during their attack step.
- **Bite:** 1d12 piercing damage + 1d6 lightning damage.
- **Claws:** 1d10 slashing damage.

Special Abilities

- **Fly (12").**
- **Burrow (4").**
- **Immune:** lightning, Frightened.
- **Frightful Presence:** An enemy non-Monster combatant that starts their activation within **6"** of this Monster must pass a **SPI Check** or become **Frightened**.

The Mire Bestiary

Bogling [Minion]

Squat and frog-mouthed, boglings lurk chest-deep in The Mire's reeking shallows with spears at the ready. They croak warnings across the water and hurl mud-darts before they close. Cowardly alone, they mass in the hundreds in the deep fens. The Mire's first warning is always the same: a sudden, total silence of frogs.

HP	AV	SPD	LVL	CV	Sz
6	0	4"	1	1c	S

Attacks

- **Spear:** 1d6 piercing damage.
- **Mud Dart: Ranged 4"**, 1d4 + 1 piercing damage.

Special Abilities

- **Small.**
- **Swim (6").**
- **Amphibious:** This **Monster** ignores **Difficult Terrain** from **Shallow Water** and **Deep Water**, moves across **Deep Water** at full Speed, and ignores the attack, **STR Check**, and **DEX Check Disadvantage** caused by swimming.
- **Resistant:** poison.
- **Darkvision (9").**

Swamp Goblin [Minion]

Slime-streaked cousins of their forest kin, swamp goblins paddle The Mire's channels and blow poisoned darts from the reeds. They melt into the cover and strike from wherever the water hides them. A nuisance one at a time, a hazard in a swarm. They strip the drowned for trinkets and teeth.

HP	AV	SPD	LVL	CV	Sz
6	0	5"	1	1c	S

AI Steps

- **Lurk (AI Step 1):** If this Monster is not **Hidden** and meets the conditions to become **Hidden** by taking **Hide** in **4.3.2**, they become **Hidden**, then continue their activation normally.

Attacks

- **Bog Knife:** 1d4 slashing damage.
- **Blowpipe: Ranged 8"**, 1d4 + 1 piercing damage. When this attack damages a target, that target must pass a **STR Check** or become **Poisoned [d4]**.

Special Abilities

- **Small.**
- **Swim (5").**
- **Amphibious:** This **Monster** ignores **Difficult Terrain** from **Shallow Water** and **Deep Water**, moves across **Deep Water** at full Speed, and ignores the attack, **STR Check**, and **DEX Check Disadvantage** caused by swimming.
- **Nimble:** After making an attack, they use **Shift 1"** toward the nearest **Cover Terrain**, avoiding hazards.
- **Darkvision (9").**

Zombie [Minion]

A waterlogged corpse that The Mire would not keep, the zombie lurches upright in tattered remains, driven by a single-minded hunger. It is slow and mindless and horribly hard to put down, shrugging off blows that would fell a living man. It drifts beneath the walkways until something warm passes overhead. Then it reaches up.

HP	AV	SPD	LVL	CV	Sz
6	0	3"	1	1c	M

Attacks

- **Slam:** 1d6 blunt damage.

Special Abilities

- **Swim (3").**
- **Undead: Immune** to **Poisoned [dX]**, **Bleeding**, **Frightened**, and **Sleeping**.
- **Immune:** poison.
- **Vulnerable:** fire.

Stirge [Minion]

A bloated mosquito-thing the size of a cat, the stirge carries a needle proboscis and a belly that swells red with stolen blood. It darts in, latches on, and drains until it is pried loose. The Mire's dusk air hums with them. One is an itch; a swarm is exsanguination.

HP	AV	SPD	LVL	CV	Sz
6	0	2"	1	1c	S

Attacks

- **Blood Drain:** 1d4 piercing damage. When this attack damages a target, this Monster regains **1 HP**, and the target becomes **Bleeding**. This instance of **Bleeding** ends after it causes HP loss once.

Special Abilities

- **Small.**
- **Beast.**
- **Fly (7").**
- **Nimble:** After making an attack, they use **Shift 1"** toward the nearest **Cover Terrain**, avoiding hazards.
- **Echolocation (9").**

Will-o'-Wisp [Cannon]

A drifting orb of pale corpse-light, the will-o'-wisp lures travellers off the safe paths and into the sucking mire to drown. It hangs motionless as a false beacon until prey strays near, then strikes with a shock of cold lightning. It feeds on the terror of the dying. The kindest-looking light in the mire is the one most likely to kill.

HP	AV	SPD	LVL	CV	Sz
11	0	4"	2	3c	S

Attacks

- **Shock:** 1d10 + 4 lightning damage.

Special Abilities

- **Small.**
- **Fly (8").**
- **Incorporeal:** This **Monster** is **Resistant** to non-magical weapon damage and can move through other models and terrain. They cannot end their movement inside terrain or another model.
- **Deceptive Light:** While **Resting**, treat this Monster as harmless scenery. Place them openly on the battlefield. The normal movement and visible-enemy wake-up triggers do not apply to them. They become **Awake** and cease to be scenery when they attack, suffer damage, or an enemy ends an activation within **4"** of them with **LOS** to them.
- **Immune:** poison, Bleeding, Sleeping.
- **Darkvision (9").**

Lizardfolk Warrior [Soldier]

Scaled and cold-eyed, the lizardfolk warrior hunts The Mire as easily in the water as on the rotting banks, fighting with heavy club and javelin in disciplined packs. They are not cruel, only pragmatic; to them the living are meat and territory. They defend their breeding-pools without mercy. The mire is theirs, and they forget no intruder who enters it.

HP	AV	SPD	LVL	CV	Sz
16	1	6"	2	3c	M

Attacks

- **Heavy Club:** 1d6 + 3 blunt damage.
- **Javelin: Ranged 6"**, 1d6 + 2 piercing damage.

Special Abilities

- **Swim (6").**
- **Amphibious:** This **Monster** ignores **Difficult Terrain** from **Shallow Water** and **Deep Water**, moves across **Deep Water** at full Speed, and ignores the attack, **STR Check**, and **DEX Check Disadvantage** caused by swimming.
- **Pack Tactics:** This Monster's attacks roll their base damage dice with **Advantage** while at least one other allied combatant is within the attack's melee distance of the target.
- **Resistant:** poison.

Lizardfolk Hunter [Cannon]

A barbed harpoon in its claws, the lizardfolk hunter stalks The Mire's margins, dragging prey off the walkways and into the water where every advantage is its own. It strikes from cover and the reeds, unseen until the line snaps taut. Patient and silent, it waits out the careless. By the time it moves, you are already in the water.

HP	AV	SPD	LVL	CV	Sz
11	0	6"	2	3c	M

AI Steps

- **Lurk (AI Step 1):** If this Monster is not **Hidden** and meets the conditions to become **Hidden** by taking **Hide** in **4.3.2**, they become **Hidden**, then continue their activation normally.

Attacks

- **Barbed Harpoon: Ranged 10"**, 1d10 + 4 piercing damage. When this attack damages a target, that target must pass a **STR Check** or be **Pulled 2"** toward this Monster.

Special Abilities

- **Swim (6").**
- **Amphibious:** This **Monster** ignores **Difficult Terrain** from **Shallow Water** and **Deep Water**, moves across **Deep Water** at full Speed, and ignores the attack, **STR Check**, and **DEX Check Disadvantage** caused by swimming.
- **Ambush:** If this Monster attacks from **Hidden** while the target lacks **LOS** to them, that attack deals an additional **1d6 piercing damage**.
- **Keen Senses (9").**

Crocodile [Skirmisher]

Grown to monstrous length in The Mire, the crocodile is a log-still ambusher that explodes from the murk to clamp on and drag its victim under in a death-roll. It can lie motionless for hours with only its eyes above the water. The deep channels belong to these. The walkways exist because of them.

HP	AV	SPD	LVL	CV	Sz
15	1	4"	2	3c	L

Attacks

- **Bite:** 1d10 + 1 piercing damage. When this attack damages a target, that target must pass a **STR Check** or become **Immobilized** until the end of the round.

Special Abilities

- **Beast.**
- **Swim (7").**
- **Amphibious:** This **Monster** ignores **Difficult Terrain** from **Shallow Water** and **Deep Water**, moves across **Deep Water** at full Speed, and ignores the attack, **STR Check**, and **DEX Check Disadvantage** caused by swimming.
- **Death Roll:** Against an **Immobilized** target, this Monster's **Bite** rolls its base damage die with **Advantage**.
- **Tremorsense (9").**

Lizardfolk Shaman [Controller]

Cloaked in dried reeds, the lizardfolk shaman speaks for the swamp-spirits, mending its packmates' wounds and hexing their prey. It hangs back among the warriors, croaking invocations over the water. Its magic is old and patient and bound to the mire itself. Kill the shaman and the pack fights harder, but it bleeds out faster.

HP	AV	SPD	LVL	CV	Sz
19	1	5"	3	8c	M

AI Steps

- **Bog Blessing (AI Step 1):** If an allied Lizardfolk within **6"** is below their **Max HP**, the allied Lizardfolk missing the most HP regains **1d6 HP**; otherwise the visible enemy nearest to this Monster within **10"** suffers the **Spirit Bolt** attack and, if damaged, becomes **Weakened** until the end of the round. This Monster then ends their activation.

Attacks

- **Staff:** 1d6 + 2 blunt damage.
- **Spirit Bolt: Ranged 10"**, 1d8 + 1 lightning damage.

Special Abilities

- **Swim (5").**
- **Amphibious:** This **Monster** ignores **Difficult Terrain** from **Shallow Water** and **Deep Water**, moves across **Deep Water** at full Speed, and ignores the attack, **STR Check**, and **DEX Check Disadvantage** caused by swimming.

Miasma Serpent [Skirmisher]

A bloated water-snake, the miasma serpent exhales clouds of poison gas as it swims, leaving a drifting green pall across the channels. Its bite carries a venom that festers fast. It hunts by lying in the haze of its own making. The mire's foulest-smelling stretches are where they nest.

HP	AV	SPD	LVL	CV	Sz
19	1	5"	3	6c	M

AI Steps

- **Miasma Cloud (AI Step 1, on d6 4+):** Create an **Aura 3"** area of poison gas centred on this Monster until the end of the round; an enemy that starts their activation within it must pass a **STR Check** or become **Poisoned [d4]**. This Monster then continues their activation normally.

Attacks

- **Venomous Bite:** 1d8 + 1 piercing damage.

Special Abilities

- **Beast.**
- **Swim (6").**
- **Amphibious:** This **Monster** ignores **Difficult Terrain** from **Shallow Water** and **Deep Water**, moves across **Deep Water** at full Speed, and ignores the attack, **STR Check**, and **DEX Check Disadvantage** caused by swimming.
- **Lethal Venom:** When **Venomous Bite** damages a target, that target must pass a **STR Check** or become **Poisoned [d6]**.
- **Tremorsense (9").**
- **Resistant:** poison.

Swamp Naga [Controller]

A great serpent with a hooded, watchful face, the swamp naga coils among the drowned ruins, spitting venom and binding prey in its crushing length. It hexes the strong to sap their strength before it strikes. Older than the mire's human settlements, it remembers when the ground was dry. It guards sunken treasures no one else can reach.

HP	AV	SPD	LVL	CV	Sz
25	1	6"	4	12c	L

AI Steps

- **Hexscale (AI Step 1):** If not **Engaged**, the visible enemy nearest to this Monster within **10"** suffers the **Venom Spit** attack; if damaged, that target also becomes **Slowed** until the end of the round. This Monster then continues their activation normally.

Attacks

- **Constricting Coils:** 1d8 + 2 blunt damage. When this attack damages a target, that target must pass a **STR Check** or become **Immobilized** until the end of the round.
- **Venom Spit: Ranged 10"**, 1d6 + 3 poison damage.

Special Abilities

- **Swim (6").**
- **Amphibious:** This **Monster** ignores **Difficult Terrain** from **Shallow Water** and **Deep Water**, moves across **Deep Water** at full Speed, and ignores the attack, **STR Check**, and **DEX Check Disadvantage** caused by swimming.
- **Tremorsense (9").**

Giant Constrictor [Skirmisher]

Long enough to bridge a channel, the giant constrictor drops from overhanging branches to coil and crush. It strikes, immobilizes, and squeezes the breath from its prey in the space of a few seconds. Then it slides back into the water before any rescue can reach it. The low branches over the mire are never safe to walk beneath.

HP	AV	SPD	LVL	CV	Sz
29	2	5"	5	16c	M

Attacks

- **Multi-Attack:** Makes one **Bite** attack and one **Constrict** attack during their attack step.
- **Bite:** 1d8 piercing damage.
- **Constrict:** 1d8 blunt damage. When this attack damages a target, that target must pass a **STR Check** or become **Immobilized** until the end of the round.

Special Abilities

- **Beast.**
- **Swim (7").**
- **Amphibious:** This **Monster** ignores **Difficult Terrain** from **Shallow Water** and **Deep Water**, moves across **Deep Water** at full Speed, and ignores the attack, **STR Check**, and **DEX Check Disadvantage** caused by swimming.
- **Crushing Coils:** Against an **Immobilized** target, **Constrict** rolls its base damage die with **Advantage**.
- **Tremorsense (9").**

Shambling Mound [Brute]

A heaving mass of animate rot and creeper-vine, roughly man-shaped and utterly tireless, the shambling mound engulfs its prey in its sodden bulk. Lightning only feeds it; blades vanish into the muck. It drifts the deep fen absorbing whatever it smothers. The mire grows them wherever enough has drowned and rotted together.

HP	AV	SPD	LVL	CV	Sz
38	2	4"	5	20c	L

Attacks

- **Multi-Attack:** Makes two **Slam** attacks during their attack step.
- **Slam:** 1d8 blunt damage.

Special Abilities

- **Swim (4").**
- **Plant: Immune** to **Poisoned [dX]** and **Bleeding**.
- **Engulf:** If both **Slam** attacks damage the same target, that target must pass a **STR Check** or become **Immobilized** until the end of the round.
- **Resistant:** lightning.
- **Immune:** poison, Bleeding, Sleeping.
- **Vulnerable:** fire.
- **Tremorsense (9").**

Swamp Hag [Controller]

A warty, weed-haired crone, the swamp hag poles their way through The Mire cursing all they meet, slipping half into the spirit-world when cornered. Their stench chokes out hope. They bargain, they lie, and they feed on misery. The loneliest hut in the mire is theirs, and it is never empty for long.

HP	AV	SPD	LVL	CV	Sz
35	2	6"	6	29c	M

AI Steps

- **Bog Curse (AI Step 1):** If not **Engaged**, the visible enemy nearest to this Monster within **12"** must pass a **SPI Check** or become **Cursed**. This Monster then continues their activation normally.
- **Ethereal Step (AI Step 2, on d6 5+):** If this Monster is at or below half their **Max HP**, they become **Incorporeal** until the end of the round and move their full Speed toward the nearest battlefield edge. This Monster then ends their activation.

Attacks

- **Claws:** 1d8 + 3 slashing damage. When this attack damages a target, that target becomes **Cursed**.

Special Abilities

- **Swim (6").**
- **Amphibious:** This **Monster** ignores **Difficult Terrain** from **Shallow Water** and **Deep Water**, moves across **Deep Water** at full Speed, and ignores the attack, **STR Check**, and **DEX Check Disadvantage** caused by swimming.

Banshee [Controller]

The shrieking spirit of a woman drowned in grief, the banshee is a translucent horror whose wail stops hearts and freezes the blood. It drifts The Mire's fog, and its keening carries the plain certainty of death. Steel passes through it; only magic answers. To hear the wail clearly is to be the one it has chosen.

HP	AV	SPD	LVL	CV	Sz
40	2	4"	7	40c	M

AI Steps

- **Death Keen (AI Step 1, on d6 5+):** Each enemy within **8"** and **LOS** of this Monster must pass a **SPI Check** or suffer **3d6 psychic damage** and become **Frightened**. This Monster then ends their activation.

Attacks

- **Wailing Touch:** 1d10 + 4 necrotic damage. When this attack damages a target, that target must pass a **SPI Check** or become **Frightened**.

Special Abilities

- **Fly (8").**
- **Undead: Immune** to **Poisoned [dX]**, **Bleeding**, **Frightened**, and **Sleeping**.
- **Incorporeal:** This **Monster** is **Resistant** to non-magical weapon damage and can move through other models and terrain. They cannot end their movement inside terrain or another model.
- **Immune:** poison.
- **Vulnerable:** holy.
- **Darkvision (9").**

Swamp Troll [Brute]

A slime-green giant of reaching arms and a tusked maw, the swamp troll hauls itself through The Mire on all fours, regenerating any wound that fire or acid has not seared. It stinks of the bog and hits like a falling tree. It is too stupid to fear and too durable to ignore. Mire-folk keep oil and flint within reach at all times.

HP	AV	SPD	LVL	CV	Sz
62	4	6"	8	54c	L

Attacks

- **Multi-Attack:** Makes one **Rending Claws** attack and one **Bite** attack during their attack step.
- **Rending Claws:** 1d12 slashing damage.
- **Bite:** 1d10 piercing damage.

Special Abilities

- **Swim (6").**
- **Amphibious:** This **Monster** ignores **Difficult Terrain** from **Shallow Water** and **Deep Water**, moves across **Deep Water** at full Speed, and ignores the attack, **STR Check**, and **DEX Check Disadvantage** caused by swimming.
- **Rend:** If both attacks damage the same target during one activation, that target must pass a **STR Check** or become **Bleeding**.
- **Regenerate:** At the start of the Monster Phase, they regain **5 HP** unless they suffered **fire** or **acid** damage since the end of their last activation.
- **Vulnerable:** fire.
- **Resistant:** poison.

Hydra [Elite]

A many-headed reptilian horror, the hydra wallows in The Mire's deepest pools, each serpentine neck striking on its own and snapping at anything in reach. It cannot be frightened, and it bites back the instant something draws near. Cut a head away and it simply works with the others. It is the apex even the crocodiles fear.

HP	AV	SPD	LVL	CV	Sz
60	4	6"	8	61c	H

Attacks

- **Multi-Attack:** Makes three **Bite** attacks during their attack step. Assign one **Bite** to each legal enemy within melee distance, nearest first, before assigning a second **Bite** to any enemy.
- **Bite:** 1d10 piercing damage.

Special Abilities

- **Swim (6").**
- **Amphibious:** This **Monster** ignores **Difficult Terrain** from **Shallow Water** and **Deep Water**, moves across **Deep Water** at full Speed, and ignores the attack, **STR Check**, and **DEX Check Disadvantage** caused by swimming.
- **Many-Headed:** Cannot be made **Frightened** and ignores **Disadvantage** from being **Blinded**.
- **Many-Headed Snap:** The first time each round an enemy ends their movement adjacent to this Monster, they make one free **Bite** attack against that enemy.
- **Immune:** Frightened, Bleeding.
- **Vulnerable:** fire.

Blackwater Wight [Elite]

The drowned dead given malice, the blackwater wight is a barnacled corpse-warrior that rises from the mire's black pools, hauling the recently dead up behind it. Its blade drinks the life from those it cuts, and the wound will not fully close until the adventure ends. It commands the drowned the way a sergeant commands recruits. The mire's deepest channels are its barracks.

HP	AV	SPD	LVL	CV	Sz
60	4	5"	8	61c	M

AI Steps

- **Grave Tide (AI Step 1, on d6 4+):** Once per adventure, place **1 Zombie** in a legal space within **4"** of this Monster. They are **Awake**. This Monster then continues their activation normally.

Attacks

- **Drowned Blade:** 1d12 + 6 necrotic damage. When this attack damages a target, that target's Max HP is reduced by the damage dealt until the end of the adventure.

Special Abilities

- **Swim (5").**
- **Undead: Immune** to **Poisoned [dX]**, **Bleeding**, **Frightened**, and **Sleeping**.
- **Amphibious:** This **Monster** ignores **Difficult Terrain** from **Shallow Water** and **Deep Water**, moves across **Deep Water** at full Speed, and ignores the attack, **STR Check**, and **DEX Check Disadvantage** caused by swimming.
- **Resistant:** necrotic, ice.
- **Immune:** poison.
- **Vulnerable:** holy.

Mire Titan [Brute]

A colossal amphibian-horror, the mire titan is a froglike bulk of warty hide and lashing tentacles crowned by a vast, distensible maw. It seizes prey in its arms and swallows them whole, dissolving them in its acid gut while they still struggle. It is The Mire's living sinkhole. Whole expeditions have gone into one and left only ripples.

HP	AV	SPD	LVL	CV	Sz
70	4	4"	9	74c	H

AI Steps

- **Drag Under (AI Step 1):** If at least one enemy is within the melee distance of **Tentacle**, this Monster makes their **Tentacle** attacks against the nearest available enemies, prioritizing any enemy they can **Pull** into the melee distance of **Bite**, then makes their **Bite** if able. If no enemy is within the melee distance of **Tentacle**, this step is invalid.

Attacks

- **Multi-Attack:** Makes three **Tentacle** attacks and one **Bite** attack during their attack step.
- **Tentacle: Reach**, 1d8 blunt damage. When this attack damages a target, that target must pass a **STR Check** or be **Pulled 2"** toward this Monster and become **Immobilized** until the end of the round.
- **Bite:** 1d10 piercing damage.

Special Abilities

- **Swim (6").**
- **Amphibious:** This **Monster** ignores **Difficult Terrain** from **Shallow Water** and **Deep Water**, moves across **Deep Water** at full Speed, and ignores the attack, **STR Check**, and **DEX Check Disadvantage** caused by swimming.
- **Swallow Whole:** When **Bite** damages an **Immobilized** target, that target must pass a **STR Check** or be swallowed using the **Swallow Whole** rules, suffering **2d6 acid damage** at the end of each round until they escape. This Monster may hold only one swallowed target at a time.
- **Unyielding Form:** This **Monster** cannot be pushed, pulled, knocked **Prone**, or transformed unless a rule explicitly says it affects Constructs, Siege Monsters, or **Monsters** with this ability.

Black Dragon [Elite]

The Mire's sovereign, the black dragon is a sleek, horned wyrm the colour of stagnant water, its breath a hiss of acid. Cruel and patient, it lairs in a flooded ruin and rules the fen through terror, taking tribute and tearing apart any who refuse to pay. It swims as easily as it flies. When the frogs go silent and the water stills, it is already close.

HP	AV	SPD	LVL	CV	Sz
78	6	7"	10	106c	H

AI Steps

- **Acid Breath (AI Step 1, on d6 5+):** Place a **1"-wide line, 14" long** from this Monster to cover the most enemy combatants possible. Each affected combatant must pass a **DEX Check** or suffer **4d8 acid damage** (half on a success). This Monster then ends their activation.

Attacks

- **Multi-Attack:** Makes one **Bite** attack and two **Claws** attacks during their attack step.
- **Bite:** 1d12 piercing damage + 1d6 acid damage.
- **Claws:** 1d10 slashing damage.

Special Abilities

- **Fly (12").**
- **Swim (7").**
- **Amphibious:** This **Monster** ignores **Difficult Terrain** from **Shallow Water** and **Deep Water**, moves across **Deep Water** at full Speed, and ignores the attack, **STR Check**, and **DEX Check Disadvantage** caused by swimming.
- **Immune:** acid, Frightened.
- **Frightful Presence:** An enemy non-Monster combatant that starts their activation within **6"** of this Monster must pass a **SPI Check** or become **Frightened**.
- **Acid Spit (2d6, Range 8").**

Bosses

A **Boss** is a unique LVL 10 Monster used as the capstone threat of a Triumph or another scenario that explicitly uses that **Boss**. A **Boss** never appears on Random Monster Generation Tables, never suffers Wounds, and never rolls on the Injuries Table.

A **Boss** uses the standard Monster profile order: **HP, AV, SPD, LVL, CV, Sz, AI Steps, Attacks, Special Abilities**. A **Boss** has **LVL 10** and **CV 200c** unless their entry says otherwise. A Boss's **CV** is flat rather than APL-scaled, because a Boss uses a fixed statline and **Boss Scale** already matches the fight to the number of Heroes facing it. A Boss's **CV** has no effect in the **Triumph Finale**, because that adventure ends the campaign and no **Town Phase** follows it. It applies when a Boss is used in any other scenario, and it is printed so that longer campaign formats can use it without repricing every Boss.

Determine **Boss Scale** when the Boss is first placed. In solo or cooperative play, Boss Scale equals the party's starting Party Size. In competitive play, Boss Scale equals the number of starting Heroes on all sides hostile to the Boss. Boss Scale has a minimum of **1** and does not change during the adventure. Hirelings, Animal Companions, Summons, and other non-Hero allied combatants never contribute to Boss Scale. A Boss's HP entry states how Boss Scale is applied; the resulting value is the Boss's **Max HP**.

A **Boss** is **Immune** to **Stunned**, **Sleeping**, **Immobilized**, **Silenced**, and **Frightened**. Individual Bosses list further resistances and immunities in their own entries.

A party that defeats a **Boss** collects their **CV** under the normal rules in **9.1 Monster Stat Profile**. A **Boss** awards no other reward except those listed by their Triumph, scenario, or campaign rule.

Unless a scenario says otherwise, a **Boss** begins **Awake** and uses **Relentless Assault** instead of activating during the **Monster Phase**.

Each Hero hostile to the Boss can trigger **Relentless Assault** once per round. After each such Hero finishes their activation during the **Party Phase**, mark that Hero as having triggered **Relentless Assault**, resolve all effects and any allied activations triggered by the end of that Hero's activation, then the Boss immediately takes 1 activation. A Hero activation triggers **Relentless Assault** even if that Hero took no actions.

If a hostile Hero who has not triggered **Relentless Assault** this round spends AP on a **Reaction** before activating and that cost leaves them with **0 AP**, mark that Hero as having triggered **Relentless Assault**. After the current activation and any effects or allied activations triggered by its end finish, the Boss takes 1 activation. If the Reaction did not resolve during an activation, the Boss takes this activation after the triggering action or effect finishes. If more than one **Relentless Assault** activation is pending, resolve them one at a time in trigger order. That Hero does not trigger **Relentless Assault** again if they later activate this round.

Hireling, Summon, and other non-Hero activations do not trigger **Relentless Assault**. The Boss can take no more **Relentless Assault** activations in a round than the number of starting Heroes on all sides hostile to the Boss. Other Monsters in the Boss's Group activate normally during the **Monster Phase**.

During the Boss's first activation each round, resolve start-of-activation Special Abilities and **AI Steps** normally. During each later activation that round, do not resolve start-of-activation Special Abilities or **AI Steps**. Determine the **Primary Target**, then continue from the normal engaged-enemy, movement, and attack steps of Monster AI. Whenever the Boss reaches their attack step, resolve their complete printed **Multi-Attack**, if any.

Start-of-**Monster Phase** abilities still resolve at their normal timing. A condition or effect that restricts a Boss applies to each activation normally. If a rule prevents the Boss from activating, skip that **Relentless Assault** trigger; the Boss does not take that activation later.

The Ancient Void Dragon [Boss]

Older than the Fall and perhaps its cause, the Ancient Void Dragon is a wound in the shape of a wyrm, its scales drinking the light from the air around them. Its breath neither burns nor freezes but unmakes, peeling away substance until nothing is left. Stars seem to dim where it passes. The wise do not speak its name, and the dead do not speak at all.

HP	84 × Boss Scale

SPD	9"
LVL	10
CV	200c
Sz	H

AI Steps

- **Unmaking Breath (AI Step 1, on d6 6+):** Place a **Cone 6"** to cover the most enemy combatants possible. Each affected combatant must pass a **DEX Check** or suffer **4d8 necrotic damage** and have their **Max HP** reduced by **3** until the end of the adventure (half damage and no reduction on a success). This Monster then ends their activation.
- **Wingbeat (AI Step 2, on d6 5+):** Each enemy within **3"** must pass a **STR Check** or be **Pushed 3"** directly away and become **Prone**. This Monster then continues their activation normally.

Attacks

- **Multi-Attack:** Makes one **Void Bite** attack and two **Claws** attacks against the nearest visible enemy, then the next-nearest if the first is slain.
- **Void Bite: Reach**, 2d8 + 4 piercing damage + 1d6 necrotic damage.
- **Claws:** 1d8 + 3 slashing damage.

Special Abilities

- **Fly (14").**
- **Immune:** necrotic, psychic.
- **Resistant:** non-magical weapon damage.
- **Star-Devouring Presence (Aura 12"):** An enemy that starts their activation within **12"** must pass a **SPI Check** or become **Frightened**.
- **Unyielding Will:** The first time each round an enemy effect would apply one or more conditions to this Monster, ignore all conditions that effect would apply.

The Hollow Crown of the Ashlands [Boss]

The empire's last emperor died without an heir, and the crown itself took up the rule. A circlet of black iron hovering above an empty regent's robe, the Hollow Crown commands the Ashlands' legions with a dead sovereign's absolute authority. It passes judgement that withers the living and raises the fallen to enforce it. Its throne room is the whole of the ruined empire.

AI Steps

- **Command the Forsaken (AI Step 1, on d6 6+):** Once per adventure, if fewer than 3 allied Undead are within **8"**, place 2 **Forsaken Knight** in legal spaces within **6"**. They are **Awake**. This Monster then ends their activation.
- **Imperial Verdict (AI Step 2, on d6 5+):** The visible enemy nearest to this Monster within **12"** must pass a **SPI Check** or drop all carried objectives, lose **1 AP** from their next activation, and become **Weakened** until the end of the round. This Monster then continues their activation normally.

Attacks

- **Withering Sceptre: Reach**, 3d6 + 4 necrotic damage. When this attack damages a target, that target becomes **Cursed**.

Special Abilities

- **Fly (6").**
- **Undead: Immune** to **Poisoned [dX]**, **Bleeding**, **Frightened**, and **Sleeping**.
- **Crown of Dust:** At the start of this Monster's activation, roll **1d6**. On a **6**, each enemy within **10"** and **LOS** suffers **2d8 necrotic damage**; a **SPI Check** halves this damage.
- **Faceless Dread (Aura 6"):** An enemy that starts their activation within **6"** must pass a **SPI Check** or become **Frightened**.
- **Resistant:** arcane.

The Last Colossus [Boss]

A walking fortress of riveted black iron three times a man's height, the Last Colossus groans at every joint with the thunder bound inside it. When the empire knew it was dying, it poured the last of its wealth into one war-construct meant to outlast everything. For centuries it has marched the same patrol, defending an empire that no longer exists. Nothing has yet proven able to stop it.

AI Steps

- **Seismic Stride (AI Step 1, on d6 5+):** Moves their full Speed toward the nearest visible enemy. Each combatant they pass adjacent to must pass a **DEX Check** or suffer **2d6 blunt damage** and become **Prone**. This Monster then ends their activation.

Attacks

- **Multi-Attack:** Makes two **Ruin Hammer** attacks against the nearest visible enemy.
- **Ruin Hammer:** 2d8 + 4 blunt damage.

Special Abilities

- **Construct: Immune** to **Poisoned [dX]**, **Bleeding**, **Frightened**, **Weakened**, and **Sleeping**.
- **Sweeping Devastation:** At the start of this Monster's activation, roll **1d6**. On a **6**, the next time a **Ruin Hammer** scores a **Critical Hit** during that activation, each other combatant adjacent to the struck target suffers **2d6 blunt damage**.
- **Siege Frame: Resistant** to damage dealt by a Hero of **Level 4** or lower, a Monster of **LVL 4** or lower, or a combatant without a Level or LVL.
- **Unyielding Form:** This **Monster** cannot be pushed, pulled, knocked **Prone**, or transformed unless a rule explicitly says it affects Constructs, Siege Monsters, or **Monsters** with this ability.
- **Fearless: Immune** to **Frightened**.
- **Siege Monster.**

Avatar of the Old Growth [Boss]

A towering shape of ancient trunk and grasping root, bark-skinned and crowned with a tangle of antlered branches, the Avatar of the Old Growth is the will of the deep forest given a body to act through. It calls the lesser green things to its side and drowns intruders in living wood. To kill it is to wound the Greenmark itself. The Greenmark does not forgive.

AI Steps

- **Awaken the Grove (AI Step 1, on d6 6+):** Once per adventure, place 2 **Briarling** in legal spaces within **8"**. They are **Awake**. This Monster then ends their activation.
- **Entangling Field (AI Step 2, on d6 5+):** Every area of **Open Terrain** and **Cover Terrain** within **6"** of this Monster becomes **Difficult Terrain** until the end of the round, and the nearest enemy not already **Immobilized** must pass a **STR Check** or become **Immobilized**. This Monster then continues their activation normally.

Attacks

- **Multi-Attack:** Makes two **Crushing Limb** attacks and one **Impaling Root** attack, prioritizing any enemy not yet **Immobilized**.
- **Crushing Limb:** 2d6 + 4 blunt damage.
- **Impaling Root: Reach**, 1d8 + 3 piercing damage. When this attack damages a target, that target must pass a **STR Check** or become **Immobilized** until the end of the round.

Special Abilities

- **Plant: Immune** to **Poisoned [dX]** and **Bleeding**.
- **Strangling Spores:** At the start of this Monster's activation, roll **1d6**. On a **6**, each enemy within **6"** suffers **2d8 poison damage**; a **STR Check** halves this damage.
- **Verdant Regeneration:** At the start of the Monster Phase, they regain **6 × Boss Scale HP** unless they suffered fire or acid damage since this ability last resolved, or since the adventure began if it has not yet resolved.
- **Vulnerable:** fire.

The Broodmother Prime [Boss]

In the deepest dark of the Undermarches squats the mother of every giant spider that plagues the deep, a bloated horror the size of a cottage, egg-sacs trailing from it that twitch with the unborn. It floods the field with its brood and binds the survivors in webs for later. Its venom stops a heart in a single beat. The deep, in the end, is its nursery.

- **The Forest Answers (AI Step 2, on d6 5+):** Once per adventure, if this Monster is at or below half their **Max HP**, place 1 **Forest Troll** in a legal space within **6"**; they are **Awake**. This Monster then continues their activation normally.

Attacks

- **Multi-Attack:** Makes one **Bite** attack and two **Claws** attacks against the nearest visible enemy, then the next-nearest if the first is slain.
- **Bite: Reach**, 2d8 + 4 piercing damage.
- **Claws:** 1d8 + 3 slashing damage.

Special Abilities

- **Fly (12").**
- **Swim (7").**
- **Amphibious:** This **Monster** ignores **Difficult Terrain** from **Shallow Water** and **Deep Water**, moves across **Deep Water** at full Speed, and ignores the attack, **STR Check**, and **DEX Check Disadvantage** caused by swimming.
- **Immune:** poison.
- **Resistant:** arcane.
- **Frightful Presence:** An enemy non-Monster combatant that starts their activation within **6"** of this Monster must pass a **SPI Check** or become **Frightened**.
- **Unyielding Will:** The first time each round an enemy effect would apply one or more conditions to this Monster, ignore all conditions that effect would apply.

Sirrach the Black [Boss]

Sirrach is the Undermarches' buried king, a black wyrm that swims through solid stone and surfaces only to feed. Its breath withers flesh and shortens lives, leaving even survivors diminished. It hoards in galleries no surface-dweller has ever mapped. The stone shudders before it the way a hand shudders before opening bad news.

HP	87 × Boss Scale
AV	6
SPD	8"
LVL	10
CV	200c
Sz	H

AI Steps

- **Breath (AI Step 1, on d6 6+):** Place a **1"-wide line, 14" long** to cover the most enemy combatants possible. Each affected combatant must pass a **DEX Check** or suffer **4d8 necrotic damage** (half on a success). This Monster then ends their activation.
- **Burrow Ambush (AI Step 2, on d6 5+):** Uses **Burrow** to move their full Speed and surface adjacent to the visible enemy with the lowest current HP; their first attack this activation rolls its base damage dice with **Advantage**. This Monster then continues their activation normally.

Attacks

- **Multi-Attack:** Makes one **Bite** attack and two **Claws** attacks against the nearest visible enemy, then the next-nearest if the first is slain.
- **Bite: Reach**, 2d8 + 4 piercing damage.
- **Claws:** 1d8 + 3 slashing damage.

Special Abilities

- **Fly (12").**
- **Burrow (5").**
- **Darkvision (9").**
- **Withering Maw:** When **Bite** damages a target, that target's **Max HP** is reduced by the damage dealt until the end of the adventure.
- **Resistant:** arcane.
- **Frightful Presence:** An enemy non-Monster combatant that starts their activation within **6"** of this Monster must pass a **SPI Check** or become **Frightened**.
- **Unyielding Will:** The first time each round an enemy effect would apply one or more conditions to this Monster, ignore all conditions that effect would apply.

Visath the White [Boss]

Visath is the Pale City's eternal winter wearing the body of a wyrm, a glacier with wings and a will. Its breath does not merely freeze; it stops time in the flesh, leaving victims locked mid-scream in the ice. It rules from the highest spire and suffers no warmth anywhere in its domain. Where it flies, the snow falls harder, as though the sky itself bows.

AI Steps

- **Breath (AI Step 1, on d6 6+):** Place a **Cone 6"** to cover the most enemy combatants possible. Each affected combatant must pass a **DEX Check** or suffer **4d8 ice damage** (half on a success). This Monster then ends their activation.
- **Glacial Sweep (AI Step 2, on d6 5+):** Each enemy within **4"** must pass a **STR Check** or become **Slowed** until the end of the round. Each affected enemy's space becomes **Difficult Terrain** until the end of the round. This Monster then continues their activation normally.

Attacks

- **Multi-Attack:** Makes one **Bite** attack and two **Claws** attacks against the nearest visible enemy, then the next-nearest if the first is slain.
- **Bite: Reach**, 2d8 + 4 piercing damage.
- **Claws:** 1d8 + 3 slashing damage.

Special Abilities

- **Fly (12").**
- **Immune:** ice.
- **Ice Glide:** This **Monster** ignores **Slippery Terrain** and **Difficult Terrain** caused by ice, snow, or frost. They do not need to make **DEX Checks** to resist falling **Prone** on ice-based terrain.
- **Glacial Presence (Aura 6"):** An enemy within **6"** treats all terrain as **Difficult Terrain**.
- **Killing Frost:** After this Monster resolves **Breath**, roll **1d6**. On a **5–6**, each enemy non-Monster combatant damaged by that **Breath** also becomes **Immobilized** until the end of the round.
- **Resistant:** arcane.
- **Frightful Presence:** An enemy non-Monster combatant that starts their activation within **6"** of this Monster must pass a **SPI Check** or become **Frightened**.
- **Unyielding Will:** The first time each round an enemy effect would apply one or more conditions to this Monster, ignore all conditions that effect would apply.

Khorrun the Dracolich [Boss]

Khorrun has not drawn breath since the Fall, yet still it coils atop its hoard in the sealed tomb-galleries beneath the Sun-Drowned. Its bones hold the shape of greed, draped in the tatters of scale and the cold blue fire of undeath, and ledgers stacked to the vault ceiling record exactly who has taken what. It rouses only to punish a debt or devour a trespasser. The lightning that pours from its jaws is the same colour as the witchfire in its empty sockets.

AI Steps

- **Breath (AI Step 1, on d6 6+):** Place a **1"-wide line, 16" long** to cover the most enemy combatants possible. Each affected combatant must pass a **DEX Check** or suffer **4d8 lightning damage** (half on a success). This Monster then ends their activation.
- **Raise the Drowned Ledger (AI Step 2, on d6 5+):** Once per adventure, place 1 **Skeleton Warrior** in a legal space within **6"**; they are **Awake**. This Monster then continues their activation normally.

Attacks

- **Multi-Attack:** Makes one **Bite** attack and two **Witchfire Lash** attacks against the nearest visible enemy, then the next-nearest if the first is slain.
- **Bite: Reach**, 2d8 + 4 piercing damage.
- **Witchfire Lash:** 1d8 + 3 necrotic damage.

Special Abilities

- **Fly (10").**
- **Undead: Immune** to **Poisoned [dX]**, **Bleeding**, **Frightened**, and **Sleeping**.
- **Immune:** lightning, necrotic.
- **Paralyzing Presence (Aura 6"):** An enemy that starts their activation within **6"** must pass a **SPI Check** or become **Slowed** until the end of the round.
- **Resistant:** arcane.
- **Frightful Presence:** An enemy non-Monster combatant that starts their activation within **6"** of this Monster must pass a **SPI Check** or become **Frightened**.
- **Unyielding Will:** The first time each round an enemy effect would apply one or more conditions to this Monster, ignore all conditions that effect would apply.

Vossegar of the Flooded Cathedral [Boss]

Vossegar lairs in a drowned cathedral at The Mire's heart, a sleek black wyrm coiled among submerged altars. Its acid breath strips flesh from bone, and at its will the waters rise to swallow the ground its enemies stand on. It takes tribute from every settlement in the mire and devours those who come up short. The bells of its cathedral toll underwater, and the frogs have not sung there in living memory.

HP	96 × Boss Scale
AV	6
SPD	7"
LVL	10

AI Steps

- **Breath (AI Step 1, on d6 6+):** Place a **Cone 6"** to cover the most enemy combatants possible. Each affected combatant must pass a **DEX Check** or suffer **4d8 acid damage** (half on a success). This Monster then ends their activation.
- **Rising Flood (AI Step 2, on d6 5+):** Every area of **Open Terrain** and **Cover Terrain** within **8"** of this Monster becomes **Difficult Terrain** for the rest of the game. This Monster then continues their activation normally.

Attacks

- **Multi-Attack:** Makes one **Bite** attack and two **Claws** attacks against the nearest visible enemy, then the next-nearest if the first is slain.
- **Bite: Reach**, 2d8 + 4 piercing damage.
- **Claws:** 1d8 + 3 slashing damage.

Special Abilities

- **Fly (10").**
- **Swim (10").**
- **Amphibious:** This **Monster** ignores **Difficult Terrain** from **Shallow Water** and **Deep Water**, moves across **Deep Water** at full Speed, and ignores the attack, **STR Check**, and **DEX Check Disadvantage** caused by swimming.
- **Drowning Coils:** When **Bite** damages a target, **Pull** that target **2"** directly toward this Monster. If that target ends this movement in **Shallow Water** or **Deep Water**, they become **Immobilized** until they spend **1 AP** to break free.
- **Immune:** acid.
- **Resistant:** arcane.
- **Frightful Presence:** An enemy non-Monster combatant that starts their activation within **6"** of this Monster must pass a **SPI Check** or become **Frightened**.
- **Unyielding Will:** The first time each round an enemy effect would apply one or more conditions to this Monster, ignore all conditions that effect would apply.

9.8 Random Monster Generation Tables

Each Climate has its own random Monster table, divided into bands by **APL** (Average Party Level, rounded down as normal). When a scenario calls for a random Monster Group, roll **1d10** on the table for the current Climate and APL band, then read the column matching the number of Heroes in the party that the Group is placed against. Each result lists one Monster Group, scaled to that party.

The number of Groups a scenario uses is set by its **Random Monster Groups** value in **10.6.4 Final Random Monster Groups**.

Reroll duplicate results and any result that would place an **Elite** already present in another Group until the result is legal. Each Group must be distinct, and each **Elite** may appear at most once.

Before generating a Group, if no unused legal result remains in the relevant column, duplicate results are allowed for that Group and every remaining Group. Continue to reroll any result that would repeat an **Elite**. This exception changes only the distinct-Group restriction; each **Elite** may still appear at most once.

If a newly generated Random Monster Group would cause Random Monster Groups on the battlefield to contain more than **1 Cannon** or more than **1 Controller**, reroll that Group once for role concentration. Apply the duplicate-result and duplicate-**Elite** restrictions to this reroll, rerolling further only until those restrictions are satisfied. Then accept the result even if it still exceeds the role-concentration limit.

10.

Scenarios

Each game of Heraldry Skirmish is a distinct **Adventure**, a self-contained battle built from a Climate, a Core Scenario, a Secondary Objective, random weather, and neutral Monsters. Competitive games usually pit two rival parties against one another while both sides race for Coins, objectives, and survival. Solo and cooperative games use the same scenario framework with additional Monsters, hazards, or other pressure in place of an opposing party.

Defeated Heroes: In this section, a Hero is **Defeated** while they are **Knocked Out**, dead, or removed from play by a scenario rule. A scenario condition that refers to a party's Heroes being defeated is met when every Hero in that party is Defeated or has escaped the battlefield.

Party Decisions: Each party makes one setup roll, generates one party objective, and makes one party choice when a rule calls for one, regardless of how many players control that party. The Party Leader's controller rolls and makes choices for that party after consulting the other controlling players.

Carried Objectives: Unless a scenario says otherwise, a carried objective occupies no equipment location. A Hero adjacent to an unattended carried objective may use **Interact [1 AP]** to pick it up. A carrier may use **Interact [1 AP]** to place it in the nearest legal space or give it to an adjacent allied Hero. If the carrier is reduced to **0 HP**, dies, or is removed without extracting, place it in the nearest legal space to the carrier's last position. A Hero carrying it extracts it by leaving through a legal extraction edge or entering a legal extraction zone as the scenario requires. A scenario's own pickup, transfer, drop, or extraction rule overrides these defaults.

Secondary Objective Extraction: If a Secondary Objective requires a carried objective or escorted NPC to escape but the Core Scenario provides no legal extraction edge or zone, any battlefield edge is legal for that Secondary Objective only. Before a carrier leaves through this fallback edge, they drop every other carried objective in the nearest legal space. This fallback does not satisfy a Core Scenario, side contract, or other extraction requirement.

Escorted NPCs: When an escorting Hero resolves voluntary movement, move the escorted NPC along a legal path by up to the NPC's **Speed**, ending within **2"** of that Hero. The Hero cannot declare movement that would leave no legal final position within **2"** for the NPC. The NPC cannot move through terrain or spaces they could not legally enter.

Scenario Reward Items: An item or token explicitly described as a scenario reward is temporary and occupies no equipment location. Unless its rule says it persists or may be used during a future adventure, remove it at the end of the current adventure.

Scenario-Specific Monster Groups at Setup: After numbering all Random Monster Groups, assign each scenario-specific Monster Group the next available group number in the order the scenario lists them. Scenario-specific Monsters deployed together under the same heading, starting state, and activation instructions form 1 Group unless the scenario says otherwise.

Monsters Placed After Setup: A creature placed after setup by a scenario rule remains a **Monster**, not a **Summon**. A scenario-specific Monster uses their printed profile. One resolution that places one or more Monsters is one reinforcement event. Monsters placed by the same resolution form one Monster Group; when that Group is first formed, assign it the next available group number. Later Monsters placed by the same repeated scenario rule join that Group and retain its number unless the scenario says otherwise. The Group uses the allegiance stated by the scenario, begins **Awake** unless stated otherwise, and uses the placement point or nearest relevant objective as its Guard Point. If placed before the Monster Phase begins, it may activate in that Monster Phase. If placed during or after a Monster Phase, it cannot activate until the next Monster Phase unless the placing rule explicitly says otherwise. A named bestiary Monster placed this way yields **0 CV** and no defeat reward unless the scenario explicitly grants one; a scenario-specific Monster retains their printed CV and rewards. A Random Monster Group generated during setup but deployed later retains its assigned Group, normal CV, and rewards; delayed deployment is not a reinforcement event.

These placement rules apply in every mode of play. No more than **6** Monster Groups may be on the battlefield at the same time. An event that would create a seventh Group fails and places nothing; an event that legally joins an existing Group may still resolve. If a Monster, marker, or objective would be placed in an illegal space, place it in the nearest legal space instead. If no legal space exists within **2"** of the intended arrival point, delay that placement until the end of the next **Monster Phase**. If no legal space exists at that later timing point either, the placement fails.

Defeated Monster Groups: A Monster Group is defeated while none of its Monsters remain on the battlefield and none are waiting to deploy or join that Group. If a later reinforcement joins the Group, it ceases to be defeated until this condition is met again.

Reading a Scenario Before Setup

This subsection is a preparation aid only; it does not add a step to **10.1 Adventure Preparation Sequence** or override any scenario field. Before resolving **10.1**, read the selected Core Scenario from **Primary Objective** through **Tiebreaker** once so setup, scoring, escape, and victory instructions are read in context.

For scenarios that use persistent state, a scenario sheet, tokens, or notes can make that state easier to verify during play. Track only what the selected scenario actually uses, such as the current round or **Pressure Clock**, objective-marker state, Monster Group number and **Awake/Resting** state, Guard Points, delayed entry, or an element waiting to deploy, transform, expire, score, or trigger. The scenario and core rules, not the tracking method, determine the state.

Scenario Scaling Field Reference

This table explains common scenario fields. It is descriptive unless a field is defined as authoritative elsewhere in this section.

Field	Use
Role Assignment	Defines competitive roles when a scenario uses asymmetric objectives. Omit this field when both parties use the same objective.
Primary Objective	Defines what each party is trying to accomplish in competitive play.
Final Random Monster Groups	Defines how many Random Monster Groups the scenario uses, normally by reference to **10.6.4**.
Awake Groups	Defines which Monster Groups begin **Awake** and which begin **Resting** at setup.
Minion Swarm	Defines whether low-LVL Monsters are added through the Minion Swarm rules.
Objective Scaling	Defines how objective count or objective requirements change with Party Size or APL.
Level Scaling	Defines how Monster difficulty, objective difficulty, or scenario pressure changes with APL.
Solo/Co-op Objective	Defines the objective and extraction requirement used when no rival party is present.
Pressure Clock	Assigns the mandatory solo and cooperative Pressure Clock.
Battlefield and Terrain	Defines the battlefield size, required terrain, placement restrictions, and special terrain rules.
Objective Placement	Defines where objective markers, treasure, hazards, or scenario elements are placed.
Boss Deployment	Defines where and when a Scenario-Specific Monster is placed and their starting state.
Random Monster Setup	Defines Random Monster Group placement, Guard Points, off-battlefield entry points, and scenario-specific waking rules.
Party Deployment	Defines where parties deploy and any Setup Roll-off choices.
Special Rules	Defines scenario-specific procedures and exceptions.
Escape Conditions	Defines whether and how carried objectives, treasure, or combatants leave the battlefield.
Victory Conditions	Defines when the scenario ends and how the winner is determined.
Tiebreaker	Defines the final comparison used when the scenario's normal victory comparison is tied.

10.1 Adventure Preparation Sequence

Use this sequence before every adventure.

Setup Roll-off

Whenever a scenario or rule calls for a **Setup Roll-off**, the Party Leader's controller rolls **1d20** once for their party. The higher result wins the roll-off. Reroll any tie. The winning party makes the listed setup choice, such as a deployment edge, Secondary Objective placement, or another procedural decision specified by that rule. If both parties would automatically win the same **Setup Roll-off**, those automatic wins cancel, and the **Setup Roll-off** is made normally. Setup Roll-offs are made before deployment unless a specific rule schedules them later.

In solo and cooperative play, replace the Setup Roll-off with the following procedure unless a scenario explicitly says otherwise: the allied party automatically wins and makes the listed winner's choice. Any choice or roll assigned to the losing party follows **10.5.5**.

Asymmetric Role Assignment: A Setup Roll-off winner never chooses between mechanically different scenario roles unless a scenario explicitly states that the choice is an intended reward. When a Core Scenario assigns two different roles, use that scenario's secret-choice or random-assignment procedure.

Random Direction

When a rule calls for a random direction, centre an imaginary 8-point compass on the affected combatant, marker, point, or area, then roll **1d8**:

1d8	Direction
1	North
2	Northeast
3	East
4	Southeast
5	South
6	Southwest
7	West
8	Northwest

Before setup, the party that won the **Setup Roll-off** designates one battlefield edge as North. In Grid Mode, diagonal directions follow the diagonal between the corresponding orthogonal directions. Move the required distance in that direction, stopping at the last legal position if terrain, a battlefield edge, or another combatant blocks further movement.

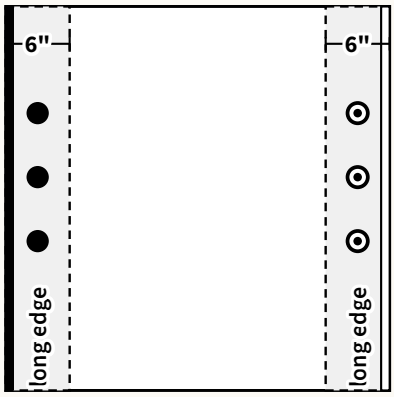
Battlefield Edges: The North and South battlefield edges are the **short battlefield edges**, and the East and West battlefield edges are the **long battlefield edges**, even when the battlefield is square. A scenario or rule that names a short or long battlefield edge uses this designation. It does not change the battlefield's dimensions.

Preparation Steps

1. **Determine Average Party Level (APL).** Determine each party's APL as described in **Section 6.14**.
2. **Choose Climate.** Select or randomly determine the Climate using **10.1.1 Climate and Core Scenario Selection**.
3. **Choose the Core Scenario.** Select or randomly determine the Core Scenario for that Climate using **10.1.1 Climate and Core Scenario Selection**.
4. **Generate Secondary Objectives.** Roll or choose from the Climate's Secondary Objective table. Record each result; do not place its markers or areas yet.

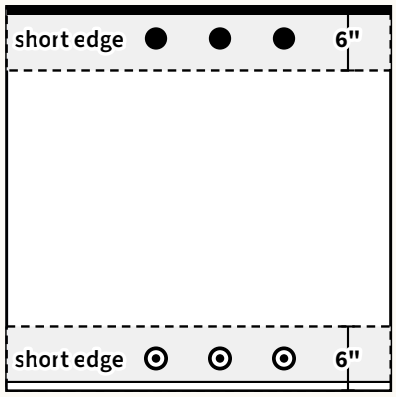
5. **Generate Weather.** Roll or choose from the Climate's Weather table. Record the result; do not place its markers or areas yet.
6. **Resolve the Setup Roll-off.** Make the **Setup Roll-off** unless the scenario replaces it with another procedure. Record the winning and losing parties for all later setup choices.
7. **Place Terrain.** Build the battlefield and place all major terrain features required by the scenario. If the scenario does not fully dictate terrain placement, parties alternate placing major terrain pieces, starting with the party that lost the Setup Roll-off. Major **Impassable Terrain** or **Blocking Terrain** cannot be placed within **3"** of a battlefield edge or within **6"** of a deployment zone unless the scenario says otherwise.
8. **Place Objectives and Markers.** Set up objectives, Treasure Chests, portals, ritual sites, hazards, and any other special markers required by the scenario, Secondary Objectives, or Weather. If Weather requires multiple markers and does not assign a placer, parties alternate placing them, starting with the party that lost the **Setup Roll-off**. Each marker must be legally placed and outside deployment zones unless the Weather says otherwise.
9. **Generate and Place Monsters.** Determine the required Monster Groups and place them according to the scenario and monster placement rules.
10. **Assign Guard Points.** Each Monster Group's Guard Point defaults to the nearest relevant objective, Treasure Chest, ritual site, altar, portal, wagon, prisoner, or central landmark nearest that group's starting position. Resolve exact ties with **Random Determination**. If no such feature exists, the group's Guard Point is its starting position.
11. **Deploy the Parties.** Resolve deployment exactly as the scenario instructs. Where the scenario is silent, the **Setup Roll-off** winner chooses their battlefield edge or corner zone and the other party takes the opposite one; each zone extends **6"** from its edge, a corner zone is **8"×8"**, and parties alternate placing Heroes, starting with the party that lost the **Setup Roll-off**.
12. **Begin Round 1.** Round 1 begins with the **Initiative Phase**.

A **Opposite long edges**



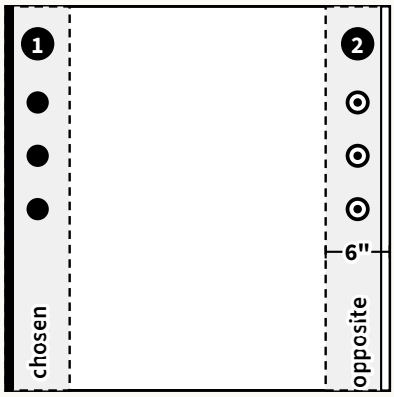
Each party deploys within 6" of its own long battlefield edge (6" is the 10.1 step 11 default where the scenario gives no depth).

B **Opposite short edges**



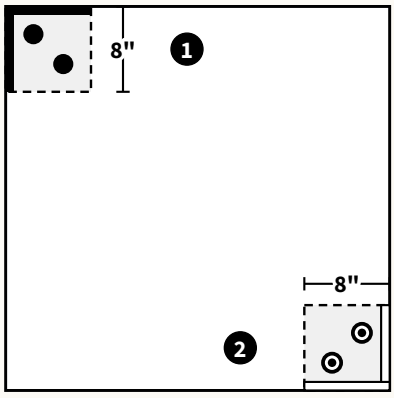
Each party deploys within 6" of its own short battlefield edge (6" is the 10.1 step 11 default where the scenario gives no depth).

C **Roll-off winner chooses the edge**



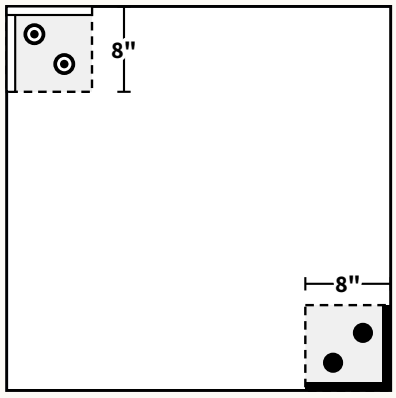
(1) The Setup Roll-off winner chooses the edge (a long edge, or any battlefield edge, as the scenario states; the 10.1 step 11 default where it is silent). (2) The other party takes the opposite edge. Both are within 6" of it.

D **Roll-off winner chooses a corner**



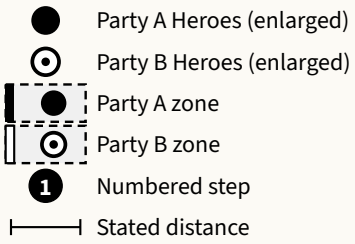
(1) The Setup Roll-off winner chooses an 8"×8" corner zone (as the scenario states; also the 10.1 step 11 default). (2) The other party deploys in the diagonally opposite corner.

E **Opposite corners, alternate placing**



Opposite 8"×8" corner zones. Parties alternate placing Heroes within their zone, starting with the party that lost the Setup Roll-off (stated, or the 10.1 step 11 default).

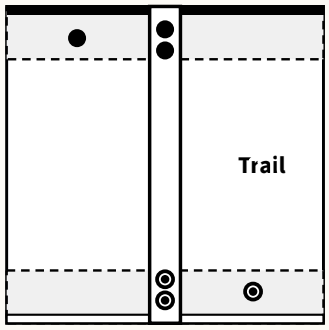
Key (full key: FIG-20)



Zones and bands are drawn to scale on a 36"×36" battlefield (4 pt per inch); Hero markers are enlarged. North and South are the short edges and East and West the long edges, even on a square battlefield (10.1). Each party may field 1–4 Heroes; two or three are shown. Where a scenario states no depth or zone size (Sun-Drowned 2 and 3, The Mire 3, 5 and 6), the 10.1 step 11 default applies: 6" from the edge, 8"×8" corners. Where it states no placing order (these, Pale City 1 and most edge scenarios), Heroes are placed alternately from the Roll-off loser. Where only "opposite battlefield edges" are named, the Roll-off winner chooses the edge.

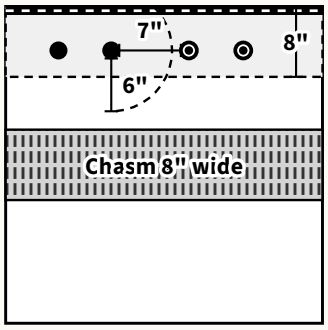
FIG-13. Deployment patterns used by the Core Scenarios, drawn on a 36"×36" battlefield: opposite long or short edges within 6", a Setup Roll-off winner's choice of edge or 8"×8" corner, and opposite corner zones with alternating placement. Where a scenario is silent, the 10.1 step 11 default supplies the 6" depth, the 8"×8" corner size and the placing order; key: FIG-20 (see 10.1 and each scenario's Party Deployment).

A **Trail**



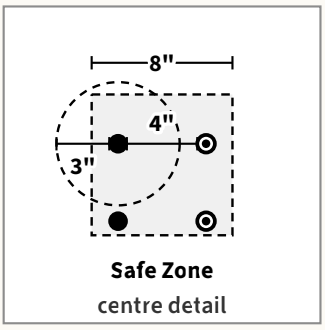
The Setup Roll-off winner chooses the short edge where the Trail enters and deploys within 6" of it with at least two Heroes on the Trail. The other party does the same at the opposite short edge. The Trail is 3–4" wide and runs the full length.

B **One shared edge**



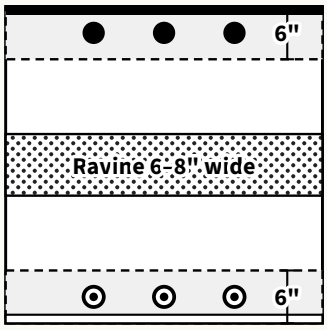
Both parties deploy along the same short edge (the start side of the Chasm) within 8" of it, placing Heroes alternately starting with the party that lost the Setup Roll-off. No Hero is placed within 6" of an opposing Hero.

C **Central Safe Zone**



Both parties deploy inside a central 8"×8" Safe Zone (shown enlarged: detail of the centre, 6.6 pt per inch), placing Heroes alternately starting with the party that lost the Setup Roll-off. No Hero is placed within 3" of an opposing Hero.

D **Across a Ravine**



Opposite short edges, within 6" of the edge, on higher ground outside the Ravine (6–8" wide, perpendicular to the long edges).

Key (full key: FIG-20) Party A Heroes (enlarged) · Party B Heroes (enlarged) · Party A zone · Party B zone · Zone both use · Ravine floor (Difficult Terrain) · Chasm · Open feature · Stated distance · Within the distance · 6–8" Range

Zones, the Trail, the Chasm and the Ravine are drawn to scale on a 36"×36" battlefield (3.3 pt per inch); Hero markers are enlarged. Zone-depth dimensions show the stated limits. In panels B and C no Hero is placed within the stated distance of an opposing Hero: the ring (B, 6", from a Party A Hero's edge; C, 3") marks that distance, and the dimension line between the nearest opposing Heroes runs between their closest edges (2.6), 7" in B and 4" in C, both outside the limit. Panel B is measured between drawn marker edges; panel C markers are drawn at their true 1" size. Where the source gives a range (Trail 3–4", Ravine 6–8"), a value inside the range is drawn and its position is schematic.

FIG-14. Special deployments: a Trail with at least two Heroes on it, one shared short edge within 8" (no Hero within 6" of an opposing Hero), a central 8"×8" Safe Zone (no Hero within 3" of an opposing Hero), and short edges either side of a Ravine; key: FIG-20 (see 10.4).

10.1 Preparation Steps

1. Determine Average Party Level (APL).
2. Choose Climate.
3. Choose the Core Scenario.
4. Generate Secondary Objectives: record only.
5. Generate Weather: record only.
6. Resolve the Setup Roll-off.
7. **Place Terrain.** Major Blocking or Impassable Terrain stays 3" from a battlefield edge and 6" from a deployment zone unless the scenario says otherwise.
8. Place Objectives and Markers.
9. Generate and Place Monsters.
10. Assign Guard Points.
11. **Deploy the Parties** as the scenario instructs. Where it is silent: the Roll-off winner chooses an edge or corner zone and the other party takes the opposite one; alternate placing Heroes, the Roll-off loser first.
12. Begin Round 1 with the Initiative Phase.

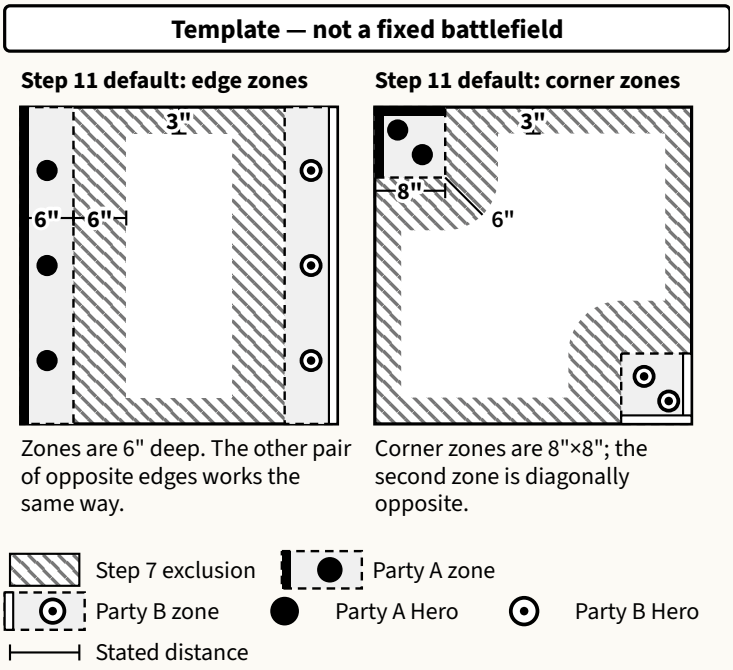


FIG-57. Template, not a fixed battlefield: the twelve Preparation Steps, with the step 11 default zones (6" deep or 8"×8" corners) and the step 7 limits on major Blocking and Impassable Terrain (3" from an edge, 6" from a zone); key: FIG-20 (see 10.1).

> *Example, Scenario Generation: Two parties begin a campaign skirmish with an APL of 3. They choose the Greenmark Climate, roll a Core Scenario using **10.1.1**, then each party rolls one Greenmark Secondary Objective and one Greenmark Weather result is rolled for the adventure. After terrain and Treasure Chests are placed, they generate four Monster Groups. One group starts beside a wagon, so that wagon becomes its Guard Point. Another group begins near the centre of the map with no closer landmark, so its starting position becomes its Guard Point.*

10.1.1 Climate and Core Scenario Selection

During **Step 2: Choose Climate**, select a Climate or roll **1d6** using the **Climate Roll** column below. During **Step 3: Choose the Core Scenario**, select a Core Scenario from that Climate or roll **1d6** and use the row with the matching **Scenario Roll**.

Objective at a Glance is a selection aid only. The complete scenario entry in **10.4 Core Scenario Outlines** is authoritative.

Climate Roll	Climate	Scenario Roll	Core Scenario	Objective at a Glance
1	Greenmark	1	Hunt the Wild Beast [Intro]	Escape with the Pristine Boar Pelt.
1	Greenmark	2	The Whispering Grove	Activate the most Standing Stones.
1	Greenmark	3	The Bandit's Toll	Defeat the Toll Captain and bank the most Coin Value.
1	Greenmark	4	The Spider's Silk Route	Extract the highest Coin Value in Spider Silk.
1	Greenmark	5	The Ambushed Emissary	Retrieve and escape with the Diplomatic Satchel.

Climate Roll	Climate	Scenario Roll	Core Scenario	Objective at a Glance
1	Greenmark	6	Ritual of the Old Growth	Steal the Heartwood Totem or protect the ritual.
2	Ashlands	1	The Fallen Observatory [Intro]	Extract the greatest Coin Value in Observatory relics.
2	Ashlands	2	The Guardian's Test	Complete the Trials and claim the Vault Keystone.
2	Ashlands	3	The Shifting Sands of Time	Secure the most Coin Value from shifting Treasure Chests.
2	Ashlands	4	The Sealed Archive	Extract the Archive Codex.
2	Ashlands	5	The Reliquary of Broken Saints	Steal the Reliquary or complete the Ritual of Quiet.
2	Ashlands	6	The Iron-Vein Vault	Seal the Vault or break it open and extract the Vault Record.
3	Undermarches	1	The Crystal Harvest [Intro]	Extract the highest Coin Value in Crystal Clusters.
3	Undermarches	2	The Chasm Crossing	Carry the Survey Map to the Cartographer's Stone.
3	Undermarches	3	The Quake	Mine and extract the most Gemstone value.
3	Undermarches	4	The Undermarches Outpost Raid	Steal the Battle Plans and defeat the Outpost Commander.
3	Undermarches	5	The Shadowed Under Passage	Steal the Heart of Shadow or consecrate every Font.
3	Undermarches	6	The Ritual of Shadow Binding	Disrupt the ritual or bind the Shadow Spirit.
4	Pale City	1	Plunder of the Frozen Ruins [Intro]	Extract the highest Coin Value from Arcane Treasure Chests.
4	Pale City	2	The Alchemist's Frozen Laboratory	Extract the most Alchemical Reagents.
4	Pale City	3	The Haunted Mausoleum	Extract the most Coin Value in Ancient Heirlooms.
4	Pale City	4	The Clockwork Menagerie	Defeat the Guardians and extract the most Clockwork Cores.
4	Pale City	5	The Ice Wyrm's Hoard	Defeat the Ice Wyrm and loot the Central Hoard.
4	Pale City	6	The Icebound Court	Defeat the Magistrate and escape with your assigned relic.
5	Sun-Drowned	1	The Oasis Raiders [Intro]	Defeat the Raider Chieftain and control the Wellspring.
5	Sun-Drowned	2	The Cinder Lord's Lost Brazier	Find and attune the Lost Brazier.
5	Sun-Drowned	3	Tomb of the Sunken Kings	Extract the most Coin Value from Royal Sarcophagi.
5	Sun-Drowned	4	The Sandwyrm's Lair	Defeat the Great Sandwyrm and loot the Hoard.
5	Sun-Drowned	5	The Cursed Colossus of the Waste	Retrieve and extract the Heartstone.
5	Sun-Drowned	6	The Cinder Lord's Obsidian Prison	Reinforce the prison or free the Cinder Lord.
6	The Mire	1	The Reliquary of Edrava Salttide [Intro]	Retrieve and extract Salttide's Reliquary.

Climate Roll	Climate	Scenario Roll	Core Scenario	Objective at a Glance
6	The Mire	2	The Lizardfolk's Stolen Offerings	Recover the Sunstone Amulet or steal Offering wealth.
6	The Mire	3	The Mire Titan's Fen	Defeat the Mire Titan or extract enough Geodes.
6	The Mire	4	The Blighted Heartwood	Destroy the Heartwood or complete the Syphon.
6	The Mire	5	Salttide's Reckoning	Break the curse or complete the Curse Ritual.
6	The Mire	6	The Serpent's Sunken Hoard	Defeat the Great Swamp Serpent and recover the Sunken Hoard.

Competitive Matched Play Variant

For tighter competitive play, use the following optional setup changes:

- Do not roll on **Weather Tables**. The battle uses no weather effect unless a scenario explicitly says otherwise.
- Use only the **first listed Secondary Objective** for the chosen climate as one shared objective; do not generate a second Secondary Objective. Both parties may attempt it.
- Apply **10.6 Dynamic Party and Scenario Scaling** normally, including fixed Hero AP, random Monster Groups, and objective scaling. If the parties' **APL** values differ, also apply the **Lower-APL Party Bonus** in **10.6.3**.

Secondary Objective Draft Variant

For matched play that keeps random Secondary Objectives while reducing objective luck, use this optional rule in place of the normal Secondary Objective generation in **10.2**. Each party rolls twice on the Secondary Objective table for the adventure's current Climate, rerolling any result already rolled during this step, then keeps one of its two results and discards the other. Both kept Secondary Objectives are open information. Resolve placement and all other Secondary Objective rules normally, starting with the party that won the Setup Roll-off. Do not combine this variant with the fixed Secondary Objective rule in the **Competitive Matched Play Variant**; use one or the other.

10.2 Secondary Objectives by Climate

After the Core Scenario is determined, each party generates one Secondary Objective. Solo and cooperative play therefore uses one Secondary Objective; competitive play normally uses two.

Generating Secondary Objectives. Each party rolls **1d20** on the Secondary Objective table for the adventure's current Climate. If the second party generates the same Secondary Objective as the first party, the second party rerolls until the results differ. During **Step 8: Place Objectives and Markers**, the parties alternate placing any markers or designating any terrain areas required by their rolled Secondary Objectives, starting with the party that won the Setup Roll-off. These placements cannot directly obstruct the Core Scenario's Primary Objective markers or Hero deployment zones unless the Secondary Objective specifically requires such an interaction.

Two Secondary Objectives are normally active in a competitive adventure; one is active in solo or cooperative play. In competitive play, both parties may attempt to complete or interact with either objective unless the objective's description specifies it is exclusive or competitive.

Interaction Template. Secondary Objectives and Core Scenarios use the same template throughout this section. **Setup**, **Trigger**, **Interact [X AP]**, **Success**, **Failure**, **Reward**, and **Special Rules** appear in bold wherever applicable. If an entry omits a field, that field has no effect for that entry.

Secondary Objective Reward Bands. Secondary Objective coin rewards use fixed bands. An easy Secondary Objective is worth **1 × (2 + (4 × APL)) Coins**. A routine Secondary Objective is worth **2 × (2 + (4 × APL)) Coins**. A risky Secondary Objective is worth **3 × (2 + (4 × APL)) Coins**. A hard Secondary Objective is worth **4 × (2 + (4 × APL)) Coins**. A severe Secondary Objective is worth **5 × (2 + (4 × APL)) Coins**. An exceptional Secondary Objective is worth **6 × (2 + (4 × APL)) Coins**. Use these values for the coin portion of a Secondary Objective reward unless that entry grants a specific non-coin item, token, Power effect, or scenario exception.

Resolving Interactions. When a Hero interacts with a scenario element, resolve in this order: confirm the Hero is in the required position, spend the listed AP, make any required **Check**, then resolve **Success** or **Failure** and apply any **Reward** or follow-up effect.

If an interactable element does not list a **Failure** result, a failed **Check** produces no effect beyond the spent AP and any risk already named in that entry. If an element can be carried, dropped, extracted, destroyed, or handed off, its own entry overrides default carry and extraction rules.

Climate 1: Greenmark Secondary Objectives (1d20)

1. Altar of the Antlered Path.
Setup: Place a 1"×1" **Standing Stone Altar** marker in a secluded, wooded section, at least **8"** from any battlefield edge or Primary Objective. *The stone is marked with three impact dents, slightly warmer than the surrounding rock.*
Interact [2 AP]: Make a **SPI Check**.
Success: That party gains **2 × (2 + (4 × APL)) Coins**. The Hero receives a **Warding Charm** scenario reward token. Once per adventure, before that Hero rolls one defensive **Check** or one **AD**, they may consume the token to gain **Advantage** on that roll or add **+2** to that **AD** result. The Altar crumbles.
Failure: Place **1 Dire Wolf** adjacent to the Hero, using the canonical bestiary entry. The Dire Wolf gains the **Incorporeal** Special Ability for the duration of this adventure. The Dire Wolf is **Awake** and hostile and yields **0 CV**.

2. Lost Hunter's Secure Cache.
Setup: Place a **Secret Cache** marker (1") at the base of a prominent tree or rock.
Interact [1 AP]: Make an **INT Check**.
Success: That party gains **2 × (2 + (4 × APL)) Coins** and one **Healing Potion**.
Failure (or looted without first resolving the listed Interact procedure): Resolve the Snare hazard (**DEX Check** or **1d4 piercing damage**). Contents are still available after the hazard resolves.

3. Sunpetal Bloom.
Setup: Place one **Sunpetal Flower** marker (1") in an open clearing.
Interact [1 AP]: Make a **DEX Check** (Careful Picking).
Success: The Hero harvests the bloom as a carried objective. If carried by an escaping Hero, it is worth **4 × (2 + (4 × APL)) Coins**. Once per adventure, the carrying Hero can crush it **[0 AP]** to grant themselves or an **Engaged** ally **+1 AP** immediately.
Failure: The delicate flower is crushed and lost. No reward.

4. Goblin Ambush Signposts.
Setup: The rolling party places three **Signpost** markers (1") along pathways, at least **6"** apart.
Interact [1 AP]: Make an **INT Check** to read the Signpost.
Success: Reading it neutralizes it. For each deactivated signpost, the party gains **1 × (2 + (4 × APL)) Coins**.
Special Rules: The first time a Hero moves within **2"** of an active Signpost without first reading it successfully, mark that Signpost as triggered and place **1d3 Beastman** within **3"** of it, using the canonical bestiary entry. The placed Monsters are **Awake** and hostile. A triggered Signpost cannot trigger again or be neutralized.

5. Sacred Deer of the Grove.
Setup: Place a **Majestic Stag** marker (**HP 6 | AV 0 | SPD 8" | Sz M | LVL 2**, Neutral Beast) in a central wooded area. The Stag has no attacks or AP, takes no actions or Reactions, does not activate, and may be targeted normally.
Reward: If unharmed and on the battlefield at the end of Round 5, they vanish, leaving a **Fey-Touched Antler** scenario reward token. The party whose Hero is closest to the token claims it. Once during this adventure, the bearer gains **Advantage** on one **SPI Check** made to resist an effect that would apply **Frightened**, **Sleeping**, or **Silenced**, or force their movement, attacks, or target choices, caused by a forest spirit, Fey ancestry rule, or Greenmark scenario effect. If the Stag is secured instead, they are a carried objective worth **5 × (2 + (4 × APL)) Coins** if escaped with.
Special Rules: The Stag flees if they take damage, if a Monster moves within **3"**, or if a Check to secure them fails. When the Stag flees, immediately move them up to their **Speed** along the shortest legal path toward the nearest battlefield edge; determine ties randomly. If they reach an edge, or are reduced to **0 HP**, remove them and fail this objective. A Hero adjacent to the Stag may use **Interact [2 AP]** and pass a **SPI Check** to calm and secure the Stag as a carried objective; while secured, the Stag does not flee.

6. Entangling Bramble Patch.
Setup: Designate a **4"×4"** area as Dense Brambles. The area is **Difficult Terrain**. Place a Lost Satchel marker in the centre.
Interact [1 AP]: A Hero adjacent to the Lost Satchel may make a **DEX Check** to retrieve it.
Success: The Hero retrieves the Lost Satchel.
Failure: That Hero becomes **Immobilized** until they spend **1 AP** to free themselves. That Hero then suffers **1 piercing damage**.
Reward: Retrieving the Lost Satchel grants **3 × (2 + (4 × APL)) Coins** and a **Thorn-Woven Charm** scenario reward token. Once during this adventure, when an enemy makes a melee attack against the carrying Hero, the Hero may consume the token before damage is rolled. The attacker suffers **1d4 piercing damage** after the triggering attack resolves.
Special Rules: A Hero moving through the Dense Brambles must make a **DEX Check** for each **1"** moved. On a failure, that Hero becomes **Immobilized** until they spend **1 AP** to free themselves.

7. Abandoned Hunter's Lean-To.
Setup: Place a **Lean-To** marker (2"×1") against a battlefield edge or large terrain piece.
Interact [1 AP]: Make an **INT Check**.
Success: The Hero finds **1d2** useful items (**d6**: 1–2 **Bandages**, 3–4 **Snare**, 5 **Healing Potion**, 6 **Oil of Lesser Sharpness**) and **1 × (2 + (4 × APL)) Coins**.
Failure: Disturbs a Stirge nest. Place **1d3 Stirge** adjacent to the Hero, using the canonical bestiary entry. The placed combatants are **Awake** and hostile.

8. Sleeping Forest Guardian.
Setup: Place one **Dire Wolf** if **APL** is **1–2**, or one **Dire Bear** if **APL** is **3+**, in a cave or thicket, using the canonical bestiary entry. The Guardian

starts **Resting**. Each time a wake trigger from **9.4** other than suffering damage occurs, roll **1d6**: the Guardian becomes **Awake** only on a **6**. The Guardian becomes **Awake** immediately if they are touched, attacked, or damaged.
Reward: If the party whose objective this is completes the Core Scenario's Primary Objective without waking the Guardian, that party gains **4 × (2 + (4 × APL)) Coins**.
Special Rules: An **Awake** Guardian that becomes **Sleeping** does not return to **Resting**, and the Guardian counts as woken for the Reward. While the Guardian is **Resting**, they are not **Sleeping** and gain no vulnerability from that condition.

9. Runestone of Shifting Paths.
Setup: Place a **Runestone** marker (1") in the centre of the battlefield.
Interact [2 AP]: Make an **INT Check**.
Success: That party gains **2 × (2 + (4 × APL)) Coins**. They may immediately choose up to two non-objective terrain pieces (max 3"×3" footprint) and instantly swap their positions on the battlefield. Each piece must fit entirely and be legal in the other's former footprint; if the swap is not legal, choose a different pair or move neither piece.
Failure: Disorienting pulse. The interacting Hero and all combatants within **3"** become **Stunned**.

10. Spider Nest Infestation.
Setup: Designate a ruined building/dense terrain as a "Spider Nest". Place **1d3+1 Egg Sac** markers within it.
Reward: Destroying a sac yields **1 × (2 + (4 × APL)) Coins**. The party that destroys the most sacs gains **1 Antitoxin**.
Special Rules: An Egg Sac has **HP 1** and **AV 0** and may be targeted by attacks. When a sac is destroyed, roll **1d4**. On a **1–2**, place **1 Giant Tarantula** adjacent to the attacker, using the canonical bestiary entry. The Giant Tarantula is **Awake** and hostile.

11. Lost Child's Trail.
Setup: Place "Small Footprint 1" and "Small Footprint 2" markers in a line toward a specific battlefield edge.
Interact [1 AP]: Make an **INT Check** (Tracking). Footprint 2 cannot be tracked until Footprint 1 has been tracked successfully.
Success: Mark that Footprint as tracked.
Reward: Successfully tracking both Footprints in sequence reveals a "Lost Child" NPC (HP 3 | AV 0 | SPD 4" | Sz S | LVL 0; no attacks; **Special Ability: Small**) within **2"** of Footprint 2. A Hero adjacent to the Child uses **Interact [1 AP]** to begin escorting them. The Child moves with the escorting Hero, remaining within **2"** at all times; if the Hero cannot move, the Child does not move. If the escorting Hero is Defeated, the Child stands in place until a Hero begins escorting them again. Escorting the Child off any battlefield edge grants that party **6 × (2 + (4 × APL)) Coins** and **1 Luck Point** to the escorting Hero.

12. Wind-Chime Warning System.
Setup: The rolling party places **1d3 Wind Chime** markers (1") hanging from trees or ruin features, each at least **4"** apart.
Interact [1 AP]: A Hero adjacent to a Wind Chime may make a **DEX Check** to silence it.
Success: The chime is silenced and removed from play.
Failure: The chime remains active.
Reward: The first time a Wind Chime jingles due to an enemy Hero, the placing party gains **2 × (2 + (4 × APL)) Coins**. In solo or cooperative play, the first jingle caused by a Monster grants this reward instead.
Special Rules: If any combatant ends a **Move** within **2"** of a Wind Chime, the chime jingles. The first qualifying jingle grants the listed **Reward**. On the next later jingle from that chime, roll **1d4** once, then mark that chime as spent for this rule. On a **1**, place one Beast or Goblin encounter from the Greenmark Random Monster Table within **1"** of that chime at the start of the next **Monster Phase**. Use an encounter whose total **LVL** is no greater than half **APL**, minimum **1**. If no such encounter is available, place **1 Dire Wolf** instead. A spent chime cannot generate another encounter.

13. Desperate Poacher's Last Stand.
Setup: Place a Wounded Poacher NPC (HP 4 | AV 0 | SPD 3" | Sz M | LVL 0; no attacks; does not activate; a legal Monster target) **Engaged** with one **Dire Wolf** if **APL** is **1–2**, one **Dire Bear** if **APL** is **3–4**, or one **Gorebeak Bear** if **APL** is **5+**.

Use the canonical bestiary entry for the chosen creature.
Trigger: The Poacher is saved if the party defeats the creature before the Poacher is defeated.
Reward: If the creature is defeated before the Poacher, the party that dealt the killing blow to the creature gains **A Hunter's Guide** scenario reward item or **3 × (2 + (4 × APL)) Coins**, that party's choice. Once during this adventure, before the bearer makes the Check required by a simple hazard's own **Interact** procedure, they may consume **A Hunter's Guide** to treat that Check as a success.

14. Fey Circle of Illusions.
Setup: Place a 2" diameter **Mushroom Ring** marker.
Trigger: The first Hero to enter the Mushroom Ring must make a **SPI Check**.
Success: That Hero gains **Advantage** on **Checks** made to disbelieve illusions until the end of the next round. That party gains **2 × (2 + (4 × APL)) Coins**.
Failure: The Hero perceives one random allied Hero as an enemy until the end of the round. They must choose that Hero as the target of their next attack this round if able, but that attack rolls its base damage dice with **Disadvantage**. The ring then vanishes.

15. Alpha Predator's Territory.
Setup: Designate one battlefield quadrant as "Alpha Territory". Place one **Dire Wolf** if **APL** is **1–2**, one **Dire Bear** if **APL** is **3–4**, or one **Gorebeak Bear** if **APL** is **5+** within that quadrant. Use the canonical bestiary entry for the chosen creature. They begin **Awake** and hostile.
Reward: Defeating the creature yields a **Predator's Trophy** scenario reward token worth **4 × (2 + (4 × APL)) Coins**. The party gains an additional **1 × (2 + (4 × APL)) Coins** if no allied Hero entered the creature's territory before they were defeated.

16. Ancient Tree of Wisdom.
Setup: Mark one large Tree terrain piece.
Interact [2 AP]: Make a **SPI Check**. Max 1 attempt per Hero.
Success: The next time during this adventure any Hero in that party would suffer a Wound from the Injuries Table (not True Death), that Wound is negated. The party finds **1 × (2 + (4 × APL)) Coins**.
Failure: Roots attempt to entangle. The Hero makes a **DEX Check**. On a failure, they become **Immobilized**.

17. Blighted Effigy.
Setup: Place a 1" effigy (HP 10, AV 1) with an **Aura 2"**: a Hero ending their activation in the Aura must pass a **STR Check** or become **Weakened**.
Reward: Destroying it ends the Aura and grants **3 × (2 + (4 × APL)) Coins**. Upon destruction, place **1d2 Thornling Sprouts** (HP 1 | AV 0 | SPD 5" | Sz S | LVL 1 | CV 0; **Attacks:** Claw, **1d4 slashing damage**; **Special Abilities: Small**; **Plant**) adjacent to the destroyed effigy. They are **Awake** and hostile.

18. Nymph's Hidden Pool.
Setup: Place a 1" Pool marker.
Interact [1 AP]: Drink. Max 2 Heroes per party total.
Reward: The first Hero from each party heals **1d6 HP**. The second Hero from each party gains **1 Luck Point**.

19. Contested Grove of Offerings.
Setup: Place a 3"×3" grove within **8"** of the battlefield centre. The grove contains **3 Offering** tokens, worth **2 × (2 + (4 × APL)) Coins** each.
Interact [1 AP]: A Hero adjacent to an Offering token and not **Engaged** may pick it up as a carried objective.
Special Rules: If an attack or harmful Power is resolved against a combatant inside the Grove, at the end of that round one randomly determined uncarried Offering token is desecrated and removed from play. At the adventure's end, one Hero (chosen by their party) in the party carrying the most Offering tokens gains **+1 Luck Point** for that party's next adventure.

20. Ritual of the Antlered Lord.
Setup: Place a 2" Ritual Site marked with antler-scratched runes. The rolling party is the **Ritualists**, the opponent is the **Disruptors**.
Interact [2 AP]: A Ritualist Hero adjacent to the site may make an **INT Check** to advance the ritual by **1** success. The ritual needs **3** net successes.
Interact [2 AP]: A Disruptor Hero adjacent to the site may make a **SPI Check** to defile the site

and remove **1** ritual success.
Reward: If the Ritualists reach 3 net successes by the end of Round 6, they gain **6 × (2 + (4 × APL)) Coins** and the **Antlered Boon** campaign reward: at the start of that party's next adventure, that party may place **1 allied Dire Wolf Summon**, using the canonical bestiary entry's HP, AV, Speed, Size, attacks, and Special Abilities. Treat "this Monster" in those imported rules as "this Summon." They have **2 AP**, activate during the **Party Phase**, do not use Monster AI or AI Steps, count against the party-wide Summon cap, and are removed at the end of **Round 2**. If the ritual does not reach 3 net successes by the end of Round 6, the Disruptors gain **4 × (2 + (4 × APL)) Coins** and the **Defiler's Mark** campaign reward: once during that party's next adventure, at the start of one **Monster Phase**, one Monster Group of that party's choice rolls its base damage dice with **Disadvantage** until the end of that phase.
Special Rules: Ritualists and Disruptors use separate interactions with the site.

Climate 2: Ashlands Secondary Objectives (1d20)

1. Warm Reliquary.
Setup: Place a 1" **Iron Reliquary** marker in a ruined alcove or crypt corner, at least **6"** from the Primary Objective.
Interact [1 AP]: A Hero adjacent to the Reliquary may attempt to claim it. Make a **SPI Check**.
Success: The Hero takes the Reliquary as a carried one-shot consumable. Once per adventure, the Hero may open the Reliquary as **[1 AP]**. One enemy within **2"** suffers **2d8 necrotic damage** and must pass a **SPI Check** or become **Frightened** until the end of their next activation. The Reliquary is then empty.
Failure: The Reliquary pushes back. The Hero suffers **1d6 necrotic damage**. The Reliquary may be reattempted on a later activation.
Reward: The Reliquary is worth **4 × (2 + (4 × APL)) Coins** if sold during the **Town Phase** at **The Arcane Spire** or **The Grand Hall**.
The Reliquary is warm to the touch. It is always warm. One of Mordain Kest's bindings, never recovered, surfacing again. Heroes who carry it report hearing a voice that does not belong to them.

2. Sealed Sarcophagus Chamber.
Setup: Place a "Sealed Door" blocking a 2"×2" alcove against a ruin wall.
Interact [2 AP]: Make a **STR Check** to force it.
Reward: Contains a Treasure Chest yielding **1 Treasure roll with Disadvantage** and one **Silvered Dagger**.
Special Rules: When the door is opened, roll **1d6**. On a **1–2**, place **1d2 Skeleton Warriors** inside the chamber, using the canonical bestiary entry. The placed combatants are **Awake** and hostile.

3. Animated Statue Hazard.
Setup: Place an ornate statue (**Impassable Terrain**). Do not place its Guardian yet.
Reward: Defeating the Guardian yields their **CV** plus a **Clockwork Heart** worth **3 × (2 + (4 × APL)) Coins**.
Special Rules: The first time a Hero ends their activation within **2"** of the statue or uses **Interact** with it, mark the statue as triggered and place **1 Skeleton Warrior** if **APL** is **1–2**, **1 Stone Sentinel** if **APL** is **3–5**, or **1 Iron Golem** if **APL** is **6+**, adjacent to the statue, using the canonical bestiary entry. The Guardian is **Awake** and hostile. The statue cannot trigger again.

4. Pressure Plate Alarm.
Setup: Rolling party places **1d3** "Pressure Plates" (1"×1") in open floor spaces.
Interact [1 AP]: A Hero adjacent to an untriggered Pressure Plate may make a **DEX Check** to disable it.
Reward: Each disabled Pressure Plate grants that party **1 × (2 + (4 × APL)) Coins**. If one party disables every placed Pressure Plate before any Plate triggers, that party gains an additional **2 × (2 + (4 × APL)) Coins**.
Special Rules: The first combatant to move onto a plate triggers a loud alarm. All **Resting** Monster Groups within **10"** immediately become **Awake**. Plates are one-use.

5. Prophetic Mural Fragment.
Setup: Designate one large flat ruined wall.
Interact [1 AP]: Make an **INT Check**.
Success: The Hero deciphers a prophecy. Once per adventure, that Hero can force an enemy targeting them or an ally within **3"** to choose a different valid target. That party gains **1 × (2 + (4 × APL)) Coins**.

6. Rigged Offering Urn.
Setup: Place an **Ornate Urn** marker (1").
Interact [1 AP], Inspect: A Hero adjacent to the Urn may make an **INT Check** to identify the danger. On a success, reveal that the Urn is rigged. On a failure, nothing happens.
Interact [1 AP], Neutralize: A Hero adjacent to the Urn may make a **DEX Check** to neutralize it before looting.
Success: The Urn is neutralized. The Hero may loot it and make **1 Treasure roll**.
Failure: The Urn explodes. The interactor suffers **1d6 fire damage**, and each other combatant within **1"** suffers **1d4 fire damage**. The coins are lost.
Reward: A neutralized Urn yields **1 Treasure roll**.

7. Restless Grave Spirit.
Setup: Designate a **Disturbed Grave** marker.
Interact [1 AP]: Make an **INT Check** to search the grave after the spirit is dealt with.
Success: Reveal the Memento of Regret.
Failure: Nothing is found.
Reward: The party gains a Memento of Regret worth **2 × (2 + (4 × APL)) Coins**.
Special Rules: When the first Hero moves within **3"** of the Disturbed Grave, place **1 Possessed Corpse** if **APL** is **1–2**, **1 Spectre** if **APL** is **3–5**, or **2 Spectres** if **APL** is **6+**, adjacent to that Hero, using the canonical bestiary entry. The placed combatants are **Awake** and hostile to that party.

8. Oracle Head's Cryptic Clue.
Setup: Place a "Stone Oracle Head" (1").
Interact [1 AP]: Ask the opposing party one yes/no question about the location or status of one Primary Objective marker or one Monster Group. The opposing party must answer truthfully. In solo and cooperative play, instead reveal the identity and full composition of one **Resting** Monster Group chosen by the allied side.
Reward: The first interacting party also finds **1 × (2 + (4 × APL)) Coins**.

9. Scattered Legionnaire's Gear.
Setup: Scatter **1d3+1 Discarded Equipment** markers.
Interact [1 AP]: Examine the object or area.
Reward: Roll **1d6**: **1–2** broken gear worth **0c**; **3 Dagger**; **4 Spear**; **5 Round Shield**; **6 1 × (2 + (4 × APL)) Coins**.

10. Twin Levers Puzzle.
Setup: Place two "Levers" on opposite sides of a chokepoint (at least **8"** apart).
Interact [1 AP]: Pull one lever.
Reward: The compartment contains **4 × (2 + (4 × APL)) Coins** and a **Warding Gem** scenario reward item. Once during this adventure, the bearer may consume the gem to reduce one source of Power damage by **1d6**.
Special Rules: If both levers are pulled by Heroes from the same party in the same round, a secret compartment appears midway between them.

11. Vulture's Prize.
Setup: At the start of Round 2, place a "Fallen Adventurer" in an open area.
Reward: If Heroes reach the Fallen Adventurer before the Vultures descend, they find **2 × (2 + (4 × APL)) Coins** and one **Healing Potion**. If the Vultures descend first, the **Healing Potion** is gone, and the coins are reduced to **1 × (2 + (4 × APL)) Coins**.
Special Rules: If no Hero has reached the Fallen Adventurer by the end of Round 3, the Vultures descend.

12. The Bell Beneath.
Setup: Place a 1" **Buried Bell** marker in the deepest or most central chamber of the battlefield, at least **8"** from any deployment zone.
Trigger: The first time any Hero enters within **3"** of the Bell marker, they must immediately make a **SPI Check**.
Success: The Hero hears nothing. They gain **+1 Luck Point** usable only on the next **SPI Check** or Injuries Roll they make this adventure. The Bell marker is removed.
Failure: The Hero hears singing from below. They gain the **Heard the Song** condition (**-1 SPI**), as defined in **9.7 The Bestiary (The Voice Beneath the Bells)**. The Bell marker remains. The next Hero to enter within **3"** must also make the **SPI Check**. This continues until one Hero succeeds, at which point the Bell marker is removed.
Reward: The party that successfully silences the Bell (has a Hero succeed the **SPI Check**) gains **3 × (2 + (4 × APL)) Coins**. If the Bell is

never silenced, no reward is granted.
Special Rules: If **The Voice Beneath the Bells** is on the battlefield from any source, they immediately become **Awake** when the Bell marker is placed, regardless of their current state or distance. *It is considered impolite to ask a Hero what they heard.*

13. Rigged Pedestal.
Setup: Place a pedestal with a Gemstone.
Interact [1 AP]: Make a **DEX Check** to remove the Gemstone without triggering the gas.
Success: The Hero removes the Gemstone cleanly; no gas is released.
Failure: The Gemstone is retrieved, but the pedestal releases Paralysis Gas in **Aura 2"**. Each Hero in the area must pass a **STR Check** or become **Immobilized**.
Reward: The Gemstone is worth **5 × (2 + (4 × APL)) Coins**.

14. Illusory Treasure Pile.
Setup: Place a Large Treasure Pile marker that appears to be **3 Treasure Chests**.
Interact [1 AP]: A Hero adjacent to the Large Treasure Pile may make a **SPI Check** to test the illusion.
Success: The illusion is dispelled. Place the real Treasure Chest within **3"** of the Large Treasure Pile.
Failure: The Hero becomes **Stunned**, then the illusion vanishes.
Reward: The real Treasure Chest yields **2 Treasure rolls**. The party that dispelled the illusion has the first opportunity to loot it.
Special Rules: If a Hero uses **Interact [1 AP]** to loot the Large Treasure Pile without first testing the illusion, the illusion vanishes and that Hero resolves the **Failure** result. The pile is then removed from play.

15. Sand-Covered Map Stone.
Setup: Place a flat 2"×2" stone, mostly buried, within **6"** of the battlefield centre.
Interact [1 AP]: Uncover the stone. Track the AP each party spends on this objective. Each party that spends at least **1 AP** uncovering the stone gains **1 × (2 + (4 × APL)) Coins**.
Reward: When the stone is fully uncovered, the party that contributed the most AP chooses one: place a **Secret Exit** marker on any battlefield edge point at least **8"** from every deployment zone (its Heroes may escape or extract through that marker as if it were a legal battlefield edge), or gain **4 × (2 + (4 × APL)) Coins**. If contributions are tied, each tied party gains **2 × (2 + (4 × APL)) Coins** instead.
Special Rules: When a total of **4 AP** has been spent this way, the stone is fully uncovered.

16. Resonant Crystal Skull.
Setup: Place a crystal skull.
Reward: The first party whose Hero successfully casts a Power while within **3"** of the skull gains **2 × (2 + (4 × APL)) Coins**. If the skull never shrieks during the adventure, that party gains an additional **2 × (2 + (4 × APL)) Coins**.
Special Rules: Any Hero casting a Power within **3"** of the skull reduces that Power's **NRG** cost by **1**. Each time a Hero uses the skull, roll **1d6**. On a **1**, the skull shrieks; each Hero within **3"** must pass an **INT Check** or lose **1 AP** during their next activation.

17. Tomb Guardian's Test.
Setup: Mark a doorway "Sealed by Riddle".
Interact [1 AP]: Make an **INT Check** to pass.
Success: The door opens, and that party gains **3 × (2 + (4 × APL)) Coins** and **Advantage** on its next Initiative roll.
Failure: Place **1 Skeleton Warrior** if **APL** is **1–2**, **1 Stone Sentinel** if **APL** is **3–5**, or **1 Iron Golem** if **APL** is **6+**, adjacent to the door, using the canonical bestiary entry. The Guardian is **Awake** and hostile.

18. Haunted Sarcophagus.
Setup: Place one Sarcophagus.
Interact [1 AP]: Make a **STR Check** to open.
Reward: Contains **2 × (2 + (4 × APL)) Coins**.
Special Rules: When opened, place one **Possessed Corpse** if **APL** is **1–2**, or one **Spectre** if **APL** is **3+**, using the canonical bestiary entry. Place that combatant adjacent to the opener. They are **Awake** and hostile.

19. Weathered Obelisk of Omens.
Setup: Place a 3" tall obelisk.
Interact [1 AP]: Once per party, a Hero adjacent to the obelisk may make a **SPI Check**.
Success: That party gains **4 × (2 + (4 × APL)) Coins** and chooses one: the current Weather effect ends and does not apply for the rest of the adventure; or the party rolls once on this

climate's Weather Table and applies the new result for the rest of the adventure.

20. Sudden Sand Burial.
Setup: At the start of Round 3, the party that lost the Setup Roll-off chooses one Hero from each party.
Trigger: Each chosen Hero must immediately make a **DEX Check**.
Burial Check, Success: No effect.
Burial Check, Failure: The chosen Hero suffers **1d4 blunt damage** and becomes partially buried. A partially buried Hero is **Immobilized**.
Interact [2 AP], Escape: A partially buried Hero may make a **STR Check** to free themselves.
Escape, Success: Remove the partial burial and **Immobilized**.
Escape, Failure: The Hero remains partially buried.
Reward: The first party to free a Hero from the burial with the Escape **Interact** unearths buried valuables and gains **2 × (2 + (4 × APL)) Coins**.

Climate 3: Undermarches Secondary Objectives (1d20)

1. Unstable Rock Bridge Hazard.
Setup: Designate a 3" wide chasm. Place a 1" wide "Rock Bridge" (HP 15, AV 1).
Reward: The party causing the final collapse gains **2 × (2 + (4 × APL)) Coins** for demolishing the bridge.
Special Rules: If the Rock Bridge takes **5+ damage** from one source, or a Monster Group crosses it, roll **1d6**. On a **1–3**, a **1"** section crumbles.

2. Luminous Crystal Geode Harvest.
Setup: Place a "Geode" on a cavern wall.
Interact [2 AP]: Make a **STR Check** to crack it. After resolving the **Check**, roll **1d4**. On a **1**, choose the nearest **Resting Monster Group** whose total **LVL** is no greater than half **APL**, minimum **1**. That group becomes **Awake**. If no such group exists, place **1 Giant Tarantula** if **APL** is **1–2**, or **1 Giant Black Widow** if **APL** is **3+**, within **3"** of the Geode, using the canonical bestiary entry. The placed Monster is **Awake**.
Success: The first successful Hero gains **1 × (2 + (4 × APL)) Coins** and **1d2 Luminous Shards**. The second successful Hero gains **2 × (2 + (4 × APL)) Coins** and **1 Luminous Shard**. The Geode is then depleted. A **Luminous Shard** may be crushed to create a **Light Source with Aura 2"** until the end of the round, or sold for **1c**. All Luminous Shards gained from the same depleted Geode may instead be sold together as a matched set for **5c**.

3. Spider Ambush Ledge & Eggs.
Setup: Designate a high ledge (**Climb** to reach). Place **1d2** "Egg Sacs".
Interact [1 AP]: A Hero adjacent to an intact Egg Sac may collect it as a carried objective.
Reward: Destroying an Egg Sac yields **1 × (2 + (4 × APL)) Coins**. An intact Egg Sac is worth **2 × (2 + (4 × APL)) Coins** if extracted.
Special Rules: The first time a Hero moves within **2"** of an intact sac, mark that sac as triggered and place **1d2 Giant Tarantulas** if **APL** is **1–2**, or **1d2 Giant Black Widows** if **APL** is **3+**, adjacent to that Hero, using the canonical bestiary entry. The placed Monsters are **Awake** and hostile. Each sac can trigger only once.

4. Subterranean Spring of Vigour.
Setup: Place a "Bubbling Spring" (1").
Interact [1 AP]: Drink. Max 1 drink per Hero, 4 total across both parties.
Reward: The Hero heals **1d6 HP** and gains **+1 AP** during their next activation. The party that takes the fourth drink finds a Geode worth **2 × (2 + (4 × APL)) Coins**.

5. Cavern Fungus Grove (Hazard and Boon).
Setup: Designate a **4"×4"** square area as the "Fungus Grove" (**Difficult Terrain**).
Trigger: A Hero that enters the Fungus Grove or ends their activation in it must make a **SPI Check** unless they are already attuned.
Success: The Hero becomes attuned. Once during the rest of this adventure, they may add **+1d4** to one **d20** roll. The first party with two attuned Heroes gains **2 × (2 + (4 × APL)) Coins**.
Failure: Roll **1d4**: **1 Poisoned [d4]**; **2 Sleeping**; **3 Slowed**; **4 Weakened**.

6. Lost Miner's Final Stand.
Setup: Place "Skeletal Remains" in a dead-end.
Interact [1 AP]: Examine the object or area.
Reward: The Hero finds **2 × (2 + (4 × APL)) Coins** and a Journal. A Hero carrying the Journal may use **Interact [1 AP]** to read it. Reading it reveals

an **Unstable Wall** marker, placed by that Hero's party on any Cave Wall section at least **6"** from every battlefield edge. The Unstable Wall has **HP 10** and **AV 1**. When it is destroyed, the destroying party gains **2 × (2 + (4 × APL)) Coins**, and that wall section becomes a **2"** wide open passage.

7. Echoing Chasm of Nightmares.
Setup: Designate a large chasm.
Reward: If 3 echoes are triggered by one party, place **1 Giant Black Widow** if **APL** is **1–2**, or **1 Vrymk** if **APL** is **3+**, using the canonical bestiary entry. The placed Monster emerges **Awake** and hostile. Defeating them yields their **CV** plus **5 × (2 + (4 × APL)) Coins**.
Special Rules: An **Explosion**, or an attack, Power, or Special Ability whose rules text explicitly states that it produces a roar, scream, wail, shout, or other loud sound, causes an echo if resolved within **6"** of the chasm. The combatant that produced the sound must pass a **SPI Check** or become **Frightened**.

8. Kobold Scavenger Warren Exit.
Setup: Place a "Tunnel Exit" (1") on a battlefield edge.
Reward: If no Kobold escapes through the Tunnel Exit while carrying loot, the party that defeated the most Kobolds gains **2 × (2 + (4 × APL)) Coins**; if that count is tied, each tied party gains **1 × (2 + (4 × APL)) Coins**.
Special Rules: At the start of Round 3, place **1d3+1 Kobolds** within **1"** of the Tunnel Exit, using the canonical bestiary entry. They are **Awake**. Instead of normal AI, each Kobold moves toward the nearest unattended Treasure Chest or dropped carried objective and picks it up by ending their movement in contact with it; on later activations, they move toward the Tunnel Exit and escape when they reach it. A Kobold carrying loot that is defeated drops that loot in the space where they fell. Kobolds attack only while **Engaged**.

9. Ancient Cave Hazard (Swinging Log).
Setup: Place a "Tension Wire" across a chokepoint.
Interact [1 AP]: A Hero adjacent to the wire may make a **DEX Check** to secure it.
Success: The wire is secured and cannot trigger.
Failure: The wire triggers.
Reward: The party gains **3 × (2 + (4 × APL)) Coins** if the wire is secured.
Special Rules: The first combatant that crosses the wire triggers a swinging log. Each combatant in the **1"×3"** line behind the wire makes a **DEX Check**. On a failure, that combatant suffers **2d6 blunt damage** and falls **Prone**.

10. Predator's "Treasure" Lure.
Setup: Place a **Coin Pile** on a ledge. Do not place its hidden Monster yet.
Reward: The Coins are false. When the hidden Monster is defeated, place a Chest yielding **1 Treasure roll** in their space.
Special Rules: The first time a Hero uses **Interact** to take the Coins, remove the false Coin Pile and place **1 Giant Black Widow** if **APL** is **1–2**, **1 Vrymk** if **APL** is **3–4**, or **1 Cryptstrangler** if **APL** is **5+**, adjacent to that Hero, using the canonical bestiary entry. The Monster is **Awake** and hostile. If a Cryptstrangler is placed, the Hero must also pass a **STR Check** or be **Pulled** directly toward them until in contact and become **Immobilized** until they spend **1 AP** and pass a **STR Check** or **DEX Check** to escape.

11. Sulphur Pool & Geyser.
Setup: Place a 2"×2" Sulphur Pool with a Geyser Vent. A combatant ending their activation in the Pool suffers 1 acid damage.
Interact [2 AP]: Make a **STR Check** to cap the vent.
Success: Cap the vent.
Failure: The vent remains active.
Reward: The party that caps the vent gains **4 × (2 + (4 × APL)) Coins**.
Special Rules: At the start of each **Monster Phase**, roll **1d6**. On a **1–2**, the Geyser erupts in a **Line 3"**. Each combatant in the line makes a **DEX Check**. On a failure, that combatant suffers **1d8 fire damage** and is **Pushed 1"** directly away from the line's origin.

12. Predator's Glowing Lure.
Setup: Place a "Glowing Lure" in a dark pool.
Reward: Defeating the Lurker yields their **CV** plus a **Bioluminescent Pearl** worth **5 × (2 + (4 × APL)) Coins**.
Special Rules: The first time a Hero moves within **1"** of the Glowing Lure or uses **Interact** with it, remove the Lure and place **1 Giant**

Black Widow if **APL** is **1–2**, or **1 Vrymk** if **APL** is **3+**, adjacent to that Hero, using the canonical bestiary entry. The Lurker is **Awake** and hostile.

13. Deep Elf Ritual Remnants.
Setup: Place candles and an "Obsidian Knife" in an alcove.
Interact [1 AP]: Make an **INT Check** to examine.
Success: That party gains "Knowledge of Shadow Magic" (the next necrotic or **Darkness** Power a Hero in that party casts either deals an additional **1d4 damage of that Power's primary damage type** or lasts until the end of the next round; the caster chooses when casting) and **1 × (2 + (4 × APL)) Coins**.
Failure: The Hero suffers **Disadvantage** on their next **SPI Check** against an effect that causes **Frightened**.

14. Unstable Guano Platform.
Setup: Place a 3"×3" platform.
Reward: A secret strongbox in the pit yields **1 Treasure roll**.
Special Rules: Combatants on the platform fall **2"** into soft guano, suffer no damage, and become **Prone**. The platform collapses if two combatants are on it, or if an **Explosion** affects any part of it.

15. Chasm Echoes of Warning.
Setup: Mark a chasm "Echoing".
Interact [1 AP]: Shout one yes/no question about the location or status of one Primary Objective marker or one Monster Group. The opposing party must answer truthfully. In solo and cooperative play, instead reveal the identity and full composition of one **Resting** Monster Group chosen by the allied side.
Reward: That party gains **1 × (2 + (4 × APL)) Coins** for ingenuity.
Special Rules: This objective can be resolved once per adventure.

16. The Lodestone Anomaly.
Setup: Place a **Lodestone** token in a cavern chamber. It projects an **Aura 4"** magnetic field.
Special Rules: At the start of each round, **Pull** every combatant within **4"** of the Lodestone **1"** directly toward it. This forced movement does not trigger **Reflex Attack** and stops if blocked by terrain or another combatant. An AP-using non-Monster combatant in base contact with the Lodestone is **Immobilized** until they spend **1 AP** to wrench free. A Monster in base contact is **Immobilized** until the end of their next activation, then wrenches free automatically.
Interact [2 AP]: A Hero in base contact with the Lodestone pries loose its magnetic core, making a **STR Check**.
Success: The Hero claims the **Lodestone Core** as a carried objective worth **4 × (2 + (4 × APL)) Coins**, and the magnetic field ends.
Failure: The core holds fast; the Hero may try again.

17. Dormant Ember Guardians.
Setup: Place a vaguely humanoid rock formation. Place **2 Fire Beetles** if **APL** is **1–2**, **3 Fire Beetles** if **APL** is **3–4**, or **1 Fire Elemental** if **APL** is **5+**, within **1"** of the formation, using the canonical bestiary entry. The Guardians begin **Resting** and become **Awake** only as described below.
Interact [1 AP]: A Hero adjacent to the formation may deliberately awaken every Guardian.
Reward: Defeating every Guardian yields their normal **CV** plus a **Hearthstone** worth **5 × (2 + (4 × APL)) Coins**.
Special Rules: Every Guardian immediately becomes **Awake** if an **Explosion** occurs within **6"**, or if an effect within **6"** creates, destroys, collapses, or forcibly moves stone or earth terrain. They treat the combatant that caused the disturbance as their **Primary Target** until that target is no longer legal.

18. Flooded Section with Hidden Current.
Setup: Designate a **4"** long tunnel section as flooded. The flooded section is **Difficult Terrain**.
Trigger: Each Hero that moves through the flooded tunnel must make a **STR Check**.
Success: The Hero moves through the current without being displaced. The first party to navigate the tunnel without any failed **Checks** finds a pouch with **3 × (2 + (4 × APL)) Coins**.
Failure: The Hero is **Pulled 1d4"** by the current toward the nearest hazard, or toward the nearest battlefield edge if no hazard exists.

19. Geode of Minor Prophecy.
Setup: Place a Geode.
Interact [1 AP]: Make an **INT Check** to divine.
Success: The Hero gains one **Prophetic Boon**

token: once during this adventure, they gain **Advantage** on one **Check** made as part of an **Interact** with a Primary Objective element. The party finds **1 × (2 + (4 × APL)) Coins**. The Geode crumbles.

20. Rumbling Forewarning of Collapse.
Trigger: At the end of Round 2, each Hero on the battlefield makes a **SPI Check**.
Special Rules: The Hero that succeeds by the highest margin over **12** senses the coming collapse; resolve ties between parties with a **Setup Roll-off**, and ties within one party by that party's choice. That Hero chooses a **2"×2"** area at least **3"** from every deployment zone and marks it. At the start of the Round 3 **Monster Phase**, the ceiling above the marked area collapses: each combatant in the area makes a **DEX Check**; on a failure, they suffer **1d10 blunt damage**. If no Hero succeeds on the **SPI Check**, the collapse instead occurs centred on a randomly determined Hero's position.
Reward: The sensing Hero's party gains **2 × (2 + (4 × APL)) Coins**.

Climate 4: Pale City Secondary Objectives (1d20)

1. Precarious Icicle Formation.
Setup: Designate one ruined archway, high ledge, or overhanging building eave.
Trigger: The first time a combatant passes directly under the formation, or an **Explosion** or an effect that a rule describes as a tremor occurs within **3"**, massive icicles fall in a **1"×3"** line beneath it, dealing **1d10 piercing damage**. Each combatant in that line must make a **DEX Check**.
Success: The combatant suffers half that damage and does not become **Slowed**. The fallen icicles create a patch of **Difficult Terrain (1"×2")**.
Failure: The combatant suffers the full damage and becomes **Slowed**.
Reward: When a Hero first suffers damage from the falling icicles, the opposing party gains **2 × (2 + (4 × APL)) Coins** for springing the trap. In solo or cooperative play, the allied party instead gains **2 × (2 + (4 × APL)) Coins** if the falling icicles damage a Monster without damaging an allied Hero.

2. Frozen Sage's Locked Chest.
Setup: Place a **Frozen Chest** marker visibly encased in a block of ice (HP 10, AV 2, **Vulnerable:** fire, **Immune:** ice).
Interact [1 AP]: Make a **DEX Check** with Lockpicks to open it, or make a **STR Check** to force it open.
Reward: The reliquary yields **1 Treasure roll** and one roll on the **Tier 1 Scrolls** (**1d2**: **1** = Arcane, **2** = Divine).

3. Awakening Frozen Statue.
Setup: Place an ornate frozen statue of a warrior. Place **2 Frozen Skeletons** if **APL** is **1–2**, **1 Ice Elemental** if **APL** is **3–5**, or **1 Iron Golem** if **APL** is **6+**, adjacent to the statue, using the canonical bestiary entry. The Guardians begin **Resting** and become **Awake** only as described below.
Reward: Defeating every Guardian yields their normal **CV** plus a **Heart of Glacial Ice** worth **4 × (2 + (4 × APL)) Coins**. A Hero may use the **Heart of Glacial Ice [1 AP]** once during this adventure to extinguish normal fire in **Aura 2"**.
Special Rules: Every Guardian immediately becomes **Awake** and treats the nearest Hero as their **Primary Target** if a Hero touches the statue, attempts to loot one pre-designated Treasure Chest within **4"**, or resolves a magical fire effect within **3"**.

4. Icy Rune Hazard.
Setup: The rolling party places **1d2 Frost Rune** markers (1" each) on open floor spaces.
Interact [1 AP]: Make an **INT Check** to spot the rune before entering its space.
Interact [1 AP]: Make an **INT Check** to neutralize a spotted rune.
Reward: Neutralizing a rune grants **2 × (2 + (4 × APL)) Coins** per rune.
Special Rules: A Hero may examine a rune before entering its space. The first Hero to move onto an unneutralized rune triggers it. The triggering Hero and all combatants within **1"** suffer **1d6 ice damage**; each affected combatant may make a **DEX Check** to halve that damage. The triggering Hero's **Speed** is halved during their next **Move**.

5. Decipher Glacial Prophecy.
Setup: Faint etchings are visible on a large, smooth ice wall section.

Interact [2 AP]: Make an **INT Check** to decipher. Requires two successful **INT Checks** total (the successes may come from different activations or different Heroes in the same party).
Success: The next time a Hero in that party would suffer ice damage, that damage is negated.
Reward: That party finds a **Frozen Scroll Case** containing **1 × (2 + (4 × APL)) Coins**.
Special Rules: After each failed **Check**, roll **1d4**. On a **1**, create a patch of **Slippery Terrain** at the interactor's feet.

6. Ice-Bound Supply Cache.
Setup: Place a heavily iced-over crate as a **2"×2"** marker. The ice has **HP 20**, **AV 1**, and is **Vulnerable:** fire and **blunt**.
Trigger: Heroes may attack the ice normally.
Success: When the ice is reduced to **0 HP**, the cache opens.
Reward: The cache contains **1d3** uses of **Arctic Rations** and **1 Treasure roll**. A Hero may consume **Arctic Rations [0 AP]** to ignore ice weather damage until the end of the next round.

7. Lingering Spirit of the Frozen Watch.
Setup: Designate one ruined guard tower or outpost.
Trigger: When the first Hero enters the guard tower or outpost, place **1 Ice Wraith** adjacent to that Hero, using the canonical bestiary entry. The Ice Wraith begins **Resting** and non-hostile. Until they become hostile, they do not activate, are not an enemy, and are ignored by other Monsters.
Interact [1 AP]: A Hero adjacent to the Ice Wraith may make a **SPI Check** to pacify the Ice Wraith.
Success: The Ice Wraith points to a loose floorboard and fades. The Hero finds **3 × (2 + (4 × APL)) Coins** and a **Frozen Watchman's Horn** scenario reward token. Once per adventure, the bearer may use the token **[1 AP]** to grant allies within **6" +1 AV** until the end of the round.
Failure: After the **Interact** resolves, the Ice Wraith becomes **Awake** and hostile, then immediately makes one listed attack against the nearest legal target. The Ice Wraith yields normal **CV**, but the treasure is lost.
Special Rules: If any combatant attacks the Ice Wraith before they are pacified, then after that attack resolves the Ice Wraith becomes **Awake** and hostile and immediately makes one listed attack against the nearest legal target, if able. They yield normal **CV** once hostile.

8. Frozen Skeleton Lair Entrance.
Setup: A shimmering, web-like crack in ice (1" marker).
Interact [1 AP]: Make an **INT Check** to search.
Success: The Hero gains **Frozen Burial Hoard** worth **4 × (2 + (4 × APL)) Coins** and one **Masterwork Dagger**. The first attack made with that dagger during this adventure that damages a target deals an additional **1 ice damage**.
Special Rules: The first time a Hero moves within **2"** of the crack or Interacts with it, mark the crack as opened and place **1d2 Frozen Skeletons** within **2"** of the crack, using the canonical bestiary entry. They are **Awake** and hostile. The crack cannot trigger again.

9. Shifting Mirror Maze (Illusory Ice Walls).
Setup: Designate two 4" long sections of ruined walls or ice as "Illusory Ice Walls" (appear solid but can be moved through).
Special Rules: At the end of Round 2 and Round 4, the party with the lower total Coin Value chooses one Illusory Ice Wall; if tied, use **Random Determination**. That wall becomes solid **Blocking Terrain**, and one different solid wall becomes Illusory. An Illusory Ice Wall is **Open Terrain** and may be entered and moved through. For **LOS**, **Cover**, and Areas of Effect only, treat it as **Blocking Terrain**. A Hero adjacent to a wall may use **Interact [1 AP]** and make an **INT Check** to reveal whether that wall is solid or Illusory. The first party to move a Hero entirely through an Illusory Ice Wall gains **3 × (2 + (4 × APL)) Coins**.

10. Oracle's Frozen Scrying Shard.
Setup: A clear ice shard (1" marker) jutting from the ground.
Interact [2 AP]: Make an **INT Check** to gaze into it.
Success: Ask the opposing party one yes/no question about the location or status of one Primary Objective marker or one Monster Group. The opposing party must answer truthfully. In solo and cooperative play, instead reveal the identity and full composition of one **Resting**

Monster Group chosen by the allied side. That party gains **2 × (2 + (4 × APL)) Coins**.
Failure: The shard cracks, releasing a burst of cold. The interacting Hero suffers **1d4 ice damage**.

11. Haunted Ice Cave.
Setup: A small "Ice Cave Entrance" (1").
Interact [1 AP]: Enter and make a **SPI Check**.
Success: The Hero finds **1 × (2 + (4 × APL)) Coins** and a "Warmstone" (the wearer ignores ambient ice damage until the end of the second round after it is claimed).
Failure: Place **1 Spectre** if **APL** is **1–3**, or **1 Ice Wraith** if **APL** is **4+**, adjacent to the Hero and using the canonical bestiary entry. The placed combatant is **Awake** and hostile. The cave can be entered only once.

12. Thin Ice and the Sunken Relic.
Setup: Designate a **4"×4"** Thin Ice area over a frozen pool. Place a **Sunken Relic** token at its centre, visible through the ice.
Interact [2 AP]: A Hero on or adjacent to the Thin Ice chops through and lifts the Sunken Relic clear, making a **STR Check**.
Success: The Hero claims the **Sunken Relic** as a carried objective worth **4 × (2 + (4 × APL)) Coins**.
Failure: The ice gives way. The Hero suffers **1d6 ice damage**, becomes **Prone**, and the Relic remains in place.
Special Rules: The Thin Ice is **Difficult Terrain**. If an Explosion occurs within the Thin Ice area, every combatant standing on it falls through, suffering **1d6 ice damage** and becoming **Prone**.

13. Territorial Tundra Wolf Pack.
Setup: Place a "Dire Wolf Den" (1") near a battlefield edge.
Interact [1 AP]: Make an **INT Check** to search the den.
Success: The Hero gains **1 × (2 + (4 × APL)) Coins**.
Reward: Defeating the Alpha yields **4 × (2 + (4 × APL)) Coins** plus their CV.
Special Rules: The first Hero that moves within **6"** of the den triggers its pack. Place one **Dire Wolf** if **APL** is **1–2**, or one **Tundra Wolf** if **APL** is **3+**, using the canonical bestiary entry. If **APL** is **5+**, also place **1d2 Dire Wolves** using the canonical bestiary entry. The placed combatants emerge **Awake** and hostile. The first Monster placed by this rule is the **Alpha**.

14. Ice-Bound Treasure Chest (Double Locked).
Setup: A prominent Treasure Chest is visibly encased in thick ice (HP 10, AV 2, **Vulnerable:** fire). The chest is also locked.
Interact [1 AP]: After the ice is destroyed, make a **DEX Check** with Lockpicks to open the chest.
Interact [2 AP]: After the ice is destroyed, make a **STR Check** to force the chest open.
Reward: The cache yields **2 Treasure rolls** and a **Frost Brand Shard** scenario reward item. A Hero may attach the shard to one weapon with **Interact [1 AP]**. That weapon deals an additional **1 ice damage** during this adventure.

15. Lost Explorer's Insulated Tent.
Setup: A **Tent** marker (2"×2" terrain).
Interact [1 AP]: Make an **INT Check** to search the tent.
Success: The Hero gains **1 × (2 + (4 × APL)) Coins** and a "Climber's Kit" (**Advantage** on **STR Checks** to **Climb** for one Hero this adventure).
Special Rules: Heroes may enter the tent. Heroes inside the tent are **Immune** to negative weather effects in this scenario, including ice damage and **LOS** reduction. Only one party may search the tent successfully.

16. Crumbling Ice Archway.
Setup: Place a large ice archway as a **3"×3"** terrain feature spanning a key path. The archway has **HP 20** and **AV 1**.
Trigger: The archway may be destroyed by attacks or scenario effects.
Success: When the archway is reduced to **0 HP**, it collapses.
Reward: The party that caused the final collapse finds **Frozen Relics** worth **3 × (2 + (4 × APL)) Coins** in the debris.
Special Rules: When the archway collapses, replace it with a **3"×2" Difficult Terrain** area.

17. Glyph of Absolute Zero.
Setup: A barely visible glyph (1" marker) in a chokepoint.
Interact [1 AP]: Make an **INT Check** before entering to spot the glyph.
Interact [1 AP]: A Hero of the **Caster** or **Hybrid** archetype may make an **INT Check** to neutralize a spotted glyph.
Reward: Neutralizing the glyph grants **4 × (2 +**

(4 × APL)) Coins.
Special Rules: The first combatant to move onto it triggers an **Aura 3"** burst of extreme cold. Combatants in the area make a **DEX Check**. On a failure, each affected combatant suffers **2d6 ice damage** and becomes **Immobilized**. The glyph fades.

18. Aurora Shard Cascade.
Setup: None.
Trigger: At the start of Round 4, place **1d3** Aurora Shard markers randomly within **10"** of the centre.
Interact [1 AP]: The first Hero adjacent to an Aurora Shard may claim it.
Reward: A Hero may crush a claimed Aurora Shard **[0 AP]** to regain **1d4 HP** and remove one **Frightened** or **Stunned** condition from themselves. Each unused Aurora Shard is worth **2 × (2 + (4 × APL)) Coins** at the end of the adventure.

19. Frozen Sage's Hidden Study.
Setup: A ruined building has a **Secret Door** marker. A Hero outside and adjacent to it may use **Interact [1 AP]** and make an **INT Check** to spot it. Once spotted, an adjacent Hero may use **Interact [1 AP]** and make a **STR Check** to force it open.
Interact [2 AP]: A Hero inside the opened study may make an **INT Check** to search it.
Success: The Hero gains one **Scroll of Ice Ray** and **1 × (2 + (4 × APL)) Coins**. In addition, that party's next damage roll against the Core Scenario's scenario-specific Monster is made with **Advantage**.

20. The Aurora Lens.
Setup: Place an **Aurora Lens** token at the battlefield centre and two **Focus Pedestal** tokens on opposite sides of it, each within **9"** of the Lens.
Interact [1 AP]: A Hero adjacent to a Focus Pedestal rotates it to catch the polar light. Each Focus Pedestal can be aligned once.
Special Rules: When both Focus Pedestals have been aligned, the Aurora Lens ignites with refracted light.
Reward: When the Lens ignites, the party that performed more of the two alignments gains **3 × (2 + (4 × APL)) Coins**; if each party aligned one Pedestal, the party that aligned the second one gains the reward. The blaze of light scatters the gloom: the current Weather effect ends and does not apply for the rest of the adventure.

Climate 5: Sun-Drowned Secondary Objectives (1d20)

1. Sudden Sand Geyser Eruption.
Setup: At the start of Round 2, place a "Geyser Vent" (1") in an open area.
Interact [1 AP]: After the vent erupts, a Hero adjacent to the vent may make a **DEX Check** to gather glassy mineral fragments.
Reward: Success grants **2 × (2 + (4 × APL)) Coins**. This reward can be claimed once.
Special Rules: At the start of each **Monster Phase**, the vent erupts. Each combatant within **2"** of the vent must pass a **DEX Check** or be **Pushed 1d3"** directly away from the vent and become **Blinded**. After the first eruption, the vent's **Aura 2"** area is **Difficult Terrain** for the rest of the adventure.

2. Shimmering Oasis (Contested).
Setup: Place an Oasis marker as a **2"×2"** water feature near the centre.
Interact [1 AP]: A Hero adjacent to the Oasis may drink from it, restoring **1d4 + 1 HP**. The Oasis provides **4** total Drinks across both parties.
Reward: The party that takes the fourth Drink finds **Desert Pearls** worth **3 × (2 + (4 × APL)) Coins**. The Oasis then runs dry.
Special Rules: Each Hero may resolve this objective once.

3. Giant Scorpion's Guarded Nest.
Setup: Place a **Nest** (**1"**) and one **Giant Scorpion** starting **Awake** within **1"**.
Interact [1 AP]: Make an **INT Check** to search.
Success: The Hero gains **Scorpion Eggs** worth **4 × (2 + (4 × APL)) Coins** and **Scorpion Venom**. A Hero may apply **Scorpion Venom** to one weapon with **Interact [1 AP]**. The next attack with that weapon that damages a target causes **Poisoned [d4]**. The target must pass a **STR Check**. On a failure, the target loses **1 AP** on their next activation; a Monster uses the normal substitute for lost AP in **9.1**.
Reward: The Giant Scorpion also yields their **CV** when defeated.
Special Rules: A Hero cannot search the Nest

until the Giant Scorpion is defeated or lured away.

4. Ancient Tomb Entrance Hazard.
Setup: Place "Pressure Plate" (1") inside a Tomb Entrance archway.
Interact [1 AP]: Make an **INT Check** to spot the hazard.
Interact [1 AP]: Make a **DEX Check** to neutralize a spotted hazard.
Reward: Neutralizing the hazard grants **3 × (2 + (4 × APL)) Coins** and a **Silvered Dagger**.
Special Rules: The first combatant to move onto the Pressure Plate triggers the scything blade: they must pass a **DEX Check** or suffer **1d10 piercing damage**.

5. Sunstone Monolith's Blessing/Curse.
Setup: A Sunstone Monolith (1"×1" pillar).
Interact [1 AP]: Touch and **SPI Check**.
Success: One weapon carried by that Hero becomes **Sun-Blessed** until the end of the next round and deals an additional **1 fire damage**. That party gains **1 × (2 + (4 × APL)) Coins**.
Failure: The Hero is drained and loses **1 AP** at the start of their next activation.
Critical Failure (natural 1): The Hero suffers **1d6 fire damage**.
Special Rules: Each Hero may attempt this objective once. A maximum of **3** total Heroes may attempt it.

6. Lost Caravan's Secure Strongbox.
Setup: Place a "Wrecked Caravan" (2"×2", **Cover Terrain** tagged **Difficult Terrain**) with a "Locked Strongbox".
Interact [2 AP]: Make a **DEX Check** with Lockpicks to open the Strongbox.
Interact [3 AP]: Make a **STR Check** to force the Strongbox open.
Reward: The caravan contains **Ancient Trade Bars** worth **6 × (2 + (4 × APL)) Coins** and a **Desert Veil** scenario reward item. Once during this adventure, the bearer may ignore **Blinded**, or may treat their **Hide distance** as **0"** while in sand.

7. Curse of the Desiccated King.
Setup: Designate one Core Scenario Treasure Chest as the **Cursed Chest**.
Reward: If that Hero survives the adventure, their party gains an additional **5 × (2 + (4 × APL)) Coins**. The curse is removed after the adventure ends.
Special Rules: The first Hero to loot the Cursed Treasure gains its contents and becomes **Cursed**.

8. Constrictor Ambush.
Setup: Place three Ambush markers in separate 3"×3" open sand areas. Secretly and randomly determine which of the three markers is the true ambush marker before play. Do not reveal it until it is triggered.
Reward: Defeating every Ambusher yields its normal **CV** plus **1 Antitoxin** and **1 × (2 + (4 × APL)) Coins**.
Special Rules: When the first Hero enters the true ambush marker, place **1 Crocodile** if **APL** is **1–2**, **1 Giant Constrictor** if **APL** is **3–4**, or **1d2 Giant Constrictors** if **APL** is **5+**, adjacent to that Hero, using the canonical bestiary entry. The Ambushers are **Awake** and roll the base damage dice of their first attack with **Advantage**.

9. Collapsing Dune Hazard.
Setup: Designate one large Sand Dune.
Special Rules: If a combatant ends their activation on top of the Sand Dune, or if an Explosion occurs within **2"** of it, the dune face collapses. Each combatant on the dune must make a **DEX Check**. On a failure, **Slide** that combatant **3"** down the dune; they become **Prone** and suffer **1d4 blunt damage**. After the collapse, the slope becomes **Difficult Terrain**.

10. Nomad's Hidden Water Stash.
Setup: Place three "Cairns" at least **8"** apart. Randomly assign one **Water** marker and two **Blank** markers face down beneath them before play.
Interact [1 AP]: Make a **STR Check** to dismantle.
Reward: The correct Cairn reveals **1d2 Waterskins**. When an incorrect Cairn is dismantled, roll **1d3**: on a **1**, it contains nothing; on a **2**, place **1 Crocodile** if **APL** is **1–2**, or **1 Giant Constrictor** if **APL** is **3+**, adjacent to that Hero, using the canonical bestiary entry; the placed Monster is **Awake** and hostile; on a **3**, it contains **(2 + (4 × APL))/2 Coins**, minimum **1c**. The first party to find the Waterskins claims them.

11. Vulture's Eye on the Fallen.
Setup: None initially.
Interact [1 AP]: An adjacent ally spends **1 AP** to

protect the Fallen Hero, driving off the vultures and removing the Vulture Flock marker.
Special Rules: The first time a Hero is reduced to **0 HP** and remains **Knocked Out**, immediately place a **Vulture Flock** marker over them. If no adjacent ally uses **Interact [1 AP]** before the end of the next **Party Phase** that begins after the marker is placed, that Hero suffers **-2** on their next Injuries Roll in campaign play. Outside campaign play, that Hero's party loses **2 × (2 + (4 × APL)) Coins** in dropped gear instead. Then remove the marker.

12. Scorched Earth Scar.
Setup: Designate an **Aura 3"** area as scorched ground. The area is **Difficult Terrain**, and a combatant ending their activation in it suffers 1 fire damage. Place a **Heart of Cinder** marker at its centre.
Interact [1 AP]: Make a **STR Check** to claim the Heart.
Reward: The Heart of Cinder is worth **4 × (2 + (4 × APL)) Coins**, or it may be used once as **[0 AP]** to make one weapon deal an additional **1d6 fire damage** until the end of the round.

13. Tomb Dead Awakening.
Setup: Designate one ruined structure as the "Sealed Tomb".
Interact [1 AP]: Make an **INT Check** to search the tomb.
Success: The Hero gains **2 × (2 + (4 × APL)) Coins**.
Reward: Defeating every Tomb Dead yields their normal **CV** plus **Burial Silks** worth **5 × (2 + (4 × APL)) Coins**.
Special Rules: The first time a Hero loots any Treasure Chest within **6"** of the Sealed Tomb or searches the Sealed Tomb, place **2 Skeleton Warriors** if **APL** is **1–2**, or **1 Mummy** if **APL** is **3+**, within the Sealed Tomb, using the canonical bestiary entry. The Tomb Dead are **Awake** and hostile.

14. Whispering Winds of Prophecy.
Setup: None.
Trigger: At the start of Round 2, each party chooses one of their Heroes to hear the whispers.
Reward: Each chosen Hero's party gains **2 × (2 + (4 × APL)) Coins**. Each chosen Hero gains **Advantage** on the first **Check** they make as part of an **Interact** action this adventure.

15. Desert Bloom Oasis (Fleeting).
Setup: At the start of Round 3, use **Random Direction** from the battlefield centre. Place the centre of the "Fleeting Oasis" (2"×2") **9"** from the battlefield centre in the rolled direction, with the entire area in **Open Terrain** and at least **6"** from every battlefield edge. If that position is illegal, place the Oasis in the nearest legal position to the rolled position that satisfies those requirements. Resolve exact ties with **Random Determination**.
Interact [1 AP]: Drink.
Reward: The Oasis provides **2** Drinks total. Each Drink heals **1d8 HP**. The party that takes the last Drink finds a **Desert Rose Crystal** worth **2 × (2 + (4 × APL)) Coins**.
Special Rules: The Fleeting Oasis vanishes at the end of Round 5.

16. Abandoned Smuggler's Sandcrawler.
Setup: Place a "Broken Sandcrawler" (2"×4" **Impassable Terrain**).
Interact [2 AP]: Make an **INT Check** to search interior.
Reward: The cache yields **1 Treasure roll** and a **Sand-Proof Cloak** scenario reward item. The wearer ignores Sandstorm and other sand-based weather penalties for the rest of the adventure.
Special Rules: When the cache is opened, roll **1d4**. On a **1**, place **1d2 Giant Scorpions** inside the cache area, using the canonical bestiary entry. The placed combatants are **Awake** and hostile.

17. Glyph of the Burning Sun.
Setup: Large glyph (1" marker).
Interact [2 AP]: Make an **INT Check** to neutralize the glyph.
Reward: Neutralizing the glyph grants **4 × (2 + (4 × APL)) Coins**.
Special Rules: The first combatant to move within **1"** of the glyph triggers an **Aura 3"** burst centred on the glyph. Each combatant in the area makes a **DEX Check**. On a failure, they suffer **1d10 fire damage** and become **Weakened**. The glyph is then spent.

18. Thirsting Wind Predator's Emergence.
Setup: None.

Reward: Defeating the Wind Predator yields their **CV** plus a **Core of Bound Wind** worth **3 × (2 + (4 × APL)) Coins**. The Core may instead be consumed once during this adventure to grant **+3" Speed** for one **Move**.
Special Rules: The first time a Hero drinks from a Waterskin or Oasis, place **1 Harpy** if **APL** is **1–2**, or **1 Wind Elemental** if **APL** is **3+**, within **6"** of that Hero, using the canonical bestiary entry. The Wind Predator is **Awake** and hostile.

19. Treasure Map Piece (Desert Ruin).
Setup: One pre-designated Treasure Chest contains a "Map Piece".
Reward: The Map Piece is worth **5 × (2 + (4 × APL)) Coins**. In campaign play, a party that has collected **2** Map Pieces may sell the completed map during the **Town Phase** for an additional **10 × (2 + (4 × APL)) Coins**, using the APL of the adventure in which the second Piece was found. Both Pieces are then expended.
Special Rules: The Map Piece is collected when the Treasure Chest is opened.

20. The Solar Reflector Array.
Setup: Place a corroded **Bronze Reflector** at the battlefield centre and a **Sealed Vault** token against one battlefield edge.
Interact [2 AP]: A Hero adjacent to the Bronze Reflector angles it to focus the harsh sun, making a **DEX Check**.
Success: A **1"-wide** beam projects in a straight line, chosen by that Hero, up to **12"** from the Reflector. Every combatant the beam crosses suffers **1d6 fire damage**, or half after a successful **DEX Check**. If the beam reaches the Sealed Vault, its lock melts open.
Failure: The brittle mechanism jams for the rest of that activation and projects no beam.
Reward: The first party to open the Sealed Vault with the beam claims its contents, worth **4 × (2 + (4 × APL)) Coins**.

Climate 6: The Mire Secondary Objectives (1d20)

1. Leech-Infested Shallows.
Setup: Designate a **3"×3" Shallow Water** area.
Trigger: The first Hero that enters the area or ends an activation there gains **1d3** attached Swamp Leeches.
Interact [1 AP]: A Hero may remove one attached Swamp Leech from themselves or an adjacent ally.
Special Rules: Each attached Swamp Leech makes that Hero lose **1 HP** at the start of their activation.
Reward: A removed Swamp Leech may be kept as an alchemical reagent. The first party to collect **2** Swamp Leeches gains **2 × (2 + (4 × APL)) Coins**.

2. Sunken Idol of the Bog Father.
Setup: Place an **Idol** marker in **Deep Water**, adjacent to the bank.
Interact [1 AP]: A Hero adjacent to the Idol may make a **STR Check** to retrieve it.
Success: The Hero retrieves the Idol as a carried objective worth **6 × (2 + (4 × APL)) Coins** and finds **1 × (2 + (4 × APL)) Coins**.
Failure: Place **1d2 Lizardfolk Warriors** within **2"** of the Idol, using the canonical bestiary entry. The placed combatants are **Awake** and hostile. The Idol can still be attempted.

3. Will-o'-Wisp's False Light.
Setup: Place one **Will-o'-Wisp** at one battlefield edge, using the canonical bestiary entry. The Will-o'-Wisp begins **Awake**. Place a "Flickering Light" illusion marker on the opposite side.
Reward: The Will-o'-Wisp drops **Corpse-Light Essence**, a scenario reward item. Once during this adventure, a Hero may spend **[1 AP]** to use it against one target within **6"**. The target makes a **SPI Check** or becomes **Frightened**. The Will-o'-Wisp also yields their **CV**. The party that defeats them gains **2 × (2 + (4 × APL)) Coins** for dispelling the trick.
Special Rules: The Will-o'-Wisp moves toward the Flickering Light marker during their activation. They attack if a Hero is within **4"** of the Flickering Light marker.

4. Bubbling Tar Pit.
Setup: Place a "Tar Pit" (**2"×2" Difficult Terrain**)

with a "Fossilized Bone" in the centre.
Interact [1 AP]: A Hero adjacent to the Fossilized Bone may retrieve it.
Reward: The Fossilized Bone is worth **4 × (2 + (4 × APL)) Coins**.
Special Rules: A combatant that enters the Tar Pit or starts their activation in it becomes **Immobilized** and suffers **1d4 fire damage**. An **Immobilized** combatant in the Tar Pit may spend **1 AP** and pass a **STR Check** to remove **Immobilized** and move to the nearest legal space outside the Tar Pit.

5. Grasping Mangrove Thicket Maze.
Setup: Place a **4"×6"** Mangrove Maze as **Difficult Terrain**. Place a Lost Explorer's Pack marker inside the maze.
Interact [1 AP]: A Hero adjacent to the Lost Explorer's Pack may retrieve it.
Reward: The pack contains **3 × (2 + (4 × APL)) Coins** and a **Bog Compass** scenario reward item. Once during this adventure, the bearer may gain **Advantage** on one **INT Check** made to avoid a hazard, identify a false trail, or choose a safe route.
Special Rules: For each **2"** a combatant moves through the maze, they must make a **DEX Check**. On a failure, they become **Immobilized**. The **Immobilized** combatant, or a combatant adjacent to them, may cut the roots as an **Interact [1 AP]** action; the **Immobilized** combatant then suffers **1 piercing damage** and removes **Immobilized**.

6. Abandoned Witch's Hut.
Setup: Place a "Hut" (2"×2").
Interact [1 AP]: Make an **INT Check** to search.
Success: The Hero finds **1 × (2 + (4 × APL)) Coins** and **1d2** "Strange Potions". Roll **1d6** for each potion: **1–2:** restore **1d6 HP**; **3:** deal **1d4 poison damage** when drunk; **4:** gain **+1" Speed** until the end of the round; **5:** become **Weakened**; **6:** create an **Aura 2"** area of smoke that provides **Cover** until the end of the round.
Failure: Place **1d3 Giant Centipedes**, using the canonical bestiary entry. Their **Bite** also inflicts **Poisoned [d4]** on a target that suffers damage from them.

7. Curse of the Drowned Spirit.
Setup: Designate one **Shallow Water** body.
Interact [1 AP]: An adjacent ally may make a **SPI Check** to lift the curse.
Success: Remove the curse.
Failure: The curse remains active.
Reward: If the Hero survives the adventure, their party gains **5 × (2 + (4 × APL)) Coins**.
Special Rules: The first Hero who suffers a **Wound** in this water becomes **Cursed**. A "Sacred Reed Bundle" lies nearby and may be found with **Interact [1 AP]** and a successful **INT Check**. An adjacent ally may use the Reed Bundle to attempt the listed curse-removal **Interact**.

8. Crocodile's Guarded Nest.
Setup: Place a **Sandy Bank** marker (**2"×2"**) with "Crocodile Eggs" guarded by one **Crocodile** if **APL** is **1–3**, or **2 Crocodiles** if **APL** is **4+**, using the canonical bestiary entry. The Crocodiles begin **Resting**.
Interact [1 AP]: Claim the Crocodile Eggs.
Reward: The Crocodile Eggs are worth **6 × (2 + (4 × APL)) Coins**.
Special Rules: Each Crocodile becomes **Awake** if a Hero moves within **3"** of them or attacks them.

9. Sinking Ruins Fragment.
Setup: Place a **Ruin Fragment** marker (1"×2") in swamp water. It sinks at the end of Round 3.
Interact [2 AP]: A Hero adjacent to the Ruin Fragment makes a **STR Check**. When a total of **2** successful **Checks** have been made across both parties, the Sealed Chest is pulled free; the party that made the second successful **Check** retrieves it. After the Fragment sinks, it can no longer be Interacted with.
Reward: The Chest yields **1 Treasure roll**.

10. Lizardfolk Offering Pole.
Setup: A crude pole (1").
Interact [1 AP]: Choose one option: take the Offering or leave an Offering. If the Hero takes the Offering, that party gains **1 × (2 + (4 × APL)) Coins**, and the Hero suffers **Disadvantage** on their next **SPI Check** against an effect that causes **Frightened**. If the Hero leaves an Offering, that party pays **1 × (2 + (4 × APL)) Coins**, to a minimum of **1c**, and the Hero gains **1 Luck Point**.
Special Rules: Each party may resolve this objective once.

11. Bloated Corpse Discovery.
Setup: "Bloated Corpse" floats in water.
Interact [1 AP]: Make a **STR Check** to drag the corpse ashore and search it. After the **Check** resolves, roll **1d6**. On a **1–3**, the corpse explodes; Heroes within **1"** must pass a **STR Check** or become **Poisoned [d4]**.
Reward: The corpse contains **1 × (2 + (4 × APL)) Coins**.
Special Rules: The corpse drifts away at the start of Round 4.

12. Sudden Marsh Fever Outbreak.
Setup: At the start of Round 3, place 2 Feverwort markers in shallow water or swamp terrain, each at least **6"** from any deployment edge.
Interact [1 AP]: A Hero adjacent to a Feverwort marker may make an **INT Check** or **SPI Check** to prepare an antidote.
Reward: Success removes Marsh Fever from one allied Hero and grants that party **2 × (2 + (4 × APL)) Coins**. Each Feverwort marker can be used once.
Special Rules: At the start of Round 3, each Hero makes a **STR Check**. On a failure, that Hero contracts "Marsh Fever": they suffer **Disadvantage** on **STR Checks** and **DEX Checks** until the end of the adventure.

13. Hag's Misleading Trail.
Setup: Place a trail of **3** Fetish markers leading to a fake treasure marker.
Interact [1 AP]: A Hero adjacent to a Fetish marker may make an **INT Check** to identify the false trail.
Success: The Hero identifies the trail as false. A party that avoids the trail completely after succeeding on the first Fetish marker's **INT Check** gains **2 × (2 + (4 × APL)) Coins**.
Failure: No effect.
Special Rules: The first time a Hero reaches the end of the trail, remove the fake treasure marker and place a number of **Boglings** whose total **LVL** is no greater than half **APL**, minimum **1**, maximum **4**. Place them within **2"** of that Hero, using the canonical bestiary entry. The placed Monsters are **Awake** and roll the base damage dice of their first attack with **Advantage**.

14. Sunken Relic Chest.
Setup: Place a Sunken Relic Chest marker in **Deep Water**.
Interact [2 AP]: A Hero adjacent to the Sunken Relic Chest may make a **DEX Check** to retrieve it.
Success: The Hero retrieves the Sunken Relic Chest.
Failure: The Chest remains in place.
Reward: The Chest yields **1 Treasure roll** and one roll on the **Tier 1 Scrolls** (**1d2**: **1** = Arcane, **2** = Divine), sealed in a waterproof case.

15. Territorial Lizardfolk Warrior.
Setup: Place **1 Lizardfolk Warrior** guarding a **4"×4"** lily pad patch, using the canonical bestiary entry. The Lizardfolk Warrior begins **Awake**.
Trigger: The Lizardfolk Warrior attacks any combatant that enters the lily pad patch.
Reward: Defeating the Lizardfolk Warrior allows a Hero adjacent to the lily pad patch to claim **Golden Lily Pollen** with **Interact [1 AP]**. It is worth **5 × (2 + (4 × APL)) Coins**, or may be consumed once during this adventure to heal **1d8 HP**.

16. Whispering Willows of Despair.
Setup: 3"×3" "Willows" (**Cover Terrain**, **Natural**).
Interact [1 AP]: Make an **INT Check** to search the willows.
Success: The Hero gains the "Lost Soul Locket," worth **2 × (2 + (4 × APL)) Coins**.
Failure: The Hero suffers **Disadvantage** on their next damage roll and cannot be healed until the end of the round.
Special Rules: A Hero that enters the Willows or ends their activation within them makes a **SPI Check**. On a failure, that Hero suffers **1 psychic damage**. On a natural **1**, that Hero instead becomes **Sleeping** as the willows whisper them under.

17. Glyph of a Thousand Bites.
Setup: Place a Glyph marker in **Shallow Water**.
Interact [1 AP]: Make an **INT Check** to neutralize the glyph.
Reward: Neutralizing the glyph grants **3 × (2 + (4 × APL)) Coins**.
Special Rules: The first combatant to move within **1"** of the glyph triggers spectral pira-

nhas. That combatant suffers **1d8 piercing damage per APL**, to a maximum of **4d8**. The glyph is then spent.

18. Marsh Gas Seep & Ignition.
Setup: Place three Gas Seep markers, each **1"** across.
Trigger: A Gas Seep ignites if a fire source moves within **2"** of it or if the Gas Seep takes damage.
Special Rules: When a Gas Seep ignites, it explodes in **Aura 2"**. Each combatant in the Aura suffers **1d8 fire damage**, or half that damage after a successful **DEX Check**.
Reward: The first party to ignite one Gas Seep finds **Fired-Amber** worth **3 × (2 + (4 × APL)) Coins**.

19. Ancient Crocodile's Hoard.
Setup: Place a **Nest** marker (1") at the edge of a **Deep Water** area. Place one **Crocodile** in that **Deep Water**, within **3"** of the Nest, using the canonical bestiary entry. The Crocodile begins **Hidden** and does not lose **Hidden** for lacking **Cover** while they remain in **Deep Water**.
Interact [1 AP]: Make an **INT Check** to search the nest.
Success: The Hero gains **4 × (2 + (4 × APL)) Coins** and one mundane weapon.
Reward: Defeating the Crocodile allows the nest to be searched safely.
Special Rules: The Crocodile attacks any Hero that enters that **Deep Water** area or that ends a second consecutive activation within **2"** of the Nest.

20. Bog Beacon's Curse/Boon.
Setup: "Bog Beacon" (1") on an island.
Interact [2 AP]: Make a **SPI Check**.
Success: The Hero gains one Swamp Boon, choosing one: ignore water terrain movement costs until the end of the next round, become **Resistant** to poison damage until the end of the adventure, or heal **2d6 HP**. That party also gains **3 × (2 + (4 × APL)) Coins**.
Failure: The Hero has **Disadvantage** on their next damage roll.
Critical Failure (natural 1): The Hero becomes **Poisoned [d4]**. Then place one hostile random Monster Group from The Mire whose total **LVL** is no greater than half **APL**, minimum **1**, within **4"** of that Hero. The placed group is **Awake**.
Special Rules: This objective can be resolved once per adventure.

10.3 Weather Tables by Climate

If the Core Scenario or a rolled Secondary Objective does not specify the weather conditions, roll 1d6 on the Weather Table appropriate to the current adventure's Climate during Step 5 of the Adventure Preparation Sequence.

The rolled weather effect persists for the entire adventure unless a Special Rule, another game effect, or a subsequent weather roll explicitly changes it. A **Weather Shift** Power suppresses this persistent result temporarily without replacing it, as described in **8.2**.

After weather is rolled, determine the battlefield's **Visibility State**. If a weather result does not specify **Darkness**, the battlefield starts in **Light**. A weather result may set the battlefield to **Darkness** only if it explicitly says so, such as night, moonless night, underground darkness, supernatural eclipse, blizzard darkness, ashfall darkness, or another specific visibility effect.

Every Weather Table uses the same severity shape. Result **1** is severe, results **2–3** are moderate, results **4–5** are minor, and result **6** applies no adverse effect. No weather result reduces **LOS** below **6"**.

Climate 1: Greenmark Weather Table

1d6	Weather Condition	Effect
1	Blackwater Deluge	**LOS** is reduced to 6". Every area of **Open Terrain** and **Cover Terrain** that is not explicitly "Indoors" or "Rocky" becomes **Difficult Terrain**; **Impassable Terrain** and **Blocking Terrain** are unchanged. At the end of their activation, each combatant that is not in **Cover** must pass a **STR Check** or suffer **1 HP loss**.
2	Heavy Rain and Mud	Every area of **Open Terrain** and **Cover Terrain** that is not explicitly "Indoors" or "Rocky" becomes **Difficult Terrain**; **Impassable Terrain** and **Blocking Terrain** are unchanged. Ranged attacks targeting beyond 10" roll their base damage dice with **Disadvantage**.
3	Thick Morning Fog	The battlefield starts in **Light**. Fog covers the battlefield and provides **Cover** in every space.
4	Strong Gusting Winds	All ranged weapon attacks suffer a -1 penalty to their final damage total. Powers are unaffected. Combatants using **Fly (X")** movement from any source treat all air as **Difficult Terrain**. At the end of each round, roll **1d6** for each such combatant that is not on a surface. On a **1–3**, **Slide** them **1"** using **Random Direction** in **10.1**.
5	Intermittent Showers	At the start of each round, roll 1d6. On a 1–2, the Heavy Rain and Mud effects apply for this round. On a 3–6, no adverse weather effect applies this round.
6	Dappled Sunlight	Shifting light and shade play across the forest floor. No adverse weather effects apply. Standard conditions apply.

Climate 2: Ashlands Weather Table

1d6	Weather Condition	Effect
1	Ashfall Blackout	The battlefield's **Visibility State** is **Darkness**. Every area of **Open Terrain** and **Cover Terrain** becomes **Difficult Terrain**; **Impassable Terrain** and **Blocking Terrain** are unchanged. At the end of their activation, each combatant that is not in **Cover** suffers **1 HP loss** as ash fills their lungs.
2	Dust Haze	Targets more than 10" away have **Cover** (ranged attacks targeting them roll their base damage dice with **Disadvantage**). At the end of each round, each Hero that is not in **Cover** must pass a **STR Check** or suffer **1 HP loss**.
3	Blistering Sun	At the end of their activation, a Hero that spent **2 AP** or more on **Move** actions or took an **Attack** action during that activation suffers **1 fire damage** from heat exhaustion, unless they declare the use of a Waterskin (1 use negates this effect for the rest of the adventure).
4	Unsettling Stillness	All combatants roll **Spot Checks** and any **Interact Check** whose rule explicitly states that it relies on speech, sound, or hearing with **Disadvantage**.
5	Sudden Sand Gusts	At the start of each Monster Phase, roll 1d6. On a 1–2, a strong gust sweeps the battlefield. **Slide** one random Hero from each party **1"** using **Random Direction** in **10.1**; each becomes **Blinded** unless they pass a **STR Check**.
6	Clear Skies, Hot Air	No adverse weather effects apply, but the ambient heat is notable (carrying Waterskins remains specified by the scenario).

Climate 3: Undermarches Cavern Conditions Table

Subterranean adventures replace the standard Weather roll with an ambient Cavern Condition, generated using the same process and timing. If a Core Scenario's own terrain rules set the battlefield's lighting or **Visibility State**, those scenario rules take priority over the rolled Cavern Condition's lighting; apply the Cavern Condition's other effects normally.

1d6	Cavern Condition	Effect
1	Deep Gloom and Condensation	The battlefield's **Visibility State** is **Darkness**. Ranged attacks targeting beyond **6"** roll their base damage dice with **Disadvantage** unless the attacker ignores visual penalties caused by **Darkness** at that distance. The extreme dampness affects equipment: Heroes and Hirelings wearing non-metal Chest armour suffer **-1** on that armour's **AD** rolls, and **Monsters** with **AV 1** or higher suffer **-1 AV**.
2	Quiet, Still and Dark	The battlefield's **Visibility State** is **Darkness**. No other ambient condition applies.
3	Disorienting Echoes	Double the listed range of any attack, Power, or Special Ability whose rules text says it relies on sound, a roar, a scream, a wail, or a shout. When a Hero or Hireling uses such an attack, Power, or Special Ability, or uses a Special Ability that explicitly requires speech, chanting, or invocation, every **Resting** Monster Group within **12"** of them immediately becomes **Awake**.
4	Minor Cave Tremors	Divide the battlefield into four equal 18"×18" quadrants and number them before Round 1. At the end of each round, roll **1d4** to determine one quadrant. Each combatant in that quadrant must make a **DEX Check**. On a failure, **Slide** that combatant **1"** using **Random Direction** in **10.1**.
5	Stagnant, Foul Air	Any Hero that spends **3 AP or more** on actions during one activation must make a **STR Check** at the end of that activation or become **Weakened** until the end of the round. **0 AP** actions do not count toward this total.
6	Phosphorescent Bloom	Glowing fungi coat the walls and ceiling. The battlefield's **Visibility State** is **Light**. No other ambient condition applies.

Climate 4: Pale City Weather Table

1d6	Weather Condition	Effect
1	Whiteout Blizzard	**LOS** is reduced to 6". Every area of **Open Terrain** and **Cover Terrain** becomes **Difficult Terrain**; **Impassable Terrain** and **Blocking Terrain** are unchanged. Each combatant suffers **1 ice damage** at the end of their activation if they are not in **Cover** or wearing **Arctic Gear**.
2	Driving Snow and Sleet	**LOS** is reduced to 8". Ranged weapon attacks roll their base damage dice with **Disadvantage**. Every area of **Open Terrain** and **Cover Terrain** becomes **Difficult Terrain**; **Impassable Terrain** and **Blocking Terrain** are unchanged.
3	Freezing Fog Bank	At the start of Round 2, a bank of Freezing Fog (6" wide, spanning the full battlefield length) rolls across the centre of the battlefield, lasting until the end of the round. The area within provides **Cover**, and combatants ending their activation inside suffer **1 ice damage**.
4	Biting Wind Chill	All combatants have a **-1"** penalty to Speed. When a combatant becomes **Prone** on an icy surface because they were **Pushed**, **Slide** them an additional **1"** in the direction of that **Push**. When a combatant becomes **Prone** there because they fell, **Slide** them **1"** directly away from the fall origin when viewed from above; if the origin is directly above them, use **Random Direction** in **10.1**.
5	Rime Ice Accumulation	All terrain features gain a slick layer of rime ice. **STR Checks** to **Climb** are made with **Disadvantage**. Any Hero knocked **Prone** also becomes **Slowed** as the ice clings to them.
6	Clear Polar Sky	The wind drops and the sky clears to a hard pale blue. No adverse weather effects apply.

Climate 5: Sun-Drowned Weather Table

1d6	Weather Condition	Effect
1	Howling Sandstorm	**LOS** is reduced to **6"**. Every area of **Open Terrain** and **Cover Terrain** becomes **Difficult Terrain**; **Impassable Terrain** and **Blocking Terrain** are unchanged. Each combatant not in **Cover** suffers **1 piercing damage** at the end of their activation. **AV** and **AD** do not apply.
2	Unbearable Sun and Heat	At the start of each Hero's, Hireling's, or allied Summon's first activation of the adventure, they lose **1 AP**, minimum **0**. During each Monster's first activation of the adventure, they cannot use **AI Step** abilities, and their first attack before the end of that activation rolls its base damage dice with **Disadvantage**. In all subsequent rounds, at the end of their activation, a Hero that spent **2 AP** or more on **Move** actions or made an **Attack** action during that activation loses **1 HP** from exhaustion, unless they declare the use of a Waterskin; 1 use negates this effect for the rest of the adventure.
3	Sudden Sand Gusts	At the start of each round (after Round 1), roll 1d6. On a 1–2, roll **Random Direction** in **10.1**. A strong gust sweeps a **6"** wide line spanning the full battlefield, centred on the battlefield centre and running perpendicular to the rolled direction. **Slide** each combatant in the line **1d3"** in the rolled direction; each becomes **Blinded** unless they pass a **STR Check**.
4	Shimmering Heat Mirage	Visual distortion ruins aim. Ranged attacks made at targets more than 10" away treat the target as having **Cover** (their base damage dice roll with **Disadvantage**).
5	Sweltering Stillness	All combatants have a **-1"** penalty to Speed and **Disadvantage** on all **STR Checks**.
6	Clear and Blazing Hot	No adverse weather effects apply beyond any scenario rule that requires water.

Climate 6: The Mire Weather Table

1d6	Weather Condition	Effect
1	Torrential Miasma Rain	**LOS** is reduced to 6". Every area of **Open Terrain** and **Cover Terrain** becomes **Difficult Terrain**; **Impassable Terrain** and **Blocking Terrain** are unchanged. Combatants ending their activation in the open (not in **Cover**) must make a **STR Check** or become **Poisoned** [**d4**].
2	Dense, Choking Fog Bank	Place an **8"-wide** Dense Fog bank through the battlefield centre, spanning the full battlefield length. Roll **1d2**: on **1**, the bank follows the North-South axis; on **2**, the bank follows the East-West axis, using the battlefield orientation designated under **Random Direction** in **10.1**. The area within provides **Cover**.
3	Plague of Biting Insects	Heroes are constantly assailed. At the start of their activation, a Hero must either spend 1 AP to "Swat" the insects away, or lose **1 HP** unless wearing a Chest item with **AD d10** or higher.
4	Unnatural Swamp Bloom	Strange swamp flowers release potent pollen. At the start of Round 3 and Round 5, each Hero must make a **SPI Check**. On a failure, they immediately lose **1 AP** from their current total, minimum 0. On a **Critical Failure**, they become **Stunned** instead.
5	Oppressive Humidity and Stillness	The thick air saps energy. The first time each combatant enters **Difficult Terrain** each round, they must make a **STR Check** or become **Slowed** until the end of their activation.
6	Still Fen Air	The mist lies low and unmoving over the water. No adverse weather effects apply.

10.4 Core Scenario Outlines

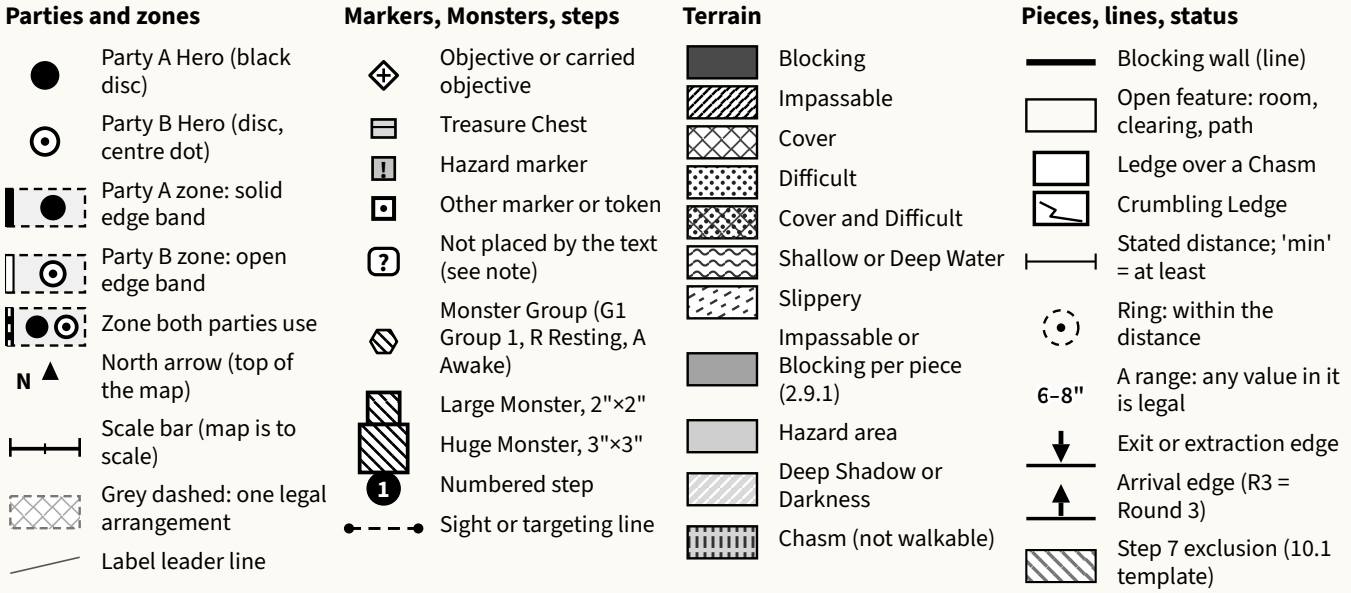
The following section details **36 Core Scenarios**, with **6 scenarios for each of the 6 Climates**. Before starting an adventure, parties determine the Climate and then select or randomly roll one of that Climate's Core Scenarios. Generate a Secondary Objective and a Weather result for the chosen Climate as normal unless the scenario says otherwise.

[Intro] marks the recommended first full-rules scenario for that Climate. The tag has no rules effect.

Every scenario uses the dynamic scaling rules in **10.6 Dynamic Party and Scenario Scaling** unless its entry gives a specific override.

If a scenario's printed Tiebreaker is also tied, the adventure is a draw: neither party wins the adventure, and both parties keep their banked Coins and earned rewards.

Key to the setup and deployment diagrams



Orientation. North is drawn at the top. The Setup Roll-off winner designates the North edge before setup; North and South are the short battlefield edges and East and West the long ones, even on a square battlefield (10.1).

Scale. The battlefield, zones and stated distances are drawn to scale; markers are enlarged, and Large and Huge Monsters are drawn at their 2"×2" and 3"×3" footprints. Distances are measured between closest points, except from a centre or origin where the rule says so (2.6).

Counts. Scattered terrain is drawn as a few representative pieces; the printed counts and the 10.6 scaling stay in the scenario text. Group numbers are the scenario's own. Hidden contents (face-down markers) are never drawn.

Solid and dashed. A solid marker or zone with a distance symbol is one position that meets the printed limit; only the battlefield, zone depths and stated distances are exact. Grey dashed pieces show one legal arrangement of something the rules leave open. Letters A and B name the drawn zones; where a scenario assigns the parties by die roll, the zones do not say who is which.

Not placed by the text. A ? tag marks an element the scenario text does not place, such as an arrival or escape edge it never names. It is listed under the map with a short note and is not drawn on the battlefield; the scenario text governs.

Where a scenario is silent, 10.1 step 11 applies: the Setup Roll-off winner chooses the edge or corner zone and the other party takes the opposite one; zones are 6" deep or 8"×8" corners, marked "(default)" on a map, and parties alternate placing Heroes, starting with the party that lost the Roll-off.

FIG-20. Key to the setup and deployment diagrams: symbols for Heroes, zones, markers, Monster Groups, terrain, distances, edges and not-placed elements, with the orientation, scale and grey-dashed conventions every such diagram follows (see 10.4).

Climate 1: Greenmark Scenarios

Scenario 1: Hunt the Wild Beast [Intro]

Something out of the deep wood has taken Greythorn's logging camps for its hunting ground, and with them the timber the Bastion is built on. The first deaths were blamed on dire wolves. The next were found driven through splintered palisade timbers, which dire wolves do not manage. Its pelt, skull, and teeth would buy a season behind the walls, and the Council of Captains will pay either way to have the camps cutting again. Comfort and timber have sent both parties into the trees.

Primary Objective: Be the party that escapes with the Pristine Boar Pelt.

Final Random Monster Groups: Determine using **10.6.4**.

Awake Groups: Random Monster Groups begin **Resting** unless a listed setup rule says otherwise. Scenario-specific Monsters use their listed state.

Minion Swarm: No.

Objective Scaling: None.

Level Scaling: Use the Scenario APL for every APL-based Monster, hazard, objective, reward, and damage value in this scenario.

Solo/Co-op Objective: Defeat the Great Forest Boar, harvest the Pristine Boar Pelt, then extract the Pelt and at least 1 Hero through any battlefield edge.

Pressure Clock: Use **Pursuit** from **10.5.7**.

Battlefield and Terrain (36"×36"): Dense forest with several Game Trails (clear paths, 1–2" wide). Place 5–7 Tree area terrain pieces and 3–4 Thickets. Place one **Mud Wallow** marker (2"×2") near the centre of the battlefield.

Objective Placement: The Great Forest Boar starts within 2" of the Mud Wallow. When the Boar is defeated, place a **Pristine Boar Pelt** token where they fell. Place 3 Treasure Chests (**1 Treasure roll with Disadvantage** each) along game trails, at least 6" apart.

Scenario-Specific Monster: Great Forest Boar

HP	(5 × Party Size × (4 + (1 × APL))) / 8
AV	1 + (APL/3, rounded down)
SPD	7"
LVL	APL + 1 (min 3, max 7)
CV	0c
Sz	L

AI Steps

Target Priority: Prioritize the valid enemy that most recently dealt damage to the Boar. If that enemy is not a valid target, use the normal Monster target priorities.

Attacks

- **Gore:** 1d10 + APL piercing damage.

Special Abilities

- **Ferocious Charge:** If the Boar moves at least 4" in a straight line before making a Gore attack in the same activation, that Gore deals an additional **1d6 damage of that attack's primary damage type**.
- **Trample:** At the start of their activation, if the Boar is not **Engaged** and has a **Primary Target**, they move up to their full Speed in a straight line toward that target, stopping at the last legal position. Every enemy whose space the Boar passes through suffers **1d8 + APL/2 blunt damage**. Each affected enemy makes a **DEX Check**; on a success, they suffer half of that damage. Each combatant that takes damage also falls **Prone**.
- **Enraged Bellow:** When the Boar is first reduced to 25% or less of their Max HP, at the start of their next activation they Bellow. All **Resting** Monster Groups on the battlefield immediately become **Awake**. During that activation, the Boar makes their Trample as normal, except the straight line's direction is determined by a **1d8** random-direction roll instead of the Boar's normal AI, and their Gore attack rolls its base damage dice with **Advantage**.
- **Thick Hide:** Reduce damage from ranged weapon attacks by 2, applied after **AV**.

Boss Deployment: Starts **Awake**, within **2"** of the Mud Wallow.

Random Monster Setup:

- **Group 1:** Roll once on the Greenmark Random Monster Table. Place within **4"** of a game trail, at least **10"** from the Mud Wallow. **Resting**.
- **Group 2:** Roll once on the Greenmark Random Monster Table. Place within a Thicket, at least **8"** from any Hero deployment zone. **Resting**.

Party Deployment: Parties deploy on opposite long battlefield edges, within **6"** of their edge.

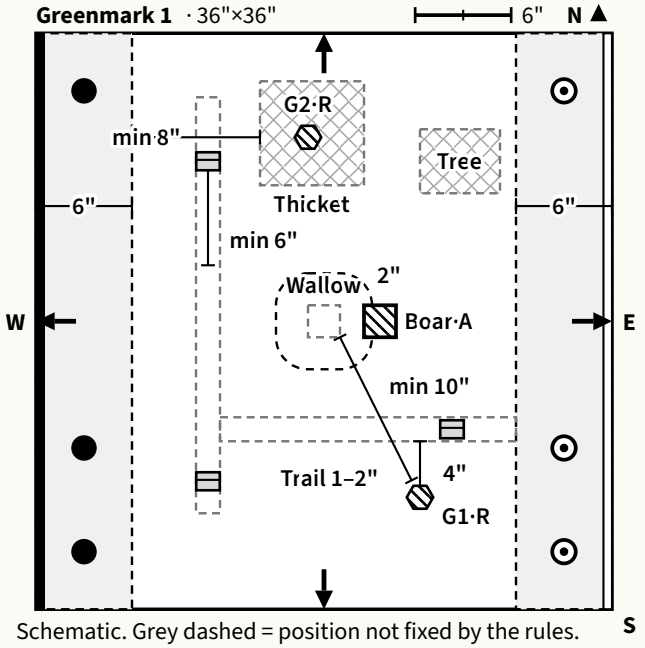


FIG-21. Hunt the Wild Beast: parties deploy within 6" of opposite long battlefield edges, and the Great Forest Boar starts within 2" of the Mud Wallow near the centre; key: FIG-20 (see 10.4, Greenmark Scenario 1).

Special Rules:

Claiming the Pelt: The Pristine Boar Pelt token is placed where the Boar fell when they are defeated. A Hero adjacent to the Pelt uses **Interact [1 AP]** to pick it up. It is a carried objective worth 5 × (2 + (4 × APL)) Coins if escaped with.

Escape Conditions: The Hero carrying the Pristine Boar Pelt must escape via any battlefield edge.

Victory Conditions: The adventure ends when the Pelt is carried off-map, after Round 8, or when all Heroes are defeated.

- The party whose Hero escapes with the Pelt wins and gains the Pelt's Coin Value.
- If the Pelt is not escaped with, the party that dealt the most total damage to the Boar gains a consolation prize of 3 × (2 + (4 × APL)) Coins. Tiebreaker: if both parties dealt identical total damage to the Boar, neither gains the consolation prize and both retain only their Chest and Monster CV totals.

Rewards from Treasure Chests and any Monster CV are added to each party's final total regardless of outcome.

Tiebreaker: If no party escapes with the Pelt and total Boar damage is also tied, the party with the most total Coin Value from all other sources wins.

Scenario 2: The Whispering Grove

The grove is older than Greythorn and older than the western forest road that skirts it. The standing stones hum when no wind passes, and pale lights move between them on moonless nights. Greythorn's farmers leave bread there and do not look back. Scholars call it a site of power. The Council of Captains calls it part of the tithe, and pays it without complaint.

Primary Objective: Be the party that has successfully activated the most Standing Stones by the end of Round 7.

Final Random Monster Groups: Determine using **10.6.4**.

Awake Groups: Random Monster Groups begin **Resting** unless a listed setup rule says otherwise. Scenario-specific Monsters use their listed state.

Minion Swarm: No.

Objective Scaling: Apply **10.6.9** to the Standing Stones. A majority is more than half the number placed.

Level Scaling: Use the Scenario APL for every APL-based Monster, hazard, objective, reward, and damage value in this scenario.

Solo/Co-op Objective: Activate a majority of the Standing Stones placed after scaling, then extract at least 1 Hero through any battlefield edge.

Pressure Clock: Use **Swarm** from **10.5.7**.

Battlefield and Terrain (36"×36"): Place 3–5 Tree area terrain pieces and 6–7 Undergrowth patches around the battlefield edges, leaving a Central Clearing (about 12–15" diameter) at the battlefield's centre. Within the Clearing, place 3 **Standing Stone** markers (1"×1") in a rough triangle, each 6–8" apart.

Objective Placement: The 3 Standing Stones are the Primary Objectives. Place 2 Treasure Chests (**1 Treasure roll with Disadvantage** each) within dense forest sections near different battlefield edges, at least 8" from any Stone.

Scenario-Specific Monster: Antlered Warden

Not Old Wode themselves. Old Wode does not stir for small intrusions. The Antlered Warden is the agreement's enforcement arm: a figure woven from the grove's oldest growth, robed in bark and grey moss, with antlers that have more branches than any natural animal. It does not speak. It does not negotiate. It maintains the terms.

HP	(5 × Party Size × (2 + (1 × APL))) / 8
AV	1 + (APL/3, rounded down)
SPD	6" (ignores forest **Difficult Terrain**)
LVL	APL (min 2, max 5)
CV	(2 + (4 × APL)) Coins
Sz	L

AI Steps

Target Priority: Prioritize the valid Hero who most recently activated or attempted to activate a Standing Stone. Otherwise, use the normal Monster target priorities.

1. **Entangling Roots:** If the **Primary Target** is within **8"** and is not **Immobilized**, that enemy must pass a **DEX Check** or become **Immobilized**. Then end this activation.

Attacks

- **Thorny Vine Lash: Reach**, 1d6 + APL/2 slashing damage.
- **Mystic Bolt:** 1d4 + APL psychic damage, **Ranged 10"**.

Special Abilities

- **Fey Resistance:** This Monster is **Resistant** to **arcane** damage, and is **Immune** to **Frightened** and **Sleeping**.

Boss Deployment: Not yet placed at setup. When a Hero first Interacts with a Standing Stone, place the Antlered Warden adjacent to that Stone. The Antlered Warden is **Awake** when placed.

Random Monster Setup:

- **Group 1:** Roll once on the Greenmark Random Monster Table. Place within **3"** of one outer Standing Stone. **Resting**.
- **Group 2:** Roll once on the Greenmark Random Monster Table. Place inside the Central Clearing, **4"** from its edge. **Resting**.
- **Group 3:** Roll once on the Greenmark Random Monster Table. Place within **3"** of one Treasure Chest. **Resting**.

Party Deployment: Parties make a Setup Roll-off. The winner chooses an 8"×8" corner zone. The other party deploys in the diagonally opposite corner.

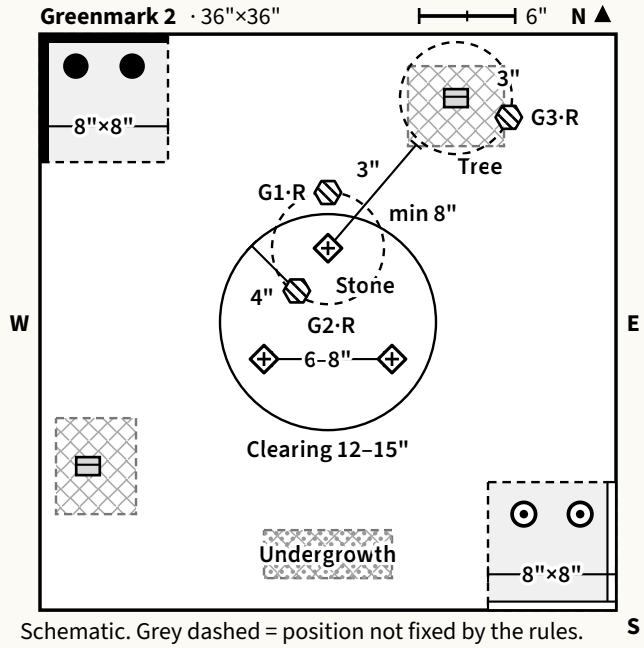

FIG-22. The Whispering Grove: parties deploy in opposite 8"×8" corners; three Standing Stones stand 6–8" apart in a Central Clearing about 12–15" across; key: FIG-20 (see 10.4, Greenmark Scenario 2).

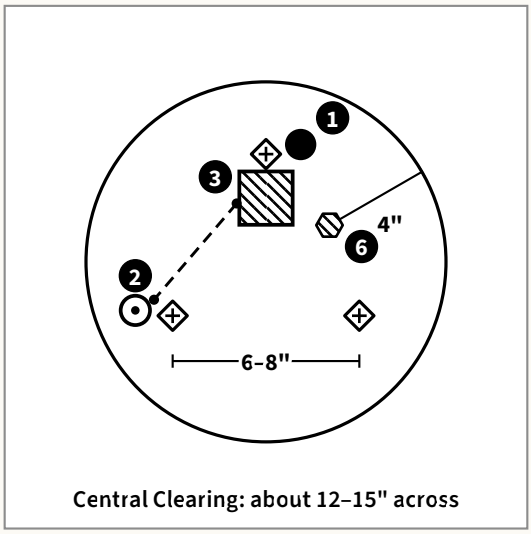
Special Rules:

Activating a Standing Stone: A Hero adjacent to a Standing Stone uses **Interact [2 AP]** and makes a **SPI Check**. On a success, that party claims the stone; mark it with a token. A stone may be claimed by only one party. Once claimed, it cannot be reclaimed. Each claimed stone is worth 2 × (2 + (4 × APL)) Coins at the adventure's end.

A The Whispering Grove (10.4, Greenmark 2)



Detail of the centre of the battlefield (10 pt per inch; Clearing drawn 13.5" across; positions schematic).

B Two parties, one Monster (PvPvE)

1. **Activate a Stone (10.4):** a Hero adjacent to a Standing Stone uses Interact [2 AP] and makes a SPI Check. A stone is claimed by only one party. Here a Party A Hero Interacts with a Stone first.
2. **Rival attempt:** a Party B Hero later attempts to activate another Stone.
3. **Antlered Warden:** not placed at setup. When a Hero first Interacts with a Standing Stone, it is placed adjacent to that Stone (here, the Party A Hero's Stone) and is Awake when placed.
4. **Monster Phase:** the Warden's Target Priority is the valid Hero who most recently activated or attempted to activate a Standing Stone, here the Party B Hero. If no listed target is valid, the normal Monster target priorities apply (9.5 E).
5. **AI Step 1, Entangling Roots:** if the Primary Target is within 8" and not Immobilized, it must pass a DEX Check or become Immobilized. The activation then ends.
6. **Random Monster Group 2:** placed inside the Central Clearing, 4" from its edge, Resting. Groups 1 and 3 (near a Stone and a Treasure Chest) are not drawn.

Key (full key: FIG-20) Party A Hero · Party B Hero · Standing Stone · Monster Group 2 · Antlered Warden (2"×2") · 1 Numbered step · Central Clearing · Stated distance · 6–8" Range · Warden's target

FIG-16. In the Whispering Grove the Antlered Warden is placed adjacent to the first Standing Stone a Hero Interacts with, and its Target Priority is the valid Hero who most recently activated or attempted to activate a Stone, whichever party that Hero belongs to. Entangling Roots then applies if the target is within 8"; key: FIG-20 (see 10.4).

Grove's Boon: Each time a Hero successfully activates a Standing Stone, that Hero immediately chooses one: heal 1d6 HP, or regain 1d4 NRG. This boon applies only to the activating Hero.

Wild Magic Flux: Each time a Hero casts a Power within **6"** of any Standing Stone, the caster rolls **1d6**. On a **1**, roll **1d3**: **1:** the caster loses **1d4 HP**; **2:** the Power targets a random valid combatant within **3"** of the original target instead; **3:** increase the Power's NRG cost by **1** for this casting. If the caster cannot pay the increased cost, the Power still resolves, and the caster is reduced to **0 NRG**.

Escape Conditions: None in competitive play. In solo or cooperative play, allied Heroes may escape through any battlefield edge as required by the **Solo/Co-op Objective**.

Victory Conditions: The adventure ends immediately when one party claims a majority of the Standing Stones placed after scaling, after Round 7, or when all Heroes are defeated. The party with the most claimed Standing Stones wins.

Tiebreaker: The party with the most total Coin Value wins.

Scenario 3: The Bandit's Toll

The western forest road carries Deepwarden iron, Reedmarch salt, and grain between the Bastions, and it is the one artery Greythorn cannot do without. A toll crew has claimed a bend of the trail and nailed its prices to the trees in stolen blood. Caravans wait behind palisades while bread grows dear inside Greythorn's walls. The Council of Captains has stamped a bounty and sent it out with anyone hungry enough to answer.

Primary Objective: Defeat the Toll Captain and bank more total Coin Value than the opposing party.

Final Random Monster Groups: Determine using **10.6.4**.

Awake Groups: Random Monster Groups begin **Resting** unless a listed setup rule says otherwise. Scenario-specific Monsters use their listed state.

Minion Swarm: No.

Objective Scaling: Apply **10.6.9** to the Stolen Wagons. The required number of looted Wagons is half the number placed, rounded up.

Level Scaling: Use the Scenario APL for every APL-based Monster, hazard, objective, reward, and damage value in this scenario.

Solo/Co-op Objective: Defeat the Toll Captain, loot at least half of the Stolen Wagons placed after scaling, then extract at least half the party through any battlefield edge as defined in **10.6.10**.

Pressure Clock: Use **Pursuit** from **10.5.7**.

Battlefield and Terrain (36"×36"): A "Trail" (clear path, about 3–4" wide) runs the full length of the battlefield from one short edge to the other. Place 6–8 Tree area terrain pieces and 3–4 Undergrowth area terrain pieces on either side of the Trail. Place one "Makeshift Barricade" (2–3" long, HP 15, AV 2 per 1" section) across the Trail at the battlefield's midpoint.

Objective Placement: Determine the number of Stolen Wagons after scaling; the printed number is **3**. Each Wagon is a Treasure Chest marker yielding **1 Treasure roll**.

- If 1 Wagon is placed, place **Wagon 2** only.
- If 2 Wagons are placed, place **Wagon 2** and randomly determine whether to place **Wagon 1** or **Wagon 3**.
- If 3 Wagons are placed, place all 3 Wagons.

Place each included Wagon as follows:

- **Wagon 1:** On the Trail, 8" from one short battlefield edge.
- **Wagon 2:** On the Trail, adjacent to the central Barricade.
- **Wagon 3:** On the Trail, 8" from the opposite short battlefield edge.

Scenario-Specific Monster: Toll Captain

HP	(5 × Party Size × (3 + (1 × APL))) / 8
AV	2 + (APL/3, rounded down)
SPD	5"
LVL	APL (min 2, max 6)
CV	2 × (2 + (4 × APL)) Coins
Sz	M

Attacks

- **Scimitar:** 1d8 + APL/2 slashing damage.
- **Shortbow:** 1d6 + APL/2 piercing damage, **Ranged 12"**.

Special Abilities

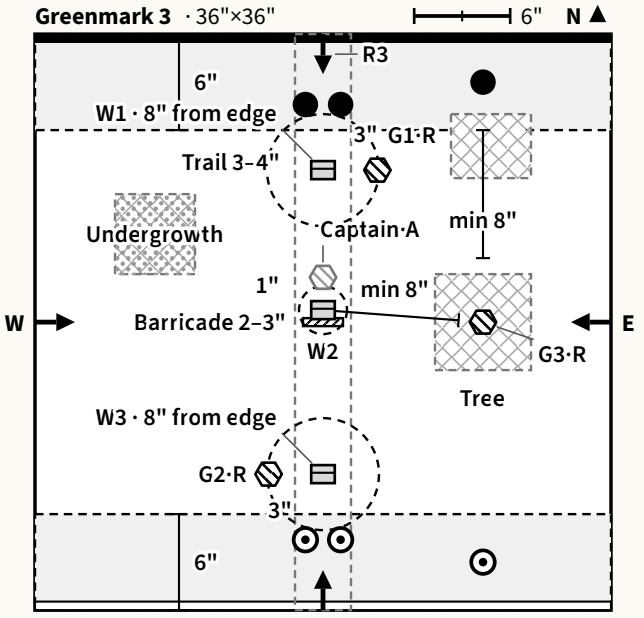
- **Command Raiders:** At the start of the Captain's activation, choose one allied **Bandit** within 6". That **Bandit** immediately **Shifts 1"** and makes one attack. That attack rolls its base damage dice with **Disadvantage**. Then the Captain's activation continues.
- **Parry:** This defence is a Special Ability, not a Reaction, and costs nothing. Each time a melee attack targets the Captain, the Captain parries with their Scimitar. Roll **1d8 + APL/2** as the Captain's parry roll and compare it to the attack as described in the core **Parry** rules. The Captain does not Riposte.
- **Take Hostage:** When the Captain is at 25% or less of their Max HP and is **Engaged** with a Hero while also within 1" of a Stolen Wagon, they seize the wagon. The Wagon cannot be looted while the Captain remains adjacent to it and this ability is active. The Captain gains **+1 AV** while this ability is active. This ability ends if the Captain moves more than 1" from that Wagon or rises above 25% of their Max HP.

Boss Deployment: Starts **Awake**, behind the central Barricade, within **1"** of Wagon 2.

Random Monster Setup:

- **Group 1:** Bandits (×APL/2, rounded up). Place within **3"** of Wagon 1's printed position, whether or not Wagon 1 is placed, and not on the Trail. **Resting**.
- **Group 2:** Bandits (×APL/2, rounded up). Place within **3"** of Wagon 3's printed position, whether or not Wagon 3 is placed, and not on the Trail. **Resting**.
- **Group 3:** Roll once on the Greenmark Random Monster Table. Place in cover at least 8" from any Wagon and 8" from any Hero deployment zone. **Resting**.

Party Deployment: Parties make a Setup Roll-off. The winner chooses one short battlefield edge (where the Trail enters). They deploy their party within **6"** of that edge with at least two Heroes starting on the Trail. The other party deploys within **6"** of the opposite short battlefield edge under the same conditions.



Schematic. Grey dashed = position not fixed by the rules. R3: reinforcements enter at the edge nearest the Captain.

FIG-23. The Bandit's Toll: parties deploy within 6" of the opposite short edges where a Trail 3–4" wide runs, with at least two Heroes each on the Trail; the Barricade and Wagon 2 stand at the midpoint; key: FIG-20 (see 10.4, Greenmark Scenario 3).

Special Rules:

The Barricade: Impassable Terrain. A combatant may **Climb** over it as **1"** of vertical movement, or attack it (HP 15, AV 2 per 1" section). A section of Barricade reduced to **0 HP** is removed.

Bandit Reinforcements: At the end of Round 3, if the Toll Captain is still alive and above half their Max HP, Bandits (×APL/2, rounded up) enter from the midpoint of the battlefield edge closest to the Toll Captain. If two or more edges are equidistant, the party that lost the Setup Roll-off chooses among them. They are placed touching that edge and are **Awake**.

Looting Wagons: A Hero adjacent to a Wagon uses **Interact [1 AP]** to loot it, gaining its Coin Value immediately. A Wagon guarded by the Captain's Take Hostage ability cannot be looted.

Escape Conditions: None in competitive play. In solo or cooperative play, allied Heroes may escape through any battlefield edge as required by the **Solo/Co-op Objective**.

Victory Conditions: The adventure ends after Round 8, or immediately when the Toll Captain has been defeated and at least half of the Stolen Wagons placed after scaling, rounded up, have been looted in total across both parties, whichever comes first.

- The party with the most total Coin Value, counting rewards from looted Wagons, Monster CV, and Secondary Objective Coins, wins.
- A party that both defeated the Toll Captain and looted at least half of the Stolen Wagons placed after scaling, rounded up, adds a **3 × (2 + (4 × APL)) Coins** Trade Route bonus to its total before the winner is determined.

Tiebreaker: If both parties have identical Coin totals, the party that dealt the killing blow to the Toll Captain wins.

Scenario 4: The Spider's Silk Route

Silk-traders whisper of a ravine in the deep Greenmark where the webs hold steel like thread and fetch absurd prices in Bastion markets. The spinners are the Broodmother's daughters, strayed up from the dark, and the place is on no honest map. That has not stopped a Greythorn merchant from selling the same path through the thorns to two parties at once.

Primary Objective: Be the party to escape with the highest Coin Value from harvested Spider Silk Bundles.

Final Random Monster Groups: Determine using **10.6.4**.

Awake Groups: Random Monster Groups begin **Resting** unless a listed setup rule says otherwise. Scenario-specific Monsters use their listed state.

Minion Swarm: No.

Objective Scaling: Apply **10.6.9** to the Spider Silk Bundles.

Level Scaling: Use the Scenario APL for every APL-based Monster, hazard, objective, reward, and damage value in this scenario.

Solo/Co-op Objective: Harvest and extract at least half of the Spider Silk Bundles placed after scaling, rounded up, then extract at least half the party as defined in **10.6.10**.

Pressure Clock: Use **Swarm** from **10.5.7**.

Battlefield and Terrain (36"×36"): A Ravine (6–8" wide, 2" deep) runs across the battlefield perpendicular to the long edges, dividing it at the midpoint. The Ravine floor is **Difficult Terrain**. Place 5–7 **Webbed Section** markers (2–3" diameter, **Difficult Terrain**) within and at the edges of the Ravine. Place 4–6 Tree area terrain pieces along the ravine edges on higher ground.

Objective Placement: Place 3 **Spider Silk Bundle** tokens, each inside a different Webbed Section within the Ravine, spaced at least 4" apart. Place 2 Treasure Chests (**1 Treasure roll with Disadvantage** each) on higher ground overlooking the Ravine, at least 8" from any battlefield edge.

Scenario-Specific Monster: Broodmother Spider

HP	(5 × Party Size × (5 + (1 × APL))) / 8
AV	2 + (APL/3, rounded down)
SPD	6" (Climb 6")
LVL	APL + 2 (min 4, max 8)
CV	3 × (2 + (4 × APL)) Coins
Sz	L

AI Steps

Target Priority: Prioritize valid Heroes who are harvesting a Silk Bundle or attacking an accompanying Giant Tarantula. Otherwise, use the normal Monster target priorities.

Attacks

- **Venomous Fangs:** 1d10 + APL/2 piercing damage.

Special Abilities

- **Potent Poison:** A target damaged by **Venomous Fangs** must make a **STR Check**. **Failure:** The target becomes **Poisoned [d6]**.
- **Web Barrage:** At the start of their activation, if their **Primary Target** is within 8" and is not **Immobilized**, the Broodmother targets an **Aura 2"** area centred on that target. Each combatant in the area makes a **DEX Check**. **Failure:** That combatant becomes **Immobilized**. The area becomes a Webbed Section until cleared.
- **Web Walker:** The Broodmother ignores all movement penalties and **Immobilized** effects from Webbed Sections.

Boss Deployment: Starts **Awake** at the centre of the Ravine, within 1" of the central Silk Bundle. Accompanied by 2 Giant Tarantulas (Awake) within 2" of the Broodmother. An additional 2 Giant Tarantulas start Resting in a Webbed Section near a second Silk Bundle.

Random Monster Setup:

- **Group 1:** Roll once on the Greenmark Random Monster Table. Place on high ground overlooking the Ravine. **Resting**.

Party Deployment: Parties deploy on opposite short battlefield edges, on higher ground outside the Ravine, within **6"** of their edge.

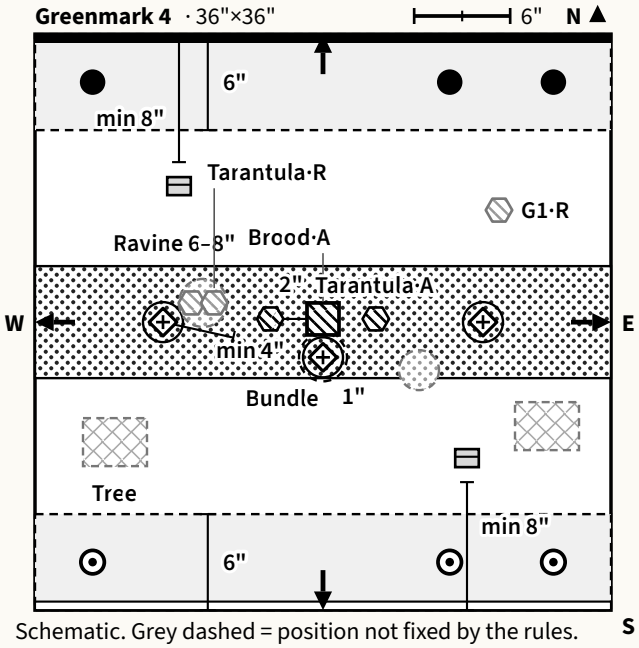


FIG-24. The Spider's Silk Route: parties deploy within 6" of opposite short edges on higher ground, either side of a Ravine 6–8" wide that cuts across the midpoint with a Silk Bundle in each of three Webbed Sections; key: FIG-20 (see 10.4, Greenmark Scenario 4).

Special Rules:

Webbed Sections, Movement Penalty: A combatant entering or ending their activation in a Webbed Section makes a **DEX Check**. **Failure:** That combatant becomes **Immobilized**. A combatant **Immobilized** by a Webbed Section, or an adjacent ally, may use **Interact [1 AP]** and make a **STR Check** or **DEX Check** to cut them free. On a success, remove **Immobilized** and place the freed combatant in the nearest legal space outside that Webbed Section.

Harvesting Silk: A Hero adjacent to a Silk Bundle uses **Interact [2 AP]** and makes an **INT Check**.

- **Success:** The Hero collects the Bundle as a carried objective, worth 3 × (2 + (4 × APL)) Coins if escaped with.
- **Failure:** The Bundle is damaged. If later escaped with, it is worth 2 × (2 + (4 × APL)) Coins instead.
- **Critical Failure (natural 1):** The Bundle is ruined and removed from play.

Ruined Bundles: A ruined Bundle token is removed from play and is not a valid carried or claimed objective.

Flammable Webs: Any Webbed Section that takes fire damage is cleared; remove the marker. Combatants inside the section when it ignites suffer **1d4 fire damage**.

Escape Conditions: Heroes carrying Silk Bundles must escape via any battlefield edge.

Victory Conditions: The adventure ends after Round 8, when every Silk Bundle has been escaped with or ruined, when all surviving Heroes from at least one party have escaped, or when all Heroes are defeated. The party that escapes with the highest Coin Value from secured (undamaged or damaged) Silk Bundles wins. The party whose Hero deals the killing blow to the Broodmother gains an additional **2 × (2 + (4 × APL)) Coins**.

Tiebreaker: The party with the most total Coins from all sources wins.

Scenario 5: The Ambushed Emissary

An emissary vanished on the western forest road carrying documents sealed under two rival Bastion laws. One patron in Greythorn wants the courier found breathing. Another, further off, wants the satchel and does not ask after the courier. The deep wood has kept worse secrets, and the Hollow Quarter is not telling.

Primary Objective: Retrieve the Diplomatic Satchel AND escape the battlefield with it.

Final Random Monster Groups: Determine using **10.6.4**.

Awake Groups: Random Monster Groups begin **Resting** unless a listed setup rule says otherwise. Scenario-specific Monsters use their listed state.

Minion Swarm: No.

Objective Scaling: Apply **10.6.9** to the Clue markers. The Bandit Camp is found when more than half the placed Clues have been deciphered.

Level Scaling: Use the Scenario APL for every APL-based Monster, hazard, objective, reward, and damage value in this scenario.

Solo/Co-op Objective: Decipher a majority of the Clues placed after scaling, then extract the living Emissary or the dropped Diplomatic Satchel and at least half the party as defined in **10.6.10**.

Pressure Clock: Use **Pursuit** from **10.5.7**.

Battlefield and Terrain (36"×36"): Dense forest with small clearings. Place 4–6 Tree area terrain pieces and 2–3 Undergrowth patches. Place one **Makeshift Bandit Camp** marker (about 4"×4", **Cover Terrain**) in one quadrant, at least 8" from any battlefield edge. The Camp's quadrant is determined by the party that won the Setup Roll-off; that party places the Camp.

Objective Placement: The Diplomatic Satchel (carried objective, 6 × (2 + (4 × APL)) Coins to the party that escapes with it) is held by the Emissary NPC and is not placed on the battlefield until the Emissary is placed. Place 4 **Clue** markers (1" tokens) in open areas at least 6" from each other and at least 6" from the Bandit Camp. Place 2 Treasure Chests (**1 Treasure roll with Disadvantage** each) hidden at least 8" from any Clue marker.

Scenario-Specific NPCs and Monsters:

Captured Emissary (NPC): HP 5 | AV 0 | SPD 4" | Sz M | LVL 0. No attacks. Carries the Diplomatic Satchel. Not placed until the Bandit Camp is found (see Special Rules).

Scenario-Specific Monster: Forest-Road Reeve

HP	(5 × Party Size × (2 + (1 × APL))) / 8
AV	2 + (APL/4, rounded down)
SPD	6"
LVL	APL (min 2, max 5)
CV	(2 + (4 × APL)) Coins
Sz	M

AI Steps

Target Priority: Prioritize valid Heroes who are Interacting with or escorting the Emissary. Otherwise, use the normal Monster target priorities.

Attacks

- **Longsword:** 1d8 + APL/2 slashing damage.
- **Hand Crossbow:** 1d6 + APL/2 piercing damage, **Ranged 8"**.

Special Abilities

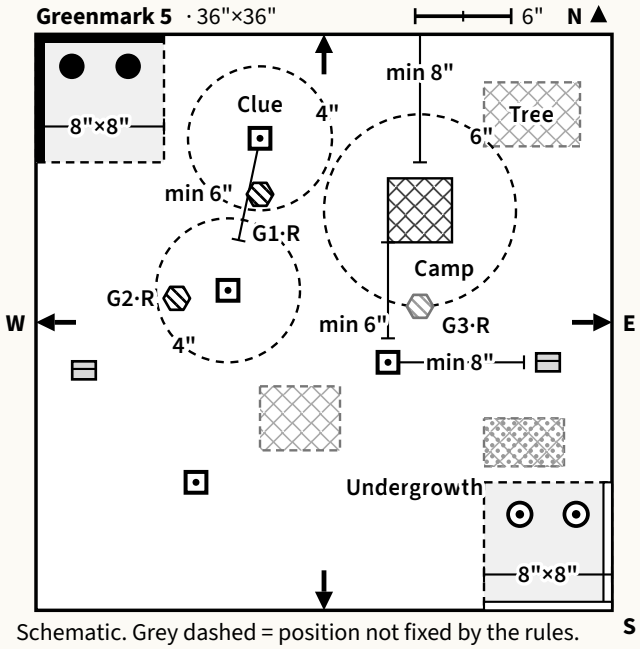
- **Brutal Order (once per adventure):** At the start of their activation, each Monster in one allied **Bandit** Group within 6" immediately moves up to their Speed before the Forest-Road Reeve's activation continues.

Boss Deployment: The Forest-Road Reeve starts **Awake** in the Bandit Camp; not placed until the Camp is found. The Emissary is placed adjacent to the Forest-Road Reeve when placed.

Random Monster Setup:

- **Group 1:** Roll once on the Greenmark Random Monster Table. Place within **4"** of one Clue marker. **Resting**.
- **Group 2:** Roll once on the Greenmark Random Monster Table. Place within **4"** of a different Clue marker. **Resting**.
- **Group 3:** Roll once on the Greenmark Random Monster Table. Place at the perimeter of the Bandit Camp, **6"** from its centre. **Resting**. This group becomes **Awake** when combat occurs within the Camp or within 4" of it.

Party Deployment: Parties deploy in opposite corner zones (8"×8"). Parties alternate placing Heroes within their zone, starting with the party that lost the Setup Roll-off.



Schematic. Grey dashed = position not fixed by the rules.
Roll-off winner chooses the Camp quadrant.
G3: the 6" ring conflicts with the Camp size.

FIG-25. The Ambushed Emissary: parties deploy in opposite 8"×8" corners; the Bandit Camp lies in one quadrant at least 8" from every edge, with four Clue markers at least 6" from each other and the Camp; key: FIG-20 (see 10.4, Greenmark Scenario 5).

Special Rules:

Finding the Emissary, Deciphering Clues: A Hero adjacent to a Clue marker uses **Interact [1 AP]** and makes an **INT Check**. On a success, that Clue is deciphered; mark it. When more than half of the placed Clues have been deciphered across both parties combined, the Bandit Camp is found: place the Forest-Road Reeve and Emissary miniatures there immediately. The Camp terrain itself is visible from setup; the Clues reveal where within it the prisoner is held. Failed **Checks** do not prevent reattempting on a subsequent activation.

Emissary, Guarded State: While the Forest-Road Reeve is within 3" of the Emissary, the Emissary is Guarded and cannot be moved or escorted. If the Emissary becomes Guarded after an escort begins, that escort ends immediately; the Emissary stands in place until Freed and a Hero begins a new escort.

Emissary, Freed State: The Emissary becomes Freed if the Forest-Road Reeve is defeated or ends their activation more than 3" from the Emissary. A Hero adjacent to the Freed Emissary uses **Interact [1 AP]** to begin escorting them. An escorted Emissary moves with the escorting Hero, remaining within 2" at all times. If the Hero cannot move, the Emissary does not move.

Escorting, Contested Control: If a Hero from the opposing party ends their activation adjacent to the Emissary while the current escort Hero is not adjacent to the Emissary, the opposing Hero may use **Interact [1 AP]** at the start of their next activation to take over as escort. The Emissary follows whichever Hero most recently completed this **Interact**. If the escorting Hero is Defeated, the Emissary stops following them and stands in place until a Hero begins escorting them again.

Diplomatic Satchel: While the Emissary is alive, they carry the Satchel. The party currently escorting the Emissary controls the Satchel for all scenario rules. If the Emissary is defeated, the Satchel drops in the Emissary's space. A Hero adjacent to the dropped Satchel uses **Interact [1 AP]** to pick it up.

Escape Conditions: An escorted Emissary escapes when the escorting Hero and the Emissary both reach the same battlefield edge. This extracts the Satchel for the escorting party. If the Emissary has been defeated, the Hero carrying the dropped Satchel may escape through any battlefield edge.

Victory Conditions: The adventure ends when the Satchel is carried off-map, after Round 8, or when all Heroes are defeated.

- The party escaping with the Satchel wins and gains the Satchel's Coin Value.
- If the Emissary escapes the battlefield alive while escorted by one of a party's Heroes, that party gains an additional $3 \times (2 + (4 \times \text{APL}))$ Coins.
- If neither party secures the Satchel and the Forest-Road Reeve was defeated, the party that dealt the killing blow to the Reeve gains their CV plus a **$2 \times (2 + (4 \times \text{APL}))$ Coins** bounty. If the Reeve survives, the party with the most total Coins wins.

Tiebreaker: Most Monster CV collected.

Scenario 6: Ritual of the Old Growth

An Old Growth elder works slowly over a sickness in the roots, and a Heartwood Totem worth more than most villages stands at the heart of the rite. Greythorn's tithe forbids touching it, and the Council of Captains keeps the tithe because the alternative is the wild court at the gate. Another Bastion, with no forest to answer to, calls the same act salvage. The roots are listening to both.

Role Assignment: Before deployment, both parties simultaneously and secretly write down **Theft** or **Protection** on a piece of paper, then reveal. A party may freely choose either role. If both parties choose the same role, both may score that role. If both complete it, the party with the higher total escaped Coin Value wins. If still tied, use this scenario's tiebreaker.

Primary Objective:

- **Theft:** Secure the Heartwood Totem AND escape with it.
- **Protection:** Gain 3 Ward Steps, then ensure the Old Growth Treant completes their ritual with the Treant alive.

Final Random Monster Groups: Determine using **10.6.4**.

Awake Groups: Random Monster Groups begin **Resting** unless a listed setup rule says otherwise. Scenario-specific Monsters use their listed state.

Minion Swarm: No.

Objective Scaling: None.

Level Scaling: Use the Scenario APL for every APL-based Monster, hazard, objective, reward, and damage value in this scenario.

Solo/Co-op Objective: Use the **Protection** objective. Gain 3 Ward Steps, keep the Old Growth Treant alive until the ritual reaches step 6, then extract at least half the party through any battlefield edge as defined in **10.6.10**. The **Theft** objective is not used.

Pressure Clock: Use **Swarm** from **10.5.7**.

Battlefield and Terrain (36"×36"): Place a **Mother Tree** marker (3–4" diameter, **Blocking Terrain**) at the battlefield's centre. The area within **6"** of the Mother Tree is the "Sacred Grove", which is **Cover Terrain**, **Natural**, and also **Difficult Terrain** for Heroes without the Druid or Ranger class unless they pass a **SPI Check** upon entering. Place 4–6 Tree area terrain pieces and 2–3 Undergrowth patches on the rest of the battlefield.

Objective Placement: The Heartwood Totem (carried objective, 6 × (2 + (4 × APL)) Coins if escaped with) starts adjacent to the Old Growth Treant at the Mother Tree. Place 3 Treasure Chests (**1 Treasure roll with Disadvantage** each) at the outer edge of the Sacred Grove, evenly spaced.

Scenario-Specific Monster: Old Growth Treant

HP	(5 × Party Size × (6 + (2 × APL))) / 8
AV	3 + (APL/3, rounded down)
SPD	4"
LVL	APL + 3 (min 5, max 9)
CV	4 × (2 + (4 × APL)) Coins
Sz	H

AI Steps

Target Priority: While **Guardian's Fury** is active, prioritize valid Heroes touching or carrying the Heartwood Totem. Otherwise, use the normal Monster target priorities.

Attacks

- **Branch Slam: Reach**, 1d10 + APL/2 blunt damage.

Special Abilities

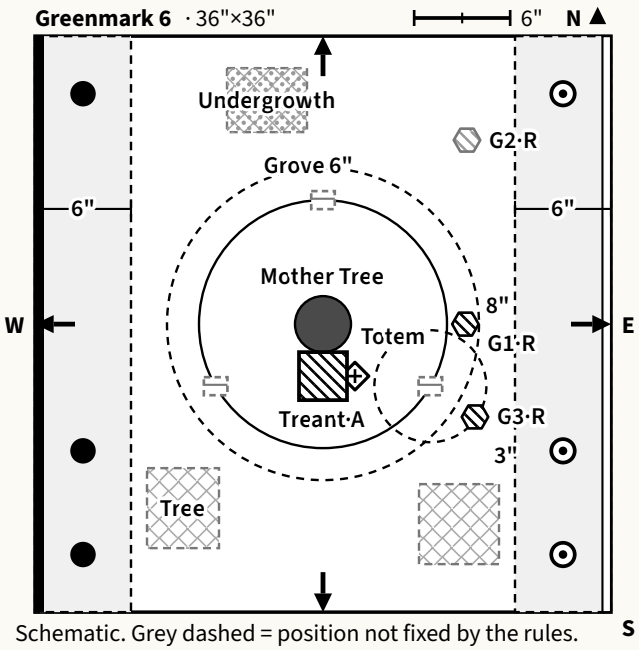
- **Performing Ritual:** While **Guardian's Fury** is not active, the Treant does not move or attack. They activate but take no offensive action, and their activation ends immediately.
- **Multi-Attack:** Makes two **Branch Slam** attacks during their attack step.
- **Root Snare:** At the start of their activation while **Guardian's Fury** is active, if one or more enemies within **8"** are not **Immobilized**, the Treant forgoes one **Branch Slam** attack and targets the nearest such enemy. That target makes a **DEX Check**. **Failure:** The target becomes **Immobilized**.
- **Guardian's Fury:** When the Treant is attacked or the Totem is touched, Guardian's Fury becomes active immediately. While Guardian's Fury is active, the Treant abandons the ritual and uses normal AI. At the end of a round in which the Treant was not attacked, no Hero touched or carried the Totem, and the Totem is adjacent to the Treant, Guardian's Fury ends and the Treant resumes the ritual.
- **Siege Monster.**
- **Vulnerable:** fire.
- **Plant Stride:** The Treant ignores **Difficult Terrain** in forest and undergrowth areas.

Boss Deployment: Starts **Awake** at the Mother Tree, adjacent to the Heartwood Totem.

Random Monster Setup:

- **Group 1:** Roll once on the Greenmark Random Monster Table. Place within 8" of the Mother Tree but outside the Sacred Grove. **Resting**. Becomes Awake if combat occurs within the Sacred Grove.
- **Group 2:** Roll once on the Greenmark Random Monster Table. Place on an approach path to the Grove. **Resting**.
- **Group 3:** Roll once on the Greenmark Random Monster Table. Place within 3" of one outer Treasure Chest. **Resting**.

Party Deployment: Parties make a Setup Roll-off. The winner chooses a long battlefield edge and deploys within **6"** of that edge. The other party deploys within **6"** of the opposite long edge.



Schematic. Grey dashed = position not fixed by the rules.

FIG-26. Ritual of the Old Growth: the Setup Roll-off winner picks a long edge and deploys within 6"; the Mother Tree at the centre has a Sacred Grove within 6" of it, with three Treasure Chests evenly spaced on its outer edge; key: FIG-20 (see 10.4, Greenmark Scenario 6).

Special Rules:

Ritual Progress: Track ritual progress with a die or token (starting at 0). At the end of each round in which the Treant was not attacked, no Hero touched or carried the Totem, and the Totem is adjacent to the Treant, advance the ritual by 1 step. The ritual reaches its midpoint at step 3 and completes at step 6.

When the ritual reaches step 3, the Sacred Grove expands to **Aura 8"**, and all Heroes currently within it heal **1d6 HP**.

Tend the Rite (Protection): A Hero from a party that chose **Protection** and is adjacent to the Mother Tree uses **Interact [2 AP]** and makes a **SPI Check**. On a success, that party gains **1 Ward Step**, to a maximum of **1 Ward Step per party per round** and **3 Ward Steps per party**. Each Ward Step is worth **(2 + (4 × APL)) Coins** if the ritual completes. A party forfeits all Ward Steps and cannot gain more if one of its Heroes attacks the Treant or touches or carries the Heartwood Totem.

Living Heartwood Shard: When the Treant is defeated, they drop a Living Heartwood Shard (worth 2 × (2 + (4 × APL)) Coins) in their space. A

Hero adjacent to it uses **Interact [1 AP]** to take it as a carried objective.

Stealing the Totem: A Hero adjacent to the Treant (or adjacent to the Totem if they have been separated) uses **Interact [3 AP]** and makes a **STR Check** to pry the Totem loose. On a success, the Hero takes the Totem. This immediately triggers Guardian's Fury.

Blighted Intruders: The first time Guardian's Fury becomes active while Ritual Progress is 2 or less, one additional Random Monster Group, generated by rolling once on the Greenmark Random Monster Table, appears within **3"** of the Mother Tree at the start of the next Monster Phase. This group is **Awake** and hostile to all other combatants and Monsters.

Escape Conditions: Required only for the Theft objective. The Hero carrying the Totem must escape via any battlefield edge.

Victory Conditions: The adventure ends after Round 8, when the Totem is carried off-map, when the ritual completes, or when all Heroes are defeated.

- **Theft win:** Escape with the Totem. Gain 6 × (2 + (4 × APL)) Coins.
- **Protection win:** The ritual reaches step 6 with the Treant alive, and the party has **3 Ward Steps**. Each winning Protection party gains **3 × (2 + (4 × APL)) Coins** from its Ward Steps plus an additional **3 × (2 + (4 × APL)) Coins**. Each Hero in that party gains **Forest's Blessing**: **+1 Luck Point** for their next adventure.
- **If the Treant is defeated before the ritual completes and the Totem is not escaped with:** The party that dealt the most total damage to the Treant gains their CV plus **4 × (2 + (4 × APL)) Coins**. If that damage is tied, neither party gains this reward.
- If no primary objective is achieved, the party with the most total Coins wins.

Tiebreaker: Most total damage dealt to the Treant.

Climate 2: Ashlands Scenarios

Scenario 1: The Fallen Observatory [Intro]

A star-engine once crowned these ruins, and its broken brass arms still turn when moonlight enters the cracked dome. Wizards would give a finger for the instruments scattered across the shifting floors, which is precisely why the Sable Watch wants them carried to Sablekeep and locked away from unregistered hands. The old servants of the place still know the penalty for touching them. They have a great deal of time in which to enforce it.

Primary Objective: Be the party to extract the greatest total Coin Value from Observatory Relics and the central Star Lens.

Final Random Monster Groups: Determine using **10.6.4**.

Awake Groups: Random Monster Groups begin **Resting** unless a listed setup rule says otherwise. Scenario-specific Monsters use their listed state.

Minion Swarm: No.

Objective Scaling: None.

Level Scaling: Use the Scenario APL for every APL-based Monster, hazard, objective, reward, and damage value in this scenario.

Solo/Co-op Objective: Extract the Central Lens, at least 1 Lesser Fragment, and at least half the party through any battlefield edge as defined in **10.6.10**.

Pressure Clock: Use **Collapse** from **10.5.7**.

Battlefield and Terrain (36"×36"): Place one large **Collapsed Dome** ruin (6"×6") at the battlefield's centre, with 4–6 broken wall sections and 3–4 rubble fields surrounding it. Place 2 raised "Observation Platforms" (2"×2", 2" high) near opposite corners of the central ruin, at least 10" from each other. Mark 3 **Unstable Floor** sections on the floor inside the dome, each at least 2" apart.

Objective Placement:

- Place the **Star Lens** on a central pedestal inside the dome (carried objective, 7 × (2 + (4 × APL)) Coins).
- Place 3 **Bronze Orrery Fragment** markers in separate ruin alcoves outside the dome (each a carried objective, 1 × (2 + (4 × APL)) Coins).
- Place 2 Treasure Chests (**1 Treasure roll with Disadvantage** each), one on each raised Observation Platform.

Scenario-Specific Monster: Observatory Sentinel

HP	(5 × Party Size × (3 + (1 × APL))) / 8
AV	3 + (APL/4, rounded down)
SPD	5"
LVL	APL + 1 (min 3, max 7)
CV	2 × (2 + (4 × APL)) Coins
Sz	M

AI Steps

Target Priority: Prioritize the valid Hero carrying the Star Lens. If no valid Hero carries it, prioritize valid Heroes inside the dome. Otherwise, use the normal Monster target priorities.

Attacks

- **Arcane Beam:** 1d8 + APL/2 arcane damage, **Ranged 12"**.
- **Stone Fist:** 1d10 + APL/2 blunt damage.

Special Abilities

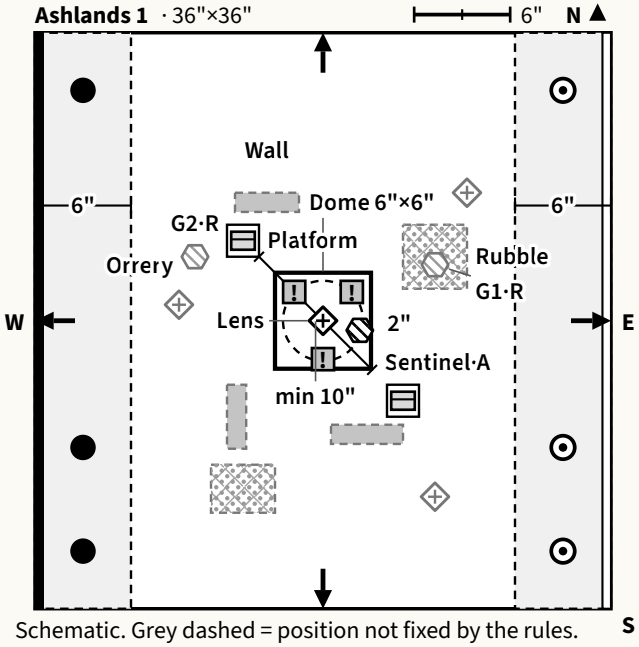
- **Construct.**
- **Rotating Lens:** At the start of the Monster Phase, the Sentinel targets one Observation Platform. The party that lost the Setup Roll-off chooses the platform during the first Monster Phase; the targeted platform then alternates each subsequent Monster Phase. Each enemy on that platform or adjacent to it must make a **DEX Check**. On a failure, that enemy suffers **1d6 arcane damage**. This effect does not apply if the Sentinel is **Engaged**.

Boss Deployment: Starts **Awake** inside the Collapsed Dome, within **2"** of the Star Lens pedestal.

Random Monster Setup:

- **Group 1:** Roll once on the Ashlands Random Monster Table. Place among rubble outside the dome. **Resting**.
- **Group 2:** Roll once on the Ashlands Random Monster Table. Place in one side alcove. **Resting**.

Party Deployment: Parties deploy on opposite long battlefield edges, within **6"** of their edge.



Schematic. Grey dashed = position not fixed by the rules.

FIG-27. The Fallen Observatory: parties deploy within 6" of opposite long edges around a central 6"×6" Collapsed Dome holding the Star Lens, with two raised Platforms at least 10" apart; key: FIG-20 (see 10.4, Ashlands Scenario 1).

Special Rules:

Unstable Floors: The first time per round a Hero ends movement in an Unstable Floor section, roll 1d6. On a 1–2, the floor collapses: that Hero falls **Prone**, suffers **1d6 blunt damage**, and the section becomes **Difficult Terrain** permanently. Collapsed sections cannot collapse again.

Star Lens: A Hero carrying the Star Lens counts as a **Light Source** with **Aura 3"**.

Escape Conditions: Heroes carrying any relic or Chest contents must escape via any battlefield edge. Heroes carrying nothing may also escape freely.

Victory Conditions: The adventure ends after Round 8, when all surviving Heroes from at least one party have escaped, or when all Heroes are defeated. The party that extracts the most total Coin Value (from relics, Chests, and Monster CV) wins.

Tiebreaker: Most Monster CV collected.

Scenario 2: The Guardian's Test

A sealed gate dominates the courtyard, black with soot and old prayers, somewhere along the imperial roads that run out from the dead empire's heart. The texts say a vault waits beyond. They warn that worthiness is tested before entry, and no surviving copy explains what worthiness means. The Sable Watch insists the guardian answers to a seal nobody now holds, while a rival party arrives carrying a Hollow Crown's Writ and a very different opinion.

Primary Objective: Be the first party to complete 2 of the 3 Trials AND claim the Vault Keystone from the Sealed Gateway.

Final Random Monster Groups: Determine using **10.6.4**.

Awake Groups: Random Monster Groups begin **Resting** unless a listed setup rule says otherwise. Scenario-specific Monsters use their listed state.

Minion Swarm: No.

Objective Scaling: None. The 3 Trials are distinct and remain fixed.

Level Scaling: Use the Scenario APL for every APL-based Monster, hazard, objective, reward, and damage value in this scenario.

Solo/Co-op Objective: Gain 3 Trial Points, open the Gateway, then extract at least half the party through the Gateway as defined in **10.6.10**.

Pressure Clock: Use **Pursuit** from **10.5.7**.

Battlefield and Terrain (36"×36"): One long battlefield edge contains the "Sealed Gateway", a 4–6" wall section with an archway of **Open Terrain** in its centre. The central area (about 15"×15") is an open Courtyard. Place 4–6 colonnade sections or free-standing pillars and scattered rubble around the Courtyard. Place three **Trial Pedestal** markers (1") in the Courtyard, forming a triangle with each Pedestal at least 5" from the others. Each Pedestal is labelled: **Insight**, **Might**, and **Will**.

Objective Placement: The Sealed Gateway and the 3 Trial Pedestals are the Primary Objectives. Place 2 Treasure Chests (**1 Treasure roll with Disadvantage** each) in alcoves or side chambers off the Courtyard.

Scenario-Specific Monster: Guardian Construct

HP	(5 × Party Size × (5 + (1 × APL))) / 8
AV	2 + (APL/2, rounded down)
SPD	5"
LVL	APL + 2 (min 4, max 8)
CV	3 × (2 + (4 × APL)) Coins
Sz	M

AI Steps

Target Priority: Prioritize valid Heroes who are Interacting with the Gateway, then valid Heroes belonging to a party with **2** or more Trial Points. Otherwise, use the normal Monster target priorities.

Attacks

- **Energy Bolt:** 1d8 + APL/2 arcane damage, **Ranged 12"**.
- **Arcane Slam:** 1d10 + APL/2 blunt damage; **Push** the target **1"** directly away.

Special Abilities

- **Construct.**
- **Nullification Protocol:** When a Power, scroll, or special item effect targets the Guardian, that effect has no effect on the Guardian. Resolve it against every other target normally.
- **Awaken Protocol:** The Guardian is not placed at setup. When the first Trial Pedestal is successfully Interacted with, place the Guardian at the centre of the Courtyard. They are immediately **Awake** and hostile to all.

Boss Deployment: The Guardian Construct is not placed at setup. See **Awaken Protocol**.

Random Monster Setup:

- **Group 1:** Roll once on the Ashlands Random Monster Table. Place amongst the colonnades. **Resting**. Becomes Awake if combat occurs within the Courtyard.
- **Group 2:** Roll once on the Ashlands Random Monster Table. Begins off-battlefield; arrives from a random edge that is neither party's deployment edge at the start of Round 3. Awake when it arrives.

Party Deployment: Parties deploy on opposite short battlefield edges, within **6"** of their edge.

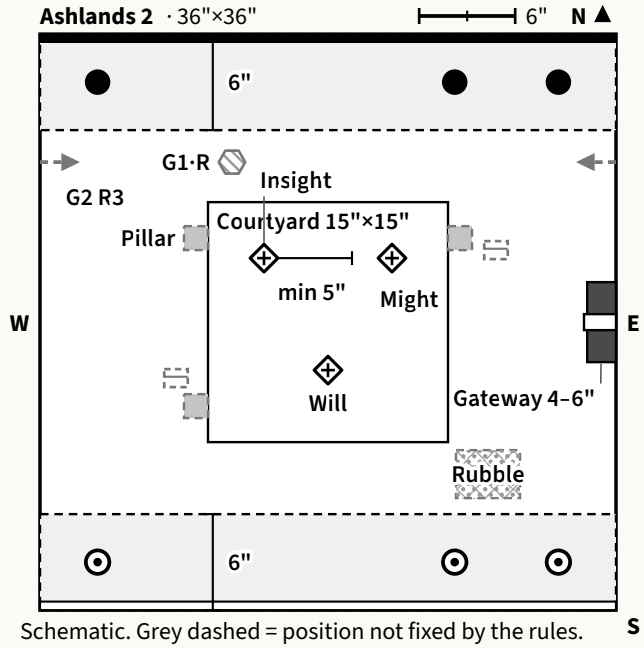


FIG-28. The Guardian's Test: parties deploy within 6" of opposite short edges, with the Sealed Gateway in one long edge and three Trial Pedestals at least 5" apart in a Courtyard about 15"×15"; key: FIG-20 (see 10.4, Ashlands Scenario 2).

Special Rules:

The Trials: Each Pedestal may be Interacted with by Heroes from both parties but grants a Trial Point only once per party per Pedestal. A party that has already gained a Trial Point from a given Pedestal cannot gain another from it.

- **Pedestal of Insight:**
  Interact [2 AP]: Make an **INT Check. Success:** Gain 1 Trial Point.
- **Pedestal of Might:**
  Interact [2 AP]: Make a **STR Check. Success:** Gain 1 Trial Point.
- **Pedestal of Will:**
  Interact [2 AP]: Make a **SPI Check. Success:** Gain 1 Trial Point.

A party needs 2 Trial Points to be eligible to open the Gateway.

Opening the Gateway: A Hero from a party with 2 or more Trial Points who is adjacent to the Sealed Gateway uses **Interact [3 AP]**. This interaction cannot be started while the Guardian Construct is **Awake**, within **6"**, and has **LOS** to that Hero. On completion, the Gateway opens and the Hero claims the **Vault Keystone** as a carried objective worth **8 × (2 + (4 × APL)) Coins**. No **Check** is required; completing the Trials is the test.

Escape Conditions: None. The Keystone does not need to leave the battlefield.

Victory Conditions: The adventure ends when a party claims the Vault Keystone, after Round 8, or when all Heroes are defeated. The party that claims the Keystone wins and gains the Keystone's Coin Value. If the Keystone is unclaimed, the party with the most total Coin Value wins.

Tiebreaker: Most Trial Points accumulated.

Scenario 3: The Shifting Sands of Time

The ruin does not keep time honestly. Glyphs flare and gutter. Soot drifts uphill in the corners. Stone that bore a traveller's weight at dawn may open beneath them by noon. Relics surface when the place remembers them and sink before anyone can make a clean claim, and the Sable Watch will register whatever is carried back to Sablekeep, whether the finder wishes it registered or not.

Primary Objective: Be the party to secure the most Coins from up to 4 Treasure Chests found by shifting terrain.

Final Random Monster Groups: Determine using **10.6.4**.

Awake Groups: Random Monster Groups begin **Resting** unless a listed setup rule says otherwise. Scenario-specific Monsters use their listed state.

Minion Swarm: No.

Objective Scaling: None. The 4 Unstable Ground zones are fixed scenario terrain.

Level Scaling: Use the Scenario APL for every APL-based Monster, hazard, objective, reward, and damage value in this scenario.

Solo/Co-op Objective: Extract at least 2 Chronal Chests and at least half the party through any battlefield edge as defined in **10.6.10**.

Pressure Clock: Use **Collapse** from **10.5.7**.

Battlefield and Terrain (36"×36"): Place 6–8 ruined wall sections, 2–3 rocky outcrops, and one larger "Central Ruin Footprint" (4"×4" flat area, **Open Terrain**) near the battlefield centre. Mark 4 separate **Unstable Ground** zones (3"×3" each) in chokepoints or open areas near the Central Ruin, at least 6" apart.

Objective Placement: No Treasure Chests start on the battlefield. Chests are found during play (see Special Rules).

Scenario-Specific Monster: None.

Boss Deployment: None.

Random Monster Setup:

- **Group 1:** Roll once on the Ashlands Random Monster Table. Place within 4" of one Unstable Ground zone. **Resting**.
- **Group 2:** Roll once on the Ashlands Random Monster Table. Place within 4" of a different Unstable Ground zone. **Resting**.
- **Group 3:** Roll once on the Ashlands Random Monster Table. Place patrolling the Central Ruin footprint. **Resting**.
- **Group 4:** Roll once on the Ashlands Random Monster Table. Begins off-battlefield; arrives from a randomly determined battlefield edge at the start of Round 2. Awake when it arrives.

Party Deployment: Parties deploy in opposite corner zones (8"×8"). Parties alternate placing Heroes within their zone, starting with the party that lost the Setup Roll-off.

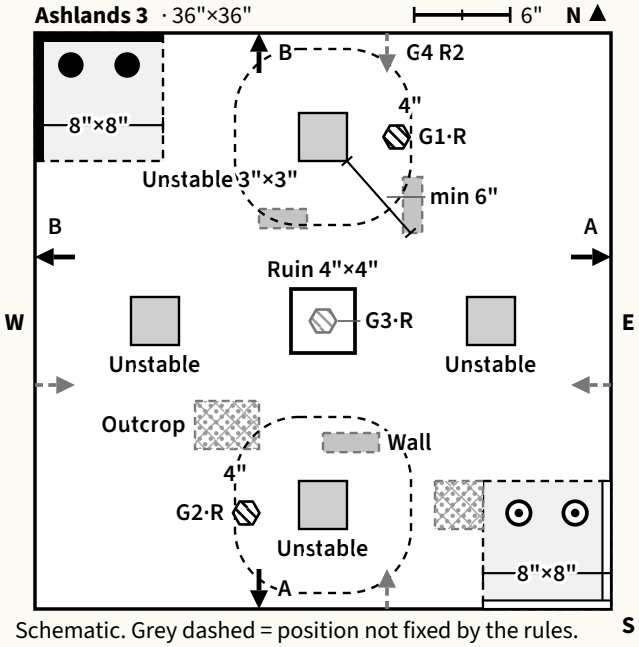

FIG-29. The Shifting Sands of Time: parties deploy in opposite 8"×8" corners around a 4"×4" Central Ruin with four 3"×3" Unstable Ground zones at least 6" apart; carriers escape by the two edges not touching their corner; key: FIG-20 (see 10.4, Ashlands Scenario 3).

Special Rules:

Shifting Terrain and Hidden Treasure: At the start of Rounds 2, 3, 4, and 5, the party that lost the Setup Roll-off chooses one Unstable Ground zone that does not yet contain a Chest. Roll 1d6 for that zone:

- **1–2:** The zone becomes **Difficult Terrain**. Place a marker. This effect is permanent for the adventure.
- **3–4:** A minor hazard is marked. The next Hero to enter the zone suffers **1d4 piercing damage**; **AV** reduces this damage normally; the hazard is then spent and removed.
- **5–6:** A Treasure Chest appears in the centre of the zone (**1 Treasure roll**). Once a zone contains a Chest, it is stable and cannot be chosen again.

If no Chest has appeared before the Round 4 shift, the Round 4 result is treated as **5–6**. If fewer than 2 Chests have appeared before the Round 5 shift, the Round 5 result is treated as **5–6**. All 4 Unstable Ground zones may be shifted only once each.

Temporal Instability: At the end of each round, each party simultaneously and secretly chooses one opposing Hero. When both parties reveal their choice, each chosen Hero makes a **SPI Check**. On a failure, the choosing party decides one of the following effects: that Hero loses **1 AP** at the start of their next activation, or the choosing party **Slides** that Hero **1d3"** in a direction of that party's choice.

Escape Conditions: Heroes carrying looted Coins must escape via either battlefield edge that does not touch their party's deployment corner.

Victory Conditions: The adventure ends after Round 8, when all surviving Heroes from at least one party have escaped, or when all Heroes are defeated. The party that escapes with the most total Coin Value wins and gains a bonus $2 \times (2 + (4 \times \text{APL}))$ Coins.

Tiebreaker: Most Monster CV collected.

Scenario 4: The Sealed Archive

A sealed archive lies under a fractured basilica in the dead empire's heart: tablets, scrolls, debt records, and sermons the Sable Watch would rather see burned than read. Dust chokes the corridors. Scavengers have gnawed through the newer shelves. Something older keeps the inner stacks in order, and it has waited longer than Sablekeep has stood for someone to disturb them.

Primary Objective: Be the first party to extract the Archive Codex. If neither party extracts the Codex, the party with the most total extracted Coin Value wins.

Final Random Monster Groups: Determine using **10.6.4**.

Awake Groups: Random Monster Groups begin **Resting** unless a listed setup rule says otherwise. Scenario-specific Monsters use their listed state.

Minion Swarm: No.

Objective Scaling: None.

Level Scaling: Use the Scenario APL for every APL-based Monster, hazard, objective, reward, and damage value in this scenario.

Solo/Co-op Objective: Identify and extract the Greater Tablet Cache, then extract at least half the party through any battlefield edge as defined in **10.6.10**.

Pressure Clock: Use **Collapse** from **10.5.7**.

Battlefield and Terrain (36"×36"): Place a central "Archive Hall" (8"×4") with two side chambers and narrow connecting corridors. Place 5–7 book stacks, shelves, or collapsed stone archives. Place 3 **Dust Hazard** markers (1") in separate corridors leading to the central hall.

Objective Placement:

- Place the **Archive Codex** on a lectern in the central hall (carried objective, 6 × (2 + (4 × APL)) Coins).
- Prepare 3 face-down **Tablet Cache** markers: two marked **Lesser** (each a carried objective, 1 × (2 + (4 × APL)) Coins) and one marked **Greater** (a carried objective, 2 × (2 + (4 × APL)) Coins). Shuffle them out of both parties' sight, then place them face down: two in one side chamber, one in the other. A Cache's value is revealed when it is picked up.
- Place 2 Treasure Chests (**1 Treasure roll with Disadvantage** each) in outer corridors.

Scenario-Specific Monster: Libram Warden

HP	(5 × Party Size × (3 + (1 × APL))) / 8
AV	2 + (APL/4, rounded down)
SPD	5"
LVL	APL + 1 (min 3, max 6)
CV	2 × (2 + (4 × APL)) Coins
Sz	M

AI Steps

Target Priority: Prioritize a valid enemy carrying the Archive Codex. Otherwise, use the normal Monster target priorities.

Attacks

- **Paper Knife Swarm:** 1d8 + APL/2 slashing damage.
- **Crushing Tome:** 1d10 + APL/2 blunt damage.

Special Abilities

- **Construct.**
- **Still Form:** While **Resting**, treat this Monster as scenery until they attack, suffer damage, or an enemy ends an activation within **3"** of them with **LOS** to them. See **9.6**.
- **Whispering Hex:** A target damaged by **Crushing Tome** must make an **INT Check**. **Failure:** The target becomes **Stunned**.

Boss Deployment: Starts **Resting** in the Archive Hall, within **2"** of the lectern, appearing as a motionless pile of stacked books (**Still Form**).

Random Monster Setup:

- **Group 1:** Roll once on the Ashlands Random Monster Table. Place in one side chamber. **Resting**.
- **Group 2:** Roll once on the Ashlands Random Monster Table. Place in the opposite side chamber. **Resting**.
- **Group 3:** Roll once on the Ashlands Random Monster Table. Place in an outer corridor. **Resting**.

Party Deployment: Parties deploy on opposite short battlefield edges, within **6"** of their edge.

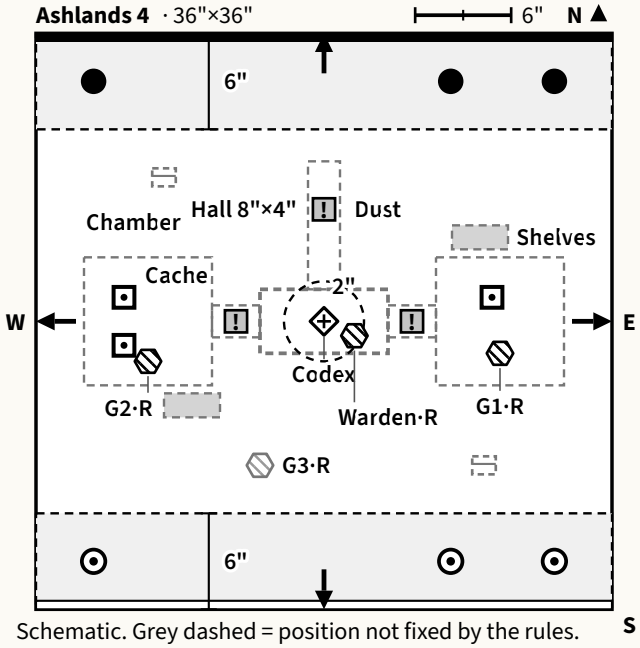

FIG-30. The Sealed Archive: parties deploy within 6" of opposite short edges around an 8"×4" Archive Hall with the Codex on its lectern, two side chambers and Tablet Caches two in one chamber and one in the other; key: FIG-20 (see 10.4, Ashlands Scenario 4).

Special Rules:

Dust Hazards: Each Dust Hazard triggers the first time a combatant moves within **1"** of its marker. That combatant makes a **DEX Check**. On a failure, they suffer **1d4 piercing damage** and become **Blinded**. The hazard is spent after triggering; remove the marker.

Hidden Information: In remote or digital play, use face-down slips, numbered opaque markers, or a private randomizer so only the controlling players of a party entitled to inspect the Tablet Caches can see the Cache identities.

Reading the Codex: A Hero adjacent to the lectern uses **Interact [2 AP]** and makes an **INT Check**.

- **Success:** The reading Hero secretly looks at all 3 face-down Tablet Cache markers, then returns them face down where they lay. In addition, the **Greater** Tablet Cache is worth +(2 + (4 × APL)) Coins if extracted by the reading Hero's party (mark it with a token when it is revealed).
- **Failure:** No information is gained. The interaction may be reattempted on a subsequent activation.

Picking Up the Codex: A Hero adjacent to the lectern uses **Interact [1 AP]** to take the Codex. Reading the Codex and picking it up are separate actions; a Hero may do both in the same activation if they have sufficient AP.

Escape Conditions: Heroes carrying the Codex or Tablet Caches must escape via any battlefield edge.

Victory Conditions: The adventure ends when the Archive Codex is carried off-map, after Round 8, or when all Heroes are defeated.

- The first party to extract the Codex wins and gains the Codex's Coin Value plus any Tablet Cache Coin Values that party extracted.
- If neither party extracts the Codex, the party with the most total extracted Coin Value wins.

Tiebreaker: Most Monster CV collected.

Scenario 5: The Reliquary of Broken Saints

Broken statues and smashed reliquaries fill the hall, and sanctified bone and silver remain in the wreckage, too holy to abandon and too valuable to leave. Sablekeep needs the relics to keep its braziers lit and its authority legal, and will pay to register every fragment. The dead here are not confused. They swore to guard these relics, and death has not released them from the oath.

Role Assignment: Before deployment, both parties simultaneously and secretly write down **Theft** (take the Kest's Reliquary) or **Sanctification** (complete the Ritual of Quiet), then reveal. Either party may choose either role. If both choose the same role, both pursue it.

Primary Objective:

- **Theft:** Carry the Kest's Reliquary off any battlefield edge.
- **Sanctification:** Complete the Ritual of Quiet at the altar by gaining 2 Ritual Steps.

Final Random Monster Groups: Determine using **10.6.4**.

Awake Groups: Random Monster Groups begin **Resting** unless a listed setup rule says otherwise. Scenario-specific Monsters use their listed state.

Minion Swarm: No.

Objective Scaling: None.

Level Scaling: Use the Scenario APL for every APL-based Monster, hazard, objective, reward, and damage value in this scenario.

Solo/Co-op Objective: Use the **Sanctification** objective. Complete 2 Ritual Steps, then extract at least half the party through any battlefield edge as defined in **10.6.10**. The **Theft** objective is not used.

Pressure Clock: Use **Swarm** from **10.5.7**.

Battlefield and Terrain (36"×36"): Place a long central nave with 4–6 broken statue bases, 2 side aisles, and one raised altar platform at the far end of the nave. Place 3–4 rubble fields and 2 hanging curtain or screen features (**Cover Terrain**).

Objective Placement:

- Place the **Kest's Reliquary** on the altar platform (carried objective; carrier's Speed is reduced by 1" for as long as they carry it; worth 6 × (2 + (4 × APL)) Coins if extracted).
- Place 2 **Saintly Bone Fragment** markers in separate side aisles (each a carried objective, 2 × (2 + (4 × APL)) Coins).
- Place 2 Treasure Chests (**1 Treasure roll with Disadvantage** each) near the rear of the nave.

Scenario-Specific Monsters: Broken Saint Revenants (2)

HP	(5 × Party Size × (2 + (1 × APL))) / 8
AV	2 + (APL/4, rounded down)
SPD	5"
LVL	APL (min 3, max 5)
CV	2 × (2 + (4 × APL)) Coins each
Sz	M

Attacks

- **Rusted Mace:** 1d8 + APL/2 blunt damage.

Special Abilities

- **Undead.**
- **Bound to Altar:** While within **6"** of the altar, each Revenant gains **+1 AV**. This bonus applies passively at all times; it does not require activation.
- **Condemning Gaze:** At the start of each activation, the Revenant targets the nearest enemy within **6"**. That target makes a **SPI Check**. **Failure:** The target becomes **Frightened**.

Boss Deployment: Both Revenants start adjacent to the altar. **Resting**. Both become Awake simultaneously when any Hero touches the altar, the Kest's Reliquary, or any Bone Fragment.

Random Monster Setup:

- **Group 1:** Roll once on the Ashlands Random Monster Table. Place in the left side aisle. **Resting**.
- **Group 2:** Roll once on the Ashlands Random Monster Table. Place in the right side aisle. **Resting**.

Party Deployment: Parties deploy on opposite long battlefield edges, within **6"** of their edge.

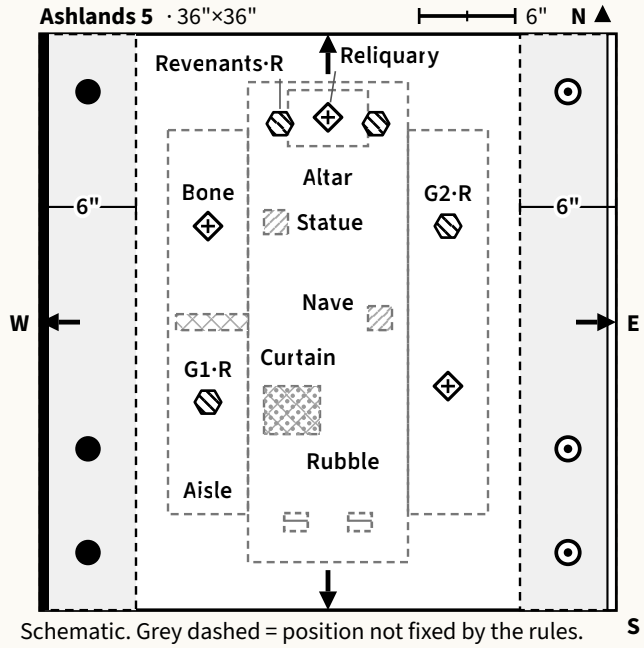

FIG-31. The Reliquary of Broken Saints: parties deploy within 6" of opposite long edges around a long central nave with the Reliquary on its altar platform, Bone Fragments in the two side aisles; key: FIG-20 (see 10.4, Ashlands Scenario 5).

Special Rules:

Ritual of Quiet: A Hero adjacent to the altar uses **Interact [2 AP]** and makes a **SPI Check**. On a success, that Hero's party gains **1 Ritual Step** and **2 × (2 + (4 × APL)) Coins**. Multiple Heroes from the same party may contribute Ritual Steps, and Steps need not be performed consecutively. When a party accumulates **2 Ritual Steps**, the altar is sanctified: all Broken Saint Revenants are immediately defeated and removed from play. The Ritual cannot be completed by the opposing party once one party achieves 2 Steps.

Picking Up the Kest's Reliquary: A Hero adjacent to the altar uses **Interact [1 AP]** to take the Kest's Reliquary. This wakes the Broken Saint Revenants if they are still **Resting**.

Escape Conditions: Required only for the Theft objective. The Hero carrying the Kest's Reliquary must escape via any battlefield edge.

Victory Conditions: The adventure ends when the Kest's Reliquary is carried off-map, when a party completes the Ritual of Quiet, after Round 8, or when all Heroes are defeated.

- **Sanctification win:** The completing party wins and gains **2 × (2 + (4 × APL)) Coins** plus all Ritual Step Coins earned, for a maximum primary reward of **6 × (2 + (4 × APL)) Coins**.
- **Theft win:** The extracting party wins and gains the Kest's Reliquary's Coin Value.
- If the same party completes the Ritual and extracts the Kest's Reliquary, it still wins, but it gains only the higher of the two primary rewards. Ritual Step Coins already earned are still retained.
- If neither primary objective is achieved, the party with the most total extracted Coin Value wins.

Tiebreaker: Most Monster CV collected.

Scenario 6: The Iron-Vein Vault

The vault has been sealed for two generations. Karnessa Iron-Vein pressed their blood into the iron door when something inside began to leak through the walls, and the seal has held. Until now. Tremors along the imperial roads have cracked the outer binding, and something below is pushing. Sablekeep sends one party to reinforce the seal before whatever waits finishes its work; a rival patron sends another to open the vault and price what was sealed there. The vault does not care about either contract.

Role Assignment: Randomly determine which party is **Sealers** (Party A); the other party is **Openers** (Party B). Roll **1d2**: on a **1**, the Setup Roll-off winner is Party A; on a **2**, the Setup Roll-off loser is Party A.

Primary Objective:

- **Sealers (Party A):** Apply Karnessa's Blood to every Binding Point placed after scaling before the vault opens.
- **Openers (Party B):** Break every Binding Point placed after scaling and escape with the Vault Record before the end of Round 8.

Final Random Monster Groups: Determine using **10.6.4**.

Awake Groups: Random Monster Groups begin **Resting** unless a listed setup rule says otherwise. Scenario-specific Monsters use their listed state.

Minion Swarm: No.

Objective Scaling: Apply **10.6.9** to the Binding Points. Any rule that refers to all Binding Points refers to all Binding Points placed after scaling.

Level Scaling: Use the Scenario APL for every APL-based Monster, hazard, objective, reward, and damage value in this scenario.

Solo/Co-op Objective: Use the **Openers** objective. Break every Binding Point placed after scaling, retrieve the Vault Record, then extract the Record and at least half the party through any battlefield edge as defined in **10.6.10**. The **Sealers** objective is not used.

Pressure Clock: Use **Ritual** from **10.5.7**.

Battlefield and Terrain (36"×36"): Build a crumbling Ashlands vault complex with one central Chamber (6"×6") containing an iron door set into the far wall. The iron door and its frame hold up to 3 **Binding Point** markers (1" tokens): one on each hinge and one on the centre lock. Place Binding Points as described in **Objective Placement**. Connect the central Chamber to two flanking corridors and one entrance hall. Place 4–6 collapsed wall sections and rubble fields.

Objective Placement: Determine the number of Binding Points after scaling; the printed number is **3**.

- If 1 Binding Point is placed, use the centre lock.
- If 2 Binding Points are placed, use the centre lock and randomly determine one hinge.
- If 3 Binding Points are placed, use the centre lock and both hinges.
- Binding Points are fixed to the iron door and do not move.
- Place the **Vault Record** on a lectern **3" beyond the iron door**, inside the sealed vault. It is a carried objective worth **8 × (2 + (4 × APL)) Coins** if escaped with by Party B and cannot be reached until the vault opens.
- Place 2 Treasure Chests (**1 Treasure roll with Disadvantage** each) in the flanking corridors.

Binding Point States: Each Binding Point is always in exactly one of three states: **Unsealed**, **Sealed**, or **Broken**. Every Binding Point begins **Unsealed**. Mark each Point's current state with a token beside it. The vault opens when every Binding Point placed after scaling is **Broken** at the same time.

Scenario-Specific Monster: Vault Presence

The thing inside the vault presses against the iron door. It does not have a name in any surviving record. The record says only: do not open, do not look, do not ask what it says.

HP	(5 × Party Size × (6 + (2 × APL))) / 8
AV	2 + (APL/3, rounded down)
SPD	Fly 7"
LVL	APL + 3 (min 6, max 10)
CV	4 × (2 + (4 × APL)) Coins
Sz	M

AI Steps

1. **Pressure Wave [Recharge 5–6]:** If one or more enemies can be included in a legal **Cone 6"**, place the cone using the Area of Effect priorities in **9.5**. Each enemy in the cone must pass a **STR Check** or be **Pushed 3"** directly away and become **Prone**. Then end this activation.

Attacks

- **Leaking Touch: Reach**, 1d10 + APL/2 necrotic damage. When this attack damages a target, that target must pass a **SPI Check** or suffer **-1 SPI** for the remainder of the adventure.

Special Abilities

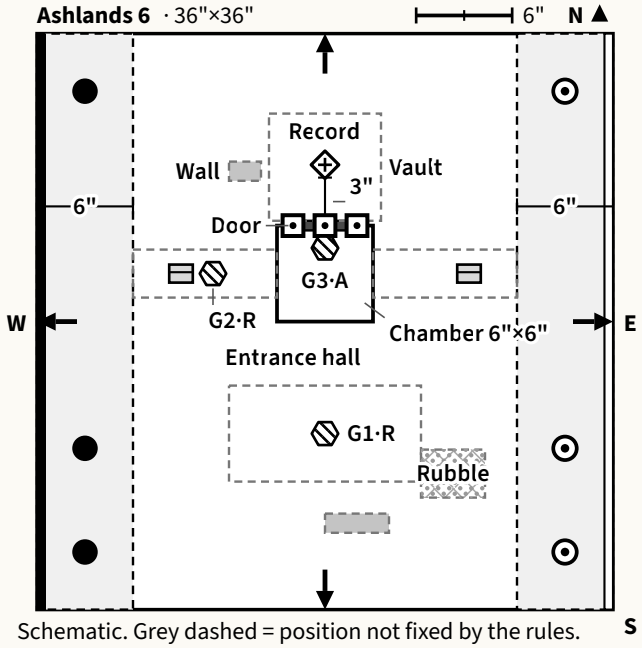
- **Undead.**
- **Incorporeal.**
- **Bound to the Door:** While any Binding Point is **Sealed**, the Vault Presence cannot move more than **6"** from the iron door. If every Binding Point placed after scaling is **Sealed** at the same time, the Vault Presence is immediately removed from play and the vault is sealed. If the vault had opened, the iron door closes when the vault is sealed, and the Vault Record inside becomes unreachable for the rest of the adventure.
- **Vault Pressure:** At the end of each round, if the vault has not yet opened, each Hero in the central Chamber must pass a **SPI Check**. **Failure:** That Hero suffers **1d4 psychic damage**.

Boss Deployment: The Vault Presence is not placed at setup. When every Binding Point placed after scaling is **Broken** at the same time, immediately place the Vault Presence adjacent to the iron door. They are **Awake** and hostile to all.

Random Monster Setup:

- **Group 1:** Roll once on the Ashlands Random Monster Table. Place in the entrance hall. **Resting**. Becomes **Awake** when combat occurs in the entrance hall.
- **Group 2:** Roll once on the Ashlands Random Monster Table. Place in a flanking corridor. **Resting**.
- **Group 3:** Roll once on the Ashlands Random Monster Table. Place at a Binding Point, adjacent to the door. **Awake**.

Party Deployment: Parties deploy on opposite long battlefield edges, within **6"** of their edge.



Schematic. Grey dashed = position not fixed by the rules.

FIG-32. The Iron-Vein Vault: parties deploy within 6" of opposite long edges around a central 6"×6" Chamber with an iron door whose hinges and lock carry the Binding Points, and the Vault Record 3" beyond the door; key: FIG-20 (see 10.4, Ashlands Scenario 6).

Special Rules:

The Binding Points: Each Binding Point has **HP 12 + (2 × APL)** and **AV 1**.

Sealing a Binding Point (Party A): A Hero adjacent to an **Unsealed** Binding Point uses **Interact [2 AP]** and makes a **SPI Check**.

- **Success:** Apply Karnessa's Blood. That Binding Point becomes **Sealed**. Mark it. A **Sealed** Binding Point gains **+3 HP** and **+1 AV**.
- **Failure:** The Point resists. The Hero suffers **1d4 necrotic damage**. The action may be reattempted on a later activation.

Re-Sealing a Broken Binding Point (Party A): A Hero adjacent to a **Broken** Binding Point uses **Interact [3 AP]** and makes a **SPI Check** with **Disadvantage**.

- **Success:** That Binding Point becomes **Sealed** and is restored to half its printed HP, rounded down, then gains the **+3 HP** and **+1 AV** from sealing.
- **Failure:** Apply the same failure effect as Sealing a Binding Point.

Breaking a Binding Point (Party B): A Hero may attack a Binding Point normally, or use **Interact [2 AP]** and pass a **STR Check** to force it. When a Binding Point reaches **0 HP**, it becomes **Broken**. An **Unsealed** or **Sealed** Binding Point can be broken.

The Vault Opens: When every Binding Point placed after scaling is **Broken**, the iron door swings open. Place the Vault Presence immediately. Each Hero on the battlefield makes a **SPI Check**. **Failure:** That Hero becomes **Frightened** until the end of the round.

The Vault Record: After the vault opens, a Hero adjacent to the lectern inside the vault uses **Interact [1 AP]** to pick up the Vault Record.

Escape Conditions: Required only for Party B carrying the Vault Record. Escape via any battlefield edge.

Victory Conditions: The adventure ends at the end of a round in which all Binding Points placed after scaling are **Sealed**, when Party B escapes with the Vault Record after the vault opens, after Round 8, or when all Heroes are defeated.

- **Party A wins** if every Binding Point remains **Sealed** through the end of the round. Gain **8 × (2 + (4 × APL)) Coins**.
- **Party B wins** if the vault opens and a Party B Hero escapes with the Vault Record. Gain the Vault Record's Coin Value.
- If the vault opens and the Vault Presence is defeated but neither party achieves its primary objective, the party that dealt the killing blow to the Vault Presence gains **4 × (2 + (4 × APL)) Coins**.
- If neither primary objective is achieved, the party with the most total Coin Value wins.

Tiebreaker: Most total damage dealt to the Vault Presence, if it appeared. Otherwise, most Monster CV collected.

Climate 3: Undermarches Scenarios

Scenario 1: The Crystal Harvest [Intro]

A new cavern has opened beneath the broken mountains, and its crystal veins pulse with cold light and drag iron filings across the floor. Deepwarden's forges would trade a season of grain for a vein this clean. The prospectors who found it have already lied about its location, and both parties arrive before the lie can harden into a map.

Primary Objective: Be the party to escape with the highest total Coin Value from harvested Crystal Clusters.

Final Random Monster Groups: Determine using **10.6.4**.

Awake Groups: Random Monster Groups begin **Resting** unless a listed setup rule says otherwise. Scenario-specific Monsters use their listed state.

Minion Swarm: No.

Objective Scaling: Apply **10.6.9** to the Crystal Nodes.

Level Scaling: Use the Scenario APL for every APL-based Monster, hazard, objective, reward, and damage value in this scenario.

Solo/Co-op Objective: Harvest and extract at least half of the Crystal Clusters available after scaling, rounded up, then extract at least half the party as defined in **10.6.10**.

Pressure Clock: Use **Collapse** from **10.5.7**.

Battlefield and Terrain (36"×36"): A network of caverns and tunnels formed by 6–8 Cave Wall sections. Create two "Main Caverns" (8"×8" each) connected by narrow passages (1–2" wide). Scatter 3–4 Stalagmite Cluster terrain pieces and place 2–3 **Glowing Fungi Patch** markers (**Aura 2" Light** each).

Objective Placement: Place 5 **Crystal Node** markers (1"): one in each Main Cavern, one at the midpoint between the two Main Caverns (the central Node), and the remaining two in tunnels or alcoves. If **10.6.9** reduces the number of Nodes, place the central Node first, then one Node in each Main Cavern, then any re-

maining Nodes in tunnels or alcoves. Place 2 Treasure Chests (**1 Treasure roll with Disadvantage** each) in separate alcoves.

Scenario-Specific Monster: Alpha Crystal Lurker

HP	(5 × Party Size × (3 + (1 × APL))) / 8
AV	2 + (APL/3, rounded down)
SPD	5" (Climb 5")
LVL	APL (min 3, max 6)
CV	2 × (2 + (4 × APL)) Coins
Sz	M

AI Steps

Target Priority: Prioritize valid Heroes who are harvesting a Crystal Node or carrying a Crystal Cluster. Otherwise, use the normal Monster target priorities.

Attacks

- **Crystal Shard Claws:** 1d8 + APL/2 piercing damage.

Special Abilities

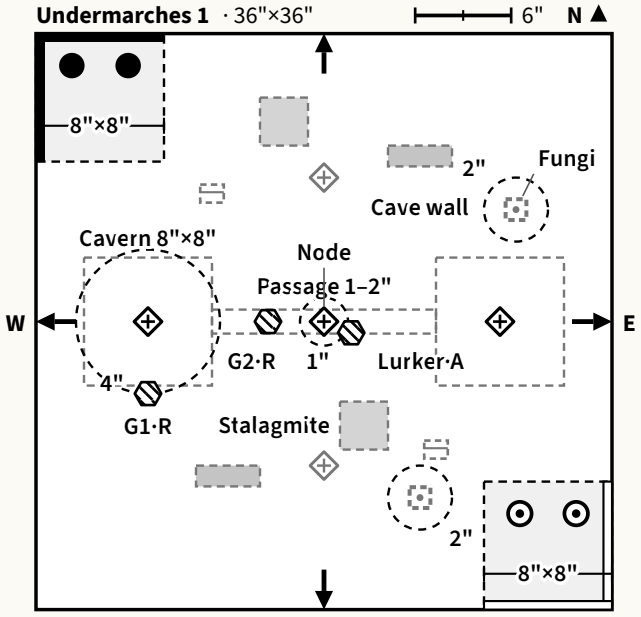
- **Crystal Camouflage:** While the Lurker is adjacent to a Crystal Node or crystal terrain feature, attacks against them roll their base damage dice with **Disadvantage**.
- **Resonating Hum [Recharge 5–6]:** At the start of their activation, if this ability is available, the Lurker activates the Hum. Each enemy within **4"** makes a **SPI Check**. **Failure:** That enemy has **Disadvantage** on their next damage roll and their next **Casting Check** (one instance each).

Boss Deployment: Starts **Awake**, within 1" of the central Crystal Node.

Random Monster Setup:

- **Group 1:** Roll once on the Undermarches Random Monster Table. Place within 4" of one Crystal Node (not the central one). **Resting**.
- **Group 2:** Roll once on the Undermarches Random Monster Table. Place at a narrow tunnel chokepoint. **Resting**.
- **Group 3:** Roll once on the Undermarches Random Monster Table. Begins off-battlefield; arrives at the start of Round 3 from a random battlefield edge that is not adjacent to either deployment corner. Awake when it arrives.

Party Deployment: Parties deploy in opposite corner zones (8"×8"). Parties alternate placing Heroes within their zone, starting with the party that lost the Setup Roll-off.



Schematic. Grey dashed = position not fixed by the rules.
? Group 3 arrival edge not fixed: no edge qualifies as written (see text)

FIG-33. The Crystal Harvest: parties deploy in opposite 8"×8" corners; two Main Caverns 8"×8" are linked by narrow passages, with a central Crystal Node midway between them; key: FIG-20 (see 10.4, Undermarches Scenario 1).

Special Rules:

Ambient Darkness: The cavern is **Darkness** except within a **Light Source's Aura**, including each Glowing Fungi Patch's **Aura 2"**. A combatant without a **Light Source** may draw **LOS** only to targets within **2"** unless a rule says otherwise.

Harvesting Crystals: A Hero adjacent to a Crystal Node uses **Interact [2 AP]** and makes an **INT Check**. On a success, the Hero takes the Node as a "Crystal Cluster" carried objective (worth 2 × (2 + (4 × APL)) Coins). Each Node yields at most one Cluster. A Node that has been harvested is depleted and removed from play.

Unstable Formations: Each time a Crystal Node is successfully harvested, roll 1d6. On a 1, a minor cave-in occurs: the harvesting Hero and all combatants within 1" make a **DEX Check**. On a failure, each affected combatant suffers **1d8 blunt damage**. A combatant cannot use a **Reaction** against this damage.

Escape Conditions: Heroes carrying Crystal Clusters must escape via any battlefield edge.

Victory Conditions: The adventure ends after Round 8, when all Crystal Clusters have been secured and all surviving Heroes from at least one party have escaped, or when all Heroes are defeated. The party that escapes with the highest total Coin Value from Crystal Clusters wins.

Tiebreaker: Most total Coins from all sources combined.

Scenario 2: The Chasm Crossing

A chasm splits the caverns like a wound in the world, crossed only by narrow ledges in broken pieces. A Survey Map must reach the Lantern Council before Deepwarden's rivals can claim the new diggings. Things cling to the dark stone below the ledges and wait for a hand to shake. The Council wants the map. It does not ask what the things want.

Primary Objective: Be the first party to carry the Survey Map from its starting position to the Cartographer's Stone on the far side of the chasm.

Final Random Monster Groups: Determine using **10.6.4**.

Awake Groups: Random Monster Groups begin **Resting** unless a listed setup rule says otherwise. Scenario-specific Monsters use their listed state.

Minion Swarm: No.

Objective Scaling: None.

Level Scaling: Use the Scenario APL for every APL-based Monster, hazard, objective, reward, and damage value in this scenario.

Solo/Co-op Objective: Move the Cartographer's Map off the battlefield through the edge opposite its starting edge, then extract at least half the party through that edge as defined in **10.6.10**.

Pressure Clock: Use **Collapse** from **10.5.7**.

Battlefield and Terrain (36"×36"): A large "Chasm" (8" wide) bisects the battlefield from one long edge to the other. Create a "Path of Ledges" using 3–4 narrow (1" wide) platform markers bridging the Chasm, with 1–2" gaps between consecutive ledges that require **Jump**. Mark 1–2 of these ledges as "Crumbling": a Hero ending their activation on a Crumbling ledge must make a **DEX Check**, and on a failure they fall. The rest of the battlefield is **Open Terrain**.

In Grid Mode, each Ledge is a 1-square-wide path, and each gap is 1–2 empty squares. A combatant occupies a Ledge only while their space is fully supported by its squares.

Objective Placement: The "Survey Map" (carried objective worth 8 × (2 + (4 × APL)) Coins if delivered; carrier's Speed is reduced by 1" for as long as they carry it) starts on the "start" side of the Chasm, 3" from the first ledge. The "Cartographer's Stone" (1" marker) is on the "delivery" side of the Chasm, 3" from the last ledge. Place 3 Treasure Chests (**1 Treasure roll with Disadvantage** each) in alcoves on both sides of the Chasm (at least one on each side).

Scenario-Specific Monsters: Chasm Stalkers (2)

HP	(5 × Party Size × (2 + (1 × APL))) / 8
AV	1 + (APL/4, rounded down)
SPD	5" (Climb 5")
LVL	APL (min 2, max 4)
CV	2 × (2 + (4 × APL)) Coins each
Sz	M

AI Steps

Target Priority: Prioritize valid Heroes carrying the Survey Map, then valid Heroes on Ledges. Otherwise, use the normal Monster target priorities.

1. **Entangling Spittle [Recharge 5–6]:** If the nearest visible enemy within **6"** is not **Immobilized**, that enemy must pass a **DEX Check** or become **Immobilized**. Then end this activation.

Attacks

- **Clinging Claws:** 1d6 + APL/2 slashing damage. If the target is on a Ledge and this attack damages the target, the target must pass a **DEX Check** or the attacker **Slides** that target **1"** toward the nearest Chasm edge.

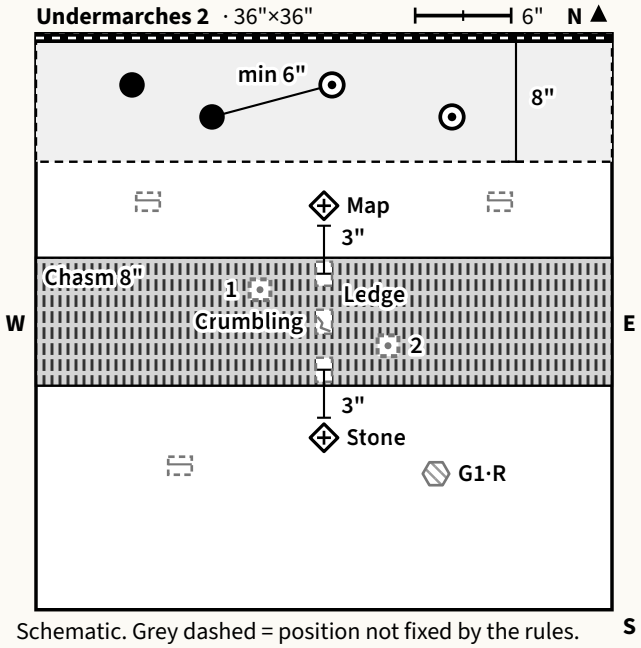
Special Abilities

- **Lurker:** See Boss Deployment.
- **Tenacious:** Chasm Stalkers are immune to the Frightened condition.

Boss Deployment: Place one numbered wall marker near the first half of the Ledges and one near the second half. When a Hero would have **LOS** to a marker, or when that Stalker attacks, remove the marker and place the Stalker at that position. They are **Awake** when placed.

Random Monster Setup:

- **Group 1:** Roll once on the Undermarches Random Monster Table. Place on the delivery side of the Chasm near the Cartographer's Stone. **Resting**.

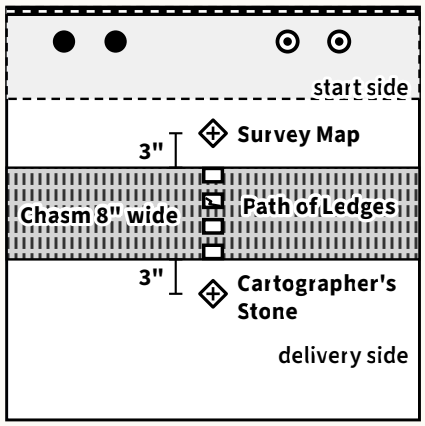


Schematic. Grey dashed = position not fixed by the rules.

FIG-34. The Chasm Crossing: both parties deploy within 8" of one short edge, no Heroes within 6" of an opposing Hero; the Chasm 8" wide bisects the battlefield, with the Survey Map and the Stone each 3" from the end ledges; key: FIG-20 (see 10.4, Undermarches Scenario 2).

Party Deployment: Both parties deploy along the same short battlefield edge (the "start" side of the Chasm), within 8" of that edge. Parties alternate placing Heroes within that zone, starting with the party that lost the Setup Roll-off. A Hero cannot be placed within **6"** of an opposing Hero during deployment.

A **The Chasm Crossing**



Schematic — not to scale

B **Reading the placement**

1. **Deployment:** both parties use the start-side short edge, within 8" of it; no Hero within 6" of an opposing Hero.
2. **Survey Map:** a carried objective that starts on the start side, 3" from the first ledge. Its carrier's Speed is reduced by 1" while carrying it.
3. **Path of Ledges:** 3–4 narrow (1" wide) platform markers bridging the Chasm, with 1–2" gaps that require a Jump. 1–2 ledges are marked Crumbling: a Hero ending an activation on one makes a DEX Check and falls on a failure.
4. **Cartographer's Stone:** a 1" marker on the delivery side, 3" from the last ledge. The first party to place the Survey Map adjacent to it wins immediately.
5. **Jumping the Gaps (4.4.9):** each 1" jumped costs 2" of movement; declare a landing point, then make a DEX Check. A failed Jump into the Chasm causes a Chasm Fall (panel C).

Key (FIG-20) Party A · Party B · Zone both use · Objective · 1 Numbered step · Chasm · Ledge · Crumbling Ledge · Stated distance

C **Chasm Fall (Undermarches 2 Special Rules)**

6. **Chasm Fall:** a combatant Pushed off a Ledge into the Chasm, or that fails a Crumbling Ledge Check and falls, is immediately removed from play. A Hero is Defeated and makes a normal Injuries Roll. A non-Hero is resolved as though reduced to 0 HP. This replaces the normal Falling rule. Any carried items, including the Survey Map, fall into the Chasm and are lost.
7. **Hero or Hireling with a Fly or Climb Speed** that would fall may immediately spend 1 unspent AP, including AP reserved for Reactions, to catch themselves. Place them Prone in the nearest legal space on a Ledge, and end their current movement. If they cannot spend the AP, resolve the Chasm Fall normally.
8. **Monster with a Fly or Climb Speed** that would fall is placed Prone in the nearest legal space on a Ledge, and their activation ends.

FIG-15. In The Chasm Crossing the Survey Map starts 3" from the first ledge and must be placed adjacent to the Cartographer's Stone 3" beyond the last ledge. Gaps of 1–2" between ledges are crossed by Jump, and a failed Jump into the Chasm causes a Chasm Fall, with stated exceptions for Fly or Climb Speeds; key: FIG-20 (see 10.4).

Special Rules:

Picking Up the Survey Map: A Hero adjacent to the Survey Map uses **Interact [1 AP]** to pick it up. If a Hero carrying the Map is defeated, the Map drops in the space where that Hero fell.

Jumping the Gaps: Use the normal **Jump** rules in **Section 4.4.9**. A failed **Jump** into the Chasm causes a **Chasm Fall**.

Chasm Fall: A combatant **Pushed** off a Ledge into the Chasm, or that fails a Crumbling Ledge **Check** and falls, is immediately removed from play. A Hero is **Defeated** and makes a normal Injuries Roll. A non-Hero is resolved as though reduced to **0 HP**. This replaces the normal **Falling** rule. Any carried items, including the Survey Map, fall into the Chasm and are lost.

A Hero or Hireling with a **Fly** or **Climb** Speed that would fall may immediately spend **1 unspent AP**, including AP reserved for Reactions, to catch themselves. Place them **Prone** in the nearest legal space on a Ledge, and end their current movement. If they cannot spend the AP, resolve the Chasm Fall normally. A Monster with a **Fly** or **Climb** Speed that would fall is placed **Prone** in the nearest legal space on a Ledge, and their activation ends.

Escape Conditions: None. The objective is reached by delivering the Map, not by escaping the battlefield.

Victory Conditions: The first party to have a Hero place the Survey Map adjacent to the Cartographer's Stone wins immediately and gains the Survey Map's Coin Value. The adventure ends at that moment. If the Map is lost (dropped into the Chasm) or not delivered by the end of Round 8, the party with the most total Coins from Chests and Monster CV wins.

Tiebreaker: Most Monster CV collected.

Scenario 3: The Quake

The old tunnels shook themselves open before dawn, and gemstone veins glimmer where the support beams snapped. Aftershocks still run through the stone. Deepwarden wants the gems hauled out before the shafts settle, and the usual exits are already blocked. The Dark has noticed the new air, and it is not the only thing moving toward it.

Primary Objective: Be the party to mine and escape with the most Coin Value from Gemstone Clusters.

Final Random Monster Groups: Determine using **10.6.4**.

Awake Groups: Random Monster Groups begin **Resting** unless a listed setup rule says otherwise. Scenario-specific Monsters use their listed state.

Minion Swarm: No.

Objective Scaling: Apply **10.6.9** to the Gemstone Veins.

Level Scaling: Use the Scenario APL for every APL-based Monster, hazard, objective, reward, and damage value in this scenario.

Solo/Co-op Objective: Mine and extract at least half of the Gemstone Clusters available after scaling, rounded up, then extract at least half the party as defined in **10.6.10**.

Pressure Clock: Use **Collapse** from **10.5.7**.

Battlefield and Terrain (36"×36"): Build a network of mining tunnels with 2–3 Cavern Pockets (4–5" across). Place 3–4 Unstable Support Beam markers (**Impassable Terrain**) and 4–6 Loose Rubble patches. The party that won the Setup Roll-off designates one battlefield edge as the **Main Exit**. The two battlefield edges perpendicular to the Main Exit are **Collapsed Tunnel** edges and are **Blocking Terrain** unless later opened by an aftershock.

Objective Placement: Place 3 Gemstone Vein markers (1") in separate Cavern Pockets or at dead ends of side tunnels. Place 1 Treasure Chest (lost strongbox, **1 Treasure roll**) near a Loose Rubble patch.

Scenario-Specific Monster: Rock Elemental Guardian

HP	(5 × Party Size × (5 + (1 × APL))) / 8
AV	3 + (APL/2, rounded down)
SPD	4"; Burrow (3")
LVL	APL + 2 (min 4, max 8)
CV	3 × (2 + (4 × APL)) Coins
Sz	L

Attacks

- **Stone Fist:** 1d8 + APL/2 blunt damage; if both **Stone Fist** attacks are **Critical Hits** against the same target during the same activation, that target becomes **Stunned**.

Special Abilities

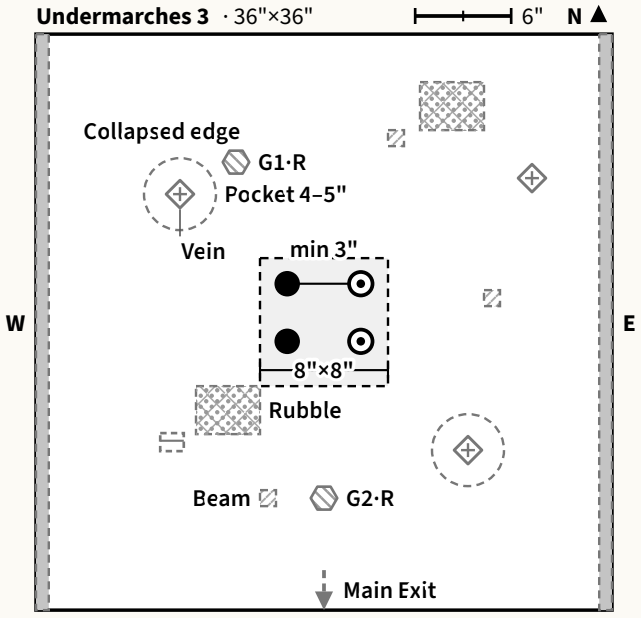
- **Earth Glide.**
- **Tremorsense (9").**
- **Multi-Attack:** Makes two **Stone Fist** attacks during their attack step.
- **Summon Rubble:** At the start of their activation, if they are not **Engaged** and their **Primary Target** is within 8", an **Aura 2"** area centred on that target becomes **Difficult Terrain** for the rest of the adventure due to falling rubble.

Boss Deployment: The Guardian is not placed at setup. At the end of Round 2, they erupt from one wall section chosen by the party whose Hero is closest to the battlefield centre. If Heroes from both parties are equidistant, the party that lost the Setup Roll-off chooses. They are **Awake** and hostile to all when placed.

Random Monster Setup:

- **Group 1:** Roll once on the Undermarches Random Monster Table. Place near one Gemstone Vein. **Resting**.
- **Group 2:** Roll once on the Undermarches Random Monster Table. Place in a tunnel leading toward the Main Exit. **Resting**.

Party Deployment: Both parties deploy within a central 8"×8" Safe Zone cavern, representing both parties caught by the initial quake. Parties alternate placing Heroes within this zone, starting with the party that lost the Setup Roll-off. A Hero cannot be placed within 3" of an opposing Hero.



Schematic. Grey dashed = position not fixed by the rules. Roll-off winner designates the Main Exit edge.

FIG-35. The Quake: both parties deploy inside a central 8"×8" Safe Zone, no Hero within 3" of an opposing Hero; the Setup Roll-off winner designates the Main Exit and the two perpendicular edges are Collapsed Tunnels; key: FIG-20 (see 10.4, Undermarches Scenario 3).

Special Rules:

Aftershocks: At the end of Rounds 2, 4, and 6, an aftershock strikes. Each combatant makes a **DEX Check**. On a failure, that combatant becomes **Prone**. For each Unstable Support Beam still standing, the party that lost the Setup Roll-off rolls **1d6**; on **1–3**, that Beam collapses. Remove the Beam and make an **Aura 1"** area centred on its last position **Difficult Terrain**. If 2 or more Beams collapse during the same Aftershock, that party rolls **1d6**; on **4–6**, one randomly determined Collapsed Tunnel edge becomes a new Exit.

Mining Gemstones: A Hero adjacent to a Gemstone Vein uses **Interact [2 AP]** and makes a **STR Check**. On a success, that Hero takes a Gemstone Cluster as a carried objective worth 5 × (2 + (4 × APL)) Coins. Each Vein yields only one Cluster.

Blocked Exit: At the end of Round 5, the Main Exit collapses and becomes **Blocking Terrain** unless at least 2 Unstable Support Beams remain standing at that moment. If this would leave no legal Exit, the **Emergency Clearance** rule opens one at the start of the next **Party Phase**.

Emergency Clearance: If no legal Exit exists at the start of a Party Phase, the nearest Collapsed Tunnel edge to the battlefield centre opens immediately as an Emergency Exit.

Escape Conditions: Heroes carrying Gemstone Clusters must escape through the Main Exit if it remains open, through any newly opened Exit, or through an Emergency Exit.

Victory Conditions: The adventure ends after Round 7, when all Gemstone Clusters have been mined and all surviving Heroes from at least one party have escaped, or when all Heroes are defeated. The party that escapes with the most Coin Value from Gemstone Clusters wins.

Tiebreaker: Most total Coin Value from all other sources.

Scenario 4: The Undermarches Outpost Raid

Scouts found an outpost below an old road shrine and did not stay to count the banners. Plans for a surface incursion lie inside, and so does the officer who drew them. Deepwarden wants the plans more than it wants the credit, and two parties descend under separate seals, each ordered to take the plans and claim the victory before the other can sell it.

Primary Objective:

- **Full Objective:** Steal the Battle Plans, defeat the Outpost Commander, and escape with the Plans.
- **Partial Objective A:** Escape with the Battle Plans while the Commander survives.
- **Partial Objective B:** Defeat the Outpost Commander even if the Battle Plans are not secured.

Final Random Monster Groups: Determine using **10.6.4**.

Awake Groups: Random Monster Groups begin **Resting** unless a listed setup rule says otherwise. Scenario-specific Monsters use their listed state.

Minion Swarm: No.

Objective Scaling: None.

Level Scaling: Use the Scenario APL for every APL-based Monster, hazard, objective, reward, and damage value in this scenario.

Solo/Co-op Objective: Defeat the Outpost Commander, retrieve the Battle Plans, then extract the Plans and at least half the party through any battlefield edge as defined in **10.6.10**.

Pressure Clock: Use **Pursuit** from **10.5.7**.

Battlefield and Terrain (36"×36"): Create a small Undermarches outpost around the battlefield centre. Place 2–3 Guard Towers (2" high, **Impassable Terrain**) connected by low defensive walls, with one central Command Tent (3"×3", **Blocking Terrain**). Scatter stalagmites and rubble around the outpost approaches.

Objective Placement: The Battle Plans begin inside the Command Tent as a carried objective worth 4 × (2 + (4 × APL)) Coins if escaped with. Place 2 Treasure Chests (**1 Treasure roll with Disadvantage** each) inside two different Guard Towers.

Scenario-Specific Monsters: Outpost Commander and Elite Guards

Before setup, randomly determine the Outpost faction. Roll **1d2**: **1:** use the **Deep Elf** profile; **2:** use the **Dwarf Commander** profile. Use the same faction for the Commander and both Elite Guards.

Outpost Commander: Deep Elf Profile

HP	(5 × Party Size × (4 + (1 × APL))) / 8
AV	3 + (APL/4, rounded down)
SPD	6"
LVL	APL + 2 (min 5, max 8)
CV	2 × (2 + (4 × APL)) Coins
Sz	M

Attacks

- **Poisoned Rapier:** 1d8 + APL/2 piercing damage. If this attack damages the target, the target makes a **STR Check** or suffers **1d4 poison damage**.
- **Hand Crossbow:** 1d6 + APL/2 piercing damage, **Ranged 8"**.

Special Abilities

- **Superior Darkvision (9").**
- **Light Aversion.**
- **Fey Ancestry.**
- **Command Underlings:** Allied Deep Elf and Spider monsters within 6" deal an additional **1 damage of that attack's primary damage type**.
- **Umbral Veil (once per adventure):** At the start of their activation, if this ability has not been used and a legal **Aura 3"** area within **10"** can include two or more enemies, place magical **Darkness** there to include as many enemies as possible, using the Area of Effect priorities in **9.5**. The area lasts until the end of the round. Otherwise, if this ability has not been used and a visible enemy is within **10"**, outline the nearest such enemy in pale witchlight until the end of the round; that enemy cannot be **Hidden** and gains no **Cover** from **Darkness** or another area that provides **Cover**. When either effect resolves, mark this ability as used and end the Commander's activation.

Outpost Commander: Dwarf Commander Profile

A Deepwarden exile or renegade forge-captain who descended past the Dark and found a new kind of authority below. They carry a Lantern Council brand on their left hand and a very different set of orders in their right.

HP	(5 × Party Size × (5 + (1 × APL))) / 8
AV	4 + (APL/3, rounded down)
SPD	4"
LVL	APL + 2 (min 5, max 8)
CV	2 × (2 + (4 × APL)) Coins
Sz	M

Attacks

- **Forge Hammer:** 1d10 + APL/2 blunt damage.
- **Heavy Crossbow:** 1d12 + APL/2 piercing damage, **Ranged 18"**.

Special Abilities

- **Darkvision (9").**
- **Tunnel Fighter:** This Monster does not suffer movement or attack penalties from narrow terrain or Low Ceiling hazards.
- **Stone Endurance (once per adventure):** The first time this Monster would suffer **6 or more damage** from a single source, they reduce that damage by **1d6 + APL/3**, rounded down. This Monster then continues their activation normally.
- **Forge-Tempered:** Reduce damage from **fire** by **2** after **AV**.

Elite Guards (2)

HP	(5 × Party Size × (3 + (1 × APL))) / 8
AV	Commander AV -1
SPD	Commander SPD
LVL	APL (min 3, max 5)
CV	(2 + (4 × APL)) Coins each
Sz	M

Attacks

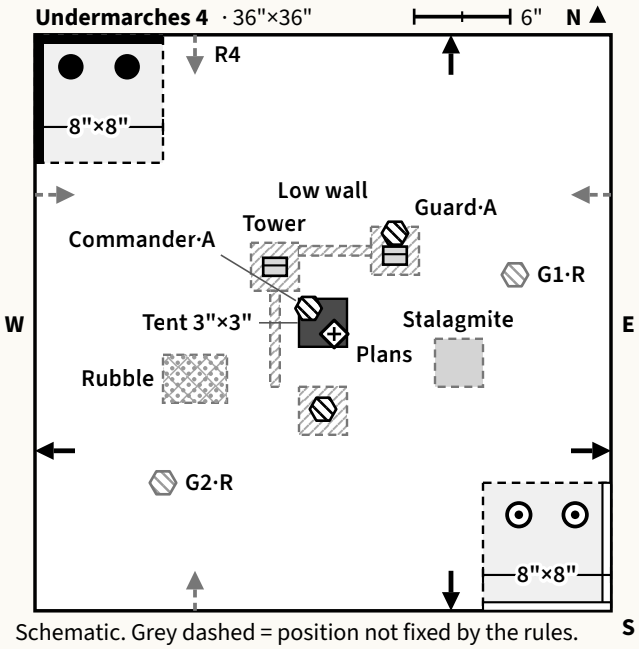
- **Shortsword:** 1d8 + APL/3 slashing damage.
- **Crossbow:** 1d8 + APL/3 piercing damage, **Ranged 12"**.

Boss Deployment: The Commander starts **Awake** in the Command Tent. Both Elite Guards start Awake, one on each of two different Guard Towers.

Random Monster Setup:

- **Group 1:** Roll once on the Undermarches Random Monster Table. Place in a dark passage leading to the outpost. **Resting**. This group becomes **Awake** if a Hero approaches within 6" or if the alarm is triggered.
- **Group 2:** Roll once on the Undermarches Random Monster Table. Place using normal alternating scenario placement. **Resting**.

Party Deployment: Parties deploy in opposite corner zones (8"×8"). Parties alternate placing Heroes within their zone, starting with the party that lost the Setup Roll-off.



Schematic. Grey dashed = position not fixed by the rules.

FIG-36. The Undermarches Outpost Raid: parties deploy in opposite 8"×8" corners around an outpost with a central 3"×3" Command Tent holding the Battle Plans and 2–3 Guard Towers; key: FIG-20 (see 10.4, Undermarches Scenario 4).

Special Rules:

Alarm System: If any Hero comes within **LOS** of a Guard Tower at a distance of 12" or less, or if any combat occurs anywhere on the battlefield, the alarm is triggered. All Resting Monster groups become Awake at the start of the next Monster Phase.

Retrieving the Battle Plans: A Hero adjacent to the Battle Plans in the Command Tent uses **Interact [2 AP]** to pick them up.

Reinforcements: At the end of Round 4, if the Outpost Commander is still alive, one additional Random Monster Group, generated by

rolling once on the Undermarches Random Monster Table, enters from a randomly determined battlefield edge. They are **Awake** when placed.

Escape Conditions: Required only for the Battle Plans. The Hero carrying the Plans must escape via any battlefield edge.

Victory Conditions: The adventure ends when the Battle Plans are escaped with and the Commander is defeated, after Round 8, or when all Heroes are defeated.

- **Full Objective:** The party that escapes with the Battle Plans and has dealt the killing blow to the Commander gains the Battle Plans' Coin Value plus the Commander's CV.
- **Partial Objective A:** The party that escapes with the Battle Plans while the Commander survives gains **3 × (2 + (4 × APL)) Coins** in addition to the Battle Plans' Coin Value.
- **Partial Objective B:** The party that deals the killing blow to the Commander gains **2 × (2 + (4 × APL)) Coins** plus the Commander's CV.
- Otherwise, the party with the most total Coin Value wins.

Tiebreaker: Most Monster CV collected.

Scenario 5: The Shadowed Under Passage

This passage has been touched by a colder dark than stone can explain. Breath sounds wrong here. The shadows lie against the light instead of with it. A Heart of Shadow waits below, prized by those who bargain with the deep elves and feared by anyone who has read Deepwarden's old warnings. The Lantern Council would rather it stayed lost. Someone with coin disagrees.

Role Assignment: Randomly determine which party is **Seekers of Darkness** (Party A); the other party is **Light's Wardens** (Party B). Roll **1d2**: on a **1**, the Setup Roll-off winner is Party A; on a **2**, the Setup Roll-off loser is Party A.

Primary Objective:

- **Seekers of Darkness (Party A):** Retrieve the Heart of Shadow AND escape with it via any battlefield edge.
- **Light's Wardens (Party B):** Consecrate every Font of Light placed after scaling.

Final Random Monster Groups: Determine using **10.6.4**.

Awake Groups: Random Monster Groups begin **Resting** unless a listed setup rule says otherwise. Scenario-specific Monsters use their listed state.

Minion Swarm: No.

Objective Scaling: Apply **10.6.9** to the Fonts of Light. Light's Wardens must consecrate every Font placed after scaling.

Level Scaling: Use the Scenario APL for every APL-based Monster, hazard, objective, reward, and damage value in this scenario.

Solo/Co-op Objective: Use the **Seekers of Darkness** objective. Retrieve the Heart of Shadow, then extract the Heart and at least half the party through any battlefield edge as defined in **10.6.10**. The **Light's Wardens** objective is not used.

Pressure Clock: Use **Swarm** from **10.5.7**.

Battlefield and Terrain (36"×36"): A long, winding "Under Passage" cavern (about 18" long, 4–6" wide) runs from one short battlefield edge to the other, walled on both sides by **Blocking Terrain**. The entire Under Passage is in Deep Shadow. A combatant cannot draw **LOS** to or from a point there unless that point is within a **Light Source**. A party without **Light Sources** cannot draw **LOS** within the Passage; carrying torches or lanterns is strongly advised. Several side alcoves branch off the main passage. Place 3 **Font of Light** markers (1" tokens) in separate side alcoves, distributed as evenly as possible along the length of the Passage.

Objective Placement: The Heart of Shadow (carried objective; carrier suffers -1 SPI for as long as they carry it; worth 10 × (2 + (4 × APL)) Coins if escaped with by Party A) is in the deepest part of the Under Passage, at least 12" from Party A's deployment edge. Place 2 Treasure Chests (**1 Treasure roll with Disadvantage** each) in side alcoves that do not contain a Font of Light.

Scenario-Specific Monster: Guardian Shade

HP	(5 × Party Size × (3 + (1 × APL))) / 8
AV	1 + (APL/4, rounded down)
SPD	Fly 7"
LVL	APL + 1 (min 3, max 7)
CV	2 × (2 + (4 × APL)) Coins
Sz	M

Attacks

- **Shadow Claw:** 1d8 + APL/2 necrotic damage. On a **Critical Hit**, the target must pass a **SPI Check** or become **Frightened**.

Special Abilities

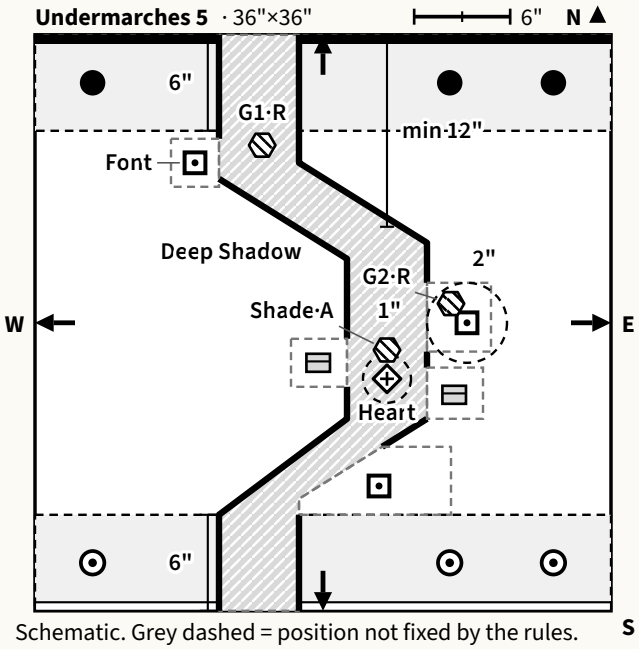
- **Incorporeal.**
- **Undead.**
- **Shadow Meld:** At the start of their activation, if the Guardian Shade is in a Deep Shadow area and is not **Engaged**, they become **Hidden**. They remain **Hidden** until they attack or move within **LOS** of a Hero outside Deep Shadow.
- **Bound to Heart:** The Guardian Shade cannot willingly move more than 8" from the Heart of Shadow.

Boss Deployment: Starts **Awake**, within 1" of the Heart of Shadow.

Random Monster Setup:

- **Group 1:** Roll once on the Undermarches Random Monster Table. Place in a Deep Shadow section of the Under Passage. **Resting**.
- **Group 2:** Roll once on the Undermarches Random Monster Table. Place within 2" of one Font of Light marker. **Resting**.

Party Deployment: Party A deploys within **6"** of one short battlefield edge (the end of the Under Passage farther from the Heart). Party B deploys within **6"** of the opposite short battlefield edge.



Schematic. Grey dashed = position not fixed by the rules. Party A takes the end farther from the Heart.

FIG-37. The Shadowed Under Passage: Party A deploys within 6" of the short edge farther from the Heart, Party B within 6" of the opposite edge; a winding Under Passage runs between the two edges and the Heart lies at least 12" from Party A's edge; key: FIG-20 (see 10.4, Undermarches Scenario 5).

Special Rules:

Picking Up the Heart of Shadow: A Hero adjacent to the Heart uses **Interact [1 AP]** to pick it up. The **-1 SPI** penalty applies for as long as the Hero carries it and is removed when the Heart is set down or the Hero is defeated.

Shadow's Pull: At the end of each activation, any Hero that ended their activation in a Deep Shadow area (not within range of a lit Font or other **Light Source**) suffers **1 ice damage**.

Consecrating Fonts (Party B): A Hero from Party B adjacent to an unlit Font uses **Interact [2 AP]** and makes a **SPI Check**. On a success, the Font is lit: it counts as a **Light Source** with **Aura 3"** and negates Deep Shadow within that **Aura** permanently. Count lit Fonts with tokens. Party B must light every Font placed after scaling to achieve its Consecration victory.

Escape Conditions: Required only for Party A. The Hero carrying the Heart of Shadow must escape via any battlefield edge.

Victory Conditions: The adventure ends when Party A escapes with the Heart of Shadow, when Party B consecrates every Font placed after scaling, after Round 8, or when all Heroes are defeated.

- **Party A wins** if a Party A Hero escapes with the Heart and gains the Heart of Shadow's Coin Value.
- **Party B wins** if every Font placed after scaling is consecrated. Gain **8 × (2 + (4 × APL)) Coins**.
- If neither party completes its primary objective by the end of Round 8, each consecrated Font is worth **2 × (2 + (4 × APL)) Coins** to Party B, and the party with the most total Coin Value wins.
- If one party is entirely defeated, the surviving party may still attempt to achieve its objective.

Tiebreaker: Most total Coin Value from Chests and Monster CV.

Scenario 6: The Ritual of Shadow Binding

In a cavern without honest light, deep elf priests have drawn a binding circle around something that answers from the dark below the Dark. One patron in Deepwarden wants the rite broken before it finishes. Another wants the circle lifted out intact, sigils and all, and will not say for whom. The thing inside the circle has not been consulted.

Role Assignment: Randomly determine which party is **Disruptors** (Party A); the other party is **Usurpers** (Party B). Roll **1d2**: on a **1**, the Setup Roll-off winner is Party A; on a **2**, the Setup Roll-off loser is Party A.

Primary Objective:

- **Disruptors (Party A):** Defeat the Shadow Caller and destroy a majority of the Shadow Orbs before the Bound Shadow Spirit is claimed.
- **Usurpers (Party B):** Ensure the Ritual completes, then bind and claim the Bound Shadow Spirit.

Final Random Monster Groups: Determine using **10.6.4**.

Awake Groups: Random Monster Groups begin **Resting** unless a listed setup rule says otherwise. Scenario-specific Monsters use their listed state.

Minion Swarm: No.

Objective Scaling: Apply **10.6.9** to the Shadow Orbs. A majority is more than half the number placed.

Level Scaling: Use the Scenario APL for every APL-based Monster, hazard, objective, reward, and damage value in this scenario.

Solo/Co-op Objective: Use the **Disruptors** objective. Defeat the Shadow Caller, destroy a majority of the Shadow Orbs placed after scaling, then extract at least half the party through any battlefield edge as defined in **10.6.10**. The **Usurpers** objective is not used.

Pressure Clock: Use **Swarm** from **10.5.7**.

Battlefield and Terrain (36"×36"): Create a central cavern containing a **Binding Circle** (4" diameter marker on the floor). Place 3 **Shadow Orb** markers (1" tokens) around the **Binding Circle**, each within 2" of its edge, evenly spaced. Connect the central cavern to smaller side caverns via tunnels. Scatter Stalagmite Cluster terrain pieces throughout. The central cavern and tunnels are in **Deep Darkness**. A combatant cannot draw **LOS** to or from a point there unless that point is within a **Light Source**. A party without **Light Sources** cannot draw **LOS** in these areas; carrying torches or lanterns is strongly advised.

Ritual Step Tracker: Use a die or a row of tokens beside the battlefield to track Ritual Steps, starting at 0. The Ritual completes at **6**.

Objective Placement: The Shadow Caller starts in the **Binding Circle**. Place 2 Treasure Chests (**1 Treasure roll with Disadvantage** each) in side caverns.

Scenario-Specific Monster: Shadow Caller

HP	(5 × Party Size × (2 + (1 × APL))) / 8
AV	1 + (APL/4, rounded down)
SPD	5"
LVL	APL + 1 (min 3, max 7)
CV	2 × (2 + (4 × APL)) Coins
Sz	M

AI Steps

1. **Channel Ritual:** If the Shadow Caller is within the **Binding Circle** and at least half of the Shadow Orbs placed after scaling remain intact, rounded up, make one **Shadow Bolt** attack against their **Primary Target** without moving. Then end this activation.

Attacks

- **Ritual Dagger:** 1d4 + APL/2 piercing damage.
- **Shadow Bolt:** 1d8 + APL/2 necrotic damage, **Ranged 10"**.

Special Abilities

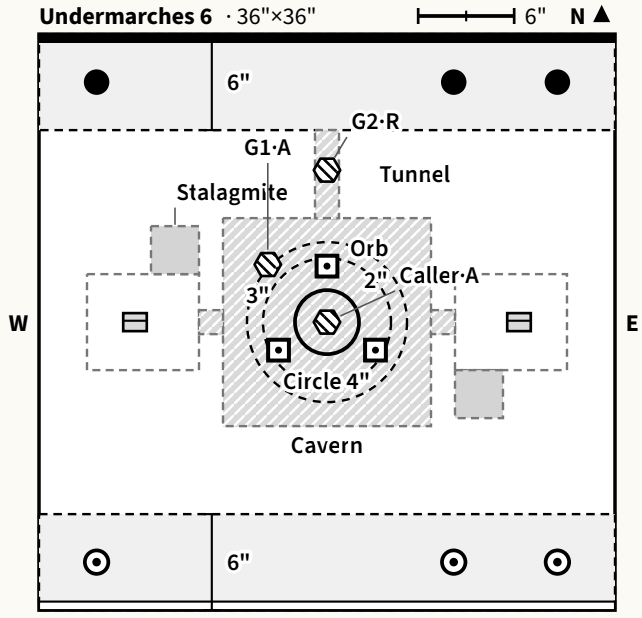
- **Summon Shadow Wisp:** When the Ritual tracker first reaches **2** and again when it reaches **4**, the Shadow Caller immediately places **1 Shadow Wisp** within **3"** of the **Binding Circle**. The Shadow Wisp is hostile to all.
  - *Shadow Wisp [Minion]:* HP 5 | AV 0 | SPD 6" (Fly 6") | Sz S | LVL 1 | CV 1c. **Attacks:** Chilling Touch, 1d4 necrotic damage. **Special Abilities: Small**; **Incorporeal**; **Darkvision (9")**.
- **Umbral Defence [Reaction]:** When the Shadow Caller is targeted by a ranged attack or damaging Power while within **1"** of an intact Shadow Orb, they use this reaction to impose **Disadvantage** on that attack's or Power's base damage dice.

Boss Deployment: Starts **Awake** in the **Binding Circle**.

Random Monster Setup:

- **Group 1:** Roll once on the Undermarches Random Monster Table. Place within 3" of the **Binding Circle**. Awake.
- **Group 2:** Roll once on the Undermarches Random Monster Table. Place in an approach tunnel to the central cavern. **Resting**.

Party Deployment: Party A deploys within **6"** of one short battlefield edge. Party B deploys within **6"** of the opposite short battlefield edge.



Schematic. Grey dashed = position not fixed by the rules. Central cavern and tunnels: Deep Darkness (shaded).

FIG-38. The Ritual of Shadow Binding: Party A deploys within 6" of one short edge and Party B within 6" of the opposite one; three Shadow Orbs stand within 2" of the 4" Binding Circle at the centre of the central cavern; key: FIG-20 (see 10.4, Undermarches Scenario 6).

Special Rules:

The Ritual: At the end of each round, if the Shadow Caller is alive, within the **Binding Circle**, and at least half of the Shadow Orbs placed after scaling remain intact, rounded up, advance the Ritual tracker by **1 step**.

When the tracker reaches **6**, the Ritual completes: place the **Bound Shadow Spirit** in the centre of the **Binding Circle**. The Spirit is hostile to all.

Bound Shadow Spirit

HP	10 + (4 × APL)
AV	1
SPD	6" (Fly 8")
LVL	APL + 2
CV	0 (see Victory Conditions)
Sz	M

AI Steps

Target Priority: If one or more valid Heroes failed a **Binding the Spirit** Check this round, prioritize the Hero who most recently failed that Check. Otherwise, use the normal Monster target priorities.

Attacks

- **Umbral Rend:** 1d10 + APL/2 necrotic damage.

Special Abilities

- **Incorporeal.**
- **Undead.**

Shadow Orbs: Shadow Orbs may be attacked normally (HP 10, AV 1 + APL/4, rounded down). Destroying a Shadow Orb reduces the Ritual tracker by 1 step. If the tracker would go below 0, it stays at 0.

Binding the Spirit (Party B): A Party B Hero adjacent to the Bound Shadow Spirit uses **Interact [3 AP]** and makes a **SPI Check**.

- **Success:** Remove the Bound Shadow Spirit from play. Party B claims it and completes its primary objective.
- **Failure:** The Hero suffers **1d6 psychic damage**.

The Hero that successfully binds the Spirit gains the **Shadow Brand** campaign reward: at the start of any one future adventure, that Hero may place **1 allied Spectre Summon**, using the canonical bestiary entry's HP, AV, Speed, Size, attacks, and Special Abilities. Treat "this Monster" in those imported rules as "this Summon." They have **2 AP**, activate during the **Party Phase**, do not use Monster AI or AI Steps, count against the party-wide Summon cap, and are removed at the end of **Round 2**.

Escape Conditions: None in competitive play. In solo or cooperative play, allied Heroes may escape through any battlefield edge as required by the **Solo/Co-op Objective**.

Victory Conditions: The adventure ends when Party A has defeated the Shadow Caller and destroyed a majority of the Shadow Orbs placed after scaling, when Party B claims the Bound Shadow Spirit, after Round 8, or when all Heroes are defeated.

- **Party A wins** if it satisfies both Disruptor requirements before Party B claims the Spirit. Gain **8 × (2 + (4 × APL)) Coins**.
- **Party B wins** if it binds and claims the Spirit. Gain **8 × (2 + (4 × APL)) Coins** plus the Shadow Brand reward.
- If the Spirit appears but is defeated or remains unclaimed when the adventure ends, the party that dealt the most total damage to the Spirit gains **4 × (2 + (4 × APL)) Coins**. If that damage is tied, neither party gains this reward.
- If neither primary objective is achieved, the party with the most total Coin Value wins.

Tiebreaker: Most total damage dealt to the Bound Shadow Spirit, if it appeared. Otherwise, most Monster CV collected.

Climate 4: Pale City Scenarios

Scenario 1: Plunder of the Frozen Ruins [Intro]

The Pale City is littered with magical treasure because its people froze too quickly to hide it, and Hearthhold has lived for generations by thawing out what they left. A promising ruin has cracked open under the snow. Both parties enter before the frozen citizens notice another room has been disturbed, because the citizens do notice, eventually, and they do not forgive trespass.

Primary Objective: Be the party to escape with the most total Coin Value from the Arcane Treasure Chests placed after scaling.

Final Random Monster Groups: Determine using **10.6.4**.

Awake Groups: Random Monster Groups begin **Resting** unless a listed setup rule says otherwise. Scenario-specific Monsters use their listed state.

Minion Swarm: No.

Objective Scaling: Apply **10.6.9** to the Arcane Treasure Chests.

Level Scaling: Use the Scenario APL for every APL-based Monster, hazard, objective, reward, and damage value in this scenario.

Solo/Co-op Objective: Extract the contents of at least half of the Arcane Treasure Chests placed

after scaling, rounded up, then extract at least half the party as defined in **10.6.10**.

Pressure Clock: Use **Swarm** from **10.5.7**.

Battlefield and Terrain (36"×36"): Create a dense ruined cityscape with 8–10 wall sections, 3–4 larger building footprints, and scattered rubble and ice. Maintain several firing lanes and elevated positions.

Objective Placement: Determine the number of Arcane Treasure Chests after scaling; the printed number is **5**. Prepare the 5 numbered contents markers listed below, shuffle the markers face down out of both parties' sight, and randomly draw a number of markers equal to the number of Chests required. Set the undrawn markers aside without revealing the markers. Parties alternate placing the required Chests at least 6" apart and at least 8" from any deployment zone. Randomly assign one drawn marker beneath each Chest without revealing that marker. Each Chest's contents are revealed only when that Chest is looted:

- **Chest 1: 1 Treasure roll**.
- **Chest 2: 1 Treasure roll with Disadvantage** + 1 Tier 1 Potion. This Chest is **Magically Sealed**.
- **Chest 3: 1 Treasure roll with Disadvantage** + 1 Tier 1 Scroll. This Chest is **Magically Sealed**.
- **Chest 4: 2 Treasure rolls**.
- **Chest 5:** Rigged. The opener suffers **1d8 piercing damage** (**AV** reduces this damage normally), then makes **1 Treasure roll with Disadvantage**.

Scenario-Specific Monsters: None pre-deployed.

Boss Deployment: None.

Random Monster Setup:

- For each Final Random Monster Group, roll once on the Pale City Random Monster Table. Parties alternate placing the Groups at least **6"** from every Chest and at least **8"** from any Hero deployment zone. All Groups begin **Resting**.

Party Deployment: Parties deploy in opposite corner zones (8"×8").

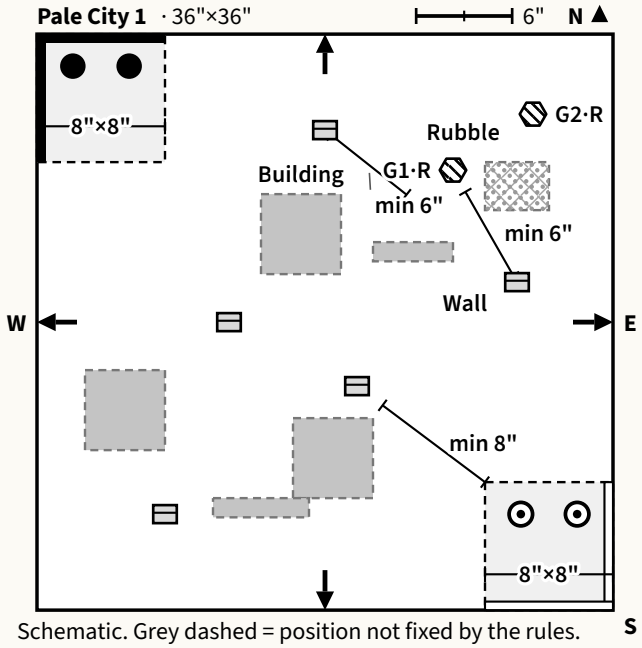


FIG-39. Plunder of the Frozen Ruins: parties deploy in opposite 8"×8" corners; the five Chests are placed alternately at least 6" apart and at least 8" from any deployment zone; key: FIG-20 (see 10.4, Pale City Scenario 1).

Special Rules:

Looting Treasures: A Hero adjacent to a Chest uses **Interact [1 AP]** to loot it. If a Chest is **Magically Sealed**, its sealed state is revealed when a Hero first attempts to loot it, and looting it instead requires **Interact [2 AP]** and an **INT Check**; a failed **Check** spends the AP but may be reattempted. When a Chest is looted, resolve its Treasure rolls and place their rewards, together with any other revealed contents, with the Hero as carried loot. Coins, Potions, and Scrolls from these Chests are not banked until that Hero escapes.

Attracting Attention: Use one shared attention counter for both parties. Each time any Chest is looted, increase the counter by 1 after the loot resolves. When the counter reaches 3, immediately generate one additional Random Monster Group by rolling once on the Pale City Random Monster Table. Place that group within **6"** of the looting Hero, **Awake** and hostile. Reset the attention counter to 0 after that group is placed.

Escape Conditions: Heroes carrying Chest contents must escape via any battlefield edge.

Victory Conditions: The adventure ends after Round 8, when no unescaped Arcane Chest contents remain on the battlefield and all surviving Heroes from at least one party have escaped, or when all Heroes are defeated. The party that escapes with the highest total Coin Value wins.

Tiebreaker: Most total Monster CV collected.

Scenario 2: The Alchemist's Frozen Laboratory

In the ice-locked Silent District, north along the road out of Hearthhold, an alchemist's laboratory remains sealed under frost. The formula inside might be worth a village, and Hearthhold burns through everything it owns just to stay warm. The cold has preserved the benches, the bottles, the last mistakes, and the guardians left to watch them. Some things in that laboratory were never meant to thaw.

Primary Objective: Be the party to secure the most Alchemical Reagents and escape with them.

Final Random Monster Groups: Determine using **10.6.4**.

Awake Groups: Random Monster Groups begin **Resting** unless a listed setup rule says otherwise. Scenario-specific Monsters use their listed state.

Minion Swarm: No.

Objective Scaling: Apply **10.6.9** to the Alchemical Reagent Chests.

Level Scaling: Use the Scenario APL for every APL-based Monster, hazard, objective, reward, and damage value in this scenario.

Solo/Co-op Objective: Extract the contents of at least half of the Alchemical Reagent Chests placed after scaling, rounded up, then extract at least half the party as defined in **10.6.10**.

Pressure Clock: Use **Collapse** from **10.5.7**.

Battlefield and Terrain (36"×36"): Represent a frozen city block with 6–7 ruined, ice-covered building footprints, one of which is the Laboratory (about 6"×8"). Scatter 4–6 Ice Barricades (**Impassable Terrain**) and Frozen Debris markers (**Cover Terrain** tagged **Difficult Terrain**) in any combination. The exposed ground is **Slippery Terrain**.

Objective Placement: Place 3 Alchemical Reagent Chests inside the Laboratory, each in a different room or on a different level. Each yields **1 Treasure roll** plus one unique Rare Reagent token. A Rare Reagent is worth an additional **2 × (2 + (4 × APL)) Coins** if its party also escapes with at least one other Rare Reagent. Place 1 Treasure Chest (**1 Treasure roll with Disadvantage**) in a nearby ruined structure outside the Laboratory.

Scenario-Specific Monster: Alchemical Golem

HP	(5 × Party Size × (4 + (1 × APL))) / 8
AV	2 + (APL/3, rounded down)
SPD	4"
LVL	APL + 1 (min 3, max 7)
CV	2 × (2 + (4 × APL)) Coins
Sz	M

AI Steps

Target Priority: Prioritize a valid enemy carrying loot taken from a Reagent Chest. Otherwise, use the normal Monster target priorities.

1. **Caustic Spray [Recharge 5–6]:** If one or more enemies can be included in a legal **Cone 4"**, place the cone using the Area of Effect priorities in **9.5**. Each enemy in the cone must pass a **DEX Check**. On a failure, that enemy suffers **1d6 + APL acid damage**, and their **AV** from metal armour is reduced by **1** until the end of the round. Then end this activation.

Attacks

- **Swirling Vials:** 1d8 + APL/2 damage. Each time this attack damages a target, roll **1d4** to determine the attack's damage type: **1** acid, **2** ice, **3** fire, **4** poison. On a **Critical Hit**, the target must also pass a **STR Check** or be **Pushed 1"** directly away.

Special Abilities

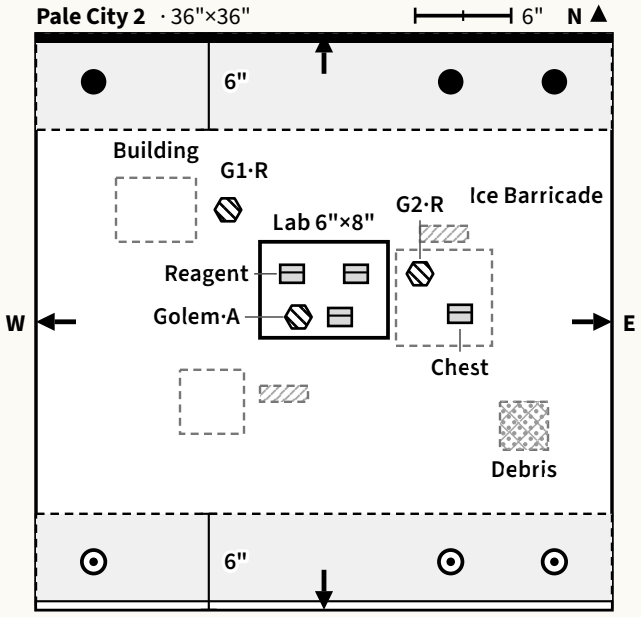
- **Construct.**
- **Immune:** poison, psychic.
- **Unstable Core:** When the Golem is defeated, they explode. All combatants within 2" make a **DEX Check** or suffer **1d6 + APL damage**, of a random listed damage type.

Boss Deployment: Starts **Awake** inside the Laboratory, guarding the Reagent Chests.

Random Monster Setup:

- **Group 1:** Roll once on the Pale City Random Monster Table. Place in icy streets leading to the Laboratory. **Resting**.
- **Group 2:** Roll once on the Pale City Random Monster Table. Place inside a ruined building adjacent to the Laboratory. **Resting**.

Party Deployment: Parties deploy on opposite short battlefield edges, within **6"** of their edge.



Schematic. Grey dashed = position not fixed by the rules. Exposed ground is Slippery Terrain.

FIG-40. The Alchemist's Frozen Laboratory: parties deploy within 6" of opposite short edges; the Laboratory, about 6"×8", holds three Reagent Chests and the Alchemical Golem; key: FIG-20 (see 10.4, Pale City Scenario 2).

Special Rules:

Slippery Ground: The first time during each **Move** action that a Hero enters exposed icy ground, they make a **DEX Check**. On a failure, they become **Prone**, and that Move action ends. A Hero makes no more than one Slippery Ground Check during the same Move action.

Looting a Reagent Chest: A Hero adjacent to a Reagent Chest uses **Interact [1 AP]** to loot it. Resolve the Chest's Treasure rolls and place their rewards, together with the Rare Reagent token, with the Hero as carried loot. Those rewards and the Rare Reagent are not banked until that Hero escapes. Each Reagent Chest may be looted only once.

Volatile Reagents: Each Reagent Chest is a visible scenario object with **AV 0**. It may be targeted by attacks and damaging effects and automatically fails any Check it is required to make. Damage does not accumulate. If a single source of fire damage or an **Explosion** deals **6 or more** final damage to it, destroy it and lose its Rare Reagent; otherwise, it suffers no lasting damage.

Intense Cold: At the end of each round, any Hero that is not inside a building and not within **1"** of a lit fire, lantern, alchemical burner, or another effect whose rules text states that it provides heat suffers **1 ice damage**. Burning webs and active fire-based magical effects count as heat sources while those effects persist.

Escape Conditions: Heroes carrying Rare Reagents or unbanked Chest contents must escape via any battlefield edge.

Victory Conditions: The adventure ends after Round 8, when all Rare Reagents have been escaped with or destroyed, or when all Heroes are defeated. The party that escapes with the highest total Coin Value from Reagents, Chests, and Monster CV wins. If 3 Reagent Chests were placed, a single party that escapes with all 3 unique Rare Reagents gains an additional **4 × (2 + (4 × APL)) Coins**.

Tiebreaker: Most unique Rare Reagents escaped with.

Scenario 3: The Haunted Mausoleum

The mausoleum stands under the ice with its doors still sealed, and a noble family of the White Court rests below, or pretends to. Their heirlooms remain in the crypt, polished by cold and watched by names too proud to fade. Hearthhold needs whatever can be sold to buy another winter's fuel. The Court does not recognize the sale.

Primary Objective: Be the party to escape with the most Coin Value from Ancient Heirlooms.

Final Random Monster Groups: Determine using **10.6.4**.

Awake Groups: Random Monster Groups begin **Resting** unless a listed setup rule says otherwise. Scenario-specific Monsters use their listed state.

Minion Swarm: No.

Objective Scaling: Apply **10.6.9** to the Heirloom-bearing Sarcophagi. The total number of Sarcophagi remains fixed.

Level Scaling: Use the Scenario APL for every APL-based Monster, hazard, objective, reward, and damage value in this scenario.

Solo/Co-op Objective: Extract at least half of the Ancient Heirlooms placed after scaling, rounded up, then extract at least half the party as defined in **10.6.10**.

Pressure Clock: Use **Pursuit** from **10.5.7**.

Battlefield and Terrain (36"×36"): Build the interior of a mausoleum with one Grand Hall, 3 Burial Crypts, one of which is the noticeably larger Grand Crypt, and connecting corridors. Place exactly **5 Stone Sarcophagus** markers and patches of Cracked Icy Floor (**Slippery Terrain**).

Objective Placement: Determine the number of Heirloom-bearing Sarcophagi after scaling; the printed number is **3**. Prepare that many **Heirloom** markers and enough **Empty** markers to create exactly 5 markers in total. Shuffle the markers face down and assign one marker beneath each Sarcophagus without revealing that marker. Each Heirloom is a carried objective worth **3 × (2 + (4 × APL)) Coins**. Place 1 Treasure Chest (**1 Treasure roll**) in the Grand Hall.

Scenario-Specific Monster: Pale Court Magistrate

HP	(5 × Party Size × (4 + (1 × APL))) / 8
AV	1 + (APL/4, rounded down)
SPD	Fly 7"
LVL	APL + 2 (min 4, max 8)
CV	3 × (2 + (4 × APL)) Coins
Sz	M

AI Steps

Target Priority: Prioritize valid Heroes opening Sarcophagi or carrying Heirlooms. Otherwise, use the normal Monster target priorities.

1. **Spectral Chains [Recharge 5–6]:** If the nearest visible enemy within **10"** is not already **Immobilized** by this ability, that enemy must pass a **DEX Check** or become **Immobilized** and suffer **1d4 ice damage** at the start of each activation until they spend **Interact [2 AP]** to break free. Then end this activation.

Attacks

- **Chill of the Grave: Ranged 8"**, 1d8 + APL/2 ice damage. If this attack damages the target, the target must pass a **SPI Check** or become **Frightened**.

Special Abilities

- **Incorporeal.**
- **Undead.**
- **Teleport:** At the start of their activation, if they are not **Engaged** and have a **Primary Target**, they teleport up to 4" to the legal space in **LOS** nearest to their **Primary Target**.

Boss Deployment: Do not place them during setup. Place them in the Grand Crypt when a Hero enters that Crypt or when any Sarcophagus is opened. They are **Awake** when placed.

Restless Spirits: Each Sarcophagus contains 1 Restless Spirit. Use the canonical **Spectre** profile with **LVL 3**, **HP 10 + (2 × APL)**, **AV 0**, and **CV (2 + (4 × APL))/2 Coins**, rounded down, minimum **1c**. When a Sarcophagus is opened, 1 Restless Spirit appears immediately **Engaged** with the Hero who opened it. Spirits from different Sarcophagi appear separately as each is opened. They are hostile to all.

Random Monster Setup:

- **Group 1:** Roll once on the Pale City Random Monster Table. Place near the entrance. **Resting**.

Party Deployment: Parties deploy on opposite short battlefield edges outside the mausoleum, within **6"** of their edge.

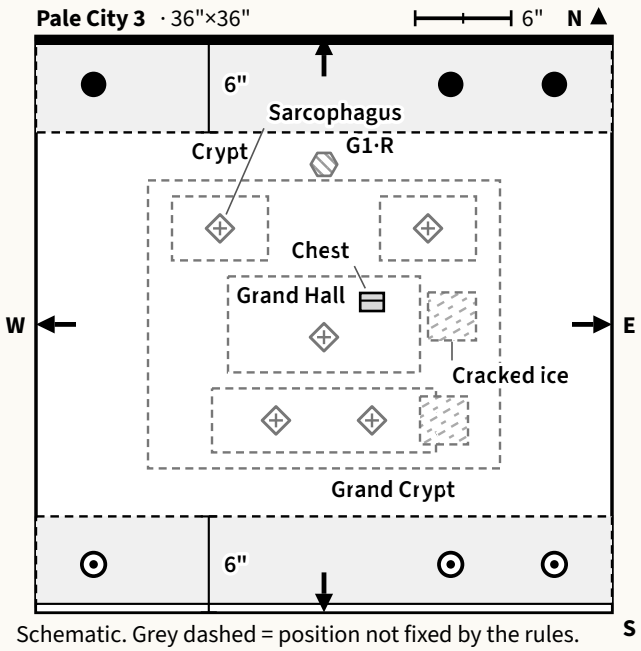


FIG-41. The Haunted Mausoleum: parties deploy within 6" of opposite short edges outside the mausoleum, which holds a Grand Hall, 3 Burial Crypts and exactly five Sarcophagi; key: FIG-20 (see 10.4, Pale City Scenario 3).

Special Rules:

Opening Sarcophagi: A Hero adjacent to a Sarcophagus uses **Interact [2 AP]** and makes a **STR Check**. On a success, open that Sarcophagus, reveal its face-down marker, and place its Restless Spirit. An Empty marker contains no Heirloom.

Claiming Heirlooms: After a Sarcophagus has been opened, a Hero adjacent to its Heirloom uses **Interact [1 AP]** to pick it up.

Desecration's Chill: Each time an Heirloom is carried past the mausoleum's outer wall, every Hero currently inside the mausoleum suffers a -1 SPI penalty. This penalty is cumulative to a maximum of -3 SPI per Hero and lasts until the adventure ends.

Escape Conditions: Heroes carrying Heirlooms must escape via any battlefield edge.

Victory Conditions: The adventure ends after Round 8, when all surviving Heroes from at least one party have escaped, or when all Heroes are defeated. The party that escapes with the most total Coin Value from Heirlooms, Chests, and Monster CV wins.

Tiebreaker: Most Heirlooms escaped with.

Scenario 4: The Clockwork Menagerie

A Deepwarden tinker came north chasing a commission and froze here with the rest of the city, and the workshop is full of brass legs, biting gears, and small minds wound tight around old orders. The tinker is dust. The orders remain. Hearthhold's firewatch wants the intact cores and the notebooks explaining how not to die retrieving them, because a Bastion this poor cannot leave brass that still moves.

Primary Objective: Be the party to secure the most Intact Clockwork Cores and escape with them.

Final Random Monster Groups: 0. This scenario uses only its scenario-specific Clockwork Guardians.

Awake Groups: All 3 Clockwork Guardians begin **Awake** as listed.

Minion Swarm: No.

Objective Scaling: None. The 3 Clockwork Guardians and their Cores are fixed.

Level Scaling: Use the Scenario APL for every APL-based Monster, hazard, objective, reward, and damage value in this scenario.

Solo/Co-op Objective: Defeat every Clockwork Guardian, extract at least half of the Clockwork Cores, rounded up, and extract at least half the party as defined in **10.6.10**.

Pressure Clock: Use **Swarm** from **10.5.7**.

Battlefield and Terrain (36"×36"): Build a ruined workshop with tables, pipework, conveyors, and 2–3 raised platforms. Place 2–3 Workbench markers and 4 Sparking Conduit markers.

Objective Placement: No Cores begin on the battlefield. Intact Clockwork Cores are dropped by defeated Clockwork Guardians. Place 3 Treasure Chests (**1 Treasure roll with Disadvantage** each). When a Chest is looted, roll **1d4**. On a **1**, that Chest also contains Tinker's Tools.

Scenario-Specific Monsters: Clockwork Guardians (3)

HP	(5 × Party Size × (1 + (1 × APL))) / 8
AV	2 + (APL/2, rounded down)
SPD	5"
LVL	APL (min 2, max 5)
CV	None
Sz	M

Attacks

- **Guardian 1, Metal Claw:** 1d8 + APL/2 slashing damage. On a **Critical Hit**, the target becomes **Immobilized**.
- **Guardian 2, Whirring Blades:** Each **Engaged** enemy suffers **1d6 + APL/2 slashing damage**.
- **Guardian 3, Heavy Piston:** 1d8 + APL/2 blunt damage. If this attack damages the target, the target must pass a **STR Check** or be **Pushed 2"** directly away.

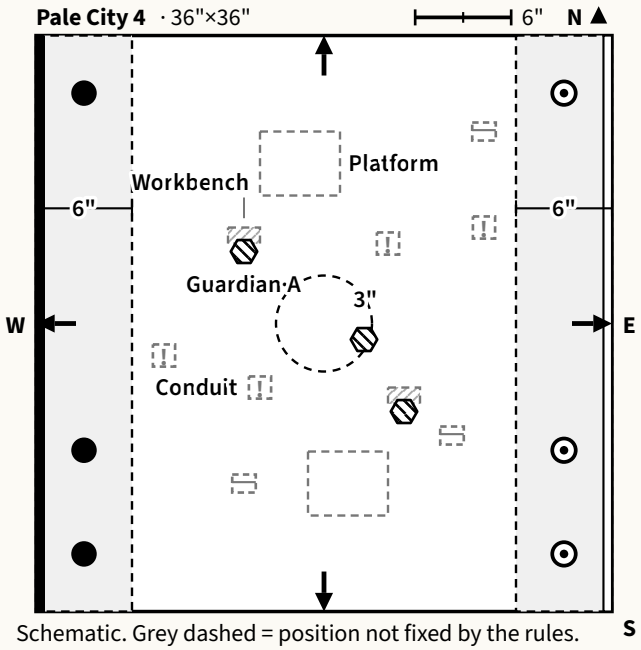
Special Abilities

- **Assigned Weapon:** Each Guardian has only the attack bearing their number; they do not use the other Guardians' attacks.
- **Construct.**
- **Vulnerable:** lightning.
- **Erratic Programming:** At the start of a Guardian's activation, roll **1d6**. On a **1–2**, they move **1d3"** in a legal **Random Direction** using **10.1**, then make their assigned attack against the nearest legal combatant, treating every other combatant as an enemy for that attack. If no legal target exists, their activation ends. On a **3–6**, they use normal AI.
- **Core Drop:** Each Guardian has one matching Intact Clockwork Core token. The first time that Guardian is defeated, place their Core in the space they occupied. That Core is a carried objective worth **3 × (2 + (4 × APL)) Coins**. A Guardian can never create a second Core.

Boss Deployment: All 3 Clockwork Guardians start **Awake**. Place one Guardian adjacent to each Workbench; if there are fewer Workbenches than Guardians, place each remaining Guardian within **3"** of the battlefield centre. The party that lost the Setup Roll-off chooses each Guardian's exact position within those constraints.

Random Monster Setup: None. This scenario uses only the scenario-specific Clockwork Guardians.

Party Deployment: Parties make a Setup Roll-off. The winner chooses one battlefield edge and deploys their party within **6"** of it. The other party deploys within **6"** of the opposite battlefield edge.



Schematic. Grey dashed = position not fixed by the rules. Two Workbenches drawn (the text allows 2–3).

FIG-42. The Clockwork Menagerie: the Setup Roll-off winner picks any battlefield edge and deploys within 6"; three Clockwork Guardians start Awake beside the Workbenches or within 3" of the centre; key: FIG-20 (see 10.4, Pale City Scenario 4).

Special Rules:

Sparking Conduits: At the end of each round, randomly determine one Conduit. Each combatant adjacent to that Conduit suffers **1d4 lightning damage**.

Repair Bench: Once per adventure, a Hero with Tinker's Tools or Lockpicks adjacent to a Workbench uses **Interact [3 AP]** and makes an **INT Check** to repair one defeated Clockwork Guardian whose matching Intact Clockwork Core is on the battlefield within **3"** of that Workbench. A Guardian whose Core has been picked up cannot be repaired. On a success, remove and expend that Guardian's Core token, then place the Guardian adjacent to the Hero with **1d6 HP** remaining. Beginning at the start of the next round, the repairing party controls the Guardian for 2 full rounds. During each of those rounds, the Guardian has **2 AP**, activates during that party's **Party Phase**, retains their printed profile including **Erratic Programming**, and cannot carry, control, or score objectives. At the end of the second full round, the Guardian becomes hostile to all and resumes normal Guardian AI. Because their Core was expended, they drop no Core when defeated again.

Escape Conditions: Heroes carrying Intact Clockwork Cores must escape via any battlefield edge.

Victory Conditions: The adventure ends after Round 8, when all 3 Clockwork Guardians are defeated and no Intact Clockwork Core remains on the battlefield, or when all Heroes are defeated. The party that escapes with the highest total Coin Value from Cores, Chests, and Monster CV wins.

Tiebreaker: Most Intact Clockwork Cores escaped with.

Scenario 5: The Ice Wyrm's Hoard

The old stories put jewels and gold in a frozen cavern beneath the north road out of Hearthhold, and a wyrm coiled on top of them whose breath can stop a heart inside its own armour. Hearthhold needs the gold more than it fears the breath, which is the kind of arithmetic only the poorest Bastion does out loud. The second part of the story has never discouraged the first kind of listener.

Primary Objective: Defeat the Ice Wyrm and loot their Central Hoard Pile.

Final Random Monster Groups: Determine using **10.6.4**.

Awake Groups: Random Monster Groups begin **Resting** unless a listed setup rule says otherwise. Scenario-specific Monsters use their listed state.

Minion Swarm: No.

Objective Scaling: None.

Level Scaling: Use the Scenario APL for every APL-based Monster, hazard, objective, reward, and damage value in this scenario.

Solo/Co-op Objective: Defeat the Ice Wyrm, loot the Central Hoard Pile, then extract the Hoard and at least half the party through any battlefield edge as defined in **10.6.10**.

Pressure Clock: Use **Pursuit** from **10.5.7**.

Battlefield and Terrain (36"×36"): Create a central Ice Cavern Lair (about 12"×12") whose floor is **Slippery Terrain**. Place several large Ice Pillars (**Blocking Terrain**). Frozen tunnel approaches connect the lair to opposite battlefield edges.

Objective Placement: The Ice Wyrm begins in the centre of the lair. Place the Central Hoard Pile within 2" of the Wyrm. The Hoard yields **3 Treasure rolls** plus one random Potion from one tier lower than the current treasure tier, minimum Tier 1. Place 2 Treasure Chests (**1 Treasure roll with Disadvantage** each) in tunnel side chambers.

Scenario-Specific Monster: Ice Wyrm

HP	(5 × Party Size × (5 + (1 × APL))) / 8
AV	3 + (APL/2, rounded down)
SPD	6" (Fly 8")
LVL	APL + 3 (min 6, max 10)
CV	4 × (2 + (4 × APL)) Coins
Sz	L

AI Steps

1. **Frost Breath [Recharge 5–6]:** If one or more enemies can be included in a legal **Cone 8"**, place the cone using the Area of Effect priorities in **9.5**. Each enemy in the cone makes a **DEX Check**. On a failure, that enemy suffers **2d6 + APL ice damage** and becomes **Slowed**. On a success, that enemy suffers half that damage, rounded down, and does not become **Slowed**. Then end this activation.

Attacks

- **Bite:** 1d12 + APL/2 piercing damage + 1d4 ice damage.
- **Claws:** 1d8 + APL/2 slashing damage + 1d4 ice damage.

Special Abilities

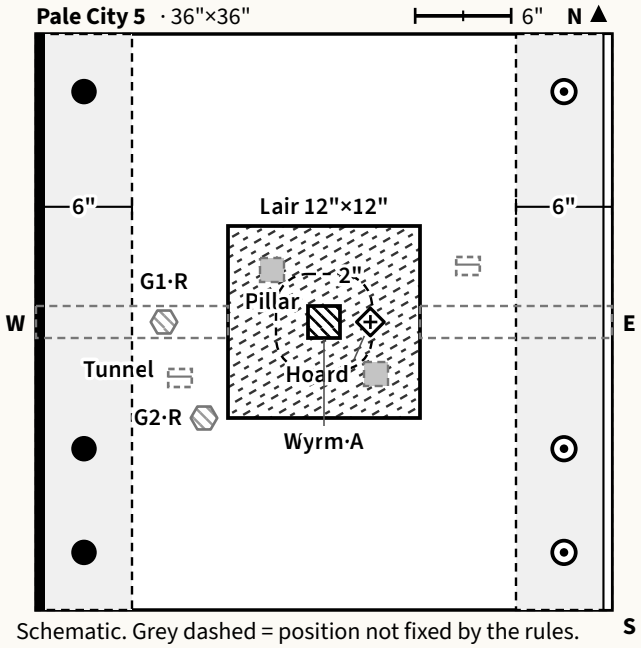
- **Immune:** ice.
- **Vulnerable:** fire.
- **Multi-Attack:** Makes one **Bite** attack and two **Claws** attacks during their attack step.
- **Tail Sweep:** At the start of their activation, if one or more enemies other than the Ice Wyrm's **Primary Target** are within **2"** of the Ice Wyrm, each such enemy must pass a **DEX Check**. On a failure, that enemy suffers **1d8 + APL/2 blunt damage** and **APL/2 ice damage**, minimum **1**, then becomes **Prone**.
- **Terror Aura (6"):** An enemy that starts an activation within the Aura makes a **SPI Check** or becomes **Frightened**.
- **Ice Glide.**

Boss Deployment: Starts **Awake** in the centre of the lair.

Random Monster Setup:

- **Group 1:** Roll once on the Pale City Random Monster Table. Place in a tunnel approach. **Resting**.
- **Group 2:** Roll once on the Pale City Random Monster Table. Place near one Treasure Chest. **Resting**.

Party Deployment: Parties deploy on opposite battlefield edges where the tunnel approaches enter, within **6"** of their edge.



Schematic. Grey dashed = position not fixed by the rules. Edges drawn long; text says only 'opposite edges'.

FIG-43. The Ice Wyrm's Hoard: parties deploy within 6" of opposite edges where the frozen tunnels enter a central lair about 12"×12", with the Ice Wyrm at its centre and the Hoard within 2" of it; key: FIG-20 (see 10.4, Pale City Scenario 5).

Special Rules:

Wyrm's Lair Effects: At the end of each round, one lair effect occurs. In competitive play, parties alternate choosing which effect applies, starting with the party that lost the Setup Roll-off. In solo or cooperative play, roll 1d6: on a 1–3, **Falling Icicles**; on a 4–6, **Flash Freeze**.

- **Falling Icicles:** Choose 1d3 enemy Heroes (in solo or cooperative play, randomly determine 1d3 allied Heroes). Each chosen Hero makes a **DEX Check**. On a failure, they suffer **1d4 piercing damage**.
- **Flash Freeze:** Choose one **3"×3"** square area of non-slippery ground anywhere on the battlefield. In solo or cooperative play, the chosen area must include at least one Hero. That area becomes **Slippery Terrain** until the end of the next round.

Looting the Hoard: A Hero adjacent to the Central Hoard Pile uses **Interact [3 AP]** to loot it. This interaction is legal only after the Wyrm has been defeated. In competitive play, the looting party immediately gains the Hoard's contents. In solo or cooperative play, the Hero instead takes the Central Hoard Pile as a carried objective containing those rewards; the rewards are banked only if the Hoard is extracted.

Escape Conditions: None in competitive play. In solo or cooperative play, the Hero carrying the Central Hoard Pile may escape through any battlefield edge.

Victory Conditions: In competitive play, the adventure ends when the Wyrm is defeated and the Hoard is looted. In solo or cooperative play, it ends successfully only when the Wyrm is defeated and the Hoard and required Heroes have extracted. In all modes, it also ends after Round 8 or when all Heroes are defeated.

- In competitive play, the party that loots the Hoard wins.
- In competitive play, if the Hoard is not looted but the Wyrm is defeated, the party that dealt the most total damage to the Wyrm gains 3 × (2 + (4 × APL)) Coins.
- In competitive play, if the Wyrm still lives at the end of Round 8, the party with the most total Coin Value wins.
- In solo or cooperative play, determine the outcome using **10.5.10**.

Tiebreaker: Most Monster CV collected.

Scenario 6: The Icebound Court

An ice-bound court still convenes in a sanctum of blue glass and frozen banners, north of every fire Hearthhold keeps lit. Its ruler is the Frost Bailiff Magistrate, who keeps bound spirits and carved servants close and passes sentences that were old before Hearthhold was founded. At the centre of the chamber lies the Heartfrost Shard, cold enough to make breath sound like prayer. Hearthhold wants the Shard. The Magistrate has not adjourned.

Role Assignment: Randomly determine which party is **Shard Seekers** (Party A); the other party is **Bounty Hunters** (Party B). Roll **1d2**: on a **1**, the Setup Roll-off winner is Party A; on a **2**, the Setup Roll-off loser is Party A.

Primary Objective:

- **Shard Seekers (Party A):** Defeat the Frost Bailiff Magistrate and escape with the Heartfrost Shard.
- **Bounty Hunters (Party B):** Defeat the Frost Bailiff Magistrate and escape with the Staff of Winter.

Final Random Monster Groups: Determine using **10.6.4**.

Awake Groups: Random Monster Groups begin **Resting** unless a listed setup rule says otherwise. Scenario-specific Monsters use their listed state.

Minion Swarm: No.

Objective Scaling: None.

Level Scaling: Use the Scenario APL for every APL-based Monster, hazard, objective, reward, and damage value in this scenario.

Solo/Co-op Objective: Defeat the Frost Bailiff Magistrate, then extract either the Heartfrost Shard or the Staff of Winter and at least half the party through any battlefield edge as defined in **10.6.10**.

Pressure Clock: Use **Pursuit** from **10.5.7**.

Battlefield and Terrain (36"×36"): Build a frozen sanctum with one central throne chamber, 2 side chambers, and icy corridors connecting them. The ground is **Slippery Terrain**. Place 3–4 ice walls or frozen pillars.

Objective Placement: The Frost Bailiff Magistrate begins on the Ice Throne. They carry the Heartfrost Shard and the Staff of Winter. Each is a carried objective worth **5 × (2 + (4 × APL)) Coins**. Both items drop in the Frost Bailiff Magistrate's space when they are defeated. Place 2 Treasure Chests (**1 Treasure roll with Disadvantage** each) in side chambers.

Scenario-Specific Monster: Frost Bailiff Magistrate

HP	(5 × Party Size × (4 + (1 × APL))) / 8
AV	1 + (APL/3, rounded down)
SPD	6"
LVL	APL + 2 (min 5, max 9)
CV	3 × (2 + (4 × APL)) Coins
Sz	M

Attacks

- **Icicle Bolt:** 1d8 + APL/2 ice damage, **Ranged 12"**.
- **Frozen Touch:** 1d6 + APL/2 ice damage. If this attack damages the target, the target makes a **STR Check** or becomes **Slowed**.

Special Abilities

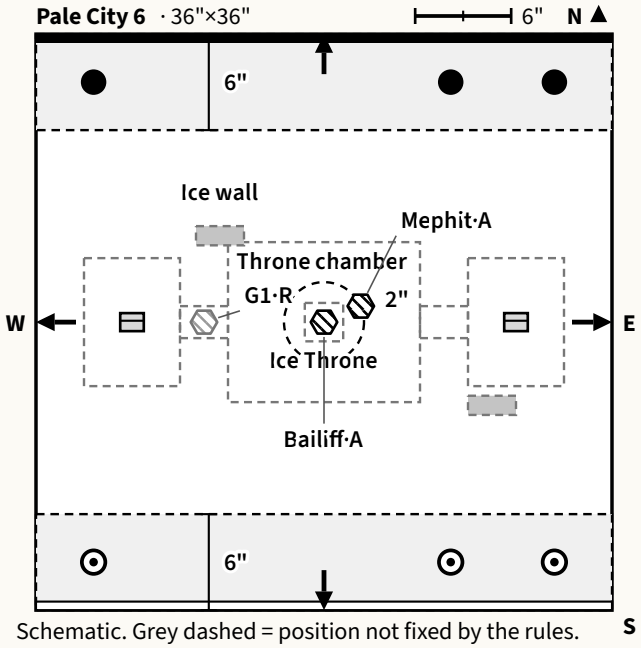
- **Summon Ice Mephit [Recharge 5–6]:** At the start of their activation, if fewer than 4 Ice Mephits placed by this ability are on the battlefield, the Magistrate places 1 Ice Mephit within 3". The placed Ice Mephit is **Awake** and hostile to all. This ability can place no more than 6 Ice Mephits during the adventure.
- **Wall of Ice (once per adventure):** At the start of their activation, the Magistrate creates a 6"×3" ice wall (HP 15, AV 2) that lasts 3 rounds.
- **Immune:** ice.
- **Vulnerable:** fire.

Boss Deployment: Starts **Awake** on the Ice Throne. They are accompanied by Ice Mephit Bodyguards equal to **1 + (APL/3, rounded down)**, maximum 4 total, placed Awake within 2" of them.

Random Monster Setup:

- **Group 1:** Roll once on the Pale City Random Monster Table. Place in the outer corridors. **Resting**.

Party Deployment: Parties deploy on opposite short battlefield edges, within **6"** of their edge.



Schematic. Grey dashed = position not fixed by the rules. Ground is Slippery Terrain; one Mephit drawn.

FIG-44. The Icebound Court: parties deploy within 6" of opposite short edges around a central throne chamber where the Frost Bailiff Magistrate begins on the Ice Throne with Ice Mephit Bodyguards within 2"; key: FIG-20 (see 10.4, Pale City Scenario 6).

Special Rules:

Ice Mephits: Use the following profile for all Ice Mephits in this scenario.

- *Ice Mephit [Minion]:* HP 8 | AV 1 | SPD 5" (Fly 6") | Sz S | LVL 2 | CV 2c. **Attacks:** Frost Claws, 1d6 ice damage. **Special Abilities: Small**; **Immune:** ice; **Vulnerable:** fire; **Death Burst:** when this Monster is defeated, each combatant within 1" suffers 1d4 ice damage.

Frigid Sanctum: At the end of each round, each combatant that is not **Resistant** or **Immune** to ice damage and is not **Engaged** suffers **1 ice damage**.

Shattering Ice Walls: If a Wall of Ice is destroyed by fire damage, each combatant within 1" suffers **1d4 piercing damage**. Reduce this damage by **AV** normally.

Claiming the Magistrate's Items: A Hero adjacent to the defeated Magistrate's space uses **Interact [1 AP]** to pick up either the Heartfrost Shard or the Staff of Winter. Picking up one item does not automatically pick up the other.

Escape Conditions: A Hero carrying either Magistrate item may escape via any battlefield edge.

Victory Conditions: The adventure ends when the Frost Bailiff Magistrate is defeated and either item is escaped with, after Round 8, or when all Heroes are defeated.

- The first party to escape with its designated item after the Frost Bailiff Magistrate is defeated wins and gains that item's Coin Value plus an additional **2 × (2 + (4 × APL)) Coins**.
- If both parties escape with their designated items during the same round, the adventure ends at the end of that round. The party with the higher total Coin Value wins.
- If neither designated item is escaped with, the party with the most total Coin Value wins.

Tiebreaker: Most Monster CV collected.

Climate 5: Sun-Drowned Scenarios

Scenario 1: The Oasis Raiders [Intro]

A vital oasis south of the mountain passes has changed hands again, and raiders hold the wells, the shade, and the people too slow to flee. Saltspire sells water as sovereignty, and an oasis it does not control is a debt it cannot collect. One contract from the Well-Keepers says liberation. A rival contract says seizure. The water will not ask which seal is righteous.

Primary Objective: Control the Oasis Wellspring at the end of Round 7 and have defeated the Raider Chieftain.

Final Random Monster Groups: Determine using **10.6.4**.

Awake Groups: Random Monster Groups begin **Resting** unless a listed setup rule says otherwise. Scenario-specific Monsters use their listed state.

Minion Swarm: No.

Objective Scaling: None.

Level Scaling: Use the Scenario APL for every APL-based Monster, hazard, objective, reward, and damage value in this scenario.

Solo/Co-op Objective: Defeat the Raider Chieftain, control the Wellspring at the end of a round after the Chieftain is defeated, then extract at least half the party through any battlefield edge as defined in **10.6.10**.

Pressure Clock: Use **Pursuit** from **10.5.7**.

Battlefield and Terrain (36"×36"): Place a central Oasis (about 8"×8") with a Wellspring marker and 2–3 Palm Trees. Place 4–6 Sand Dunes and 2–3 Rocky Outcrops across the rest of the battlefield.

Objective Placement: The Wellspring is the central control point. Place 3 Treasure Chests (**1 Treasure roll with Disadvantage** each) behind dunes and rock formations.

Scenario-Specific Monster: Raider Chieftain

HP	(5 × Party Size × (3 + (1 × APL))) / 8
AV	2 + (APL/4, rounded down)
SPD	6"
LVL	APL + 1 (min 3, max 6)
CV	2 × (2 + (4 × APL)) Coins
Sz	M

Attacks

- **Desert Scimitar:** 1d8 + APL/2 slashing damage.
- **Throwing Knives:** 1d4 + APL/2 piercing damage, **Ranged 6"**.

Special Abilities

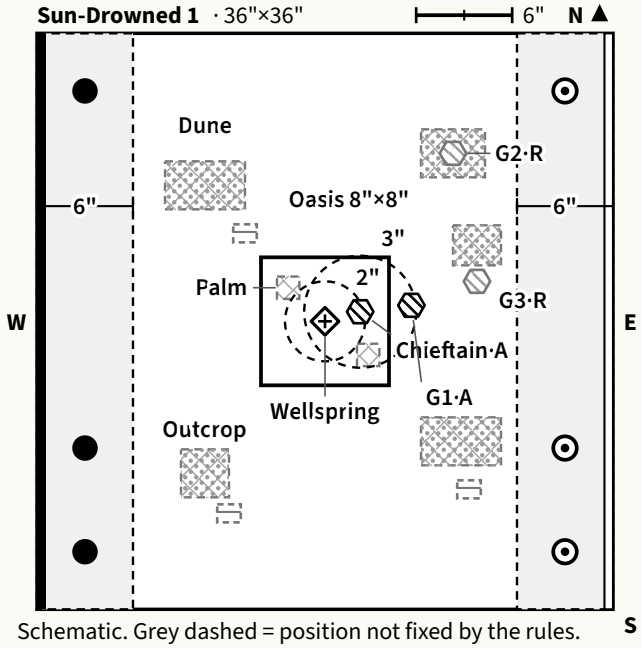
- **Desert Tactics:** Allied Monsters within **6"** gain **+1" Speed**.
- **Multi-Attack:** If **Engaged**, makes one **Desert Scimitar** attack. Otherwise, makes two **Throwing Knives** attacks during their attack step, using the normal Monster target priorities.
- **Sandstorm Dance (once per adventure):** At the start of their activation, the Chieftain creates an **Aura 3"** sandstorm centred on themselves. The area provides **Cover** and reduces ranged damage traced through it by 1 until the end of the round.

Boss Deployment: Starts **Awake** within 2" of the Wellspring.

Random Monster Setup:

- **Group 1:** Roll once on the Sun-Drowned Random Monster Table. Place within 3" of the Chieftain. Awake.
- **Group 2:** Roll once on the Sun-Drowned Random Monster Table. Place on a high dune overlooking the Oasis. **Resting**.
- **Group 3:** Roll once on the Sun-Drowned Random Monster Table. Place behind a Rocky Outcrop on one approach route. **Resting**.

Party Deployment: Parties deploy on opposite long battlefield edges, within **6"** of their edge.



Schematic. Grey dashed = position not fixed by the rules.

FIG-45. The Oasis Raiders: parties deploy within 6" of opposite long edges around a central Oasis about 8"×8" with the Wellspring, the Raider Chieftain starting within 2" of it; key: FIG-20 (see 10.4, Sun-Drowned Scenario 1).

Special Rules:

Controlling the Wellspring: A party controls the Wellspring if, at the end of the round, it is the only party with Heroes within 2" of the Wellspring and no Monster is within 2" of the Wellspring. If both parties have Heroes within 2", or if a Monster is within 2", the Wellspring is Contested and neither party controls it. While a party controls the Wellspring, each of that party's Heroes within 2" heals 1d3 HP at the start of that Hero's activation.

Heat Haze: Ranged attacks targeting beyond **12"** roll their base damage dice with **Disadvantage**.

Escape Conditions: None in competitive play. In solo or cooperative play, allied Heroes may escape through any battlefield edge as required by the **Solo/Co-op Objective**.

Victory Conditions: The adventure ends at the end of Round 7 or when all Heroes are defeated.

- If one party controls the Wellspring at the end of Round 7 and the Raider Chieftain has been defeated, that party wins and gains 8 × (2 + (4 × APL)) Coins.
- If the Chieftain has been defeated but neither party controls the Wellspring, the party that dealt the killing blow to the Chieftain gains **6 × (2 + (4 × APL)) Coins**.
- If the Chieftain remains alive, the party that controls the Wellspring at the end of Round 7 gains 3 × (2 + (4 × APL)) Coins.
- In all other cases, and in every case above where no winner is named, the party with the most total Coin Value wins.

Tiebreaker: Most Monster CV collected.

Scenario 2: The Cinder Lord's Lost Brazier

A brass brazier lies somewhere in the scorched ruins, still holding the ember of a bound Cinder Lord. The relic promises power to the hand that completes the binding, and Saltspire knows more about binding infernal things to contracts than it admits to anyone. One patron wants the brazier brought in quietly. Another wants the binding finished out here. Promises made by fire should be read twice.

Primary Objective: Be the first party to find the Lost Brazier and successfully complete the Attunement Ritual.

Final Random Monster Groups: Determine using **10.6.4**.

Awake Groups: Random Monster Groups begin **Resting** unless a listed setup rule says otherwise. Scenario-specific Monsters use their listed state.

Minion Swarm: No.

Objective Scaling: None. The 3 Elemental Loci are distinct steps and remain fixed.

Level Scaling: Use the Scenario APL for every APL-based Monster, hazard, objective, reward, and damage value in this scenario.

Solo/Co-op Objective: Find the Lost Brazier, successfully complete the Attunement Ritual, then extract at least half the party through any battlefield edge as defined in **10.6.10**.

Pressure Clock: Use **Pursuit** from **10.5.7**.

Battlefield and Terrain (36"×36"): Create a ruined plaza with a central Altar of Binding (2"×2", 1" high). Scatter scorched earth, jagged obsidian rubble, and fire-blasted wall sections around the plaza. Place 3 Elemental Locus pillars (**Impassable Terrain**) 4–6" from the Altar.

Objective Placement: The Lost Brazier does not begin on the battlefield. It is found through searching the Elemental Loci. Place 2 Treasure Chests (**1 Treasure roll with Disadvantage** each) in surrounding ruins.

Scenario-Specific Monsters: Flame Guardians (2)

HP	(5 × Party Size × (2 + (1 × APL))) / 8
AV	1 + (APL/4, rounded down)
SPD	6" (Fly 4")
LVL	APL (min 2, max 5)
CV	(2 + (4 × APL)) Coins each
Sz	L

Attacks

- **Fiery Lash: Reach**, 1d6 + APL/2 fire damage.

Special Abilities

- **Immune:** fire.
- **Cinder Burst:** At the start of the Guardian's activation, target the nearest enemy within **8"**. That target and every combatant within **1"** of them suffer **1d4 + APL/2 fire damage**, minimum **1**. Each affected combatant may make a **DEX Check** to halve the damage.
- **Bound to Locus:** A Flame Guardian cannot willingly move more than 6" from the Locus where they spawned.

Boss Deployment: Flame Guardians are not placed at setup. The first two successful Locus searches each spawn one Flame Guardian at that Locus, Awake.

Random Monster Setup:

- **Group 1:** Roll once on the Sun-Drowned Random Monster Table. Place within **4"** of a randomly determined Elemental Locus. **Resting**.
- **Group 2:** Roll once on the Sun-Drowned Random Monster Table. Place on an outer approach route. **Resting**.

Party Deployment: Parties deploy on opposite short battlefield edges, converging on the plaza.

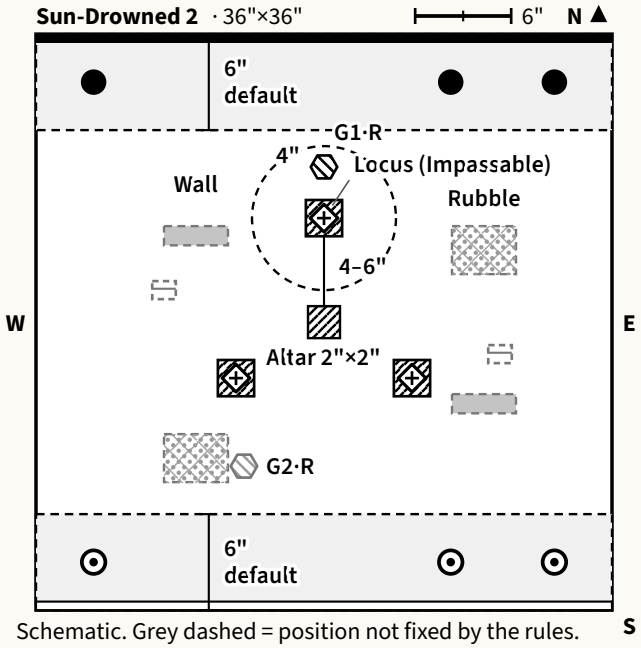


FIG-46. The Cinder Lord's Lost Brazier: parties deploy on opposite short edges converging on a plaza whose 2"×2" Altar has three Elemental Locus pillars 4–6" from it; key: FIG-20 (see 10.4, Sun-Drowned Scenario 2).

Special Rules:

Interacting with the Loci: A Hero adjacent to an Elemental Locus uses **Interact [1 AP]** and makes an **INT Check**. Each Elemental Locus can produce at most one successful search; once a Locus has produced a success, it cannot be searched again. The first two successful **Interact** actions spawn Flame Guardians. The third successful search reveals the Lost Brazier at that Locus; place it adjacent to the searching Hero.

Picking Up the Lost Brazier: A Hero adjacent to the found Brazier uses **Interact [1 AP]** to take it as a carried objective.

Using the Brazier: A Hero carrying the Lost Brazier who is adjacent to the Altar of Binding uses **Interact [3 AP]** and makes a **SPI Check**.

- **Success:** That Hero claims the Brazier's power. Gain **8 × (2 + (4 × APL)) Coins**. That Hero also gains one **Cinder Lord's Boon** token. Once during a future adventure, before making any one d20 roll, the Hero may spend that token to treat the roll as a natural **20** for that roll's purpose, including any **Critical Success** or **Critical Cast** effect that roll triggers.
- **Failure:** The Brazier erupts. Every combatant within **2"** suffers **1d8 fire damage**. The ritual may be attempted again on a later activation.

Escape Conditions: None in competitive play. In solo or cooperative play, allied Heroes may escape through any battlefield edge as required by the **Solo/Co-op Objective**.

Victory Conditions: The adventure ends immediately when a party successfully claims the Brazier's power, after Round 8, or when all Heroes are defeated. If no party claims the Brazier by the end of Round 8, the party with the most total Coin Value wins.

Tiebreaker: Most Monster CV collected.

Scenario 3: Tomb of the Sunken Kings

The sand has drawn back from a tomb complex of the priest-kings, and gilded chambers show through the heat shimmer. The old hazards remain patient, and so do the guardians. Saltspire will buy whatever is carried out and ask no awkward questions about how, because plausible innocence is worth as much to it as gold. Nothing buried with a priest-king expects to be taken politely.

Primary Objective: Be the party to escape with the most Coin Value looted from the Royal Sarcophagi placed after scaling.

Final Random Monster Groups: Determine using **10.6.4**.

Awake Groups: Random Monster Groups begin **Resting** unless a listed setup rule says otherwise. Scenario-specific Monsters use their listed state.

Minion Swarm: No.

Objective Scaling: Apply **10.6.9** to the Royal Sarcophagi.

Level Scaling: Use the Scenario APL for every APL-based Monster, hazard, objective, reward, and damage value in this scenario.

Solo/Co-op Objective: Loot and extract the contents of at least half of the Royal Sarcophagi placed after scaling, rounded up, then extract at least half the party as defined in **10.6.10**.

Pressure Clock: Use **Collapse** from **10.5.7**.

Battlefield and Terrain (36"×36"): Build a tomb entrance complex with 5–7 wall sections forming small chambers and one Grand Hall (about 5"×10"). Scatter 3–4 Fallen Pillars and patches of Deep Sand.

Objective Placement: Place 3 Royal Sarcophagus markers in separate chambers. Each yields **1 Treasure roll**. When a Sarcophagus is looted, roll **1d4**. On a **4**, that Sarcophagus also contains a **Desert King's Trinket** (see **Special Rules**). Place 1 Treasure Chest (**1 Treasure roll with Disadvantage**) in an alcove.

Scenario-Specific Monster: Tomb Herald (Mummy)

HP	(5 × Party Size × (5 + (1 × APL))) / 8
AV	2 + (APL/3, rounded down)
SPD	4"
LVL	APL + 2 (min 4, max 8)
CV	3 × (2 + (4 × APL)) Coins
Sz	M

AI Steps

Target Priority: Prioritize valid Heroes opening or looting Sarcophagi. Otherwise, use the normal Monster target priorities.

1. **Desiccating Grasp [Recharge 5–6]:** If the nearest visible enemy is within **6"**, that enemy suffers **1d6 + APL necrotic damage** and cannot regain HP until the end of their next activation. Then end this activation.

Attacks

- **Slam of Ages:** 1d10 + APL/2 blunt damage. If this attack damages the target, the target must pass a **STR Check** or become **Weakened**.

Special Abilities

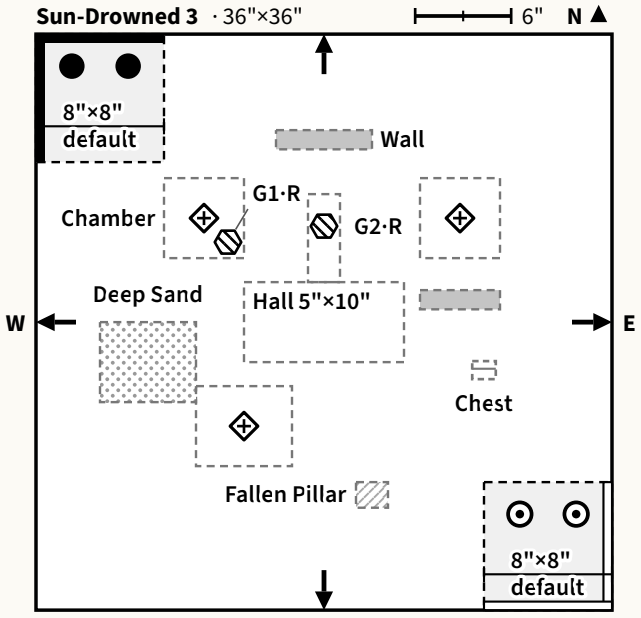
- **Undead.**
- **Vulnerable:** fire.
- **Terror Aura (3"):** An enemy entering or starting an activation in the Aura makes a **SPI Check** or becomes **Frightened**.

Boss Deployment: Starts **Awake** guarding the central Sarcophagus.

Random Monster Setup:

- **Group 1:** Roll once on the Sun-Drowned Random Monster Table. Place in a side chamber near one Sarcophagus. **Resting**. It becomes **Awake** when that Sarcophagus is Interacted with.
- **Group 2:** Roll once on the Sun-Drowned Random Monster Table. Place in a corridor leading to the Grand Hall. **Resting**.

Party Deployment: Parties deploy in opposite corner zones, representing different breaches into the tomb.



Schematic. Grey dashed = position not fixed by the rules.
? Tomb Herald not placed: no Sarcophagus is designated central (see text)

FIG-47. Tomb of the Sunken Kings: parties deploy in opposite corner zones (8"×8" by the 10.1 default) breaching a tomb complex with a Grand Hall about 5"×10" and three Royal Sarcophagi in separate chambers; key: FIG-20 (see 10.4, Sun-Drowned Scenario 3).

Special Rules:

Ancient Hazards: Before Hero deployment, roll **1d3 once** to determine the total number of Pressure Plate markers. Starting with the party that lost the Setup Roll-off, parties alternate placing that many markers in corridors, not in Deep Sand. The first Hero to move within **1"** of a Pressure Plate marker triggers it and makes a **DEX Check**. **Failure:** Roll 1d4: **1:** the Hero suffers **1d6 piercing damage** from darts; **2:** the Hero becomes **Blinded**; **3:** the Hero becomes **Immobilized**; **4:** the nearest Resting Monster Group becomes **Awake**. A Hero adjacent to a Pressure Plate may use **Interact [1 AP]** and make an **INT Check** to neutralize that Pressure Plate.

Desert King's Trinket: A Hero may carry no more than **1 Desert King's Trinket** into an adventure. At the start of an adventure, a Hero carrying a Trinket gains **+1 Luck Point** for that adventure. A Trinket may instead be sold during the Town Phase for **(2 + (4 × APL)) Coins**, using the APL of the adventure in which it was found.

Sarcophagus Seals: Opening a Royal Sarcophagus requires **Interact [2 AP]** and either a **STR Check** to force it open or an **INT Check** to carefully unseal it. Looting its contents requires a separate **Interact [1 AP]**.

Escape Conditions: Heroes carrying Sarcophagus loot must escape via any battlefield edge.

Victory Conditions: The adventure ends at the end of Round 7, when every Royal Sarcophagus placed after scaling has been looted and all surviving Heroes from at least one party have escaped, or when all Heroes are defeated. The party that escapes with the most total Coin Value wins.

Tiebreaker: Most Royal Sarcophagi successfully looted.

Scenario 4: The Sandwyrm's Lair

Nomad legends speak of a vast shape beneath the dunes south of the passes, and a gullet lined with the treasure of everything it has swallowed. The nomads tell it as a warning. Saltspire's patrons hear it as an inventory and pay accordingly. The dunes do not distinguish between the two kinds of listener.

Primary Objective: Defeat the Great Sandwyrm and loot the Hoard of the Wastes.

Final Random Monster Groups: Determine using **10.6.4**.

Awake Groups: Random Monster Groups begin **Resting** unless a listed setup rule says otherwise. Scenario-specific Monsters use their listed state.

Minion Swarm: No.

Objective Scaling: None.

Level Scaling: Use the Scenario APL for every APL-based Monster, hazard, objective, reward, and damage value in this scenario.

Solo/Co-op Objective: Defeat the Great Sandwyrm, loot the Hoard of the Wastes, then extract at least half the party through any battlefield edge as defined in **10.6.10**.

Pressure Clock: Use **Pursuit** from **10.5.7**.

Battlefield and Terrain (36"×36"): Create a broad basin of loose desert sand with a central Shifting Sands Zone. Scatter a few rock shelves, ruined stakes, and dune ridges.

Objective Placement: No Hoard token begins on the battlefield. When the Sandwyrm is defeated, place the Hoard of the Wastes token in the space where it fell. Place 2 Treasure Chests (**1 Treasure roll with Disadvantage** each) near the edge of the basin.

Scenario-Specific Monster: Great Sandwyrm

HP	(5 × Party Size × (6 + (1 × APL))) / 8
AV	3 + (APL/2, rounded down)
SPD	6"
LVL	APL + 3 (min 6, max 10)
CV	4 × (2 + (4 × APL)) Coins
Sz	H

Attacks

- **Titanic Maw:** 1d12 + APL piercing damage.
- **Bursting Slam:** 1d10 + APL/2 blunt damage. If this attack damages the target, the target makes a **STR Check** or is **Pushed 2"** directly away.

Special Abilities

- **Burrow and Emerge [Recharge 4–6]:** The Sandwyrm starts burrowed and off-battlefield and remains eligible to activate while in that state. On their first activation, place them within the Shifting Sands Zone; the party that lost the Setup Roll-off chooses the exact legal position for their **Huge** footprint. If no legal placement fits at the chosen point, use the nearest legal placement to that point, determining tied nearest placements using **Random Determination**. Then resolve their activation normally. On a later activation, after attacking, the Sandwyrm uses this ability if it is available and they are not **Immobilized** or **Stunned**. Remove them from the battlefield and place a Burrow marker in the space they occupied. At the start of each of the Sandwyrm's activations while burrowed, move the Burrow marker up to the Sandwyrm's Speed toward their **Primary Target**. If the marker ends that movement adjacent to their **Primary Target**, or if the Sandwyrm suffered any damage while burrowed since their previous activation, the Sandwyrm emerges: place their **Huge** footprint centred on the marker if legal; otherwise use the nearest legal placement to the marker, determining tied nearest placements using **Random Determination**. Remove the marker and resolve their activation normally. If the Sandwyrm begins an activation already burrowed and does not emerge during that activation, they emerge at the end of it: place their **Huge** footprint centred on the Burrow marker if legal, otherwise use the nearest legal placement to the marker, determining tied nearest placements using **Random Determination**. Remove the marker. The Sandwyrm does not resolve a further activation that round. The Sandwyrm therefore cannot remain burrowed through more than one of their own activations. While the Sandwyrm

is burrowed, attacks and Powers may target the Burrow marker; they affect the Sandwyrm, but the Sandwyrm is treated as having **Cover** against them.

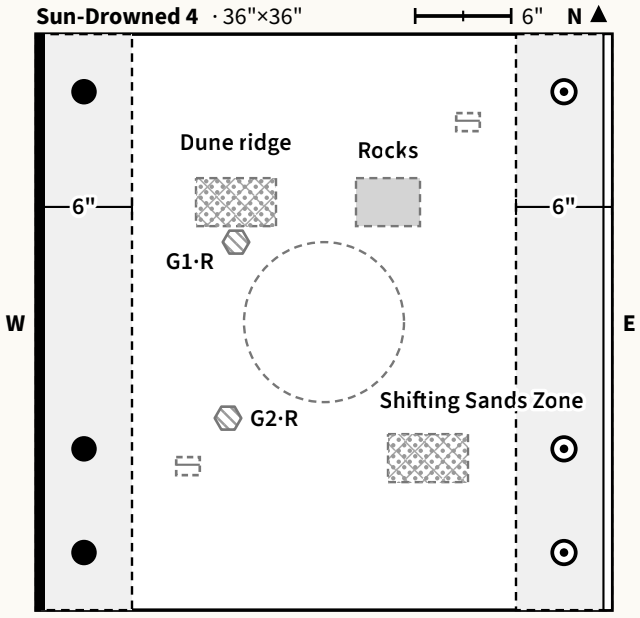
- **Swallow Whole:** If **Titanic Maw** reduces a Hero to **0 HP**, that Hero makes their Injuries Roll at **-2**. If they survive, they are swallowed under the universal **Swallow Whole** rules in **9.6**: remove them from the battlefield, mark them as swallowed by the Sandwyrm, and drop their carried objectives in the space they occupied. Because they are **Knocked Out**, they cannot attempt to escape. If the adventure ends while the Sandwyrm lives, place each surviving swallowed Hero **Prone** at the Sandwyrm's position, or at the Burrow marker if the Sandwyrm is burrowed, before resolving the Aftermath.
- **Tremorsense (9").**

Boss Deployment: Starts **Awake**, off-battlefield, and burrowed.

Random Monster Setup:

- **Group 1:** Roll once on the Sun-Drowned Random Monster Table. Place near a dune ridge. **Resting**.
- **Group 2:** Roll once on the Sun-Drowned Random Monster Table. Place near a Treasure Chest. **Resting**.

Party Deployment: Parties deploy on opposite battlefield edges, within **6"** of their edge.



Schematic. Grey dashed = position not fixed by the rules. Edges drawn long; text says only 'opposite edges'.

FIG-48. The Sandwyrm's Lair: parties deploy within 6" of opposite battlefield edges around a broad sand basin with a central Shifting Sands Zone where the burrowed Sandwyrm first appears; key: FIG-20 (see 10.4, Sun-Drowned Scenario 4).

Special Rules:

Looting the Hoard: After the Sandwyrm is defeated, a Hero adjacent to the Hoard of the Wastes uses **Interact [2 AP]** to loot it. The looting party immediately makes **3 Treasure rolls**, then rolls **1d2**. On a **1**, roll once on the Potions table matching the current treasure tier. On a **2**, roll once on the Special Items group matching the current treasure tier. At Tier 1, use Tier 2 Special Items; at Tier 5, use Tier 4 Special Items. In competitive play, the opposing party makes these rolls.

Escape Conditions: None in competitive play. In solo or cooperative play, allied Heroes may escape through any battlefield edge as required by the **Solo/Co-op Objective**.

Victory Conditions: The adventure ends when the Sandwyrm is defeated and the Hoard is looted, after Round 8, or when all Heroes are defeated.

- The party that loots the Hoard wins.
- If the Hoard is not looted, the party with the most total Coin Value from all other sources wins.

Tiebreaker: Most total damage dealt to the Sandwyrm.

Scenario 5: The Cursed Colossus of the Waste

A colossal statue of a priest-king rises from the sand, broken at the waist and still angry, with a Heartstone lodged in its hollow chest. Fortune-hunters call it a prize. Grave-robbers know better and come anyway, and Saltspire pays the survivors of either trade the same rate. The waste keeps the ones who do not survive.

Primary Objective: Retrieve the Heartstone of the Colossus from the Colossus's chest cavity and escape with it.

Final Random Monster Groups: Determine using **10.6.4**.

Awake Groups: Random Monster Groups begin **Resting** unless a listed setup rule says otherwise. Scenario-specific Monsters use their listed state.

Minion Swarm: Yes.

Objective Scaling: None.

Level Scaling: Use the Scenario APL for every APL-based Monster, hazard, objective, reward, and damage value in this scenario.

Solo/Co-op Objective: Retrieve and extract the Heartstone of the Colossus, then extract at least half the party through the same or another battlefield edge as defined in **10.6.10**.

Pressure Clock: Use **Swarm** from **10.5.7**.

Battlefield and Terrain (36"×36"): Place the Colossus as a large central terrain feature (**Blocking Terrain**) with legs, shoulders, and a chest cavity that combatants may **Climb**. Surround it with dunes, broken statuary, and drifted sand. Place one 1" **Glowing Rune** marker on its back.

Colossus Elevation: For rules purposes, the Colossus's legs are **1"** above ground level, the **Glowing Rune** marker is **2"** above ground level, and the shoulders and chest cavity are **3"** above ground level, regardless of the physical terrain piece used.

Objective Placement: The Heartstone begins inside the Colossus's chest cavity as a carried objective worth 10 × (2 + (4 × APL)) Coins. Place 2 Treasure Chests (**1 Treasure roll with Disadvantage** each) in the surrounding dunes or broken chambers at the statue's base.

Scenario-Specific Monster: Cursed Colossus

HP	(5 × Party Size × (5 + (1 × APL))) / 8
AV	4 + (APL/2, rounded down)
SPD	5"
LVL	APL + 3 (min 6, max 10)
CV	4 × (2 + (4 × APL)) Coins
Sz	H

AI Steps

Target Priority: Prioritize a valid enemy carrying the Heartstone. Otherwise, use the normal Monster target priorities.

1. **Falling Rubble:** If the Colossus is not **Engaged** and their **Primary Target** is more than **2"** away and within **8"**, centre an **Aura 2"** area on that target. Each combatant in the area must pass a **DEX Check** or suffer **1d8 blunt damage** and become **Prone**. Then end this activation.

Attacks

- **Crushing Fist:** 1d12 + APL blunt damage.

Special Abilities

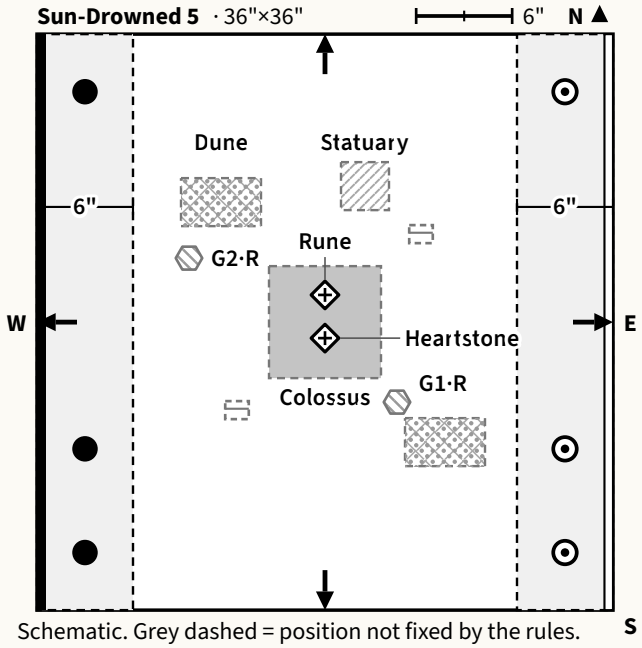
- **Construct.**
- **Siege Monster.**
- **Cursed:** This Monster is permanently **Cursed** and cannot regain HP.
- **Glowing Rune Weakness:** The Glowing Rune marker is fixed to the Colossus and moves with them. A Hero attacking the Colossus while within **1"** of the Glowing Rune marker, or from a position above the Colossus, ignores the Colossus's AV.
- **Awaken Protocol:** The Colossus is inert and treated as terrain until the Heartstone is picked up for the first time or the Colossus has suffered 15 or more total damage. While inert, they are also a visible scenario object: attacks and damaging effects may target them, use their printed **AV**, and they automatically fail any Check they are required to make. Apply HP damage normally and count it toward the 15-damage threshold. They then animate immediately, become **Awake**, and are hostile to all. When the Colossus animates, every Hero on the Colossus is placed at the nearest legal ground-level space and resolves **Falling** (**4.4.10**) using their current height. While the Colossus is animated, a Hero may **Climb** them, and reach the chest cavity, only while the Colossus is **Prone**, **Immobilized**, or **Stunned**.

Boss Deployment: Starts inert and treated as terrain under **Awaken Protocol**.

Random Monster Setup:

- **Group 1:** Roll once on the Sun-Drowned Random Monster Table. Place near the statue's base. **Resting**.
- **Group 2:** Roll once on the Sun-Drowned Random Monster Table. Place on an outer dune approach. **Resting**.

Party Deployment: Parties deploy on opposite battlefield edges, within **6"** of their edge.



Schematic. Grey dashed = position not fixed by the rules. Edges drawn long; text says only 'opposite edges'.

FIG-49. The Cursed Colossus of the Waste: parties deploy within 6" of opposite battlefield edges around a large central Colossus of Blocking Terrain bearing the Glowing Rune and holding the Heartstone; key: FIG-20 (see 10.4, Sun-Drowned Scenario 5).

Special Rules:

Scenario Minions: This scenario uses the **Minion Swarm** rules in **10.6.8**.

Retrieving the Heartstone: A Hero adjacent to the chest cavity uses **Interact [2 AP]** to take the Heartstone.

Curse of Binding: After the Heartstone has been picked up for the first time, and until it is escaped with, at the start of each Monster Phase the party that lost the Setup Roll-off rolls **1d2**. Place that many **Skeleton Warriors**, using the canonical bestiary entry, within **3"** of a randomly determined Hero. They are hostile to all. No more than **6 Skeleton Warriors** placed by this rule may be on the battlefield at the same time, and this rule can place no more than **8 Skeleton Warriors** during the adventure.

Escape Conditions: The Hero carrying the Heartstone must escape via any battlefield edge.

Victory Conditions: The adventure ends when the Heartstone is escaped with, after Round 8, or when all Heroes are defeated.

- The party that escapes with the Heartstone wins and gains the Heartstone's Coin Value.
- If no party escapes with the Heartstone, the party with the most total Coin Value wins.

Tiebreaker: Most total damage dealt to the Colossus.

Scenario 6: The Cinder Lord's Obsidian Prison

An obsidian dais burns without fuel at the centre of the ruin, and a Cinder Lord strains against the binding that holds it. Saltspire's Well-Keepers wrote bindings like this one, back when the desert still kept its own law, and one of them wants the prison strengthened before it fails. A rival patron wants it broken and calls that ambition. The Cinder Lord calls it overdue.

Role Assignment: Randomly determine which party is **Jailers** (Party A); the other party is **Liberators** (Party B). Roll **1d2**: on a **1**, the Setup Roll-off winner is Party A; on a **2**, the Setup Roll-off loser is Party A.

Primary Objective:

- **Jailers (Party A):** Reinforce every intact Glyphic Stone and maintain a majority of the placed Stones intact through the end of a round beginning with Round 4.
- **Liberators (Party B):** Shatter a majority of the placed Glyphic Stones and receive the Cinder Lord's Boon.

Final Random Monster Groups: Determine using **10.6.4**.

Awake Groups: Random Monster Groups begin **Resting** unless a listed setup rule says otherwise. Scenario-specific Monsters use their listed state.

Minion Swarm: No.

Objective Scaling: Apply **10.6.9** to the Glyphic Stones. A majority is more than half the number placed.

Level Scaling: Use the Scenario APL for every APL-based Monster, hazard, objective, reward, and damage value in this scenario.

Solo/Co-op Objective: Use the **Liberators** objective. Shatter a majority of the Glyphic Stones placed after scaling, receive the Cinder Lord's Boon, then extract at least half the party through any battlefield edge as defined in **10.6.10**. The **Jailers** objective is not used.

Pressure Clock: Use **Ritual** from **10.5.7**.

Battlefield and Terrain (36"×36"): Place a central Obsidian Dais (**Impassable Terrain**) with 3 Glyphic Stones (**Impassable Terrain**) arranged evenly around it. Surround the dais with scorched flagstones, broken columns, and zones of heated ground (**Difficult Terrain**).

Objective Placement: The Glyphic Stones placed after scaling are the primary objectives. Place 2 Treasure Chests (**1 Treasure roll** each) near the battlefield edges.

Scenario-Specific Monster: Bound Cinder Lord

HP	(5 × Party Size × (6 + (1 × APL))) / 8
AV	3 + (APL/2, rounded down)
SPD	7" (Fly 10")
LVL	APL + 4 (min 7, max 10)
CV	3 × (2 + (4 × APL)) Coins if defeated
Sz	L

AI Steps

1. **Cinder Wall [Recharge 4–6]:** If this ability is available and two or more enemies are within **8"**, create a **6"** straight line of fire placed to include as many enemies as possible, using the Area of Effect priorities in **9.5** to resolve ties. That line blocks movement and deals **1d8 fire damage** to a combatant that enters or crosses it for the first time each round. The wall lasts until the end of the round. Then end this activation.
2. **Cinder Volley:** If **Cinder Haste** did not trigger this activation, the Cinder Lord is not **Engaged**, and at least one visible enemy is within **10"**, make three ranged fire attacks, **Ranged 10"**, using the normal Monster target priorities. Each attack deals **1d6 + 1 fire damage**. Then end this activation.

Attacks

- **Scimitar of Cinders:** 1d10 + APL/2 slashing damage + 1d6 fire damage.

Special Abilities

- **Immune:** fire.
- **Vulnerable:** ice.
- **Cinder Haste:** At the start of their activation, if they are at half HP or less and not already affected by this ability, their next attack before the end of their next activation rolls one additional base damage die.
- **Multi-Attack:** Makes two **Scimitar of Cinders** attacks during their attack step.
- **Wish:** See **Cinder Lord's Release** in Special Rules.

Boss Deployment: The Cinder Lord is not placed at setup. They appear only if the prison is broken. Two Flame Mephits start Awake guarding the Dais.

- *Flame Mephit [Minion]:* HP 8 | AV 1 | SPD 5" (Fly 6") | Sz S | LVL 2 | CV 2c. **Attacks:** Cinder Claws, 1d6 fire damage. **Special Abilities: Small**; **Immune:** fire; **Vulnerable:** ice; **Death Burst:** when this Monster is defeated, each combatant within 1" suffers 1d4 fire damage.

Random Monster Setup:

- **Group 1:** Roll once on the Sun-Drowned Random Monster Table. Place near one Chest. **Resting**.
- **Group 2:** Roll once on the Sun-Drowned Random Monster Table. Place on an outer approach. **Resting**.

Party Deployment: Parties deploy on opposite short battlefield edges, within **6"** of their edge.

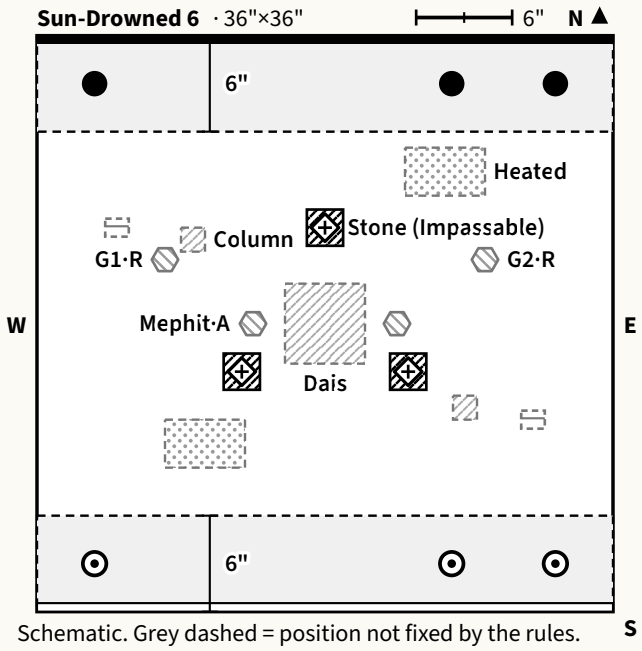


FIG-50. The Cinder Lord's Obsidian Prison: parties deploy within 6" of opposite short edges around a central Obsidian Dais with three Glyphic Stones evenly arranged around it; key: FIG-20 (see 10.4, Sun-Drowned Scenario 6).

Special Rules:

Glyphic Stones: Each Glyphic Stone has HP 10 + (2 × APL) and AV 2.

Reinforce (Party A): A Hero adjacent to an intact, unreinforced Glyphic Stone uses **Interact [2 AP]** and makes a **SPI Check**. On a success, mark that Stone **Reinforced**. It gains **+5 Max HP** and immediately regains **5 HP**, up to its new maximum. A Stone can be Reinforced only once.

Maintain a Reinforced Stone (Party A): A Hero adjacent to a damaged Reinforced Stone uses **Interact [1 AP]** to restore **3 HP**, up to its maximum.

Shatter (Party B): A Hero may attack a Glyphic Stone normally. A Stone reduced to 0 HP is shattered and removed from play.

Cinder Lord's Release: When a majority of the Glyphic Stones placed after scaling have been shattered, place the Cinder Lord **Awake** at the centre of the Dais. Until the end of the round after their release, the Cinder Lord cannot attack. At the start of their next activation, if no Party B Hero has attacked them, they grant Party B one **Cinder Lord's Boon** token, carried by a Party B Hero of that party's choice (once during a future adventure, before making any one d20 roll, the bearer may spend the token to treat the roll as a natural **20** for that roll's purpose, including any **Critical Success** or **Critical Cast** effect that roll triggers). In competitive play, the adventure then ends. In solo or cooperative play, continue the adventure until the allied party satisfies its extraction requirement or another ending condition occurs. If a Party B Hero attacks the Cinder Lord before the Boon is granted, the Cinder Lord becomes hostile to all and the Boon is forfeited. If a combatant from any other side attacks the Cinder Lord before the Boon is granted, the Cinder Lord becomes hostile to every combatant that is not a Party B Hero and still grants the Boon at the start of their next activation if they are alive.

Dais Energy: A Hero that ends an activation on the Dais suffers **1d4 fire damage** unless they are **Resistant** or **Immune** to fire damage.

Escape Conditions: None in competitive play. In solo or cooperative play, allied Heroes may escape through any battlefield edge as required by the **Solo/Co-op Objective**.

Victory Conditions: Beginning at the end of Round 4, Party A wins if every intact Glyphic Stone is Reinforced and a majority of the Stones placed after scaling remain intact. The

adventure also ends when Party B receives the Cinder Lord's Boon, after Round 8, or when all Heroes are defeated.

- **Party A wins** if it completes the active Jailer objective. Gain **8 × (2 + (4 × APL)) Coins**.
- **Party B wins** if it shatters a majority of the placed Stones and receives the Cinder Lord's Boon. Gain **8 × (2 + (4 × APL)) Coins** in addition to the Boon.
- If the Cinder Lord becomes hostile and is then defeated, the party that dealt the killing blow gains the Cinder Lord's CV. This does not replace the primary objective.
- If neither party completes its primary objective, the party with the most total Coin Value wins.

Tiebreaker: Most Monster CV collected.

Climate 6: The Mire Scenarios

Scenario 1: The Reliquary of Edrava Salttide [Intro]

Recent floods opened a grave-house that The Mire had kept sealed for two hundred years. Edrava Salttide, the salt-coast's last great toll-lord, who fed their enemies to the tide and married four pirate-kings in succession, was laid here with a reliquary no Bastion will admit to wanting and every Bastion has quietly sent parties to find. Reedmarch knew where it lay all along and sold the location twice. Both parties enter before the dead gather the strength to close the door again. The water smells of salt. There is no ocean for eighty miles.

Primary Objective: Be the first party to retrieve the Reliquary of Edrava Salttide and escape with it.

Final Random Monster Groups: Determine using **10.6.4**.

Awake Groups: Random Monster Groups begin **Resting** unless a listed setup rule says otherwise. Scenario-specific Monsters use their listed state.

Minion Swarm: No.

Objective Scaling: None.

Level Scaling: Use the Scenario APL for every APL-based Monster, hazard, objective, reward, and damage value in this scenario.

Solo/Co-op Objective: Retrieve and extract the Reliquary of Edrava Salttide, then extract at least half the party through any battlefield edge as defined in **10.6.10**.

Pressure Clock: Use **Swarm** from **10.5.7**.

Battlefield and Terrain (36"×36"): Place a central Sunken Barrow mound (**Impassable Terrain**) with a flooded interior sanctum. Surround it with Bog Islands, Dense Reeds, and areas of **Shallow Water**.

Objective Placement: Place the Reliquary on a pedestal inside the Sanctum. It is a carried objective worth 8 × (2 + (4 × APL)) Coins; while carrying it, a Hero has **Disadvantage** on **SPI Checks** made to resist effects that cause **Frightened**. Place 3 Treasure Chests (**1 Treasure roll with Disadvantage** each) on outer islands or in reeds.

Scenario-Specific Monster: Salttide's Shade

Edrava Salttide has not finished counting. The Mire preserved them, and it is patient. The Shade does not speak. It watches the reliquary. It watches the water. It watches every hand that reaches for what belongs to it.

HP	(5 × Party Size × (4 + (1 × APL))) / 8
AV	1 + (APL/4, rounded down)
SPD	Fly 6"
LVL	APL + 1 (min 4, max 7)
CV	2 × (2 + (4 × APL)) Coins
Sz	M

AI Steps

Target Priority: Prioritize a valid enemy carrying the Reliquary of Edrava Salttide. Otherwise, use the normal Monster target priorities.

Attacks

- **Spectral Claw:** 1d8 + APL/2 necrotic damage. If this attack damages the target, the target must pass a **SPI Check** or become **Frightened**.

Special Abilities

- **Incorporeal.**
- **Undead.**
- **Curse of The Mire:** At the start of the Shade's activation, the nearest enemy within **8"** must pass a **STR Check** or become **Immobilized**.
- **Bound to Reliquary:** The Shade cannot willingly move more than 10" from the Reliquary, or from the Hero carrying it.

Boss Deployment: The Shade is not placed at setup. When any Hero first attempts to take the Reliquary, place the Shade adjacent to the Reliquary. The Shade is **Awake** when placed.

Additional Combatants: Roll 1d2 for Giant Leech Swarms. Place one such swarm Awake in the Barrow water at setup. If the result is 2, place the second swarm Resting in adjacent floodwater outside the Sanctum.

- *Giant Leech Swarm [Minion]:* HP 10 | AV 0 | SPD 3" (Swim 5") | Sz M | LVL 2 | CV 2c. **Attacks:** Draining Bite, 1d4 piercing damage; if this attack damages a target, that target suffers **Bleeding**. **Special Abilities: Amphibious**; **Resistant:** blunt, piercing, and slashing.

Random Monster Setup:

- **Group 1:** Roll once on The Mire Random Monster Table. Place on a Bog Island near one Chest. **Resting**.
- **Group 2:** Roll once on The Mire Random Monster Table. Place patrolling murky water. **Resting**. They become Awake if a Hero enters that water area.

Party Deployment: Parties deploy on opposite short battlefield edges on the driest banks, within **6"** of their edge.

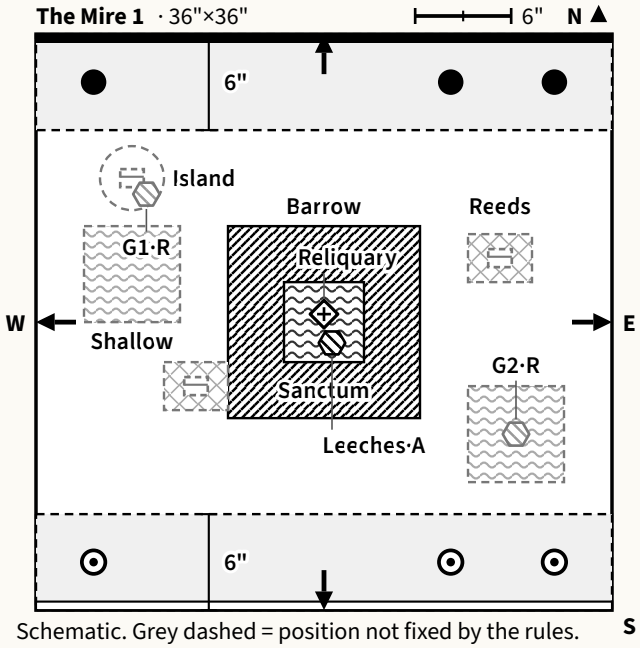

FIG-51. The Reliquary of Edrava Salttide: parties deploy within 6" of opposite short edges on the driest banks around a central Sunken Barrow whose flooded sanctum holds the Reliquary; key: FIG-20 (see 10.4, The Mire Scenario 1).

Special Rules:

Murky Water: Within the Sunken Barrow mound, **LOS** through water is limited to **1"**.

Claiming the Reliquary: A Hero adjacent to the Reliquary uses **Interact [2 AP]** and makes a **SPI Check**. On a failure, that Hero suffers **1d6 psychic damage**, and the attempt fails. The action may be reattempted on a later activation. On a success, the Hero takes the Reliquary as a carried objective.

Escape Conditions: The Hero carrying the Reliquary must escape via any battlefield edge.

Victory Conditions: The adventure ends when the Reliquary is escaped with, after Round 8, or when all Heroes are defeated. The party that escapes with the Reliquary wins. If no party escapes with it, the party with the most total Coin Value wins.

Tiebreaker: Most Monster CV collected.

Scenario 2: The Lizardfolk's Stolen Offerings

A lizardfolk shrine in the deep fen was raided before dawn, and the Sunstone Amulet and the offering-piles were dragged off into the reeds. The lizardfolk temple-guards want it back, and they remember faces. One writ names the amulet sacred and to be returned. Another names the silver recoverable property, and Reedmarch will broker either errand for its usual cut of silence.

Role Assignment: Randomly determine which party is **Priests' Agents** (Party A); the other party is **Treasure Hunters** (Party B). Roll **1d2**: on a **1**, the Setup Roll-off winner is Party A; on a **2**, the Setup Roll-off loser is Party A.

Primary Objective:

- **Priests' Agents (Party A):** Retrieve the Sunstone Amulet and escape with it.
- **Treasure Hunters (Party B):** Escape with more total Coin Value from the Offering Piles than Party A.

Final Random Monster Groups: Determine using **10.6.4**.

Awake Groups: Random Monster Groups begin **Resting** unless a listed setup rule says otherwise. Scenario-specific Monsters use their listed state.

Minion Swarm: No.

Objective Scaling: Apply **10.6.9** to the Offering Piles.

Level Scaling: Use the Scenario APL for every APL-based Monster, hazard, objective, reward, and damage value in this scenario.

Solo/Co-op Objective: Retrieve the Sunstone Amulet and the contents of at least half of the Offering Piles placed after scaling, rounded up, then extract those objectives and at least half the party as defined in **10.6.10**.

Pressure Clock: Use **Swarm** from **10.5.7**.

Battlefield and Terrain (36"×36"): Create a swamp encampment on raised ground with rope walkways, reed screens, and pools of **Shallow Water** around it.

Objective Placement: Place 3 Offering Pile markers. Parties alternate placing the Piles in the encampment, starting with the party that lost the Setup Roll-off. Prepare one **Sunstone** marker and enough **Coin** markers for the remaining Piles. Shuffle those markers face down out of both parties' sight, then randomly assign one beneath each Pile. Neither party may inspect the markers before the Piles are looted. Reveal a Pile's contents only when it is looted.

- The **Sunstone Pile** contains the Sunstone Amulet (carried objective, worth 8 × (2 + (4 × APL)) Coins to Party A or 4 × (2 + (4 × APL)) Coins to Party B) plus **1 Treasure roll with Disadvantage**.
- Each **Coin Pile** yields **1 Treasure roll**.

Scenario-Specific Monster: Lizardfolk Scale-Shaman

HP	(5 × Party Size × (3 + (1 × APL))) / 8
AV	2 + (APL/4, rounded down)
SPD	6" (Swim 6")
LVL	APL + 1 (min 3, max 6)
CV	(2 + (4 × APL)) Coins
Sz	M

AI Steps

1. **Swamp Gas Orb:** If one or more enemies can be included in a legal **Aura 2"** area placed within **8"**, place the area using the Area of Effect priorities in **9.5**. Each enemy in the area must pass a **DEX Check** or become **Poisoned [d4]**. Then end this activation.

Attacks

- **Barbed Spear: Reach**, 1d8 + APL/2 piercing damage.

Special Abilities

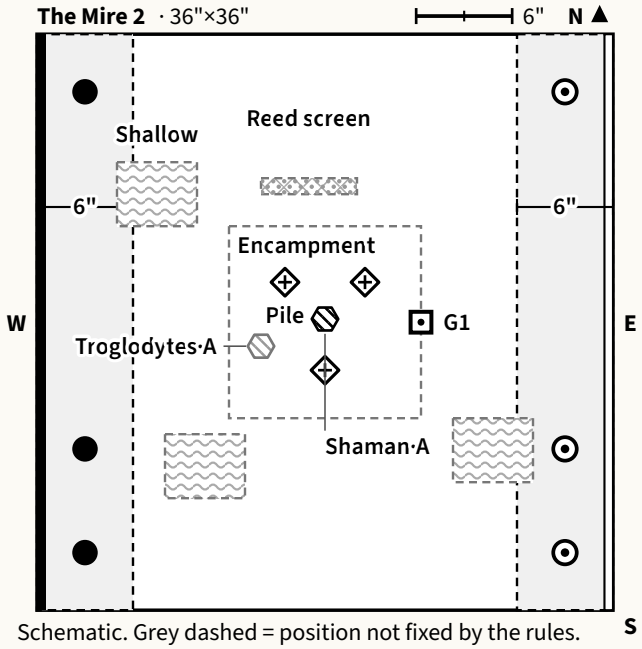
- **Amphibious.**
- **Command:** Allied **Lizardfolk** within **6"** deal an additional **1 damage of that attack's primary damage type**.
- **Ritual Chant:** At the start of their activation, allied **Monsters** within **8"** gain **Advantage** on **Checks** to resist Powers and magical item effects until the end of the round.

Boss Deployment: Starts **Awake** in the encampment, accompanied by Troglodytes equal to **2 + APL/2**, maximum 6, all **Awake**.

Random Monster Setup:

- **Group 1:** Roll once on The Mire Random Monster Table. Place a numbered reeds marker at the encampment edge. The Monster Group is not on the battlefield until the encampment is attacked; then place the group at that marker. It becomes **Awake** at the start of the next Monster Phase.

Party Deployment: Parties deploy on opposite battlefield edges, within **6"** of their edge.



Schematic. Grey dashed = position not fixed by the rules. Edges drawn long; text says only 'opposite edges'.
? Escape edge not stated (see text)

FIG-52. The Lizardfolk's Stolen Offerings: parties deploy within 6" of opposite battlefield edges around a swamp encampment where three Offering Piles are placed alternately; key: FIG-20 (see 10.4, The Mire Scenario 2).

Special Rules:

At Home in the Water: A Monster with a **Swim** speed that ends their activation in **Shallow Water** while not **Engaged** becomes **Hidden**. They do not lose **Hidden** for lacking **Cover** while they remain in **Shallow Water**.

Looting an Offering Pile: A Hero adjacent to an Offering Pile uses **Interact [1 AP]** to loot it and immediately reveal its contents. The Hero takes those contents as carried loot. Coins and the Sunstone Amulet are not banked until the Hero escapes.

Escape Conditions: Required for the Sunstone Amulet and for any unbanked rewards from Offering Piles.

Victory Conditions: The adventure ends at the end of Round 7, when every Offering Pile placed after scaling has been looted and all surviving Heroes from at least one party have escaped, or when all Heroes are defeated.

- **Party A wins** if it escapes with the Sunstone Amulet.
- **Party B wins** if Party A does not escape with the Sunstone Amulet and Party B escapes with more total Coin Value from the Offering Piles than Party A.
- If Party A does not escape with the Sunstone Amulet and Party B does not escape with more Offering Pile Coin Value than Party A, the party with the most total escaped Coin Value wins.

Tiebreaker: Most Monster CV collected.

Scenario 3: The Mire Titan's Fen

A Mire Titan has claimed the bubbling fen, and glimmering geodes lie scattered through its territory like bait, because that is more or less what they are. Hunters arrive with hooks, ropes, and prayers. Thieves arrive lighter and usually leave that way. Reedmarch wants the geodes and does not much care which trade brings them in, so long as the fen stays quiet about the rest.

Role Assignment: Before deployment, both parties secretly choose **The Hunt** or **The Heist**, then reveal.

Primary Objective:

- **The Hunt:** Defeat the Mire Titan.
- **The Heist:** Escape with at least half of the Glimmering Geodes placed after scaling, rounded up.

Final Random Monster Groups: Determine using **10.6.4**.

Awake Groups: Random Monster Groups begin **Resting** unless a listed setup rule says otherwise. Scenario-specific Monsters use their listed state.

Minion Swarm: No.

Objective Scaling: Apply **10.6.9** to the Glimmering Geodes. The Heist requires extraction of half the placed Geodes, rounded up.

Level Scaling: Use the Scenario APL for every APL-based Monster, hazard, objective, reward, and damage value in this scenario.

Solo/Co-op Objective: Use **The Hunt** objective. Defeat the Mire Titan, then extract at least half the party through any battlefield edge as defined in **10.6.10**. **The Heist** objective is not used.

Pressure Clock: Use **Swarm** from **10.5.7**.

Battlefield and Terrain (36"×36"): Create a central Bubbling Fen of deep mud and shallow pools, ringed by muddy banks and Razor Reeds. Place several small islands or raised hummocks within the fen.

Objective Placement: Place 3 Glimmering Geode markers in or near the Fen. Each is worth 3 × (2 + (4 × APL)) Coins when escaped with.

Scenario-Specific Monster: Mire Titan

HP	(5 × Party Size × (5 + (1 × APL))) / 8
AV	2 + (APL/2, rounded down)
SPD	5" (Swim 7")
LVL	APL + 3 (min 6, max 9)
CV	4 × (2 + (4 × APL)) Coins
Sz	H

AI Steps

Target Priority: Prioritize a valid enemy carrying a Glimmering Geode, then a valid enemy in the Fen. Otherwise, use the normal Monster target priorities.

Attacks

- **Bite:** 1d12 + APL piercing damage.
- **Tentacle Slam: Reach**, 1d8 + APL/2 blunt damage.

Special Abilities

- **Amphibious.**
- **Standing Leap (5").**
- **Multi-Attack:** Makes one **Bite** attack and two **Tentacle Slam** attacks during their attack step.
- **Sticky Tongue:** At the start of the Mire Titan's activation, the nearest enemy within **4"** must pass a **DEX Check** or be **Pulled** up to **4"** directly toward the Mire Titan, stopping when adjacent, and become **Immobilized** until they spend **1 AP** and succeed on a **STR Check** or **DEX Check** to escape.
- **Swallow Whole:** If the Mire Titan's **Bite** reduces an **Immobilized** target to **0 HP**, that target is swallowed. A swallowed Hero immediately makes a normal Injuries Roll; any other swallowed target is removed from play normally.
- **Shocking Bile [Reaction]:** When a melee attack deals more than **10 damage** to this Monster after mitigation, the attacker suffers **1d8 lightning damage**.

Boss Deployment: Starts **Awake** in the Fen.

Random Monster Setup:

- **Group 1:** Roll once on The Mire Random Monster Table. Place a numbered Razor Reeds marker near one Geode. The Monster Group is not on the battlefield until a Hero enters or uses **Interact** within **6"** of that marker; then place the group at that marker, **Resting**.
- **Group 2:** Roll once on The Mire Random Monster Table. Place on a muddy bank overlooking the Fen. **Resting**.

Party Deployment: Parties deploy in opposite corner zones on the outer banks.

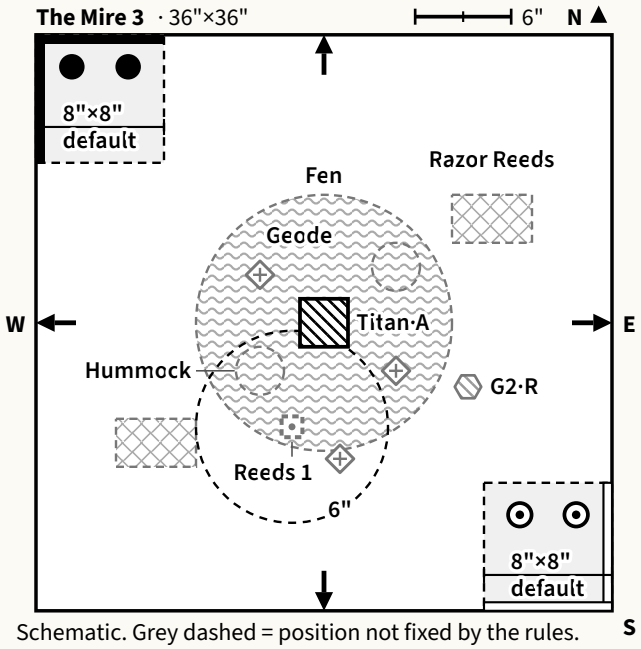


FIG-53. The Mire Titan's Fen: parties deploy in opposite corner zones on the outer banks (8"×8" by the 10.1 default), around a central Bubbling Fen where the Mire Titan starts Awake; key: FIG-20 (see 10.4, The Mire Scenario 3).

Special Rules:

Looting Geodes: A Hero adjacent to a Glimmering Geode uses **Interact [1 AP]** to take it as a carried objective.

Escape Conditions: Required only for **The Heist**. Heroes carrying Geodes must escape via any battlefield edge.

Victory Conditions: The adventure ends when the Mire Titan is defeated, when a party escapes with at least half of the Geodes placed after scaling, rounded up, after Round 8, or when all Heroes are defeated.

- A party pursuing **The Hunt** wins if one of its Heroes deals the killing blow to the Mire Titan.
- A party pursuing **The Heist** wins if it escapes with at least half of the Geodes placed after scaling, rounded up.
- If neither party achieves its declared objective, the party with the most total Coin Value wins.

Tiebreaker: Most total damage dealt to the Mire Titan.

Scenario 4: The Blighted Heartwood

Blight has wrapped the swamp growth around a pulsing Heartwood that beats under the bark like a buried organ. One patron wants it destroyed before the rot spreads to the ferry-roads Reedmarch lives on. Another wants its corruption bottled and carried off, and neither wants to be the one holding it on the way home. The Marsh Council would prefer the whole matter stay unspoken.

Role Assignment: Randomly determine which party is **Cleansers** (Party A); the other party is **Corruptors** (Party B). Roll **1d2**: on a **1**, the Setup Roll-off winner is Party A; on a **2**, the Setup Roll-off loser is Party A.

Primary Objective:

- **Cleansers (Party A):** Destroy the Blighted Heartwood.
- **Corruptors (Party B):** Complete 3 Syphon Steps before the Heartwood is destroyed.

Final Random Monster Groups: Determine using **10.6.4**.

Awake Groups: Random Monster Groups begin **Resting** unless a listed setup rule says otherwise. Scenario-specific Monsters use their listed state.

Minion Swarm: No.

Objective Scaling: None.

Level Scaling: Use the Scenario APL for every APL-based Monster, hazard, objective, reward, and damage value in this scenario.

Solo/Co-op Objective: Use the **Cleansers** objective. Destroy the Blighted Heartwood, then extract at least half the party through any battlefield edge as defined in **10.6.10**. The **Corruptors** objective is not used.

Pressure Clock: Use **Ritual** from **10.5.7**.

Battlefield and Terrain (36"×36"): Create a central Blighted Grove (about 8"×8") with the Heartwood at its centre. Fill the Grove with Thorny Vines (**Cover Terrain** tagged **Difficult Terrain**, **Dangerous Terrain**, and **Natural**) that deal **1 piercing damage** when entered. Surround it with **Shallow Water**, Twisted Mangroves, and Corrupted Muck.

Objective Placement: The Heartwood has HP **20 + (10 × APL)** and AV **2 + (APL/3, rounded down)**. It is **Vulnerable:** fire and **holy**, and **Resistant** to **necrotic** and **poison**. Place 2 Treasure Chests (**1 Treasure roll with Disadvantage** each) in Corrupted Muck areas.

Scenario-Specific Monster: Blighted Treant Guardian

HP	(5 × Party Size × (5 + (1 × APL))) / 8
AV	3 + (APL/4, rounded down)
SPD	4"
LVL	APL + 2 (min 5, max 8)
CV	4 × (2 + (4 × APL)) Coins
Sz	H

AI Steps

Target Priority: Prioritize valid Heroes damaging or Interacting with the Heartwood. Otherwise, use the normal Monster target priorities.

1. **Corrupting Spores [Recharge 5–6]:** If one or more enemies can be included in a legal **Aura 3"** area placed within **8"**, place the area using the Area of Effect priorities in **9.5**. Each enemy in the area must pass a **DEX Check** or suffer **1d6 + APL poison damage** and be unable to regain HP until the end of the round. Then end this activation.

Attacks

- **Blighted Slam:** 1d8 + APL/2 blunt damage + 1d4 necrotic damage. If this attack damages the target, the target must pass a **STR Check** or become **Weakened**.

Special Abilities

- **Plant.**
- **Vulnerable:** fire.
- **Multi-Attack:** Makes two **Blighted Slam** attacks during their attack step.
- **Aura of Blight (2"):** Living combatants within the Aura suffer **1d4 necrotic damage** at the end of their activation.

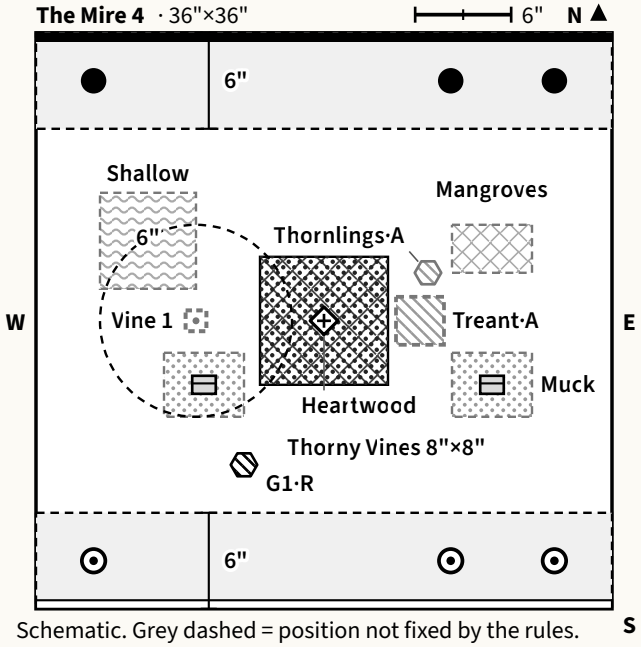
Boss Deployment: Starts **Awake** near the Heartwood, accompanied by 2 Thornling Sprout groups of **1d2 Thornling Sprouts** each. One group starts **Awake**. Place a numbered vine marker for the other group; that group is not on the battlefield until a Hero enters or uses **Interact** within **6"** of that marker, then place it at the marker.

- *Thornling Sprout [Minion]:* HP 1 | AV 0 | SPD 5" | Sz S | LVL 1 | CV 0. **Attacks:** Claw, 1d4 slashing damage. **Special Abilities: Small**; **Plant**.

Random Monster Setup:

- **Group 1:** Roll once on The Mire Random Monster Table. Place near one Chest. **Resting**.

Party Deployment: Parties deploy on opposite short battlefield edges, within **6"** of their edge.



Schematic. Grey dashed = position not fixed by the rules. Thorny Vines: Cover, Difficult, Dangerous (1 piercing damage when entered).

FIG-54. The Blighted Heartwood: parties deploy within 6" of opposite short edges around a central Blighted Grove about 8"×8" of Thorny Vines with the Heartwood at its centre; key: FIG-20 (see 10.4, The Mire Scenario 4).

Special Rules:

Corrupted Muck: A Hero that enters or ends an activation in Corrupted Muck makes a **STR Check**. **Failure:** The Hero becomes **Poisoned [d4]**.

Destroying the Heartwood (Party A): The Heartwood is attacked normally. If it is destroyed, Party A immediately gains 8 × (2 + (4 × APL)) Coins.

Syphoning the Heartwood (Party B): A Party B Hero adjacent to the Heartwood uses **Interact [3 AP]** and makes an **INT Check**. On a success, Party B gains **1 Syphon Step**, and the Heartwood regains **1d6 + APL/2 HP**, rounded down, up to its maximum. When Party B reaches **3 Syphon Steps**, Party B gains **8 × (2 + (4 × APL)) Coins** and the **Dark Favour** campaign reward: once during that party's next adventure, when one of its Heroes fails any **Check**, that party may reroll the **Check**; the new result must be used.

Escape Conditions: None in competitive play. In solo or cooperative play, allied Heroes may escape through any battlefield edge as required by the **Solo/Co-op Objective**.

Victory Conditions: The adventure ends when the Heartwood is destroyed, when Party B completes 3 Syphon Steps, after Round 8, or when all Heroes are defeated.

- **Party A wins** if the Heartwood is destroyed before Party B completes 3 Syphon Steps.
- **Party B wins** if it completes 3 Syphon Steps before the Heartwood is destroyed.
- If neither party completes its primary objective, the party with the most total Coin Value wins.

Tiebreaker: Most total damage dealt to the Heartwood.

Scenario 5: Salttide's Reckoning

A curse lies over the sacred island like oil on water. Edrava Salttide has made a ritual of the place, the same ritual they once used to curse the harbours that refused their ships, now turned on the living who entered The Mire without paying the toll. The reeds bend toward the island. The water smells of brine, this far from any sea. Reedmarch sent one party to break the working, and let a rival sell the other a contract whose small print it has not read.

Role Assignment: Randomly determine which party is **Cursebreakers** (Party A); the other party is **Power Usurpers** (Party B). Roll **1d2**: on a **1**, the Setup Roll-off winner is Party A; on a **2**, the Setup Roll-off loser is Party A.

Primary Objective:

- **Cursebreakers (Party A):** Destroy a majority of the Cursed Effigies placed after scaling.
- **Power Usurpers (Party B):** Complete the Curse Ritual with Salttide's Pact in force.

Final Random Monster Groups: Determine using **10.6.4**.

Awake Groups: Random Monster Groups begin **Resting** unless a listed setup rule says otherwise. Scenario-specific Monsters use their listed state.

Minion Swarm: Yes.

Objective Scaling: Apply **10.6.9** to the Cursed Effigies. A majority is more than half the number placed.

Level Scaling: Use the Scenario APL for every APL-based Monster, hazard, objective, reward, and damage value in this scenario.

Solo/Co-op Objective: Use the **Cursebreakers** objective. Destroy a majority of the Cursed Effigies placed after scaling, then extract at least half the party through any battlefield edge as defined in **10.6.10**. The **Power Usurpers** objective is not used.

Pressure Clock: Use **Swarm** from **10.5.7**.

Battlefield and Terrain (36"×36"): Place a central Ritual Island surrounded by murky **Shallow Water**, muddy islets, and dense reeds. Place Edrava Salttide and 3 Cursed Effigy markers on the island.

Objective Placement: Each Cursed Effigy has HP **12 + (2 × APL)** and AV **1 + (APL/4, rounded down)**. Place 2 Treasure Chests (**1 Treasure roll with Disadvantage** each) on muddy islands. The **Salttide's Counting Stone** drops in Salttide's space when they are defeated and is worth 10 × (2 + (4 × APL)) Coins.

Scenario-Specific Monster: Edrava Salttide

HP	(5 × Party Size × (5 + (1 × APL))) / 8
AV	2 + (APL/3, rounded down)
SPD	5"
LVL	APL + 3 (min 6, max 10)
CV	2 × (2 + (4 × APL)) Coins
Sz	M

AI Steps

Target Priority: While **Salttide's Pact** is in force, Party B combatants are not valid targets. Use the normal Monster target priorities among Party A combatants. Otherwise, use the normal Monster target priorities.

1. **Powercasting:** If a legal **4"×4"** cloud area can include two or more enemies and no cloud created by Salttide is active, place the cloud to include as many enemies as possible, using the Area of Effect priorities in **9.5**; it blocks **LOS** until the end of the round. Otherwise, if the nearest visible enemy is within **8"**, centre an **Aura 2"** area of grasping roots on that enemy; it is **Difficult Terrain** until the end of the round, and each enemy in it must pass a **STR Check** or become **Immobilized**. After either area resolves, end this activation. If neither area is valid, this AI Step is not valid.

Attacks

- **Staff of Mires:** 1d8 + APL/2 blunt damage; on a **Critical Hit**, the target becomes **Poisoned [d4]**.
- **Curse Bolt:** 1d8 + APL/2 necrotic damage, **Ranged 10"**. If this attack damages the target, the target makes a **SPI Check** or becomes **Weakened**.

Special Abilities

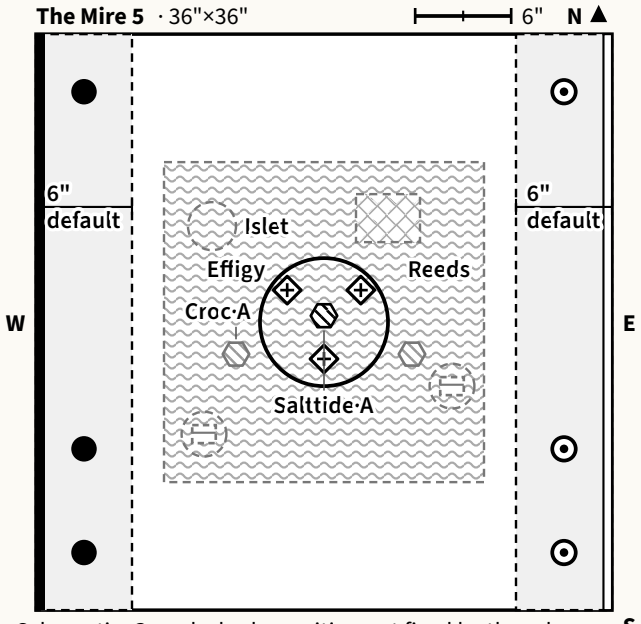
- **Undead.**
- **Summon Bog Minions [Recharge 5–6]:** At the start of their activation, if they are at half HP or less, or if any Effigy has been destroyed, place **1d2 Boglings** or **1d2 Troglodytes** within **3"**, using the canonical bestiary entries. Roll **1d2** to determine the type. The placed combatants are **Awake** and hostile. No more than **6 Minions** placed by this ability may be on the battlefield at the same time, and this ability can place no more than **8 Minions** during the adventure.
- **Aura of Misfortune (3"):** An enemy within the Aura that rolls **18+** on a d20 must reroll and use the lower result.

Boss Deployment: Starts **Awake** on the Ritual Island. Two Crocodiles start Awake in adjacent water.

Random Monster Setup:

- **Group 1:** Roll once on The Mire Random Monster Table. This group begins off-battlefield and enters from a water edge at the start of Round 3. Awake when it arrives.

Party Deployment: Parties deploy on opposite long battlefield edges along the outer banks.



Schematic. Grey dashed = position not fixed by the rules.
? Group 1 arrival: the "water edge" is not defined (see text)
? Escape edge not stated (see text)

FIG-55. Salttide's Reckoning: parties deploy along the outer banks within 6" of opposite long edges (6" is the 10.1 default) around a central Ritual Island holding Edrava Salttide and three Cursed Effigies; key: FIG-20 (see 10.4, The Mire Scenario 5).

Special Rules:

Scenario Minions: This scenario uses the **Minion Swarm** rules in **10.6.8**.

Curse Ritual: The ritual completes at the end of Round 7 if Edrava Salttide is alive and a majority of the Cursed Effigies placed after scaling remain intact.

Cursed Effigies: At the start of each round, every Hero within **6"** of an intact Cursed Effigy becomes **Cursed**. Each time a Cursed Effigy is destroyed, Salttide permanently suffers -1 AV.

Salttide's Pact (Party B): If Party B has not dealt damage to Salttide for 2 consecutive full rounds, a Party B Hero adjacent to Salttide may use **Interact [2 AP]** and make a **SPI Check**. On a success, **Salttide's Pact** is in force for the rest of the adventure. Party B may still target Salttide. If Party B later damages Salttide, the Pact ends and Salttide becomes hostile to all.

Claiming the Salttide's Counting Stone: A Hero adjacent to the defeated Salttide's space uses **Interact [1 AP]** to pick up the Salttide's Counting Stone.

Escape Conditions: Required only if a party is carrying the Salttide's Counting Stone.

Victory Conditions: The adventure ends when Party A destroys a majority of the Cursed Effigies placed after scaling, when the Curse Ritual completes with Salttide's Pact in force, after Round 8, or when all Heroes are defeated.

- **Party A wins** if it destroys a majority of the placed Effigies.
- **Party B wins** if the Curse Ritual completes while Salttide's Pact is in force.
- The Salttide's Counting Stone remains an optional carried reward and does not complete Party B's primary objective.
- If neither party completes its primary objective, the party with the most total Coin Value wins.

Tiebreaker: Most Monster CV collected.

Scenario 6: The Serpent's Sunken Hoard

A flooded sinkhole has opened in the black water, and something ancient coils below it, older than Reedmarch's oldest ferry-family. Its hide, its hoard, and its death would each command a price in a different market. The water is dark enough to hide which one is being hunted, and Reedmarch prefers it that way. Whatever is down there has paid the toll longer than anyone alive, and does not intend to stop now.

Primary Objective: Defeat the Great Swamp Serpent and recover the most Coin Value from the Sunken Hoard.

Final Random Monster Groups: Determine using **10.6.4**.

Awake Groups: Random Monster Groups begin **Resting** unless a listed setup rule says otherwise. Scenario-specific Monsters use their listed state.

Minion Swarm: No.

Objective Scaling: Apply **10.6.9** to the Hoard Chests.

Level Scaling: Use the Scenario APL for every APL-based Monster, hazard, objective, reward, and damage value in this scenario.

Solo/Co-op Objective: Defeat the Great Swamp Serpent, retrieve at least half of the Hoard Chests placed after scaling, rounded up, then extract at least half the party through any battlefield edge as defined in **10.6.10**.

Pressure Clock: Use **Swarm** from **10.5.7**.

Battlefield and Terrain (36"×36"): Place a central Sinkhole Pool (10–12" across) of **Deep Water**. The edges are Crumbling Banks. Surround the pool with small islands, reeds, and muddy approaches.

Objective Placement: Place 3 Hoard Chest markers in the Sinkhole Pool. Each yields **1 Treasure roll**. When a Hoard Chest is retrieved, roll **1d4**. On a **1**, that Chest also contains a Serpent Scale token worth 2 × (2 + (4 × APL)) Coins.

Scenario-Specific Monster: Great Swamp Serpent

HP	(5 × Party Size × (6 + (1 × APL))) / 8
AV	2 + (APL/2, rounded down)
SPD	4" (Swim 8")
LVL	APL + 3 (min 7, max 10)
CV	4 × (2 + (4 × APL)) Coins
Sz	L

AI Steps

Target Priority: Prioritize a valid enemy in the Sinkhole Pool, then a valid enemy within **1"** of the Sinkhole Pool. Otherwise, use the normal Monster target priorities.

1. **Constrict:** If the Serpent begins their activation **Engaged** with a target they **Immobilized** with **Crushing Bite** during their previous activation, that target suffers **2d6 + APL blunt damage** and is no longer **Immobilized** by Crushing Bite. Then end this activation.

Attacks

- **Crushing Bite:** 1d12 + APL piercing damage. On a **Critical Hit**, the target becomes **Immobilized** until they spend **1 AP** and succeed on a **STR** or **DEX Check** to escape.

Special Abilities

- **Amphibious.**
- **Tail Lash:** At the start of their activation, if one or more enemies other than the Serpent's **Primary Target** are within **3"** of the Serpent, each such enemy makes a **DEX Check**. On a failure, that enemy suffers **1d8 + APL/2 blunt damage** and is **Pushed 2"** directly away from the Serpent.
- **Lurker in the Deep:** Do not place them during setup. Place them in **Deep Water** when a Hero enters or uses **Interact** within **6"** of the Sinkhole Pool. If they are not **Engaged** and are in **Deep Water** at the start of their activation, they become **Hidden** and do not lose **Hidden** for lacking **Cover** while they remain in **Deep Water**.
- **Vicious Coils: Checks** made to escape being **Immobilized** by this Monster's Crushing Bite are rolled with **Disadvantage**.
- **Serpent's Fury:** While at half HP or less, Crushing Bite also forces a **STR Check**; on a failure, the target becomes **Poisoned [d8]**.

Boss Deployment: Do not place the Serpent during setup. Place them **Awake** in the Sinkhole Pool when their **Lurker in the Deep** rule triggers.

Random Monster Setup:

- **Group 1:** Roll once on The Mire Random Monster Table. Place on a Bog Island. **Resting**.
- **Group 2:** Roll once on The Mire Random Monster Table. Place on muddy banks near the Sinkhole. **Resting**.

Party Deployment: Parties deploy on opposite short battlefield edges, outside the immediate Sinkhole area.

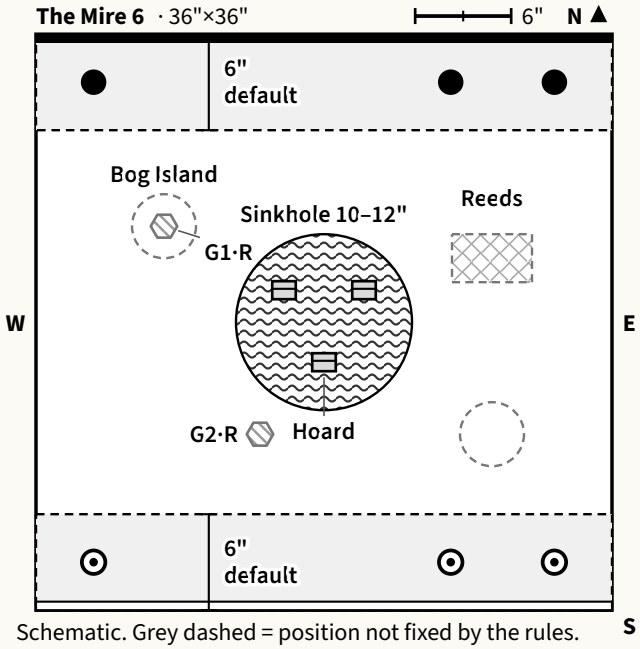


FIG-56. The Serpent's Sunken Hoard: parties deploy outside the Sinkhole area within 6" of opposite short edges (6" is the 10.1 default), around a central Deep Water Sinkhole Pool 10–12" across holding three Hoard Chests; key: FIG-20 (see 10.4, The Mire Scenario 6).

Special Rules:

Retrieving Hoard: A Hero in **Deep Water** in the Sinkhole Pool uses **Interact [3 AP]** and makes a **STR Check** to retrieve one Hoard Chest. On a success, resolve that Chest's Treasure rolls. Their rewards and any Serpent Scale token are banked immediately by the retrieving Hero's party, and the Chest is removed from play.

Escape Conditions: None in competitive play. In solo or cooperative play, allied Heroes may escape through any battlefield edge as required by the **Solo/Co-op Objective**.

Victory Conditions: The adventure ends when the Great Swamp Serpent is defeated and every Hoard Chest placed after scaling has been retrieved, after Round 8, or when all Heroes are defeated.

- The party that banks the most total Coin Value from retrieved Hoard Chests wins.
- The party that deals the killing blow to the Serpent gains an additional **2 × (2 + (4 × APL)) Coins**.
- If the Hoard remains unretrieved, the party with the most total Coin Value from all other sources wins.

Tiebreaker: Most total damage dealt to the Serpent.

10.5 Solo and Cooperative Play

Heraldry Skirmish may be played as a **solo** or **cooperative** game. In these modes, there is no rival adventuring party. Instead, the battlefield itself becomes the enemy. Solo and cooperative play use the normal core rules unless this section says otherwise.

Solo and cooperative Heraldry use **one fixed hard mode** without optional pressure settings, easy modes, or player-selected scaling presets.

10.5.1 Allied Force Size

A solo or cooperative party contains **1–4 Heroes**.

- A single player may control **1–4 Heroes**.
- Multiple players share one allied side and may divide those Heroes among themselves as they wish.
- **Hirelings** are not granted for free in solo or cooperative play. They may still be recruited, fielded, controlled, dismissed, and replaced exactly as allowed by the normal Hireling rules.

Use the following default force splits when players want a standard solo or cooperative setup:

- **1 player: 3 Heroes**
- **2 players: 2 Heroes each**
- **3 players: 3 or 4 Heroes total**, divided as the players choose
- **4 players: 1 Hero each**

10.5.2 Solo and Cooperative Setup Checklist

Use the following sequence for every solo or cooperative adventure.

1. **Choose the Party.** Field **1–4 Heroes**, confirm each Hero's normal maximum resources, then calculate **APL**.
2. **Choose or Randomly Determine the Climate.** In a campaign, the players may choose the Climate or determine it randomly.
3. **Roll a Core Scenario.** Roll **1d6** for a random Core Scenario within that Climate unless the campaign or a previous rule instructs otherwise.
4. **Generate Secondary Objective and Weather.** Roll one Secondary Objective and one Weather result for that Climate unless the scenario says otherwise.
5. **Generate Monster Groups.** Generate all required Monster Groups for the adventure using **10.6.4 Final Random Monster Groups**.
6. **Deploy All Monster Groups.** Place every group. Random Monster Groups begin **Resting** unless a scenario-specific setup rule says otherwise.
7. **Apply Scenario-Specific Waking Rules.** If the scenario says that one or more groups begin **Awake**, follow that scenario's instructions. If the scenario says to determine Awake groups randomly, randomly choose from among all legally deployed groups.
8. **Place Objectives, Hazards, and Extraction Zones.** Resolve all remaining setup rules.
9. **Confirm the Pressure Clock.** Use the Core Scenario's assigned **Pressure Clock**. If no Pressure Clock is assigned, determine one using **10.5.7**.
10. **Deploy Heroes.** Resolve Hero deployment after all hostile setup is complete unless a specific scenario says otherwise.
11. **Begin Round 1.** Resolve initiative normally for PvE.

> *Example, Solo Setup: Marta begins a solo campaign with three Heroes at **APL 2**. They choose **The Mire** as the Climate, roll a Core Scenario within that Climate, then roll one swamp Secondary Objective and one swamp Weather result. Because three Heroes are in play, the adventure uses **4** Random Monster Groups. Marta deploys all four groups according to the scenario's Random Monster Setup. Each group begins **Resting** unless the scenario gives a specific waking rule. Only after all Monsters, hazards, and objectives are placed does Marta deploy their Heroes and begin Round 1.*

10.5.3 Activation Order

In **solo** and **cooperative** play, there is only **one allied side**. During the **Party Phase**, the allied players choose the activation order of all eligible allied combatants.

When the allied side has no eligible combatants left, it must **Pass**. If the **Monster Phase** has not yet resolved this round, resolve it next. If the **Monster Phase** has already resolved, proceed to the **End of Round**.

All normal activation rules still apply:

- each eligible allied combatant may activate once per round,
- an activated combatant must spend at least **1 AP** unless they cannot take actions,
- unspent AP may still be saved for **Reactions**,
- and allied players do **not** alternate among themselves unless a scenario explicitly says otherwise.

10.5.4 PvE Initiative

At the start of each round in **solo** and **cooperative** play, one allied player rolls **1d20**.

- **12 or higher:** The Heroes seize the initiative. Resolve the **Party Phase**, then the **Monster Phase**.
- **11 or lower:** The wilderness strikes. Resolve the **Monster Phase**, then the **Party Phase**.

This roll replaces competitive side-based Initiative in PvE play. The rolled phase order also sets simultaneous-effect priority under **3.6 Timing Rules**.

After both phases have resolved, proceed to the **End of Round**.

10.5.5 Solo and Cooperative Scenario Conversion

If a rolled Core Scenario was originally written for competitive play, convert its primary objective using the following table unless that scenario already includes its own solo or cooperative rules.

Competitive Scenario Type	Solo/Co-op Objective	Extraction Requirement
Treasure race	Extract at least half of all treasure markers and then escape	At least half of the party's starting Heroes must extract, as defined in **10.6.10**
Ritual disruption	Stop the ritual before the fail threshold is reached	At least 1 allied Hero must extract
Boss hunt	Defeat the boss and then escape	At least 1 allied Hero must extract
Escort or rescue	Move the protected target to extraction	The protected target and at least half of the party's starting Heroes must extract, as defined in **10.6.10**
Survival or holdout	Hold for the listed rounds, then extract	At least half of the party's starting Heroes must extract, as defined in **10.6.10**
Control or race	Complete the printed control or race requirement alone	At least 1 allied Hero must extract

10.5.6 Scenario Pressure and Scaling

Apply the mandatory Hero, Monster, **Awake** Group, objective, and APL adjustments in **10.6 Dynamic Party and Scenario Scaling** to the printed scenario values.

Pressure Clocks, extraction rules, reward timing, and outcome grades still apply normally in solo and cooperative play unless a scenario explicitly overrides them.

If a scenario includes multiple objective layers, complete the primary converted objective first, then satisfy any listed extraction requirement. When the competitive **Victory Conditions** would end the adventure immediately upon completing the primary objective, do not end the solo or cooperative adventure at that timing. Continue play until the allied side satisfies its **Solo/Co-op Objective** extraction requirement, loses through a fail condition, or reaches the scenario's round limit. If the round limit is reached before the required extraction is complete, the allied side loses.

If a rule says an opposing party makes a choice and no opposing party exists, use **Random Determination** among the legal options. If a rule references an opponent's roll or benefit and no opponent exists, that clause has no effect unless the rule gives a solo procedure. Treat any choice or roll a scenario assigns to the party that lost the Setup Roll-off as an opposing-party choice or roll.

If a scenario prints a **Solo/Co-op Objective**, that field is authoritative and the allied side does not choose a competitive role. Any extraction route stated in that field is legal in solo or cooperative play and overrides a competitive **Escape Conditions** field that says otherwise. For any future scenario that assigns competitive roles but does not print a **Solo/Co-op Objective**, randomly determine among the roles that remain mechanically functional without an opposing party. If no role remains functional, convert the scenario using the table above instead.

10.5.7 Pressure Clocks

Pressure Clocks are solo and cooperative pacing rules. They do not apply in PvPvE competitive play.

When playing solo or cooperative, use the Core Scenario's assigned mandatory **Pressure Clock** after scenario setup and before Round 1. The clock applies to the allied side as a whole. If a custom, replay, or future scenario does not assign a Pressure Clock, roll **1d4** on the table below. Players cannot choose, replace, or omit the assigned or rolled result. Each clock advances only at the listed timing. If a clock

reaches its fail threshold, the allied side loses the adventure unless the scenario gives a more specific result.

1 Collapse

Trigger: At the end of each round, beginning with **Round 4**

Escalation: On the first advance, place one **Aura 3" Dangerous Terrain** collapse marker in the battlefield centre. On each later advance, place one additional **Aura 3" Dangerous Terrain** collapse marker adjacent to an existing collapse marker, in the legal position closest to the nearest Primary Objective marker. Each collapse marker's hazard deals **1d6 blunt damage**.

Fail Threshold: If at least one Primary Objective marker remains on the battlefield and every such marker lies within a collapse marker's **Aura**, the allied side loses.

Mitigation: None unless the scenario says otherwise.

2 Swarm

Trigger: At the end of each round, beginning with **Round 3**

Escalation: Wake one additional **Resting Monster Group**. If none remain, the nearest **Awake** Monster Group that has not gained the Swarm bonus gains it for the rest of the adventure. The first attack made by that Group each round that damages a target deals an additional **1 damage** of that attack's primary damage type. A Group cannot gain this bonus more than once; if every Awake Group has it, this advance has no further effect.

Fail Threshold: If all Monster Groups are **Awake** and the allied side has not completed the primary objective by the end of **Round 8**, the allied side loses.

Mitigation: None unless the scenario says otherwise.

3 Ritual

Trigger: At the end of each round

Escalation: Advance the Pressure Ritual by **1**.

Fail Threshold: If the Pressure Ritual reaches **6**, the allied side loses.

Mitigation: **Interact [2 AP]:** A Hero adjacent to the Pressure Ritual marker may make an **INT Check** or **SPI Check**. On a success, reduce the Pressure Ritual by **1**, to a minimum of 0.

4 Pursuit

Trigger: At the end of each round, beginning with **Round 4**

Escalation: Increase the Pursuit value by **1**, starting from 0. Until the adventure ends, the first attack made by each enemy each round that damages a target deals additional damage equal to the current Pursuit value, of that attack's primary damage type.

Fail Threshold: If no allied Hero has extracted by the end of **Round 8**, the allied side loses.

Mitigation: None unless the scenario says otherwise.

If **Ritual** is assigned or rolled, place a Pressure Ritual marker in the nearest legal space to the battlefield centre after all scenario objectives are placed. The marker is not an objective, cannot be carried, damaged, controlled, or removed, and does not block movement or **LOS**.

For **Collapse**, count only Primary Objective markers currently on the battlefield. A carried or removed Primary Objective is not within a collapse marker's **Aura**. On each later advance while at least 1 Primary Objective marker remains, compare the distance from every existing collapse marker to every Primary Objective marker. Use the pair with the shortest distance; resolve exact ties with **Random Determination**. Place the new collapse marker adjacent to the selected collapse marker, in the legal position closest to the selected Primary Objective marker.

If no Primary Objective marker remains, identify the existing collapse markers that have at least 1 legal adjacent placement. If none do, that advance has no effect. Otherwise, use **Random Determination** to choose 1 of those collapse markers, then roll **Random Direction** from that marker until the roll indicates a legal adjacent placement. **Tabletop Mode:** place the new marker with its centre **1"** from the selected marker's centre in the rolled direction. **Grid Mode:** place the new marker in the adjacent square in the rolled direction.

Collapse cannot meet its fail threshold solely because no Primary Objective marker remains.

A **Pressure Clock** does not change the Primary Objective, Secondary Objective, reward, ex-

traction rule, Monster Group, or round limit of the scenario unless the clock explicitly says so. If a scenario rule and a **Pressure Clock** conflict, the scenario rule takes priority.

10.5.8 Reinforcements, Spawns, and Objective Impossibility

Unless a scenario says otherwise, use the following rules in solo and cooperative play.

- No more than **2 reinforcement events** may resolve during the same **Monster Phase**. A third or later event that phase fails and places nothing.
- The universal **6** Monster Group battlefield limit and the illegal-placement procedure in **Monsters Placed After Setup** apply normally.
- If the primary objective becomes impossible to complete, the allied side loses immediately.

10.5.9 Extraction

A Hero counts as extracted only if they leave the battlefield through a legal extraction edge or stand in a legal extraction zone at the moment the scenario ends, as the scenario requires.

- If only one Hero survives, that Hero must still extract unless the scenario explicitly grants victory in place.
- A rescued NPC does not count as an extracted Hero unless a scenario explicitly says otherwise.
- A **Knocked Out** Hero on an extraction edge or inside an extraction zone is not extracted unless a rule explicitly allows them.
- A Hero that leaves the battlefield early is no longer a legal target and takes no further part in the battle unless a rule says otherwise.

10.5.10 Victory, Failure, and Outcome Grades

The allied side immediately loses if:

- all allied Heroes are dead,
- all allied Heroes are **Knocked Out** with no legal recovery remaining,
- the scenario's Pressure Clock reaches its fail threshold,
- the primary objective becomes impossible,
- or a scenario-specific fail condition is met.

If the allied side does not immediately lose, determine the result using the following outcome grades.

- **Major Victory:** The allied side completes the primary objective, satisfies the extraction requirement, and completes every listed Secondary Objective.
- **Costly Victory:** The allied side completes the primary objective and satisfies the extraction requirement, but does not complete every listed Secondary Objective.
- **Withdrawal:** At least **1 Hero** extracts, but the primary objective is incomplete.
- **Catastrophe:** The allied side loses, or no Hero extracts.

10.5.11 Reward Timing and Banking

Unless a scenario explicitly says a reward is banked immediately, no reward is banked until the scenario result is determined.

- On a **Major Victory**, bank all extracted treasure, all collected Monster CV, all primary scenario rewards, and all completed Secondary Objective rewards.
- On a **Costly Victory**, bank all extracted treasure, all collected Monster CV, and all primary scenario rewards. Reduce total coin rewards by **25%**, rounded down as normal. Uncompleted Secondary Objective rewards are lost.
- On a **Withdrawal**, bank only treasure, chests, relics, or carried objectives that were physically extracted. Collected Monster CV and all unextracted rewards are lost. No primary scenario reward is gained, and no Secondary Objective reward is gained.
- On a **Catastrophe**, no unbanked reward is kept unless a scenario explicitly says otherwise.

10.5.12 Play Example

> *Example, Costly Victory: Three Heroes enter the **Ashlands** seeking gold and a relic. They complete the rolled Core Scenario objective and one Hero escapes carrying the relic while a second Hero escapes empty-handed. Their third Hero is left **Knocked Out** beside a collapsed archway. Because the primary objective was completed and the extraction requirement was met, the party earns a **Costly Victory**. They keep the extracted relic and the scenario's main reward, but they lose any unfinished Secondary Objective reward and reduce total coin rewards by **25%** before banking them.*

10.6 Dynamic Party and Scenario Scaling

Heraldry Skirmish supports **solo**, **cooperative**, and **competitive PvPvE** play with **1–4 Heroes per party**. Apply this section unless a scenario explicitly overrides it.

These rules use three separate concepts:

- **Party Size:** the number of Heroes in one party at the start of the adventure.
- **APL:** the average Hero level used for scenario scaling.
- **Total Heroes in Play:** the total number of Heroes deployed across all parties. This determines **Final Random Monster Groups**.

10.6.1 Legal Party Structures

Solo and Cooperative Play

A solo or cooperative game uses **1 party** containing **1, 2, 3, or 4 Heroes**.

Competitive PvPvE Play

A competitive PvPvE game uses **2 parties**. Both parties must field the same number of Heroes:

- **1 Hero vs 1 Hero**
- **2 Heroes vs 2 Heroes**
- **3 Heroes vs 3 Heroes**
- **4 Heroes vs 4 Heroes**

Asymmetric competitive party sizes are not allowed.

Hirelings and Summons

Hirelings and **Summons** do not count toward Party Size and do not modify **APL**, Boss Scale, total Heroes in play, random Monster Group count, scenario waking or statistics, reinforcement limits, or objective scaling. Hirelings are purchased party assets; their recruitment cost, permanent-loss risk, roster and control limits, and printed profiles are their balancing constraints. A rule may let a Hireling interact with an objective without changing any scaling value.

10.6.2 Hero Action Economy

Party Size does not modify a Hero's AP refresh, Max NRG, or Max HP. Every Hero begins each round with **3 AP** and uses the maximum resources printed by their ancestry, Class, Talents, equipment, conditions, and other rules.

Hirelings and Summons retain their own printed or default AP values. A rule may still modify a combatant's AP, NRG, or HP when that rule explicitly does so.

10.6.3 APL

APL is used to determine enemy quality, treasure bands, and any level-sensitive scenario effects.

Solo and Co-op APL

In solo or cooperative play, use the allied party's APL determined under **6.14 Average Party Level**.

Competitive PvPvE APL

In competitive PvPvE, determine each party's APL separately under **6.14 Average Party Level**, then compare the two results.

Lower-APL Party Bonus

For each point of APL difference between the two parties, every Hero in the lower-APL party gains **+1 Luck Point** for the adventure. These bonus points may raise a Hero above their normal maximum for that adventure.

This bonus applies only to **Heroes**. It does not apply to Hirelings or Summons.

Scenario APL in Competitive PvPvE

After determining both Party APLs, determine the scenario's APL as follows:

Scenario APL = average of the two parties' APLs, rounded down as normal

This Scenario APL is used for **Monster** tier selection, **Elite** scaling, treasure bands, hazards, and level-sensitive scenario rules.

10.6.4 Final Random Monster Groups

Each adventure uses a number of random Monster Groups based on the total number of Heroes in play across all sides. Use this value unless a scenario explicitly gives a different number. Generate and reroll those Groups under **9.8 Random Monster Generation Tables**.

Total Heroes in Play	Final Random Monster Groups
1 Hero	2
2 Heroes	3
3–4 Heroes	4
5–6 Heroes	5
7–8 Heroes	5

The count holds at **5** for both the **5–6** and **7–8** bands. This is deliberate: it reserves one Group under the **6** Group battlefield limit for a scenario-specific, reinforcement, or Boss Group. A **4 Hero** party instead gains pressure through **Minion Swarm** in **10.6.8**, which increases Group density rather than Group count.

Scenario-Specific Monster Coin Value

A scenario-specific Monster's **CV** is priced from the amount by which their **LVL** exceeds the Scenario APL, using the multiplier below applied to **(2 + (4 × APL)) Coins**.

LVL	CV multiplier
APL	1 ×
APL + 1	2 ×
APL + 2	3 ×
APL + 3 or higher	4 ×

A scenario may price a Monster outside this scale when that Monster is not the scenario's payout, such as an obstacle in a role-asymmetric scenario, or when a scenario grants its reward through an objective instead of a defeat reward. A Monster priced outside this scale is deliberate and is not an error.

Maximum Group Cap

Unless a scenario explicitly says otherwise, the final number of random Monster Groups cannot exceed **6**. This matches the universal battlefield limit in **Monsters Placed After Setup**.

10.6.5 Random Monster Setup Patterns

Scenario entries provide placement instructions for random Monster Groups. If the final number of random Monster Groups is lower than the number of listed placement instructions, use the lowest-numbered placement instructions first. If the final number is higher than the number of listed placement instructions, repeat the listed placement pattern from the beginning, placing each additional group in the nearest legal position that is not within **6"** of another random Monster Group unless no such position exists.

If a scenario gives a unique placement instruction for a numbered Monster Group, apply that instruction only to that numbered group. Additional groups created by repeating the pattern do not copy unique off-battlefield arrival, patrol, or waking rules unless the scenario explicitly says they do.

10.6.6 Monster Deployment and Awake Groups

After determining the final number of random Monster Groups, deploy all random Monster Groups before party deployment unless a scenario says otherwise.

Random Monster Groups begin **Resting** by default. A random Monster Group begins **Awake** only if a scenario-specific setup rule explicitly says it begins **Awake** or gives a procedure for determining which groups begin **Awake**.

Players never choose which groups begin **Awake** unless a scenario explicitly says otherwise.

10.6.7 Scenario-Specific Awake Groups

Apply any scenario-specific **Awake Groups** rule during setup. Scenario-specific Monsters, Bosses, reinforcements, and spawned Monsters use the activation state given by their scenario rule.

10.6.8 Minion Swarms

Some scenarios have the **Minion Swarm** keyword. Unless a scenario gives a lower limit, a single reinforcement or summoning rule cannot have more than **6 scenario-spawned Minions** on the battlefield at the same time. If a rule would place another Minion beyond that limit, do not place it. Minions placed during setup do not count against this limit unless the scenario says otherwise.

If a scenario has **Minion Swarm**, apply the following:

- **1–3 Heroes per party:** no change
- **4 Heroes per party:** add **+1 Minion** to each minion-class group that deploys or is placed

Do not apply this rule to Elite or Boss Monsters.

10.6.9 Objective Count Scaling

If a scenario places several identical objective markers that independently contribute to the main objective, scale those markers as follows unless the scenario gives a specific override.

Solo and Co-op Objective Scaling

In solo and cooperative play, scale identical required objective markers in direct proportion to Party Size.

Required Objective Markers = printed number × Party Size / 4, rounded up, minimum 1

Use the printed number for a 4-Hero party. Rounding can create a difference of less than one marker from exact proportional scaling.

Competitive PvPvE Objective Scaling

In competitive PvPvE, always use the **printed number** of objective markers.

Scope of Objective Scaling

This rule applies only to ritual pylons, altars, beacons, required loot markers, pressure-reducing objective nodes, or other identical markers that each independently advance the main objective.

It does **not** modify decorative markers, optional treasure markers, unique named objectives, or scenario-specific markers whose number is explicitly fixed.

10.6.10 Extraction Clauses

Whenever a scenario or campaign rule requires the party to extract **at least half** of its Heroes, this number is always calculated from the party's **starting size** at the beginning of the adventure, rounded up.

Starting Party Size	Minimum Extracted Heroes
1 Hero	1
2 Heroes	1
3 Heroes	2
4 Heroes	2

This requirement is checked when the scenario would otherwise be won, or when the scenario ends. Falling below this threshold during play does **not** automatically cause defeat unless the scenario explicitly says so.

A scenario may still impose a stricter unique extraction condition.

II.

Campaign Play

*In the Dying Lands, a single **Skirmish** is a transaction. Blood for coin. Risk for salvage. A name crossed off a roster so another name can eat for a week. A campaign is the longer ledger. It records what the party won, what it spent, who carried the chest, who did not stand up, and which debts waited at the gate.*

The Bastions cannot send standing armies into the ruined climates. No regiment survives a season outside the walls. The Greenmark returns scouts as antlers, hair, and boot leather. The Ashlands count the living among the dead before the first banner reaches the road. The Undermarches take columns whole and send back voices that belong to no one missing. The Pale City waits for armour to freeze shut. The Sun-Drowned lets thirst command the battle. The Mire removes the road and calls that victory.

Councils, chapels, guilds, and discreet nobles use smaller tools. They hire parties. Small enough to hide. Strong enough to fight. Cheap enough to lose. Each contract begins as ink on a table inside the walls. It ends in mud, ash, snow, salt, or blood.

*A campaign follows that cycle of contracts, scars, salvage, and attrition. It is played as a sequence of **Expeditions**, **Skirmishes**, **Aftermaths**, and **Town Phases**. The party earns coin, recovers equipment, recruits replacements, improves its **Heroes**, and spends its winnings in pursuit of a final **Stronghold**. Nothing about the process is clean. Clean things do not last long beyond the gates.*

*Each adventure begins with a promise written by someone who expects not to bleed. A patron may ask the party to recover medicine from a ruined apothecary, extract a relic from a sealed crypt, escort a message through The Mire, burn out a sorcerer's tower, slay a named **Monster**, or confirm that another party failed. The written terms rarely mention the rival company hired under another seal. They rarely mention the last expedition whose bones still lie within sight of the objective. The Bastions know. The contracts are drafted accordingly.*

*Your party is not an army, a noble house, or a sworn order unless its **Heroes** make it one. At the start of a campaign, it is a working company with weapons, debts, grudges, and enough courage or desperation to leave the gate. Its first contracts buy food, oil, arrows, dry boots, and a roof that does not leak grave-water. Later contracts are taken because the party has enemies, missing friends, unfinished accounts, and reasons to return to places no sensible person names twice.*

*Between **Skirmishes**, survival is counted in smaller measures. A blade recovered from a corpse. A shield hammered flat and bound with wire. A **Hireling** paid before they desert. A **Hero** carried back breathing, though not whole. A name scratched from the **Roster**. A debt moved from one column to another. The **Treasury** grows by contract pay, salvage, theft, and **Monster** blood. **Storage** fills with gear stripped from the dead and saved for the living. The **Bench** waits behind the walls, healing, drinking, praying, or pretending not to hear the next contract read aloud.*

*Every party that walks out from a Bastion gate tells itself it marches toward something larger than a shallow grave. A few survive long enough to gather their winnings into a refuge: a reclaimed manor, a hill-keep, a fortress-chapel, or walls thick enough to outlast one terrible winter. Some call that hope **Triumph**. Most say the word quietly.*

*The Dying Lands answer ambition with mud, hunger, curses, and teeth. Some **Heroes Die** beyond the lanterns and return only as recovered equipment, if they return at all. Some **Retire**, giving their gear back to **Storage** and their wealth back to the **Treasury** before the road takes the rest. A few endure long enough for their party's name to mean something heavier than a signature at the bottom of a contract.*

11.1 Campaign Overview

*A **Stronghold** is not a castle in the noble sense. No ancient bloodline sanctifies it. No bard remembers its founding. It is a claim driven into a dying world with coin, fear, salvage, and stubborn labour. Its stones come from ruined shrines, abandoned watch-keeps, broken bridges, and walls that failed other people first. Its gates are paid for with burial gold, bounty coin, chapel debt, and the last wages of the dead.*

A Stronghold gathers people the Bastions cannot keep and the wilds have not taken yet. Retired killers sleep near frightened families. Debt-bound craftsmen work beside wounded hirelings. Failed priests bless thresholds they do not trust. Cooks, armourers, mule-drivers, grave-diggers, deserters, orphans, and informants learn the same bell-calls because the same things come at night. Half-paid guards watch ditches, palisades, and cold murder-holes, hoping the dark has chosen an easier meal.

To build a Stronghold is to stop running long enough to answer for other people. That is not mercy. It is weight. A party becomes more than adventurers with blades and debts. It becomes a name in ledgers, a mark on maps, a rumour at gates, and a provocation beyond the watch-fire. Its enemies no longer need to hunt it across the Dying Lands. They know where to come.

***Triumph** does not mean the world is saved. It means people can sleep behind a door they helped bar. It means a few more fires stay lit when the weather turns. It means a few more children hear the training yard before they hear claws on wood. The dark has been pushed back by the width of a wall. That is enough to matter. It is not enough to last.*

Campaign Reference

This table is a navigation aid. The full campaign rules in **11.1** through **11.5** are authoritative.

Phase or Topic	Reminder	Full Rule
1. Expedition	Choose the next adventure and prepare the party.	**11.2.1**
2. Skirmish	Play the scenario using the battlefield rules.	**11.2.2**
3. Aftermath	Bank secured coins, loot, and Monster **Coin Value**; resolve **Knocked Out** Heroes, injuries, Wounds, death, and Journey Home.	**5.8**, **10**, **11.1.4**, **11.1.5**, and **11.2.3**
4. Town Phase	Spend **TAP** at the **Grand Hall**, **Chapel**, **Arcane Spire**, **Training Grounds**, **Ironworks**, and **Guild of Keys** to trade, recover, recruit, train, manage the Roster, and build the Stronghold.	**11.2.4** and **11.3**
Stronghold and Triumph	Complete Stronghold Components from the shared **Treasury** to pursue **Triumph**. Solo and cooperative parties instead resolve the **Triumph Finale**.	**11.3** and **11.5.4**

11.1.1 Campaign Goal

A standard Heraldry Skirmish campaign is an economic race. A Stronghold has **10** available Components. Component costs rise as a party builds, as shown in the Component Cost table in **11.3**, and a party achieves **Triumph** when it completes any **5** different Components. Simultaneous completion is resolved under **11.3 Building the Stronghold**.

11.1.2 Active Party, Roster, and Bench

A standard campaign uses the following structure:

- **Active Party:** normally **4 Heroes** fielded in each adventure. A scenario or agreed campaign format may instead use **1–3 Heroes**, subject to **10.6 Dynamic Party and Scenario Scaling**.
- **Roster:** up to **8 Heroes** total.
- **Bench:** any Heroes on your Roster not currently in the Active Party.

During the Town Phase, you may freely swap Heroes between the Active Party and the bench unless a rule says otherwise.

11.1.3 Campaign Setup

Every Heraldry Skirmish campaign begins from the same starting point. Each party assembles their starting **Active Party**, records their starting **Treasury** and **Storage**, and confirms the campaign parameters before the first **Expedition Phase** begins.

Starting Roster

At the start of a new campaign, each party builds an **Active Party** of **4 Heroes**, each at **Level 1**. Use the Hero creation rules in **Sections 6.2–6.13**. Each side's starting **Roster** is exactly those **4 Heroes**. The **Bench** begins empty. The starting Roster may contain no more than **1 Hero** with a rare ancestry.

The Roster may grow to a maximum of **8 Heroes** as new recruits are added during later **Town Phases**. See **11.1.6** for adding a new recruit.

One Hero must be nominated as the party's **Party Leader** during setup. See **6.1 Party Structure** for full Party Leader rules.

A party may field **1, 2, 3, or 4 Heroes** in its Active Party if a scenario or campaign agreement allows a smaller Active Party. The default and competitive standard is **4 Heroes**.

Starting Treasury and Storage

At the start of a new campaign, the party's shared **Treasury** records all coins from each starting Hero's class package, background, ancestry, and any coins gained from random creation bonuses.

Record each starting item as equipped, assigned to a Hero to carry during the first adventure, or held in **Storage**. A chosen starting package must satisfy **6.3 Equipment Eligibility**.

Any ineligible starting item granted by a background, ancestry, randomly determined package, or reward begins in **Storage**. Do not reroll a random result because it grants an unusable item.

No Starting Hirelings or Summons

A party begins each campaign with **0 Hirelings**, including Animal Companions. Hirelings are recruited only during a **Town Phase** as described in **11.2**. A party cannot field a Hireling during the first adventure of a new campaign unless a scenario or campaign rule explicitly says otherwise.

A party cannot begin a campaign with persistent allied **Summons** already in play. Certain class talents, such as **Infernal Familiar**, may create Summons during an adventure, but Summons do not persist between adventures. They are created during adventures by Powers, items, class features, or scenario rules, and are removed at the end of each adventure unless a specific rule says otherwise. See **2.5.1 Summon Limits**.

Starting Stronghold

A party begins each campaign with **0** completed **Stronghold Components**. **Stronghold Components** may be purchased only during the **Town Phase** as described in **11.3**. The starting **Treasury** does not include any pre-purchased Stronghold Components. See **11.1.1** for the campaign's **Triumph** condition.

Persistent and Per-Adventure Elements

The following elements are **persistent** across the entire campaign:

- The **Roster**, including each Hero's Level, Wounds, General Talents, Class Talents, Known Powers, Automatic Special Abilities, ancestry traits, and background rules.
- The assignment of one Hero as **Party Leader**.
- The **Active Party** selection made for the next adventure.
- The **Bench**.
- The **Treasury**.
- **Storage**.
- Recruited **Hirelings**.
- Recruited **Animal Companions**.
- Completed **Stronghold Components**.
- **Legendary Veterans** created when Heroes retire at Level 10.

The following elements **reset between adventures** unless a rule says otherwise. A Journey result or another rule that explicitly applies during the next Town Phase or adventure survives this reset for its stated duration.

- Each Hero's and Hireling's **HP**, which refreshes to their maximum immediately before the next adventure.
- Each Hero's **NRG**, which refreshes to its maximum immediately before the next adventure.
- Each Hero's **Luck Points**, which refresh to their maximum immediately before the next adventure.
- Each combatant's **AP**, which refreshes during the Initiative Phase of each round.
- Conditions applied during the adventure.
- Temporary effects, including buffs, wards, marks, marked targets, and short-duration scenario effects.
- Allied **Summons**, which are removed at the end of the adventure unless a rule says otherwise.
- Battlefield placement, terrain, weather, and scenario state.

Wounds persist between adventures. Wounds may be removed by specific high-tier consumables (such as a *Potion of Vitality* or *Potion of Remove Curse*) or by **Chirurgeon's Care [1 TAP]** during the Town Phase. See **5.8 Knocked Out, Wounds, and Death** and **The Chapel** in **11.2.4 Phase 4: Town Phase**.

Lingering injuries from the **Injuries Table** persist between adventures until healed during the Town Phase as described in **5.8.1 Injuries Table** and **The Chapel** in **11.2.4 Phase 4: Town Phase**.

Solo and Cooperative Campaigns

A solo or cooperative campaign uses the same starting setup with the adjustments in **11.5 Solo and Cooperative Campaign Adjustments**. The allied side begins with **1–4 Heroes** at **Level 1**, the same starting **Treasury** and **Storage** rules, and **0 Hirelings** and **0 completed Stronghold Components**. A solo or cooperative campaign ends through the **Triumph Finale** in **11.5.4** rather than through Stronghold completion.

Matched-Play Parity

In competitive campaign play, both sides must begin their campaigns under the same starting conditions unless an agreement says otherwise. Both sides must field the same number of starting Heroes, begin at the same starting Level, and operate under the same campaign restrictions. Both sides may use the same random creation tables, but matched competitive campaigns ignore all random-creation bonuses. See **6.17 Party Building Guidelines**.

11.1.4 Treasury and Storage

Campaign wealth is tracked in a single shared **Party Treasury**.

Between adventures, all unequipped items, scrolls, potions, poisons, and similar gear are kept in shared **Storage**. During the Town Phase, you may freely reassign stored gear among Heroes on your Roster as long as each Hero equips items legally.

Coins and items earned during an adventure remain unbanked until a scenario rule banks them immediately or the party secures them under the scenario's reward and extraction rules. A banked reward is secured. During the **Aftermath**, record secured Coins in the **Treasury** and secured unequipped items in **Storage**. Record each reward only once.

When a campaign rule reduces a Coin cost by a percentage, the final cost is **rounded up** to the nearest **1c**. If more than one rule would reduce the same Coin cost, choose one reduction unless a rule explicitly says otherwise. Apply a percentage reduction before a flat reduction. A cost cannot be reduced below **0c**.

If a Hero dies or retires, all stored items remain with the party. Any items that Hero failed to extract from the battlefield are lost unless another allied Hero successfully carried them off.

11.1.5 The Three Fates

A Hero may leave the Roster in three ways:

- **Die:** removed permanently after dying unless returned to life before the next adventure.
- **Retire:** removed permanently during the Town Phase by choice, with a Retirement Payout.
- **Triumph:** shares in the party's final victory.

Die

A Hero meets the Fate **Die** if they die and are not returned to life before the next adventure.

When a Hero dies during a campaign, remove them from play and from the **Roster**, but retain their roster record separately until the next adventure begins. A retained death record does not count toward the current roster maximum, **APL**, the **Active Party**, or the **Bench**; it exists only so a rule that explicitly allows resurrection, such as **Glyph of Resurrection** or **Resurrection [2 TAP]**, can return that Hero. A returned Hero re-enters the **Roster** and cannot cause it to exceed its current maximum. If the Hero is not returned before the next adventure begins, discard the retained death record permanently.

Items carried by a Hero that dies during an adventure are lost unless a rule allowed the party to recover them before the end of that adventure. If a Hero dies during the Town Phase, return their equipped and unequipped items to **Storage** unless the death rule says otherwise.

Recover Gear (Interact [1 AP]): An allied Hero adjacent to a death marker may recover any number of items the dead Hero had equipped or carried. Move those items to the recovering Hero's carried inventory; they do not function unless that Hero equips them legally. The items are secured only if the recovering Hero extracts with them. If the dead Hero returns to play before their gear is recovered, they retain it normally.

During the next Town Phase, the party may use **Recruit Hero [1 TAP]** if its Roster is below its maximum.

Retire

During the Town Phase, you may choose one Hero in your Roster to **Retire**. A retired Hero is removed from the Roster permanently and cannot be fielded again.

When a Hero retires, return their equipped and unequipped items to **Storage** unless a rule says otherwise. Items lost during an adventure remain lost. Add coins to the Treasury equal to that Hero's Retirement Payout.

A Hero that retires at **Level 10** becomes a **Legendary Veteran** under **11.4 Legendary Veterans**.

A Hero that retires before **Level 10** does not become a **Legendary Veteran**.

A **Level 10** Hero does not retire automatically. A party may continue to field a **Level 10** Hero until that Hero dies, retires, or shares in **Triumph**.

During the same Town Phase, the party may use **Recruit Hero [1 TAP]** if its Roster is below its maximum.

Retirement Payout

A Hero's Retirement Payout is based on their current Level. This payout represents half of the standard cumulative Training Costs required to reach that Level. Do not recalculate it for discounts, catch-up timing, free Training, or reduced Training Costs unless a rule explicitly says otherwise.

Hero Level	Retirement Payout
1	0c
2	8c
3	20c
4	36c
5	56c
6	80c
7	108c
8	140c
9	176c
10	216c

Triumph

A Hero meets the Fate **Triumph** if they remain on the Roster when their party achieves **Triumph**.

A party achieves **Triumph** under **11.1.1 Campaign Goal** in competitive play, or by winning the **Triumph Finale** in solo or cooperative play.

When a party achieves **Triumph**, each Hero on that party's Roster who has not died or retired shares in that victory unless a rule says otherwise. The campaign ends in victory for that party.

A retired Hero does not share in **Triumph** as a rostered Hero. If the retired Hero is assigned as a **Legendary Veteran**, they are recorded as part of the party's legacy when the party achieves **Triumph**.

No new recruit is added after **Triumph** unless the campaign continues under a rule that explicitly allows further play.

11.1.6 New Recruits

A **new recruit** is a Hero added to the Roster during the Town Phase. A party may add no more than **1 new recruit per Town Phase**, and only while its Roster contains fewer than **8 Heroes**.

Use **Recruit Hero [1 TAP]** at the **Grand Hall** and pay **10c**. This cost represents the recruit's advance, personal equipment, and induction into the company. A recruit may be added whether or not another Hero left the Roster.

A new recruit:

- starts at **Level 1**,
- uses the normal Hero creation rules in **Sections 6.2–6.13**,
- enters the Roster immediately,
- gains their normal starting items but adds no starting coins to the Treasury,
- may be randomly generated, but gains no random-creation bonuses,
- may equip legal items from **Storage** during that same Town Phase,
- may join the Active Party in the next adventure if selected,
- and does not inherit Training Costs, Wounds, conditions, campaign effects, class features, Talents, or retirement benefits from another Hero unless a rule says otherwise.

Adding a new recruit does not recalculate the Town Phase **APL**. Use the APL already established under **6.14** to determine that recruit's **Catch-Up Training** limit.

Starting items gained through **Recruit Hero** are that recruit's personal issue until they complete one adventure as a member of the **Active Party**. Before then, those starting items cannot be sold, transferred, assigned to another Hero, or placed in shared **Storage**. If the recruit dies, retires, or otherwise leaves the Roster before completing that adventure, remove those starting items instead of returning them to **Storage**. After the recruit completes that adventure, their remaining starting items follow the normal equipment, **Storage**, recovery, and sale rules.

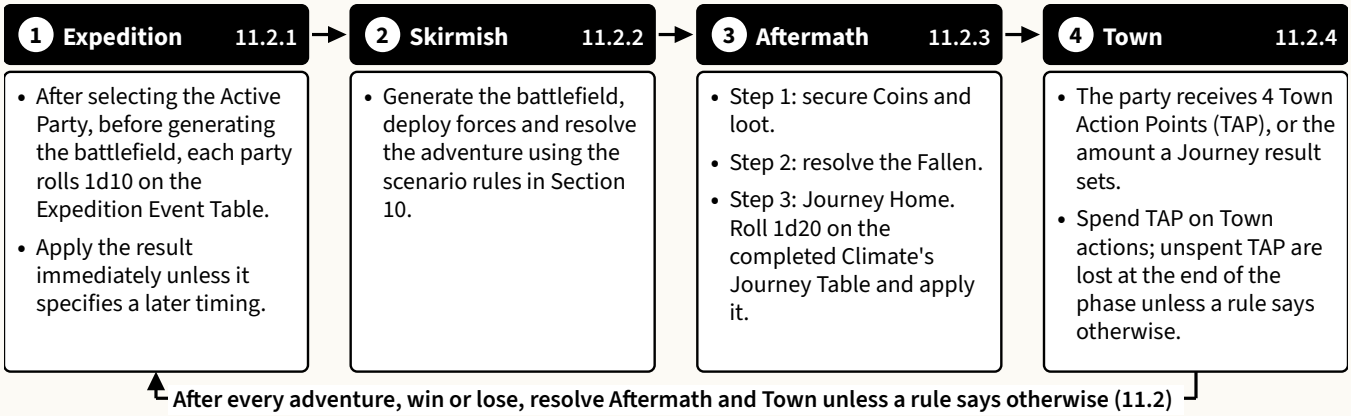
If the Roster is already at its maximum number of Heroes, you cannot add a new recruit unless a rule first removes another Hero from the Roster.

11.2 The Campaign Cycle

Each adventure follows this sequence:

1. **Expedition Phase**
2. **Skirmish Phase**
3. **Aftermath Phase**
4. **Town Phase**

The **Aftermath Phase** includes the return journey from the expedition site. After every adventure, whether the party wins or loses, resolve the **Aftermath Phase** and **Town Phase** unless a specific rule says otherwise.



A **Town Phase checklist (11.2.4)**

1. Confirm current Storage, Treasury, roster status and any lingering injuries.
2. Resolve start-of-Town effects, then gain 4 TAP (or the modified amount).
3. Spend TAP on legal Town actions in any order.
4. Pay all required coin costs as each Town action resolves.
5. Update Hero sheets, known Powers, equipped items, pending commissions, Storage and Stronghold progress.
6. Confirm the party's legal Roster and Active Party before the next adventure.

B **Town locations**

- **The Grand Hall:** trade, brokerage, commissions and fencing
- **The Chapel:** restores the injured, removes afflictions, petitions for miracles
- **The Arcane Spire:** researches Powers and copies scrolls
- **The Training Grounds:** retrains veterans and sharpens technique
- **The Ironworks:** improves gear and reforges prized equipment
- **The Guild of Keys:** manages contracts, maps, logistics and black-market routes

FIG-17. Each adventure runs Expedition, Skirmish, Aftermath, then Town; Aftermath and Town follow every adventure, win or lose, unless a rule says otherwise. The Town Phase grants 4 TAP, or the Journey-modified amount, to spend at six locations (see 11.2).

11.2.1 Phase 1: Expedition

After selecting the Active Party but before generating the battlefield, each party rolls **1d10** on the **Expedition Event Table**. Apply the result immediately unless it specifies a later setup timing. If delayed effects share the same timing, the Setup Roll-off winner chooses their resolution order. Apply effects that determine the Setup Roll-off before making that roll; conflicting automatic wins cancel as described in **10.1**. In solo and cooperative play, resolve a result that references an opposing party using **10.5.5**.

d10	Expedition Event
1	**Ambush on the Road:** During Round 1, your side suffers **-1** on its Initiative roll.
2	**Foul Weather:** When this adventure's Weather is generated, treat the Weather roll as a result of **1** instead of rolling. If the scenario or a rule sets the weather without a roll, this event has no effect.
3	**Treacherous Path:** Choose one Hero in your Active Party. That Hero begins the adventure having already lost **1d4 HP**. This cannot reduce them below **1 HP**.
4	**Lost and Delayed:** The opposing party automatically wins the Setup Roll-off for this adventure.
5	**Uneventful Journey:** No effect.
6	**Wandering Peddler:** Immediately purchase one **Tier 1** or **Tier 2** consumable item at **50%** of its normal cost and assign it to an eligible Hero in the Active Party. An item purchased this way cannot be sold.
7	**A Moment of Rest:** Choose one Hero in your Active Party. That Hero begins the adventure with **+1 Luck Point**. This may raise that Hero **1 above** their normal maximum for that adventure.
8	**Scout's Vantage:** Reposition one random Monster Group up to **4"** before Hero deployment begins.
9	**Omen of Blood:** The first time your party reduces an enemy Hero or an Elite Monster to **0 HP** this adventure, add **1c** to the party's unbanked adventure rewards.
10	**Shortcut:** Your Heroes may deploy up to **2"** outside their normal deployment zone for this adventure.

11.2.2 Phase 2: Skirmish

Generate the battlefield, deploy forces, and resolve the adventure using the scenario rules in **Section 10**.

11.2.3 Phase 3: Aftermath

Immediately after the adventure ends, resolve the following steps in order.

Step 1: Secure Coins and Loot

Add to the **Party Treasury** every Coin reward that the party secured under the scenario's reward and extraction rules, including Coins from treasure, objectives, defeated Monsters, contracts, and scenario rewards. If Coins were already added to the **Treasury** during play, do not add them again.

Add to **Storage** every secured unequipped item, including items successfully carried off the battlefield and item rewards granted by the scenario result. If an item was already added to **Storage** during play, do not add it again.

Step 2: Resolve the Fallen

For each Hero reduced to **0 HP** during the adventure, resolve all required consequences.

- If the Hero became **Knocked Out**, apply the result already rolled during play.
- If a rule delayed part of that resolution until the adventure ended, apply it now.
- If the Hero died, remove them from play and the **Roster**, but retain their roster record separately until the next adventure begins, as described in **11.1.5**. The record does not count toward roster limits or **APL** and exists only for an explicit resurrection effect.

Hirelings, Monsters, and Summons do not use Hero Wound recovery. If one was reduced to **0 HP**, they are gone unless a rule says otherwise.

Step 3: Journey Home

After resolving the adventure but before entering Town, the party must make the return journey. Determine the Climate of the completed expedition, then roll **1d20** on that Climate's **Journey Table** and apply the result immediately.

If a Journey result grants a discount, free service, or similar benefit during Town, that benefit applies during the very next **Town Phase** only.

When a Journey result affects one or more Heroes, use only living Heroes from the Active Party that completed the adventure. If it does not specify random selection, the party chooses among those Heroes. If a Journey result requires an eligible Hero, item, hazard, or other element and none exists, ignore that part unless the result states another outcome. A Hero cannot begin the next adventure below **1 HP** because of a Journey result that says they begin having already lost HP. Any item or carried objective secured during Step 1 still counts as carried by the Hero who extracted it until Journey Home is resolved. Coin loss cannot reduce the Treasury below **0c**.

At the start of the next adventure, refresh each Hero's normal resources first, then apply Journey results, then apply Expedition Events.

If a Journey result conflicts with a more specific scenario or campaign rule, the more specific rule takes priority.

Climate 1: Greenmark Journey Table (1d20)

d20	Journey Result
1	**Bandit Toll:** Lose **3c** from the Party Treasury.
2	**Dire Wolf Trail:** One random Hero begins the next adventure having already lost **1d8 + half APL HP**, rounding half APL up. This cannot reduce them below **1 HP**.
3	**Herbal Hollow:** Gain **Bandages**.
4	**Hunter's Path: 1 Hero** may deploy **2"** farther forward in the next adventure.

d20	Journey Result
5	**Antlered Path Shrine:** One chosen Hero finds a cairn of three struck stones on the old trail: Old Wode's mark, or someone keeping the practice alive. They gain **+1 Luck Point** usable only on the first **SPI Check** or **Injuries Table** roll they make during the next adventure.
6	**Broken Cart Track:** The party loses time. The next Town Phase grants **3 TAP** instead of **4 TAP**, unless the party pays **3c** before the Town Phase begins.
7	**Greythorn Forester:** A Council of Captains forester meets the party on the road home, shares fire and directions, and asks no questions. Reduce the Coin cost of one purchase at the **Grand Hall** during this Town Phase by **2c**.
8	**Quiet Stream:** Choose one Hero. The first time that Hero would become **Bleeding**, **Burning**, or **Poisoned** [**dX**] during the next adventure, ignore that condition.
9	**Buried Cache:** Gain **1c**.
10	**Calm Return:** No effect.
11	**Game Trail:** The party may reroll one random Monster Group result in the next adventure.
12	**Travelling Peddler:** Buy one **Tier 1** consumable at **75%** of list price immediately.
13	**Sacred Oak:** One Hero gains **Advantage** on their first **SPI Check** in the next adventure.
14	**Rope Bridge:** One random carried mundane item is lost unless the party pays **1c** to recover it.
15	**Dry Camp:** One chosen Hero begins the next adventure with **+1 Luck Point**. This may raise them **1 above** their normal maximum for that adventure.
16	**Poacher's Notes:** Reveal one random hidden hazard immediately after setup in the next adventure.
17	**Moonlit March:** In competitive play, gain **+1** on your party's Round 1 Initiative roll in the next adventure. In solo or cooperative play, gain **+1** on the Round 1 PvE Initiative roll instead.
18	**Strange Tracks:** Increase the next adventure's **Final Random Monster Groups** by **1**, subject to the Maximum Group Cap in **10.6.4**. The additional Group begins **Resting** unless the scenario says otherwise.
19	**Woodland Pilgrims:** Reduce the Coin cost of one paid **Chapel** service during this Town Phase by **2c**.
20	**King's Deer Crossing:** Gain **1c** and **Bandages**.

Climate 2: Ashlands Journey Table (1d20)

d20	Journey Result
1	**Falling Masonry:** One random Hero begins the next adventure having already lost **1d6 HP**. This cannot reduce them below **1 HP**.
2	**Dust-Choked Lungs:** One random Hero begins the next adventure **Weakened** until the end of their first activation.
3	**Hollow Crown's Vault Mark:** A sigil scratched into a lintel, the Hollow Crown's administrative mark, indicating a catalogued vault whose contents have not been collected. Gain **2c** and **Advantage** on the first **INT Check** made to Interact with a locked container or sealed door in the next adventure.
4	**Cracked Reliquary:** Gain **1 random Tier 1 Scroll**.
5	**Collapsed Causeway:** The next Town Phase grants **3 TAP** instead of **4 TAP**.
6	**Relic Broker:** Sell one item during the next **Grand Hall** action at **75%** of its base value.
7	**Ashen Courtyard:** Gain **1 Antitoxin**. Choose one Hero; they gain **Advantage** on the first Check they make to resist a curse-like affliction during the next adventure.
8	**Pilfered Coin Purse:** Lose **1c**.
9	**Surveyor's Map:** In competitive play, automatically win the **Setup Roll-off** in the next adventure. In solo or cooperative play, roll one additional Core Scenario from the same Climate and choose which result to use.
10	**Uneventful Return:** No effect.
11	**Broken Idol:** One chosen Hero gains **+1** on the first **INT Check** they make in the next adventure.
12	**Lingering Hex:** One random Hero must pass a **SPI Check** or begin the next adventure **Frightened** until the end of their first activation.
13	**Stone-Cutter's Kit:** Reduce the Coin cost of one **Ironworks** action during this Town Phase by **4c**.
14	**Hidden Amphora:** Gain **1 Antitoxin** and **1c**.
15	**Old Pilgrim Road:** One chosen Hero begins the next adventure with **+1 Luck Point**. This may raise them **1 above** their normal maximum for that adventure.
16	**Whispering Arch:** The next random Weather result may be rolled twice and the players choose one.
17	**Looted Burial Niche:** Gain **1 random Tier 2 Special Item** or **4c**, the party's choice.
18	**Ruin Vermin:** One random Hero begins the next adventure having already lost **1d4 HP** and **Poisoned** [**d4**]. The HP loss cannot reduce them below **1 HP**.

d20	Journey Result
19	**Scholar's Rubbing:** Reduce the Coin cost of one **Arcane Spire** action during this Town Phase by **4c**.
20	**Imperial Cache:** Gain **4c** and **1 random Tier 1 Scroll**.

Climate 3: Undermarches Journey Table (1d20)

d20	Journey Result
1	**Cave-In:** One random Hero begins the next adventure having already lost **1d6 HP**. This cannot reduce them below **1 HP**.
2	**Lost in the Dark:** The next Town Phase grants **3 TAP** instead of **4 TAP**.
3	**Glowmoss Vein:** Gain **1 Healing Potion** and **1c**.
4	**Underground Spring:** Gain **1 Antitoxin**. Choose one Hero; they are **Resistant** to poison until the end of Round 1 of the next adventure.
5	**Stalactite Maze:** In competitive play, the opposing party automatically wins the next **Setup Roll-off**. In solo or cooperative play, the allied party receives no winner's choice from its next Setup Roll-off; resolve any required losing-party choice under **10.5.5**.
6	**Miner's Shrine:** Reduce the Coin cost of one paid **Chapel** service or **Ironworks** action during this Town Phase by **4c**.
7	**Mushroom Patch:** Gain **1 Antitoxin**.
8	**Chittering Pursuit:** Increase the next adventure's **Final Random Monster Groups** by **1**, subject to the Maximum Group Cap in **10.6.4**. The additional Group begins **Resting** unless the scenario says otherwise.
9	**Abandoned Tools:** One chosen Hero gains **Advantage** on the first **STR Check** or **INT Check** made to interact with terrain in the next adventure.
10	**Careful March:** No effect.
11	**Echoing Tunnel:** In competitive play, gain **+1** on your party's Round 1 Initiative roll in the next adventure. In solo or cooperative play, gain **+1** on the Round 1 PvE Initiative roll instead.
12	**Stolen Pack:** Lose **1c** and one random carried consumable.
13	**Deep Fungus Rot:** One random Hero must pass a **STR Check** or begin the next adventure **Slowed** until the end of their first activation.
14	**Smuggler's Mark:** Gain **2c**.
15	**Cryptstrangler's Husk:** Gain **1 Basic Venom**.
16	**Hidden Chamber:** Before the next adventure begins, reveal one random treasure marker before deployment.
17	**Miner's Shortcut:** Up to **2 Heroes** may deploy **2"** farther forward in the next adventure.
18	**Shattered Bridge:** Choose 1 carried objective extracted during the completed adventure. Unless the party pays **1c**, remove that objective and every Coin or item reward granted specifically for extracting it. If those rewards were recorded during Step 1, remove them from the **Treasury** or **Storage** now. If the party extracted no carried objective, lose **1c** instead.
19	**Runic Soot:** Reduce the Coin cost of one **Arcane Spire** action during this Town Phase by **4c**.
20	**Crystal Seam:** Gain **3c** and one random Tier 1 Scroll.

Climate 4: Pale City Journey Table (1d20)

d20	Journey Result
1	**Whiteout:** The next Town Phase grants **3 TAP** instead of **4 TAP**.
2	**Icefall:** One random Hero begins the next adventure having already lost **1d6 HP**. This cannot reduce them below **1 HP**.
3	**Snow-Buried Cache:** Gain **2c** and **1 Healing Potion**.
4	**Chapel of Saint Cael:** A frost-locked roadside chapel bearing Cael's bridge-and-flame crest, still consecrated, still warm inside by no natural explanation. Reduce the Coin cost of one paid **Chapel** service during this Town Phase by **4c**. One chosen Hero gains **+1** on the next **SPI Check** they make to resist **Frightened**.
5	**Frozen Tracks:** In competitive play, automatically win the **Setup Roll-off** in the next adventure. In solo or cooperative play, roll one additional Core Scenario from the same Climate and choose which result to use.
6	**Bitter Exposure:** One random Hero begins the next adventure **Slowed** until the end of their first activation.
7	**Seal-Skin Cloak:** One chosen Hero is **Resistant** to **ice** until the end of the next adventure's first round.
8	**Starving Desperation:** Lose **1c** in food and fuel.
9	**Warm Refuge:** One chosen Hero begins the next adventure with **+1 Luck Point**. This may raise them **1 above** their normal maximum for that adventure.
10	**Cold but Clear:** No effect.

d20	Journey Result
11	**Bell Tower View:** The party shelters in the upper level of a frozen bell tower. Reveal one random hidden hazard immediately after setup in the next adventure. One Hero must make a **SPI Check** before leaving. **Failure:** That Hero heard something in the tower below. They begin the next adventure with the **Heard the Song** condition (**-1 SPI**), as defined in **9.7 The Bestiary (The Voice Beneath the Bells)**. *It is considered impolite to ask what they heard.*
12	**Pilgrim Fire:** Choose one Hero. The first time that Hero would become **Burning**, **Poisoned** [**dX**], or **Frightened** during the next adventure, ignore that condition.
13	**Frostbitten Fingers:** One random Hero suffers **-1** on their first attack damage roll in the next adventure.
14	**Ice Merchant:** Buy one **Tier 1** or **Tier 2** potion at **50%** of list price immediately. An item purchased this way cannot be sold.
15	**Snowed-In Patrol:** The first Monster in the first enemy Group to become **Awake** in the next adventure deals **-1 damage** with the first attack they make that would damage a target.
16	**Buried Reliquary:** Gain **1 Holy Water** and **1c**.
17	**Glacial Shortcut:** Up to **2 Heroes** may redeploy up to **2"** after all combatants are placed in the next adventure.
18	**Deadly Chill:** One random Hero must pass a **STR Check** or gain **1 Wound** of lingering frostbite. This Wound counts normally, including toward death by a third Wound. It may be removed during the next **Chapel** visit for **0 TAP**; the normal coin cost still applies.
19	**Clockwork Locksmith:** The first **Guild of Keys** action taken during this Town Phase costs **0 TAP** instead of **1 TAP**.
20	**Treasury Sled:** Gain **4c**.

Climate 5: Sun-Drowned Journey Table (1d20)

d20	Journey Result
1	**Sandstorm Delay:** The next Town Phase grants **3 TAP** instead of **4 TAP**.
2	**Heatstroke:** One random Hero begins the next adventure having already lost **1d4 HP** and with **1 fewer Luck Point**, to a minimum of **0**. The HP loss cannot reduce them below **1 HP**; their maximum Luck is unchanged.
3	**Nomad Caravan:** Buy one **Tier 1** consumable or one **Pack Mule** at **50%** of list price immediately. An item purchased this way cannot be sold. Recruiting the Pack Mule costs no TAP, but it must fit within the Stronghold Hireling roster limit.
4	**Sunken Cache:** Gain **2c**.
5	**Hidden Oasis:** Choose one Hero. The first time that Hero would become **Poisoned** [**dX**] or **Burning** during the next adventure, ignore that condition.
6	**Bleached Bones:** Increase the next adventure's **Final Random Monster Groups** by **1**, subject to the Maximum Group Cap in **10.6.4**. The additional Group begins **Resting** unless the scenario says otherwise.
7	**Guide Through the Dunes:** Up to **2 Heroes** may deploy **2"** farther forward in the next adventure.
8	**Thirst Tax:** Lose **1c** in water and provisions.
9	**Scorpion Nest:** One random Hero must pass a **STR Check** or begin the next adventure having already lost **1d4 HP** and **Poisoned** [**d4**]. The HP loss cannot reduce them below **1 HP**.
10	**Clear March:** No effect.
11	**Buried Shrine:** Reduce the Coin cost of one paid **Chapel** service or **Arcane Spire** action during this Town Phase by **4c**.
12	**Mirage Route:** In competitive play, roll your party's Round 1 Initiative die twice and use the preferred result. In solo or cooperative play, roll PvE Initiative twice and use the preferred result for Round 1.
13	**Merchant Bones:** Gain **1 Basic Venom** and **1c**.
14	**Collapsed Cistern:** Choose 1 carried objective extracted during the completed adventure. Unless the party pays **1c**, remove that objective and every Coin or item reward granted specifically for extracting it. If those rewards were recorded during Step 1, remove them from the **Treasury** or **Storage** now. If the party extracted no carried objective, lose **1c** instead.
15	**Burning Wind:** One random Hero begins the next adventure **Weakened** until the end of their first activation.
16	**Carved Boundary Stone:** The players may reroll the next adventure's Weather result once.
17	**Ancient Coin Trail:** Gain **3c**.
18	**Desert Pilgrims:** Gain **1 Holy Water**. Choose one Hero; the first time they would become **Frightened** during the next adventure, ignore that condition.
19	**Buried Armoury:** Reduce the Coin cost of one **Ironworks** action during this Town Phase by **4c**.

d20	Journey Result
20	**Royal Caravan Ruin:** Gain **5c** and **1 random Tier 1 Scroll**.

Climate 6: The Mire Journey Table (1d20)

d20	Journey Result
1	**Rotting Ford:** One random Hero begins the next adventure having already lost **1d4 HP** and **Poisoned** [**d6**]. The HP loss cannot reduce them below **1 HP**.
2	**Sucking Mud:** The next Town Phase grants **3 TAP** instead of **4 TAP**.
3	**Leechwater Pool:** Gain **1 Antitoxin**. Choose one Hero; the first time they would become **Poisoned** [**dX**] or **Bleeding** during the next adventure, ignore that condition.
4	**Salttide Tribute Coins:** Old toll-coins from Edrava Salttide's era surface from the mud, accepted at face value by any Reedmarch ferry-tender and cursed according to three different folk traditions. Gain **2c**. One chosen Hero gains **Advantage** on the first **DEX Check** or **STR Check** they make to cross water terrain in the next adventure.
5	**Heron's Track:** In competitive play, automatically win the **Setup Roll-off** in the next adventure. In solo or cooperative play, roll one additional Core Scenario from the same Climate and choose which result to use.
6	**Mosquito Swarm:** One random Hero begins the next adventure **Weakened** until the end of their first activation.
7	**Sunken Pack:** Lose one random consumable from Storage or lose **1c** if none is available.
8	**Reed Hut:** One chosen Hero begins the next adventure with **+1 Luck Point**. This may raise them **1 above** their normal maximum for that adventure.
9	**Witchroot Grove:** Gain **1 Antitoxin** and **1 Healing Potion**.
10	**Still Water:** No effect.
11	**Ghoul Tracks:** Increase the next adventure's **Final Random Monster Groups** by **1**, subject to the Maximum Group Cap in **10.6.4**. The additional Group begins **Resting** unless the scenario says otherwise.
12	**Fen Lanterns:** One chosen Hero gains **Advantage** on the first **INT Check** or **SPI Check** they make in the next adventure.
13	**Swamp Fever:** One random Hero must pass a **STR Check** or gain **1 Wound** of lingering illness. This Wound counts normally, including toward death by a third Wound. It may be removed during the next **Chapel** visit for **0 TAP**; the normal coin cost still applies.
14	**Mud-Fisher:** Buy one **Tier 1** or **Tier 2** potion at **50%** of list price immediately. An item purchased this way cannot be sold.
15	**Sunken Reliquary:** Gain **1 Holy Water** and **1c**.
16	**Cypress Causeway:** Up to **2 Heroes** may deploy **2"** farther forward in the next adventure.
17	**Fen Charm:** In competitive play, gain **+1** on your party's Round 1 Initiative roll in the next adventure. In solo or cooperative play, gain **+1** on the Round 1 PvE Initiative roll instead.
18	**Rot-God Idol:** Reduce the Coin cost of one paid **Chapel** service during this Town Phase by **4c**, but one random Hero must pass a **SPI Check** or begin the next adventure **Frightened** until the end of their first activation.
19	**Hidden Ferry:** The party may ignore the first reinforcement spawn in the next adventure.
20	**Sunken Tribute Chest:** Gain **4c** and **1 random Tier 1 Scroll**.

> *Example, Journey Home: After escaping **The Mire**, the party rolls **1d20** on the swamp Journey Table and gets **12**, **Fen Lanterns**. Its Ranger carries that omen into the next expedition and gains **Advantage** on the first **INT Check** or **SPI Check** they make in the next battle before the party ever reaches Town.*

11.2.4 Phase 4: Town Phase

During each Town Phase, each party receives **4 Town Action Points (TAP)**.

The party may spend TAP on Town actions available to it. Unspent TAP are lost at the end of the Town Phase unless a rule says otherwise.

Unless a rule says otherwise:

- each listed Town action costs the TAP shown beside it,
- you may visit the same location multiple times,
- and each action is resolved when chosen.

Town Phase checklist

1. Confirm current **Storage**, **Treasury**, roster status, and any lingering injuries.
2. Resolve effects that occur at the start of the Town Phase, then gain **4 TAP** or the modified amount specified by a Journey result.
3. Spend **TAP** on legal Town actions in any order.
4. Pay all required coin costs as each Town action resolves.
5. Update Hero sheets, known Powers, equipped items, pending commissions, **Storage**, and **Stronghold** progress.
6. Confirm the party's legal Roster and Active Party before the next adventure.

The Grand Hall

The Grand Hall handles trade, brokerage, commissions, and fencing.

- **Buy and Sell Goods [0 TAP]:** Buy **Tier 1** and **Tier 2** items at list price. This normally includes mundane weapons, armour, shields, adventuring gear, **Tier 1–2 consumables**, and non-special enhanced items below **Rare** rarity. Sell unwanted gear for **50%** of base value. If your **Roster** includes at least **1 Merchant**, once during this Town Phase, either resolve one sale at **75%** of base value or buy one item for **90%** of its listed price, rounded up to the nearest **1c**. Multiple Merchants do not increase this benefit. It does not stack with another purchase or sale modifier unless a Town action says otherwise.
- **Commission Rare Item [1 TAP]:** Reserve one specific **Tier 1–3 permanent special item**, one specific **Tier 3 consumable**, or one item with **Enchanted +3**. It is guaranteed to be available for purchase during your next Town Phase at its normal price. You may instead reserve one specific **Tier 4 consumable**, **Tier 4 permanent special item**, or one item with **Enchanted +4** only if the party's current **APL** is 7+; that item's purchase price increases by **25%**. A party may have only **one** pending commission and may complete no more than **one** commissioned purchase during the same Town Phase. **Tier 5** items, **Legendary Artifacts**, and items with **Enchanted +5** cannot be commissioned or purchased unless a rule explicitly says otherwise. If the commissioned item is not purchased during the next Town Phase, the commission expires.
- **Appraise and Fence [1 TAP]:** Sell up to **two items** for **70%** of their base value instead of the normal sale rate.
- **Recruit Hero [1 TAP]:** If the Roster contains fewer than **8 Heroes** and the party has not added a recruit during this Town Phase, pay **10c** and add one new recruit under **11.1.6**.

The Chapel

The Chapel restores the injured, removes afflictions, and petitions for miracles.

- **Chirurgeon's Care [1 TAP]:** Remove **1 Wound** from one Hero. Cost: **6c × that Hero's Level**.
- **Cleanse Affliction [1 TAP]:** Remove one permanent negative effect caused by the Injuries Table or a similar injury rule. Cost: **3c**.
- **Quiet the Bells [1 TAP]:** Remove **Heard the Song** from one Hero. Cost: **0c**.
- **Resurrection [2 TAP]:** Choose one Hero with a retained death record and return that Hero to life. Cost: **8c × that Hero's Level**. The Hero returns to the **Roster** with **1 Wound**, regardless of how many Wounds they had when they died. This action cannot return a Hero if doing so would exceed the current roster maximum. Each Hero may be resurrected at most **once per campaign**.

The Arcane Spire

The Arcane Spire researches Powers and copies scrolls.

- **Scribe Scroll [1 TAP]:** One eligible Hero creates one scroll of a Tier 1 or Tier 2 **Arcane Spell** or **Divine Prayer** they know. Cost: **60%** of that scroll's standard purchase price. A scroll created with **Scribe Scroll** cannot be sold.
- **Research Power [1 TAP]:** One Hero learns one new eligible Tier 1–3 Power of a tradition they already use. Cost: **6c × the new Power's Tier × the new Power's Tier**.
- **Transcribe Lore [1 TAP]:** One Hero replaces one known Tier 1–3 Power with another eligible Power of the same tradition and Tier or lower. Cost: **3c × the new Power's Tier × the new Power's Tier**.

A Hero cannot learn a Power above the highest Tier they can normally access. A Hero may be the subject of **Research Power** or **Transcribe Lore** no more than **once per Town Phase**.

The Training Grounds

The Training Grounds retrain veterans and sharpen technique.

- **Train [1 TAP]:** Train one Hero in the Roster under **6.16 Hero Advancement**.
- **Retrain [1 TAP]:** One Hero may replace one previously chosen **Class Talent** or **General Talent** with another eligible option from the same tier or list, subject to that Hero's archetype restrictions. Automatic Archetype Abilities cannot be retrained. Cost: **4c × that Hero's Level**.

The Ironworks

The Ironworks improves gear and reforges prized equipment.

- **Masterwork Upgrade [1 TAP]:** Upgrade up to **2** mundane weapons, Chest armour pieces, or shields that do not already have an Item Quality. Each upgraded item gains the **Masterwork** quality. Cost: pay the difference between the item's base value and its Masterwork value, minimum **1c**, per item upgraded. When sold, an item upgraded this way uses its value before the upgrade.

The Guild of Keys

The Guild of Keys manages contracts, maps, logistics, and black-market routes.

- **Accept Contract [1 TAP]:** Take one side contract for the next adventure. A party may have no more than **1** active side contract at a time. After the next adventure is generated but before deployment, roll **1d6** to determine the contract term:
  - **1–2 Monster Writ:** Defeat at least **1** Monster Group and have at least **1** Hero extract.
  - **3–4 Salvage Writ:** Extract at least **1** treasure, relic, clue, captive, or carried scenario object beyond any object required for the primary objective.
  - **5–6 Survey Writ:** During the adventure, a Hero must use **Interact [1 AP]** while adjacent to a terrain feature or objective marker within **6"** of the battlefield centre and not **Engaged**.

  If the Core Scenario gives no legal Hero extraction route, a living Hero standing on any battlefield edge when the adventure ends sat-

isfies only the contract's Hero-extraction requirement; that Hero does not leave the battlefield and is not extracted for any other rule. After applying this exception, reroll a term whose required target, object, action, or extraction cannot legally occur in the generated adventure. If no legal term exists after checking all 3 terms, cancel the contract and refund its **1 TAP** at the start of the next Town Phase.

If the party completes the contract and at least **1** Hero extracts, gain **5c × APL** during Aftermath, using the party's APL at the start of that adventure. If the party does not complete the contract, gain nothing. A side contract never changes the scenario's victory conditions, never counts as a Secondary Objective, and cannot be accepted for the **Triumph Finale**.

- **Map Room [1 TAP]:** Study the next battlefield's known approaches. In competitive play, your party automatically wins the Setup Roll-off in the next adventure. In solo or cooperative play, after generating the next adventure's Core Scenario, roll one additional Core Scenario from the same Climate and choose which of the two scenarios to play. If the next adventure is fixed by a scenario, campaign rule, or Triumph Objective, you instead gain **Advantage** on the first **Setup Roll-off**, search, or scenario **Interact Check** made by your party during that adventure.

11.2.5 Hirelings

During the **Town Phase**, your party may recruit persistent **Hirelings** into its **Stronghold** roster. A Hireling remains on that roster until they are slain, dismissed during a **Town Phase**, or removed by a specific rule.

Hirelings are purchased with **Treasury** funds during the **Town Phase**. Recruiting a Hireling costs **1 TAP** and their listed coin cost.

Hirelings require no recurring upkeep once recruited. A party's **Stronghold** roster may contain no more than **8 Hirelings** total, including Animal Companions. A Hireling may be dismissed for no TAP cost during the Town Phase; a dismissed Hireling is removed permanently and grants no refund.

Active Hirelings and Summon Limits

At the start of each adventure, after choosing the Heroes who will take part in that adventure, choose which Hirelings from your **Stronghold** roster will deploy with that party.

The maximum number of active Hirelings for that adventure is determined by the number of Heroes in that party at the start of the adventure.

Heroes in the Party	Maximum Active Hirelings	Per-Hero Control Limit
4	**4**	**1** per Hero
3	**3**	**1** per Hero
2	**4**	**2** per Hero
1	**3**	**3** for that Hero

These limits are checked only when the adventure begins. They do not recalculate later in that adventure if one or more Heroes are removed from play.

When you choose active Hirelings for an adventure, assign each active Hireling to a specific Hero in that party. That assignment is locked for the duration of the adventure.

A Hireling may only be assigned to a Hero whose printed **SPI** is equal to or greater than that Hireling's listed **Min SPI** value.

Use the Hero's printed **SPI** on their Hero sheet. Temporary in-adventure modifiers do not change which Hirelings that Hero may control.

Hirelings, including Animal Companions, do not count against the party-wide limit of **2** active allied Summons. See **2.5.1 Summon Limits**.

Specialist Hireling Roster

These are trained mortal retainers recruited into the party's **Stronghold** roster.

Porter

Min SPI 2 **Cost** 12c **SPD** 6" **Sz** M **HP** 6 **AV** 0
Attack None

Special Abilities: Cannot attack. May use **Interact** to pick up, carry, transfer, drop, and extract one treasure chest, relic, or other bulky objective as though they were a **Hero**. This permission does not allow them to control or score any other objective. **Drag [1 AP]:** Move one adjacent **Knocked Out** Hero **2"**.

Torchbearer
Min SPI 2 **Cost** 16c **SPD** 6" **Sz** M **HP** 5 **AV** 0
Attack None
Special Abilities: Counts as a **Light Source** while on the battlefield.

Squire
Min SPI 3 **Cost** 32c **SPD** 6" **Sz** M **HP** 10 **AV** 1
Attack **Shortsword: 1d6 slashing damage**
Special Abilities: **Assist:** While adjacent to a Hero, that Hero gains **+1 AV**.

Sellsword
Min SPI 4 **Cost** 40c **SPD** 6" **Sz** M **HP** 8 **AV** 1
Attack **Shortsword: 1d6 slashing damage**
Special Abilities: **Round Shield:** Gain **d6 AD** when using **Block**.

Apothecary
Min SPI 4 **Cost** 44c **SPD** 6" **Sz** M **HP** 7 **AV** 0
Attack None
Special Abilities: **Remedy [2 AP]:** One adjacent Hero regains **2 HP** and removes **Poisoned [dX]**.

Archer
Min SPI 4 **Cost** 48c **SPD** 7" **Sz** M **HP** 7 **AV** 0
Attack **Shortbow: 1d6 piercing damage, 16"**
Special Abilities: **Steady Shot:** The first ranged attack this Hireling resolves each round ignores **Cover**.

Scout
Min SPI 5 **Cost** 52c **SPD** 8" **Sz** M **HP** 6 **AV** 0
Attack **Shortsword: 1d6 slashing damage**
Special Abilities: **Keen Scout:** Gain **Advantage** on **Spot Checks** and observation-based **Interact Checks**. **Climb Walls:** Gain **Advantage** on **STR Checks** to **Climb**.

Crossbowman
Min SPI 5 **Cost** 56c **SPD** 5" **Sz** M **HP** 9 **AV** 1
Attack **Heavy Crossbow: 1d10 + 2 piercing damage, 18"**
Special Abilities: **Reload [1 AP].**

Guard
Min SPI 5 **Cost** 60c **SPD** 5" **Sz** M **HP** 12 **AV** 2
Attack **Mace: 1d6 + 1 blunt damage**
Special Abilities: **Heater Shield:** Gain **d8 AD** when using **Block**.

Longbowman
Min SPI 5 **Cost** 64c **SPD** 7" **Sz** M **HP** 8 **AV** 0
Attack **Longbow: 1d8 + 1 piercing damage, 18"**
Special Abilities: None.

Alchemist
Min SPI 5 **Cost** 64c **SPD** 6" **Sz** M **HP** 6 **AV** 0
Attack None
Special Abilities: **Bomb [2 AP]:** Choose one point within **8"** and **LOS**. Each combatant within **2"** of that point suffers **1d6 fire damage**. Each affected combatant may use **Dodge**.

Apprentice
Min SPI 6 **Cost** 68c **SPD** 6" **Sz** M **HP** 6 **AV** 0
Attack None
Special Abilities: **Arcane Dart [2 AP, 0 NRG]:** One combatant within **12"** suffers **2d4 arcane damage**. Treat this as a **Tier 0 Arcane Spell** for all rules purposes, but make no **Casting Check**; it cannot Critical Cast or cause an **Arcane Mishap**.

Acolyte
Min SPI 6 **Cost** 72c **SPD** 6" **Sz** M **HP** 10 **AV** 1
Attack **Quarterstaff: 1d4 blunt damage**
Special Abilities: **Heal [2 AP]:** One Hero within **6"** regains **1d6 + 2 HP**.

Mauler
Min SPI 6 **Cost** 76c **SPD** 5" **Sz** M **HP** 16 **AV** 1
Attack **War Maul: 1d10 + 2 blunt damage**
Special Abilities: None.

Priest
Min SPI 7 **Cost** 96c **SPD** 6" **Sz** M **HP** 12 **AV** 2
Attack **Quarterstaff: 1d6 blunt damage**
Special Abilities: **Heal [2 AP]:** One Hero within **8"** regains **2d6 + 2 HP**.

Specialist Hireling Rules

Unless a profile says otherwise, all Specialist Hirelings follow **6.15 Hirelings** and these campaign rules:

- A Hireling reduced to **0 HP** is slain, removed from play, and crossed off the **Stronghold** roster.
- A Hireling cannot be equipped from **Storage** unless a specific rule explicitly allows them.
- A Hireling never counts as a Hero for Party Size, **APL**, Boss Scale, enemy or scenario scaling, reinforcement limits, objective scaling, campaign progression, or victory conditions. A specific profile or scenario may still let a Hireling carry or interact with an objective without changing any of those values.

11.2.6 Animal Companions

An **Animal Companion** is a subtype of **Hireling** representing a trained beast, bonded combatant, or other persistent animal ally.

Animal Companions are recruited, rostered, assigned, and limited exactly like any other **Hireling** unless a more specific rule says otherwise. They count against the party's active **Hireling** cap and against their controller's personal **Hireling** limit.

Animal Companions are harder to command than most mortal retainers. For that reason, their **Min SPI** values are often higher than those of similarly priced humanoid **Hirelings**.

All Animal Companions have the **Beast** tag.

Animal Companions use the following additional rules:

- An Animal Companion has **2 AP** each round unless their profile says otherwise.
- An Animal Companion activates during the **Party Phase** like any other allied combatant.
- An Animal Companion cannot use normal equipment unless a rule explicitly says otherwise.
- An Animal Companion cannot open doors, pull levers, carry treasure, take **Interact** actions, or carry, claim, or score scenario markers unless their profile explicitly allows it.
- An Animal Companion does not gain Levels.
- An Animal Companion reduced to **0 HP** is slain, removed from play, and crossed off the **Stronghold** roster.
- An Animal Companion is affected by any rule that targets a combatant with the **Beast** tag.
- Unless a rule says otherwise, an Animal Companion has **0 CV** when removed from play.

If a class feature, item, or campaign reward grants an Animal Companion, add that model to the party's **Stronghold** roster unless that rule says otherwise.

Animal Companion Roster

All Animal Companions in this roster have **0 CV**. The listed **Cost** is the amount paid to recruit that companion during the **Town Phase**.

Pack Mule
Min SPI 2 Cost 16c SPD 6" Sz M HP 10 AV 0
Attack **Hooves: 1d4 blunt damage**
Special Abilities: **Burden Bearer:** May use **Interact** to pick up, carry, transfer, drop, and extract one treasure chest, relic, or other bulky objective as though they were a **Hero**. This permission does not allow them to control or score any other objective. **Sure-Footed:** Ignore **Difficult Terrain** while carrying an objective. Cannot take the **Hide** action.

War Hound
Min SPI 3 Cost 32c SPD 8" Sz M HP 9 AV 1
Attack **Bite: 1d6 + 1 piercing damage**
Special Abilities: **Pack Hunter:** Roll the base damage die with **Advantage** if an allied combatant is adjacent to the target. **Scout:** May make a free **3" Move** before **Round 1** begins.

Hawk
Min SPI 4 Cost 32c SPD 10" Sz S HP 5 AV 0
Attack **Talons: 1d4 + 1 slashing damage**
Special Abilities: **Small. Fly (10"). Keen Eyes:** This companion may use **Spot** and gains **Advantage** on **Spot Checks** made against **Hidden** enemies within **8"**.

Wild Boar
Min SPI 5 Cost 52c SPD 7" Sz M HP 13 AV 2
Attack **Tusks: 1d8 + 1 blunt damage**
Special Abilities: **Charge:** If the Boar moved at least **4"** in a straight line before this attack, deal an additional **3 damage of that attack's primary damage type. Stubborn:** This companion cannot be moved by an effect that would push it **1"** or less.

Venomous Snake
Min SPI 5 Cost 44c SPD 6" Sz S HP 6 AV 0
Attack **Bite: 1d4 + 1 piercing damage**
Special Abilities: **Small. Venom:** If this attack deals damage, the target becomes **Poisoned [d4]**. **Slither:** Ignore **Difficult Terrain**. **Low Profile:** Enemy ranged weapon attacks against this companion roll their base damage dice with **Disadvantage** unless the attacker is within **6"**.

Dire Wolf
Min SPI 5 Cost 48c SPD 8" Sz M HP 11 AV 1
Attack **Bite: 1d8 + 1 piercing damage**
Special Abilities: **Pack Hunter:** Roll the base damage die with **Advantage** if an allied combatant is adjacent to the target. **Knockdown:** When this attack

deals damage, the target must pass a **STR Check** or become **Prone**.

Wolverine
Min SPI 6 **Cost** 56c **SPD** 7" **Sz** S **HP** 12 **AV** 1
Attack **Claws: 1d6 + 2 slashing damage**
Special Abilities: **Small. Savage Grip:** Gain **+2** damage against **Prone** targets. **Stubborn:** This companion cannot be moved by an effect that would push it **1"** or less.

Lynx
Min SPI 6 **Cost** 44c **SPD** 9" **Sz** S **HP** 8 **AV** 1
Attack **Claws: 1d8 + 1 slashing damage**
Special Abilities: **Small. Pounce:** If the Lynx moved at least **4"** before this attack and ends adjacent, the target chooses either a **STR Check** or a **DEX Check**. On a failure, the target becomes **Prone**.

Leopard
Min SPI 7 **Cost** 76c **SPD** 10" **Sz** M **HP** 11 **AV** 1
Attack **Claws: 2d6 + 1 slashing damage**
Special Abilities: **Ambush Predator:** Roll the base damage dice with **Advantage** against a target that was not within **LOS** at the beginning of this companion's activation. **Pounce:** If the Leopard moved at least **4"** before this attack and ends adjacent, the target chooses either a **STR Check** or a **DEX Check**. On a failure, the target becomes **Prone**.

Bear
Min SPI 8 **Cost** 104c **SPD** 6" **Sz** M **HP** 19 **AV** 2
Attack **Maul: 2d6 + 2 blunt damage**
Special Abilities: **Durable:** The first time each adventure this companion would be reduced to **0 HP**, leave it on **1 HP** instead. **Savage Grip:** Gain **+2** damage against **Prone** targets.

Lion
Min SPI 8 **Cost** 96c **SPD** 9" **Sz** M **HP** 15 **AV** 2
Attack **Maul: 2d6 + 1 slashing damage**
Special Abilities: **Charge:** If the Lion moved at least **4"** in a straight line before this attack, deal an additional **3 damage of that attack's primary damage type. Pounce:** If this attack deals damage after such a move, the target chooses either a **STR Check** or a **DEX Check**. On a failure, the target becomes **Prone**.

Companion Control and Replacement

An Animal Companion always has a controlling **Hero**, as any other **Hireling** does.

If a controlling **Hero** dies, retires, is removed from play, or otherwise ceases to be a legal controller, reassign that Animal Companion to another allied **Hero** immediately after the current action or effect resolves if doing so is legal. If no legal controller is available, remove that Animal Companion from the battlefield. An Animal Companion removed only for lacking a legal controller remains on the Stronghold roster if it was not slain.

If an Animal Companion is slain, they are lost permanently unless a specific rule says otherwise. You may recruit a replacement normally during a later **Town Phase**.

11.3 Building the Stronghold

A competitive campaign uses the **Stronghold** race in **11.1.1 Campaign Goal**. A **Stronghold** has **10** available **Components**. The cost of a Component depends on how many Components your party has already completed, not on which Component you choose.

Components already completed	Cost of the next Component
0	130c
1	170c
2	210c
3	250c
4	290c
5 or more	290c

Completing 5 different Components therefore costs **1050c** in total. In a campaign that continues past **Triumph**, each further Component costs **290c**.

You may purchase any **Component** during the **Town Phase** if you have the coins to do so. Purchasing a **Component** costs **1 TAP**, and you may purchase no more than **1 Component** during the same **Town Phase**.

If one party purchases its **fifth different** Stronghold Component during a Town Phase, finish both parties' current Town Phase. That party then achieves **Triumph** and the campaign ends. If both parties purchase their fifth different Component during the same Town Phase, both achieve **Triumph** and the campaign ends in a shared victory.

If the campaign continues after **Triumph**, a party may continue improving its **Stronghold**. Each completed **Component** grants 1 permanent campaign benefit.

A **Vault Reserve** is temporary spending power. It can be spent only during the **Town Phase** in which it is gained. It is not added to the **Treasury**, cannot be saved, and cannot be used for costs outside its listed categories. An item purchased using a **Vault Reserve** cannot be sold.

The Vault

The Vault is not a treasury. It is a sealed confession of greed, iron-bound and watched by clerks who sleep in shifts. They count each coin as if the dead might come back to collect.

Parties build the Vault below ground, behind murder-holes, false doors, and oath-locked chests. In the Dying Lands, wealth is not owned until it has survived the night.

Cost: See the Component Cost table in **11.3**.

Benefit: During each **Town Phase**, gain a **Vault Reserve** of **20c**. During that **Town Phase**, you may spend this reserve on equipment, items, Hirelings, and services. It cannot pay Training Costs, Retirement Payouts, or **Stronghold Components**. Unspent reserve is lost at the end of the **Town Phase**.

The Barracks

The Barracks smell of straw, old sweat, damp wool, and boiled leather. Names are carved into the beams by people who expected to return. Few are still spoken.

A completed Barracks gives a party bodies, discipline, and replacements before grief has finished its work. The Bastions call this resilience. Adventurers call it another chance to bleed.

Cost: See the Component Cost table in **11.3**.

Benefit: Once during each **Town Phase**, when a Hero uses **Train [1 TAP]**, reduce that Training Cost by **10c**.

The Armoury

The Armoury smells of oil, wet leather, coal smoke, and old violence. Its walls hold blades recovered from drowned shrines, shields hammered flat after dragon-fire, and helms whose former owners are better left unnamed.

A party with an Armoury does not look safe. It looks prepared. In the Dying Lands, that is close enough to hope.

Cost: See the Component Cost table in **11.3**.

Benefit: At the start of each adventure, choose 1 Hero in your Active Party. Choose one equipped mundane weapon or **Chest** armour; it gains **Enchanted +1** until the end of that adventure. Alternatively, choose one equipped mundane shield; it gains **Masterwork** until the end of that adventure.

The Apothecary

The Apothecary is built around heat, glass, knives, bone saws, and the bitter stink of herbs that should not grow in clean soil. Its shelves hold tinctures from The Mire, salts from the Sun-Drowned, and poultices learned from surgeons paid in secrets.

No one leaves untouched. The fortunate leave with scars closed. The unlucky leave with something inside them quieted rather than cured.

Cost: See the Component Cost table in **11.3**.

Benefit: Once per adventure, when a Hero in your Active Party would gain a Wound, ignore that Wound.

The Outer Walls

The Outer Walls declare that the dark must work harder. Stone, timber, ditch, spike, and warding nail stand between the party's claim and the things that circle after sundown.

No wall in the Dying Lands is permanent. A completed wall only means the first wave breaks against something other than the door.

Cost: See the Component Cost table in **11.3**.

Benefit: When your party rolls on a **Journey Table**, roll twice and choose either result.

The Arcanum

The Arcanum rises too thin and too tall. Its upper windows burn at hours when honest fires should be dead. Brass instruments turn toward storms, old constellations, and places where the sky has not healed.

Every Bastion mistrusts an Arcanum. Every party that owns one learns why, then keeps using it anyway.

Cost: See the Component Cost table in **11.3**.

Benefit: Once per adventure, after a Hero in your Active Party fails a **Casting Check**, they may reroll that Check. They must use the new result.

The Stronghold Chapel

The Chapel is small, cold, and crowded with votive offerings from those who survived by inches. Its saints are chipped. Its relics are suspect. Its candles burn low even when no wind enters.

The Chapel does not promise salvation. It gives the desperate a place to kneel before they return to the roads that nearly killed them.

Cost: See the Component Cost table in **11.3**.

Benefit: Once during each **Town Phase**, one Hero may take **Chirurgeon's Care [1 TAP]** without paying its Coin cost.

The War Room

The War Room is where contracts are signed, debts are denied, and maps are stained. Its hearth burns beneath banners taken from ruins, enemies, and dead patrons.

A party with a War Room becomes visible. Petitioners arrive. Rivals take note. Every whispered bargain begins to sound like law.

Cost: See the Component Cost table in **11.3**.

Benefit: Your party gains **+2 Initiative Bonus**.

The Expedition Hall

The Expedition Hall is packed earth, split posts, blunted steel, blood in the mud, and shouted correction from veterans with no patience for heroic stupidity. New recruits learn quickly that courage is not a defence.

A party with an Expedition Hall turns survival into doctrine. The first lesson is how to fall. The second is how to stand before the thing that made you fall reaches you.

Cost: See the Component Cost table in **11.3**.

Benefit: Heroes in your Active Party gain **+1" Speed**.

The Undercroft

The Undercroft is a warren of cellars, sealed drains, hidden doors, and passages older than the Stronghold above it. Smugglers, informants, and quiet killers all find reasons to know its shape.

No one admits how deep it goes. Each year another blocked stair is uncovered. Each year the party decides not to ask who carved it.

Cost: See the Component Cost table in **11.3**.

Benefit: After deployment, choose 1 Hero in your Active Party. That Hero may **Shift 3"**, then becomes **Hidden** if they are eligible to **Hide**.

11.4 Legendary Veterans

A Hero that **Retires** at **Level 10** becomes a **Legendary Veteran** in addition to producing their normal **Retirement Payout**. Record that Legendary Veteran as unassigned. It cannot be assigned during the **Town Phase** in which it is created. Beginning with the party's next **Town Phase**, assign it to one completed Stronghold Component. If no completed Stronghold Component is available, it remains unassigned and may be assigned during a later **Town Phase** after a Stronghold Component is completed.

Each completed Stronghold Component can have only 1 assigned Legendary Veteran. Once assigned, a Legendary Veteran cannot be reassigned.

A **Legendary Veteran** grants the benefit listed for their assigned **Stronghold Component**. This benefit is gained in addition to the **Component**'s normal benefit. Where a Veteran benefit states an improved value with **instead of**, use the improved value in place of the Component's printed value.

Stronghold Component	Legendary Veteran Benefit
The Vault	**Master of the Treasury:** Your **Vault Reserve** is **40c** instead of **20c**.
The Barracks	**Drillmaster of the Old Guard:** Once during each **Town Phase**, when a Hero uses **Train** [**1 TAP**], reduce that Training Cost by **20c** instead of **10c**. When a Hero uses **Retrain** [**1 TAP**], they may replace any number of eligible **Class Talents** and **General Talents** instead of 1. Pay the Retrain cost once.
The Armoury	**Keeper of Relics:** Choose up to **2 Heroes** instead of 1 when applying the Armoury's benefit.
The Apothecary	**Physician of Last Resort:** Each Hero in your Active Party may ignore the first Wound they would gain during each adventure.
The Outer Walls	**Warden of the Threshold:** When your party rolls on a **Journey Table**, roll **4 times** instead of twice and choose 1 result.
The Arcanum	**Archmage of the Arcanum:** You may use the Arcanum's benefit once per round instead of once per adventure.
The Stronghold Chapel	**Saint of the Hearth:** Heroes pay no Coin cost when using **Chirurgeon's Care**.
The War Room	**Marshal of the Campaign:** Your party gains **+4 Initiative Bonus** instead of **+2**.
The Expedition Hall	**Master of Expeditions:** Heroes in your Active Party gain **+2" Speed** instead of **+1" Speed**.
The Undercroft	**Master of Whispers:** The chosen Hero may **Shift 8"** instead of **3"**.

11.5 Solo and Cooperative Campaign Adjustments

Use this section for **solo** and **cooperative** campaigns.

11.5.1 Campaign Length and Party Structure

A solo or cooperative campaign lasts until the party wins the **Triumph Finale**, loses the **Triumph Finale**, or records **4 permanent Hero deaths**. Record a permanent death when a retained death record is discarded because the Hero was not resurrected before the next adventure. A Hero returned to life before then does not increase this total.

- The allied party fields **1–4 Heroes**.
- **Hirelings** may be recruited and used normally under the core Hireling rules.
- In solo and cooperative campaigns, purchasing Stronghold Components grants the normal benefits, but the campaign does not end early when the fifth Component is purchased.

Eligibility and resolution for the **Triumph Finale** are defined in **11.5.4**. If the party records its fourth permanent Hero death before attempting the Finale, the campaign ends in defeat. If the party loses the Finale, the campaign ends in defeat. Do not resolve **Journey Home**, Aftermath rewards, or a further **Town Phase** after a lost Finale unless the **Triumph Objective** explicitly says otherwise.

11.5.2 Reward and Economy Adjustments

Solo and cooperative campaigns use the outcome grades in **10.5.10** and the reward-banking rules in **10.5.11**.

In addition:

- any reward tied to defeating a boss is lost if no allied Hero escapes,
- treasure taken from the battlefield must still be extracted to count,
- and any discount or boon granted by a **Journey Table** result applies before normal Town spending begins.

11.5.3 Solo and Cooperative Campaign Generation

Prepare each adventure using **10.5.2 Solo and Cooperative Setup Checklist**. During **Aftermath**, resolve **Journey Home** before entering the **Town Phase**.

If the result matches the Core Scenario used for the immediately preceding adventure, reroll once and use the new result even if it repeats.

11.5.4 Triumph Finale

In solo and cooperative campaigns, the **Triumph Finale** is the final expedition of the campaign. The party may attempt the Finale once they have completed any **5** different Stronghold Components and the Active Party has **APL 9–10**.

The Triumph Finale uses:

- **1 Triumph Boss**
- **1 Triumph Objective**
- **1 Weather result**
- **1 Awake support Monster Group** generated for the party's starting Party Size

Ignore normal Secondary Objectives during the Triumph Finale unless a specific Triumph Objective says otherwise.

Triumph Setup

1. **Battlefield:** Use a standard **36"×36"** battlefield.
2. **Edges:** The party chooses one battlefield edge as the **South** edge. The opposite edge is **North**; the remaining edges are **East** and **West**.
3. **Climate, Terrain, and Weather:** Choose or randomly determine the Finale's Climate and one Core Scenario from that Climate using **10.1.1 Climate and Core Scenario Selection**. Use only that scenario's **Battlefield and Terrain** instructions; ignore its other rules. Then roll **1d6** on that Climate's Weather Table and apply the result.
4. **Boss and Objective:** Roll **1d20** on the Triumph Boss table and **1d10** on the Triumph Objective table. On a Boss result of **16–20**, the party chooses any Boss entry from the table. The Boss forms **Monster Group 1**, begins **Awake**, and has Boss Scale determined under **9.7 The Bestiary**. Place the Boss in the centre or nearest legal space unless the objective's Setup rule changes, splits, or delays Boss placement. Then place the objective's remaining elements as instructed.
5. **Deployment:** All Heroes and active Hirelings deploy within **3"** of the **South** edge.
6. **Support Monsters:** Generate and deploy **1 Awake support Monster Group** as described under **Triumph Support**.
7. **Begin Play:** Begin Round 1 with the **Initiative Phase**. Do not roll **PvE Initiative** for Round 1: the **Party Phase** happens first unless a specific Triumph Objective says otherwise.

Triumph Support

Every Triumph Finale generates exactly **1 Awake support Monster Group**. Generate the Group on the Finale Climate's random Monster table for the party's APL band, using the column for the party's starting Party Size. It is **Monster Group 2**. Place it at the midpoint of the North edge, using the nearest legal spaces that are at least **8"** from every allied combatant and **6"** from the Boss where possible. It uses the normal Monster AI rules.

Triumph Minions

When a Triumph Objective places one or more **Triumph Minions**, roll once on the row for the Finale Climate to determine the Monster type for that placement event. Place the listed number of that Monster. All Triumph Minions placed by the same Triumph Objective belong to one Monster Group. Assign that Group the next available group number when the objective first places a Triumph Minion. Record that number for the rest of the Finale, and add later Triumph Minions from that objective to the same Group even if none of its earlier Monsters remain. Follow **Monsters Placed After Setup** in **Section 10**. Every Triumph Minion is **Awake**, hostile to the party, and uses its canonical bestiary profile.

If an objective's simultaneous or cumulative Minion limit would be exceeded, place as many Minions as possible without exceeding either limit and ignore the excess.

Finale Climate	Roll	Triumph Minion
Greenmark	1d3	1 = Goblin; 2 = Beastman; 3 = Briarling
Ashlands	1d3	1 = Undead Warrior; 2 = Ghoul; 3 = Possessed Corpse
Undermarches	1d3	1 = Kobold; 2 = Cave Goblin; 3 = Giant Bat
Pale City	1d4	1 = Frozen Skeleton; 2 = Snow Goblin; 3 = Ratkin Scavenger; 4 = Frost Ghoul
Sun-Drowned	1d2	1 = Fire Beetle; 2 = Skeleton Warrior
The Mire	1d4	1 = Bogling; 2 = Swamp Goblin; 3 = Zombie; 4 = Stirge

Triumph Boss Rules

Use the complete **Boss** rules and profiles in **9.7 The Bestiary**, including Boss Scale, control protections, rewards, and **Relentless Assault**. If an objective delays the Boss's placement, the Boss cannot use **Relentless Assault** before being placed.

When selecting a **Primary Target**, a Triumph Boss uses these priorities before its printed priorities:

1. **Objective Pressure:** A legal Hero carrying a required scenario objective, or the legal Hero who most recently resolved a required scenario action this round, while in the Boss's **LOS**. If more than one qualifies, choose the nearest, then the one with the lowest current HP, then use **Random Determination**.
2. **Vengeful Focus:** The last legal Hero to damage the Boss. This priority lasts until another Hero damages the Boss or that Hero is no longer a legal target.
3. The Boss's printed target priorities and normal Monster AI tie-breakers.

Triumph Success and Failure

At setup, determine the **Required Extractors**: half the starting Party Size, rounded up, minimum **1**. Unless an objective states a different edge or requirement, every instruction to "extract at least half the party" means the Required Extractors must leave through the **North** edge after the other Victory requirements are complete.

Victory: The party wins the Triumph Finale only if it completes the rolled Triumph Objective and satisfies that objective's extraction requirement.

Defeat: The party immediately loses if all Heroes are dead, all Heroes are **Knocked Out** with no legal recovery remaining, or the Triumph Objective's fail condition is met. The **Triumph Finale** has no round limit unless the rolled objective explicitly defines one. The Finale ends only when the party achieves the listed **Victory** condition or one of the listed **Defeat** conditions resolves. In a solo or cooperative campaign, losing the **Triumph Finale** ends the campaign in defeat. Do not return to the **Town Phase** after a lost **Triumph Finale**.

At the end of any round, the party may concede the Triumph Finale. Conceding is a **Defeat** and ends the campaign under the same rules.

Triumph Objective Table

Roll **1d10**.

Ward-Pillars, Chests, Portal Gates, Beacons, and Altars in this table are scenario objects, not combatants. They cannot take actions or Reactions, gain conditions, or be moved or healed unless their objective says otherwise. If an objective gives an object HP and AV, attacks and damaging effects may target it as though it were visible; it automatically fails any Check it is required to make.

1. The Arcane Anchors

Objective Scaling: Use the printed Ward-Pillar count for the party's starting Party Size.

Level Scaling: Ward-Pillar statistics are fixed. The Boss and support Monsters use the normal Triumph Finale rules.

Reinforcement Limit: This objective creates no reinforcements.

Setup: Place Ward-Pillars equally spaced around the centre, each at least **8"** from the Boss.

- **1 Hero:** 1 Pillar
- **2 Heroes:** 2 Pillars
- **3 Heroes:** 3 Pillars
- **4 Heroes:** 4 Pillars

Each Pillar has **40 HP** and **AV 2**.

Special Rules: The Boss is immune to all damage and conditions while any Pillar remains intact.

Victory: Destroy all Pillars, then slay the Boss, then extract at least half the party.
Failure: This objective has no round-based failure condition. The party loses only through the defeat conditions in **Triumph Success and Failure**.

2. The Endless Tide

Objective Scaling: Reinforcement counts and limits use the party's starting Party Size.

Level Scaling: The Boss and support Monsters use the normal Triumph Finale rules.

Reinforcement Limit: No more than **2 × Party Size** Minions placed by this objective may be on the battlefield at the same time, and this objective can place no more than **3 × Party Size** Minions during the Finale.

Setup: Standard.

Special Rules: The Boss cannot be reduced below **1 HP** before the end of Round 8. At the start of each Monster Phase, place Triumph Minions equal to the starting Party Size at a randomly determined battlefield edge. Apply this objective's **Reinforcement Limit**.

Victory: Survive through the end of Round 8, then extract at least half the party via the North edge by the end of Round 10.
Failure: If fewer than the **Required Extractors** remain able to extract, or if the extraction requirement is not met by the end of Round 10, the party loses.

3. The Artifact Extraction

Objective Scaling: Use the printed Chest count for the party's starting Party Size.

Level Scaling: Chest interactions use the printed Check. The Boss and support Monsters use the normal Triumph Finale rules.

Reinforcement Limit: This objective creates no reinforcements.

Setup: Place sealed Chests along the battlefield midline.

- **1 Hero:** 2 Chests
- **2 Heroes:** 3 Chests
- **3 Heroes:** 4 Chests
- **4 Heroes:** 5 Chests

Interact [1 AP]: Open a Chest. Make an **INT Check**.
Success: The Chest opens.
Failure: The Chest remains closed.

If **2 or more** Chests remain unopened after a Chest is opened, that Chest is empty. When a Chest is opened and exactly **1** Chest remains unopened, roll **1d6**. On **1–5**, the just-opened Chest contains the Artifact. On a **6**, the final unopened Chest contains the Artifact.

A Hero carrying the Artifact drops it in the nearest legal space if reduced to **0 HP**.

Victory: Recover the Artifact and extract it via the North edge.
Failure: The party loses through the defeat conditions in **Triumph Success and Failure**, or if no Hero can legally reach, carry, or extract the Artifact.

4. The Gauntlet

Objective Scaling: Use the printed Elite count for the party's starting Party Size. Do not generate the Triumph support Monster Group.

Level Scaling: Generate each Elite independently by rolling on the **APL 9–10** band of the Finale Climate's Random Monster Table and using the **4 Heroes** column, regardless of Party Size, until the result contains at least one Elite. Randomly select one Elite from that result. Duplicate results and duplicate Elite names are allowed for this objective. The Boss uses the normal Triumph Finale rules.

Reinforcement Limit: This objective creates no reinforcements after setup.

Setup: Do not deploy the Boss at setup. Instead deploy Elite enemies.

- **1 Hero:** 1 Elite
- **2 Heroes:** 2 Elites
- **3 Heroes:** 3 Elites
- **4 Heroes:** 4 Elites
- If 1 Elite is placed, place it at the midpoint of the North edge.
- If 2 Elites are placed, place one at the midpoint of the East edge and one at the midpoint of the West edge.
- If 3 Elites are placed, place one at the midpoint of each of the North, East, and West edges.
- If 4 Elites are placed, use the 3-Elite placement, then place the fourth at one of the two North corners, determined randomly.

All Elites placed by this objective form **Monster Group 1** and begin **Awake**.

Special Rules: When the final Elite is slain, immediately deploy the Boss in the centre or nearest legal space. The Hero activation during which the Boss is deployed does not trigger **Relentless Assault**.

Victory: Slay the Boss, then extract at least half the party.
Failure: The party loses only through the defeat conditions in **Triumph Success and Failure**.

5. Collapse the Portal

Objective Scaling: Use the printed Portal Gate count for the party's starting Party Size.

Level Scaling: Portal Gate statistics are fixed. The Boss and support Monsters use the normal Triumph Finale rules.

Reinforcement Limit: No more than **2 × Party Size** Minions placed by this objective may be on the battlefield at the same time, and this objective can place no more than **3 × Party Size** Minions during the Finale.

Setup: Place Portal Gates across the centre line.

- **1 Hero:** 1 Gate
- **2 Heroes:** 2 Gates
- **3 Heroes:** 3 Gates
- **4 Heroes:** 4 Gates

Each Gate has **30 HP** and **AV 1**.

Interact [2 AP]: Disrupt a Gate. Make a **SPI Check**.
Success: Destroy the Gate.
Failure: The interaction fails.

Special Rules: At the start of each Monster Phase, if any Gate remains intact, place Triumph Minions equal to the starting Party Size within **2"** of a randomly determined intact Gate. Apply this objective's **Reinforcement Limit**. The Boss gains **+2 AV** while any Gate remains intact.

Victory: Destroy all Gates, then slay the Boss, then extract at least half the party.
Failure: The party loses only through the defeat conditions in **Triumph Success and Failure**.

6. Banish the Shadows

Objective Scaling: Use the printed Beacon count for the party's starting Party Size.

Level Scaling: Beacon interactions use the printed cost. The Boss and support Monsters use the normal Triumph Finale rules.

Reinforcement Limit: This objective creates no reinforcements.

Setup: Place Beacons in a ring around the centre. The battlefield is in total darkness. Maximum **LOS** is **4"** until all required Beacons are lit.

- **1 Hero:** 1 Beacon
- **2 Heroes:** 2 Beacons
- **3 Heroes:** 3 Beacons
- **4 Heroes:** 4 Beacons

Interact [1 AP]: Light an unlit Beacon. The Beacon becomes lit.

Special Rules: The Boss cannot be targeted by ranged attacks while fewer than the required number of Beacons are lit.

Victory: Light all required Beacons, then slay the Boss, then extract at least half the party.
Failure: The party loses only through the defeat conditions in **Triumph Success and Failure**.

7. The Moving Storm

Objective Scaling: None.

Level Scaling: The storm area and damage are fixed. The Boss and support Monsters use the normal Triumph Finale rules.

Reinforcement Limit: This objective creates no reinforcements.

Setup: Place an **Aura 6"** safe area centred on the battlefield.

Special Rules: At the end of each round, the safe area moves **1d6"** using **Random Direction** in **10.1**, stopping its centre at the battlefield edge if necessary. Any allied combatant outside the safe area after it moves suffers **1d10 arcane damage**.

Victory: Slay the Boss, then extract at least half the party.
Failure: The party loses only through the defeat conditions in **Triumph Success and Failure**.

8. Purge the Altars

Objective Scaling: Use the printed Altar count for the party's starting Party Size.

Level Scaling: Altar statistics are fixed. The Boss and support Monsters use the normal Triumph Finale rules.

Reinforcement Limit: This objective creates no reinforcements.

Setup: Place Altars near the battlefield centre.

- **1 Hero:** 1 Altar
- **2 Heroes:** 2 Altars
- **3 Heroes:** 3 Altars
- **4 Heroes:** 4 Altars

Each Altar has **35 HP** and **AV 1**.

Special Rules: The first time each round the Boss ends an activation within **6"** of an intact Altar, roll **3d8**. The Boss heals HP equal to the result multiplied by Boss Scale.

Victory: Destroy all Altars, then slay the Boss, then extract at least half the party.
Failure: The party loses only through the defeat conditions in **Triumph Success and Failure**.

9. The Twin Threat

Objective Scaling: None.

Level Scaling: Divide the rolled Boss's final Max HP as printed below. All other Boss values use the normal Triumph Finale rules.

Reinforcement Limit: This objective creates no reinforcements.

Setup: Split the Boss into Alpha and Omega forms. Both forms belong to **Monster Group 1**, begin **Awake**, and are placed within **6"** of the battlefield centre. Alpha has half the Boss's final Max HP, rounded up. Omega has half, rounded down. Each form otherwise uses the Boss's complete profile. The forms share all Recharge rolls, Recharge states, and limited-use abilities.

Special Rules: The forms collectively use the Boss's normal **Relentless Assault** limit. After each triggering Hero activation, only the next form activates. Alternate the scheduled form after every **Relentless Assault** trigger, beginning with Alpha in Round 1; do not reset this sequence between rounds. If the scheduled form is destroyed, the surviving form activates instead, and the Alpha-Omega sequence still advances normally.

At the start of the **Monster Phase**, only the form due to take the next **Relentless Assault** activation resolves start-of-**Monster Phase** abilities. During the forms' first collective activation each round, only the activating form resolves start-of-activation Special Abilities and **AI Steps**. Later collective activations follow the normal **Relentless Assault** restrictions. If one form is destroyed and the other survives until the end of the round, the destroyed form returns within **2"** of the survivor with **8 × Boss Scale HP**.

Victory: Destroy both forms in the same round, then extract at least half the party.
Failure: The party loses only through the defeat conditions in **Triumph Success and Failure**. A form destroyed during the same round as the other form's destruction does not revive, regardless of which form was destroyed first that round.

10. Defend the Innocent

Objective Scaling: Use the printed Civilian count for the party's starting Party Size.

Level Scaling: Civilian statistics are fixed. The Boss and support Monsters use the normal Triumph Finale rules.

Reinforcement Limit: This objective creates no reinforcements.

Setup: Place Civilians in the centre of the battlefield.

- **1 Hero:** 2 Civilians
- **2 Heroes:** 3 Civilians
- **3 Heroes:** 4 Civilians
- **4 Heroes:** 5 Civilians

Each Civilian is an allied scenario combatant with **5 HP**, **AV 0**, **Speed 4"**, and **Sz M**. Civilians have no AP, take no actions or Reactions, automatically fail Checks, do not count as Heroes or Hirelings, and are legal targets for hostile Monsters. Remove a Civilian from play when they are reduced to **0 HP**.

Special Rules: While any Hero is a legal target for the Boss, a Civilian is not a legal target for the Boss's non-area attacks or effects. The Boss treats the legal Hero nearest to any surviving Civilian as their highest-priority target. If no Hero is a legal target, the Boss treats the nearest surviving Civilian as their highest-priority target. Civilians do not count when a Boss determines the placement of an Area of Effect. They are still affected if the final area covers them. Other Monsters target and affect Civilians normally. At the end of each Party Phase, move each surviving Civilian up to **4"** toward the South edge. A Civilian that leaves the battlefield through the **South** edge is safely escorted: remove them from the battlefield. A safely escorted Civilian counts as a surviving Civilian.

Victory: At least as many Civilians as the starting Party Size survive and the Boss is slain, then extract at least half the party.
Failure: If fewer Civilians than the starting Party Size are alive or safely escorted, the party immediately loses.

Triumph Boss Table

Roll **1d20**. On a result of **16–20**, the party chooses any listed Triumph Boss.

d20	Triumph Boss
1	The Ancient Void Dragon
2	The Hollow Crown of the Ashlands
3	The Last Colossus
4	Avatar of the Old Growth
5	The Broodmother Prime
6	Captain Veyr of the Forsaken
7	The Frost Bailiff Magistrate
8	The Sun-Crowned Prince
9	The Antlered Warden of the Tithe
10	The Voice Beneath the Bells
11	Maelthorn the Verdant
12	Sirrach the Black
13	Visath the White
14	Khorrun the Dracolich
15	Vossegar of the Flooded Cathedral
16–20	Party choice

Each listed Triumph Boss uses its full **Boss** profile in **9.7 The Bestiary**.

Appendix A.

Learn to Play

This appendix teaches the first Heraldry Skirmish game using a reduced setup. It does not replace the full rules. It teaches the core loop of initiative, activations, **AP**, movement, attacks, Reactions, Monster AI, carried objectives, and extraction.

A standard competitive game normally uses **4 Heroes per side** on a **36"×36"** battlefield with a full scenario, a **Secondary Objective**, weather, random Monsters, and full party creation. This introductory skirmish instead uses **2 Heroes per side**, **1** neutral Monster Group, **1** carried objective, and **1 Treasure Chest** on a **24"×24"** battlefield.

In **Grid Mode**, use a **24"×24"** map marked in **1"** squares.

Ignore backgrounds, Hirelings, Summons, weather, Secondary Objectives, campaign rules, and random scenario generation for this first game. Class names identify each Hero's role only. Do not use class talents, ancestry rules, backgrounds, Luck, Powers, or advancement unless they are printed in this section. The full rules in **Sections 2–11** still apply unless this appendix states otherwise.

For this teaching game, do not use the **Injuries Table**. When a Hero is reduced to **0 HP**, they become **Knocked Out**, become **Prone**, drop any carried objective in their current space, and remain at **0 HP** unless restored by a rule.

A.1 Learn to Play At a Glance

Element	Learn-to-Play Rule
Battlefield	**24"×24"** battlefield. In **Grid Mode**, use a **24"×24"** map marked in **1"** squares.
Sides	**2 Heroes** per side.
Neutral Monsters	**4 Dire Wolves**, all **Awake** at the start of the adventure.
Primary Objective	Pick up and extract the **Dispatch Satchel**.
Secondary Treasure	Open the **Treasure Chest** for **1c**.
Round Limit	**4** rounds.
Campaign Rules	Do not use campaign injuries, advancement, Town actions, backgrounds, Hirelings, Summons, weather, or Secondary Objectives.

A.2 What You Need for the First Game

Use the following:

- **1** battlefield measuring **24"×24"**
- **4** Hero miniatures, **2** per side
- **4** Dire Wolf miniatures or suitable stand-ins
- **1 Dispatch Satchel** marker
- **1 Treasure Chest** marker
- **4–6** terrain pieces
- Dice, measuring tools, and markers for **AP**, **HP**, and conditions

Place terrain as follows:

- **1** ruined wall or low ruin, about **3"×3"**, at the centre (**Blocking Terrain**)
- **1** low wall, about **2"×3"**, **4–6"** from the centre on one flank (**Impassable Terrain**)
- **1** patch of rubble, about **3"×3"**, **4–6"** from the centre on the opposite flank (**Cover Terrain** tagged **Difficult Terrain**)
- **2–3** additional scatter pieces, each about **2"×3"** or **3"×3"**, around the middle of the battlefield (**Cover Terrain**)

A.3 Learn-to-Play Parties

Use these fixed Heroes as written. Do not buy equipment, choose backgrounds, or alter these profiles for this teaching game.

For this teaching game, ignore equipment requirements, **DEX Pen**, and **Max Speed**. Use only the damage, **AD**, and traits printed here.

Party A: Road Wardens

Edric, the Road Captain
Class: Fighter
HP: 16 | **Speed:** 5" | **Sz:** M | **NRG:** 0
STR: +3 | **DEX:** +1 | **INT:** 0 | **SPI:** +1

- **Longsword (one-handed with shield):** 1d8 + STR slashing, **Parrying**, **Versatile**
- **3 Throwing Knives:** 1d4 + STR piercing, **Thrown 10"**, **Agile**, **Light**
- **Brigandine:** Chest **AD d8**
- **Heater Shield:** Shield **AD d8**

Mara, the Wayfinder Scout
Class: Rogue
HP: 12 | **Speed:** 6" | **Sz:** M | **NRG:** 0
STR: +1 | **DEX:** +3 | **INT:** +1 | **SPI:** 0

- **Shortbow:** 1d6 + DEX piercing, **Ranged 12"**
- **Dagger:** 1d4 + DEX piercing, **Light**, **Finesse**, **Agile**
- **Gambeson:** Chest **AD d3**
- **Backstab:** The first melee weapon attack during each of your activations against an enemy that is **Prone**, **Weakened**, **Engaged** by 1 of your allies, or without **LOS** to you deals additional damage equal to your **DEX**, using that attack's primary damage type, before mitigation.

Party B: Black Briar Raiders

Varek, the Briar Reaver
Class: Fighter
HP: 15 | **Speed:** 5" | **Sz:** M | **NRG:** 0
STR: +3 | **DEX:** +1 | **INT:** 0 | **SPI:** 0

- **Battleaxe:** 1d8/1d10 + STR slashing, **Cleave**, **Parrying**, **Versatile**
- **Javelin:** 1d6 + STR piercing, **Thrown 6"**, **Agile**
- **Mail Shirt:** Chest **AD d6**

Senna, the Briar Runner
Class: Rogue
HP: 11 | **Speed:** 6" | **Sz:** M | **NRG:** 0
STR: +1 | **DEX:** +3 | **INT:** +1 | **SPI:** 0

- **Shortbow:** 1d6 + DEX piercing, **Ranged 12"**
- **Dagger:** 1d4 + DEX piercing, **Light**, **Finesse**, **Agile**
- **Leather Coat:** Chest **AD d2**

Neutral Monsters: Pack of Dire Wolves

This learn-to-play profile replaces the Bestiary **Dire Wolf** profile in **Appendix A** only.

Dire Wolf
HP: 15 | **AV:** 1 | **SPD:** 8" | **Sz:** M | **LVL:** 2 | **CV:** 0c

- **Bite:** 1d8 + 1 piercing damage.
- **Pack Tactics:** This Monster's attacks roll their base damage dice with **Advantage** while at least one other allied combatant is within the attack's melee distance of the target.
- **Takedown:** When **Bite** damages a target, the target must pass a **STR Check** or become **Prone**. In this teaching game, **Takedown** has no movement requirement.

A.4 Quickstart Scenario: The Broken Courier

A royal courier was cut down on the old road. The satchel still lies beside the body, and a small lockbox has been thrown clear into the brush. Both parties race to seize the dispatches before wolves or rivals claim them.

Primary Objective: Escape with the **Dispatch Satchel**.

Battlefield and Terrain: Use the battlefield and terrain from **A.2 What You Need for the First Game**.

Objective Placement: Place the **Dispatch Satchel** adjacent to the centre ruin. Place the **Treasure Chest 5–6"** from the centre near one flank, but not inside a deployment zone.

Monster Placement: Place **4 Dire Wolves** within **2"** of the **Dispatch Satchel**. They begin **Awake**.

Deployment: Each party rolls **1d20** once, rerolling ties. This is a **Setup Roll-off**. The winning party chooses one short battlefield edge and deploys both Heroes within **4"** of it. The other party deploys within **4"** of the opposite short edge.

Special Rules

Teaching Knockouts: In this introductory scenario, Heroes do not gain **Wounds** and do not roll on the **Injuries Table**. A Hero reduced to **0 HP** becomes **Knocked Out** for the rest of the game.

Dispatch Satchel: A Hero adjacent to the **Dispatch Satchel** may use **Interact [1 AP]** to pick it up if they are not **Engaged**. It is a carried objective. If the carrier is **Knocked Out**, is removed from the battlefield without extracting, or stops being able to carry the **Dispatch Satchel**, place the **Dispatch Satchel** in the carrier's current space.

Treasure Chest: A Hero adjacent to the **Treasure Chest** may use **Interact [1 AP]** to open it if they are not **Engaged**. It grants **1c** immediately, then is removed from play.

Extraction: A Hero carrying the **Dispatch Satchel** must leave the battlefield through any battlefield edge to extract it.

Round Limit: **4** rounds.

Scoring

- Extracted **Dispatch Satchel: 8c**
- Opened **Treasure Chest: 1c**
- Each defeated Dire Wolf: **0c** in this teaching game
- Defeated enemy Heroes grant no **Coin Value** in this teaching game

Victory Conditions: The side with the most total **Coin Value** wins. If one side extracts the **Dispatch Satchel**, the game ends immediately, and that side wins.

Tiebreaker: If both sides have equal **Coin Value** at the end of **Round 4**, the side currently carrying the **Dispatch Satchel** wins. If neither side carries it, the side with more surviving Heroes wins.

A.5 Goal of the Game

In this teaching game, both sides are trying to do three things:

- Pick up and extract the **Dispatch Satchel**
- Open the **Treasure Chest** if it can do so without becoming surrounded
- Keep its Heroes alive long enough to leave with more **Coin Value**

The **Dispatch Satchel** usually decides the game. The **Treasure Chest** is a useful source of extra money, but it is not worth losing the satchel carrier or abandoning the centre of the battlefield.

A.6 Round Structure

Every round follows this sequence:

1. **Initiative Phase**
2. **Party Phase**
3. **Monster Phase**
4. **End of Round**

During the **Initiative Phase**, all Heroes refresh to **3 AP**.

Both sides then roll initiative:

1d20 + Party Leader's INT + Party Leader's SPI

The higher total wins initiative. The winning side chooses whether to act first or second in the **Party Phase**. Acting first helps seize the centre immediately. Acting second can be stronger when contesting the **Dispatch Satchel** after the opposing side commits.

The Party Phase

During the **Party Phase**, each allied combatant may activate **once per round**. Players alternate activating one eligible allied combatant at a time, beginning with the side chosen during the **Initiative Phase**.

An eligible combatant must be on the battlefield, belong to your side, have at least **1 AP** remaining, and not have already activated this round.

When you activate a combatant, they must spend at least **1 AP**. They may spend any remaining **AP** on additional actions, or retain unused **AP** for **Reactions**. Once that combatant has activated, they cannot activate this round again.

A player who has no eligible combatants left must **Pass**. After a side **Passes**, it cannot activate combatants during the remainder of the current **Party Phase**. Its combatants keep unspent **AP** for **Reactions** until the end of the round. Once all sides have **Passed**, the **Party Phase** ends.

The Monster Phase

During the **Monster Phase**, the Dire Wolves activate using the learn-to-play target priority in **A.9 Monster Phase**.

End of Round

Resolve end-of-round effects, end effects that last **until the end of the round**, remove unspent **AP**, then resolve scoring and other end conditions. Begin the next round unless the scenario has ended.

A.7 Hero Activations

When a rule calls for a **Check**, roll **1d20 + relevant ability**. A total of **12 or more** succeeds, and a total of **11 or less** fails. **STR** is used for brute force, resisting bodily effects, and similar physical contests. **DEX** is used for dodging, balance, and delicate physical actions. **INT** is used for perception, searching, Psychic Abilities, and Arcane Spells. **SPI** is used for willpower, leadership, Sorceries, Divine Prayers, and Druidic Rituals. A natural **1** on a **Check** is a **Critical Failure** and always fails. A natural **20** on a **Check** is a **Critical Success** and always succeeds.

When you activate a Hero, choose that Hero, check their current position and available **AP**, then spend **AP** on legal actions in any order. In this teaching game, most activations use only four action types:

- **Move**
- **Attack**
- **Interact**
- **Shift**

A Hero may also save **AP** for Reactions instead of spending all their **AP** during their own activation.

Move [1 AP]: Move up to the Hero's **Speed**.

Attack [1 AP]: Choose a legal target. Weapon attacks roll damage directly. If the attack is legal, roll damage; it is a **Total Miss** only if all retained base damage dice are natural **1s** or a rule says otherwise. Apply defence and other reductions, then reduce **HP**.

Interact [1 AP]: Use a scenario object such as the **Dispatch Satchel** or **Treasure Chest**.

Shift [1 AP]: Shift 1". Shift does not trigger **Reflex Attack** and may leave an enemy melee distance.

A.8 Attacks, Multiple Attacks, and Reactions

When a Hero attacks, resolve the attack in this order:

1. **Declare and verify:** Name the attacker, attack, target, and damage types; confirm range, **LOS**, visibility, **Engagement**, **Cover**, and target legality.
2. **Resolve declaration Reactions:** Resolve redirection and other declaration Reactions, then verify the attack again. Declare the defender's one modifying Reaction, if any.
3. **Roll and build damage:** Generate the complete damage roll: roll and retain base damage dice with **Advantage** and **Disadvantage**, resolve permitted changes or rerolls of retained base dice, determine provisional **Total Miss** and **Critical Hit** results, roll all applicable exploding and other damage dice, and add modifiers by damage type. Before applying consequences, resolve any **Luck** reroll under **2.10** and rebuild the complete roll from the new result. Using only the final result, resolve any **Total Miss** and end the attack if applicable. Otherwise, resolve **Critical Hit** and other after-roll effects at their stated timings, then state the total for each damage type.
4. **Defend and mitigate:** Resolve any chosen **Reaction**, then use **5.1.1 Mitigation Order**.
5. **Apply and finish:** Reduce **HP** by the remaining damage, then resolve any remaining **Critical Hit** effects, conditions, and damage-triggered effects.

Weapon attacks roll damage directly. A Longsword attack, for example, rolls **1d8 + STR**. If Edric rolls **6** on the d8, the attack deals **9 slashing damage** before defence.

AV reduces only **blunt**, **piercing**, and **slashing** damage, regardless of source. Damage of every other type and **HP loss** ignore **AV**. If an attack deals more than one damage type, keep each type separate until mitigation and damage-type modifiers are complete.

Each melee or ranged weapon attack costs **1 AP** unless a rule says otherwise. A Hero may make more than one attack during the same activation if they have enough AP. The second and each later weapon attack that Hero makes during the activation rolls its base damage dice with **Disadvantage** unless a rule says otherwise.

Each combatant may declare only one **Reaction** in response to the same action or effect. For each affected combatant, only 1 **Reaction** may be declared by that combatant or on their behalf to modify how the source resolves against them. A **Reaction** used by the source's controller to modify the source's own roll does not count against that limit. Resolve each **Reaction** at its stated timing.

Prone Reminder: Melee attacks against a **Prone** combatant roll their base damage dice with **Advantage**. Ranged weapon attacks made from more than **2"** away roll their base damage dice with **Disadvantage**. A **Prone** combatant cannot **Block** or **Parry**. A combatant may spend **Stand [1 AP]** to remove **Prone**.

Armour applies on its own. The Reactions in this teaching game are **Dodge**, **Parry**, **Block**, and **Reflex Attack**.

A Hero that spends all AP during their activation cannot use AP-cost Reactions later that round. Their armour **AV** still applies.

Armour: Whenever an attack or effect would deal blunt, piercing, or slashing damage to you, roll your chest **AD**, if any, and add every applicable source of flat AV except shield AV. The total is your AV against that damage. This is automatic, costs no AP, and is not a Reaction.

Dodge [1 AP]: When an attack or other evadable effect targets you, make a **DEX Check**, using a maximum of **+5** from your own DEX. On success, suffer no damage or HP loss from the triggering effect. On failure, resolve the effect normally. On a natural **1**, also become Prone.

Block [1 AP]: When an attack or effect would deal blunt, piercing, or slashing damage to you while you have a shield, roll your shield **AD**, if any, and add its flat AV to the AV you already apply against that damage.

Parry [1 AP]: When a melee attack deals blunt, piercing, or slashing damage to you, roll your parry weapon's normal base damage dice and attack modifier. Compare the parry total to the attack's total damage of every type after **Roll and build damage**, but before mitigation. If the parry total is lower, resolve the attack normally. If it equals or exceeds that damage, you suffer none of the attack's damage; effects that do not require the attack to damage you resolve normally. If any retained parry base damage die shows its maximum value and the Parry succeeds, the attacker suffers a Riposte equal to the parry total and applies AV against it normally. If all retained parry base damage dice are natural **1s**, the Parry fails and the triggering attack ignores all of your **AV**; resolve the attack normally otherwise.

Reflex Attack [1 AP]: When an enemy willingly leaves your melee distance using **Move**, or makes a ranged attack during their activation while within your melee distance, make one melee attack against that enemy with **Disadvantage** on its base damage dice. Resolve a movement trigger before the enemy leaves your melee distance. Declare a ranged trigger before that attack's damage is rolled, then resolve the **Reflex Attack** immediately after that attack and before the enemy takes another action. Shift, forced movement, and ranged attacks made as Reactions do not trigger Reflex Attack.

> **Block Example:** Dire Wolf 1 bites Edric for **7 piercing damage**. Edric's Brigandine **AD d8** rolls automatically for **5**. Edric spends **1 AP** to Block, adding a Heater Shield **AD d8** roll of **3**, for **8 AV** in total. Edric suffers **0 damage**.

> **Parry Example:** Varek attacks Edric with a Battleaxe for **9 slashing damage**. Edric declares Parry with their Longsword and rolls **1d8 + STR** for **9**. The parry total equals the incoming slashing damage, so Edric suffers **0 damage**.

A.9 Monster Phase

Monsters do not choose actions the way players do. They follow AI.

In the full game, a Monster checks any valid **AI Step** ability first, attacks if they are already **Engaged**, otherwise moves toward a valid target and attacks if able, and otherwise moves toward their objective, patrol route, or Guard Point.

In this teaching game, the **4 Dire Wolves** form a single Monster Group and activate in number order, from Dire Wolf 1 to Dire Wolf 4. Each Dire Wolf activates once during the **Monster Phase**. Dire Wolves do not spend **AP**, do not save **AP**, and do not take **Reactions**. A **Knocked Out** Hero is not a valid target for learn-to-play Dire Wolf AI and does not prevent a Dire Wolf from selecting another **Primary Target**. Defeated Monsters are removed from the battlefield.

Resolve each Dire Wolf as follows:

1. If the Dire Wolf is **Engaged**, they attack an **Engaged** non-**Knocked Out** Hero. If more than one **Engaged** Hero is legal, choose the Hero carrying the **Dispatch Satchel**, then the Hero with lower current **HP**, then use **Random Determination** among the tied Heroes.
2. If the Dire Wolf is not **Engaged**, choose their **Primary Target** using the learn-to-play target priority below.
3. The Dire Wolf moves up to **8"** toward their **Primary Target** by the shortest legal route.
4. If the Dire Wolf ends **Engaged** with a Hero, they make one **Bite** attack.
5. If at least one other Dire Wolf is within the **Bite** attack's melee distance of the target, apply **Pack Tactics** to the **Bite** damage roll.
6. If **Bite** deals damage, the target makes a **STR Check**. On a failure, the target becomes **Prone**.

The Dire Wolves use this target priority:

1. Nearest non-**Knocked Out** Hero carrying the **Dispatch Satchel**.
2. Nearest non-**Knocked Out** Hero within **6"** of the battlefield centre.
3. Nearest non-**Knocked Out** Hero.
4. If still tied, the Hero with the lower current **HP**.
5. If still tied, use **Random Determination** among the tied Heroes.

In practice, this means the Dire Wolves surge toward the centre fight and attack the satchel carrier first.

A.10 Objectives, Extraction, and Scoring

Heraldry Skirmish is not won only by defeating enemies. Positioning and objective play matter more than trading damage.

The **Treasure Chest** provides immediate **Coin Value** and is removed upon opening.

The **Dispatch Satchel** must be picked up, carried, and extracted. Reaching it is not enough. If your satchel carrier is **Knocked Out** or is caught in melee, your side usually falls behind.

A.11 Sample Opening: Two Full Rounds of Play

This example begins from the normal learn-to-play deployment and follows the first two rounds of the game. It uses fixed positions and fixed rolls to show the rules procedure.

Initial Positions and Values

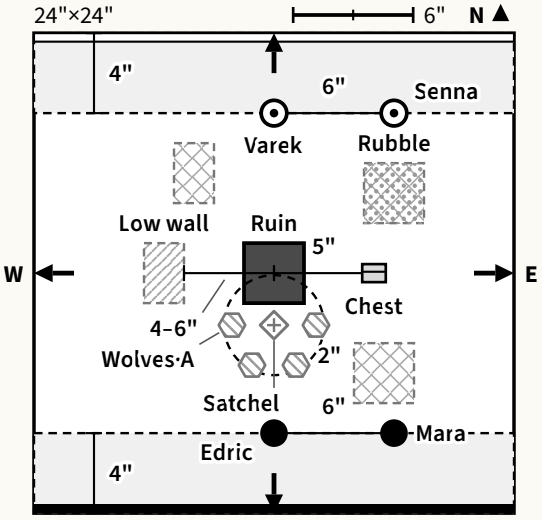
Use the following positions. The battlefield is **24"×24"**. Party A deploys from the south short edge. Party B deploys from the north short edge. The centre point is **12"** from each short edge and **12"** from each long edge.

Element	Starting Position
Dispatch Satchel	Adjacent to the centre ruin.
Treasure Chest	**5"** east of the battlefield centre, outside both deployment zones.
Edric	**4"** from Party A's edge on the centre line.
Mara	**4"** from Party A's edge and **6"** east of the centre line.
Varek	**4"** from Party B's edge on the centre line.
Senna	**4"** from Party B's edge and **6"** east of the centre line.
Dire Wolf 1	**2"** south of the **Dispatch Satchel**.
Dire Wolf 2	**2"** east of the **Dispatch Satchel**.
Dire Wolf 3	**2"** west of the **Dispatch Satchel**, behind the centre ruin from Edric's approach.
Dire Wolf 4	**2"** north of the **Dispatch Satchel**.

After Varek, Dire Wolf 1, and Dire Wolf 2 move into contact during Round 1, the centre ruin leaves no open space for Dire Wolf 3 or Dire Wolf 4 to engage Edric. In **Grid Mode**, use the same relative positions on the nearest legal **1"** squares.

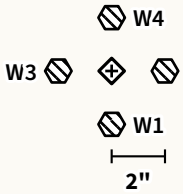
At the start of Round 1, each Hero has **3 AP**. Edric has **16 HP**, Mara has **12 HP**, Varek has **15 HP**, and Senna has **11 HP**. Each Dire Wolf has **15 HP**.

A **Setup and positions (A.4, A.11)**



Schematic. Grey dashed = position not fixed. Satchel and Wolves: one legal arrangement (the ruin side is not stated).

A.11 relative layout (not a position on the board)



W1 to W4 are Dire Wolves 1 to 4: 2" south, east, west and north of the Satchel (A.11). On the board, the ruin leaves no space for W3 and W4 beside Edric.

B **Round 1 as played in A.11 (fixed rolls)**

Initiative: Road Wardens 1d20 = 13, +0 INT, +1 SPI = **14**. Black Briar Raiders 1d20 = 10, +0, +0 = **10**. The Road Wardens win and choose to act first. All Heroes refresh to 3 AP.

Party Phase (activations alternate, Road Wardens first)

1 Edric	Move, Move, Interact: picks up the Dispatch Satchel. With 0 AP left he cannot take Reactions this round.	☒☒☒
2 Varek	Move, Move (Engaged with Edric), Attack with Battleaxe: 1d8 = 6, +3 STR = 9. Edric's Brigandine AD d8 = 4, so Edric takes 9 − 4 = 5 (16 → 11 HP).	☒☒☒
3 Mara	Move, Attack with Shortbow: 1d6 = 4, +3 DEX = 7. Dire Wolf 3 has AV 1: 7 − 1 = 6 (15 → 9 HP). Keeps 1 AP.	☒☒■
4 Senna	Move, Attack with Shortbow: 1d6 = 5, +3 DEX = 8. Mara declares Dodge [1 AP]: 1d20 = 11, +3 DEX = 14. A Check of 12 or more succeeds: Mara takes 0 (her 3 AP are spent). Senna keeps 1 AP.	☒☒■

Monster Phase (Dire Wolves 1 to 4 in order; Edric carries the Satchel)

Wolf 1	Moves into Engagement with Edric and Bites: 1d8 = 5, +1 = 6. AD d8 = 3: Edric takes 3 (11 → 8 HP). STR Check 9 + 3 = 12 succeeds.
Wolf 2	Pack Tactics (Advantage): 4 and 7, keep 7, +1 = 8. AD d8 = 5: Edric takes 3 (8 → 5 HP). STR Check 6 + 3 = 9 fails: Edric is Prone.
Wolves 3, 4	No open space from which to engage Edric: they end as close as possible and do not attack.

End of Round: Senna's 1 unspent AP is removed. Edric: 5 HP, Prone, carrying the Satchel, Engaged by Varek and Dire Wolves 1 and 2.

AP squares: ■ unspent after activation ☒ spent

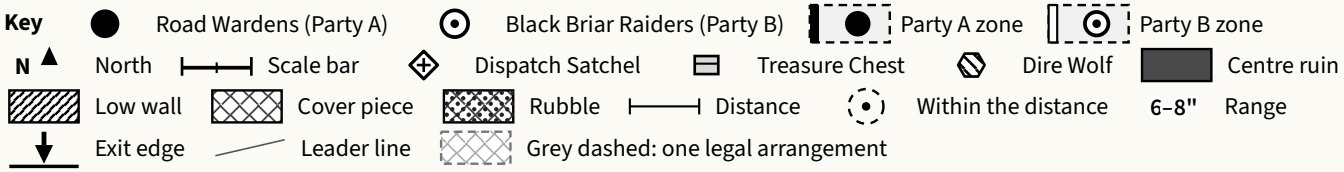


FIG-18. Appendix A starting positions, with the Dispatch Satchel adjacent to the centre ruin, and Round 1 of the sample game. Edric ends the round with 16 − 5 = 11, 11 − 3 = 8 and 8 − 3 = 5 HP after Varek's attack and two Dire Wolf bites; key: FIG-20 (see A.11).

Round 1

Initiative Phase

The Road Wardens roll initiative using Edric as Party Leader [**1d20 = 13, +0 INT, +1 SPI, total 14**]. The Black Briar Raiders roll initiative using Varek as Party Leader [**1d20 = 10, +0 INT, +0 SPI, total 10**]. The Road Wardens win initiative and choose to act first.

Party Phase, Activation 1: Edric

Edric uses **Move [1 AP]** and moves toward the centre. Edric then uses **Move [1 AP]** again and reaches the **Dispatch Satchel**. Edric uses **Interact [1 AP]** to pick it up. Edric has spent all **3 AP**, so if Edric is attacked this round, Edric can use no Reactions, though their armour **AV** still applies.

Edric ends the activation carrying the **Dispatch Satchel** with **0 AP** and **16 HP**.

Party Phase, Activation 2: Varek

Varek uses **Move [1 AP]** and advances toward Edric. Varek uses **Move [1 AP]** again and ends **Engaged** with Edric. Varek then uses **Attack [1 AP]** with the **Battleaxe** against Edric.

Varek's attack rolls damage directly. Varek rolls damage [**1d8 = 6, +3 STR, total 9**]. Edric's **Brigandine AD** rolls automatically [**d8 = 4**]. Edric reduces the damage by **4** and takes **5** damage.

Edric falls from **16 HP** to **11 HP**. Varek has spent all **3 AP** and cannot activate this round again.

Party Phase, Activation 3: Mara

Mara uses **Move [1 AP]** to advance along the flank and gain **LOS** to Dire Wolf 3. Mara then uses **Attack [1 AP]** with the **Shortbow**. The attack rolls damage directly. Mara rolls damage [**1d6 = 4, +3 DEX, total 7**]. Dire Wolf 3 has **AV 1**, so they take **6** damage.

Dire Wolf 3 falls from **15 HP** to **9 HP**. Mara keeps **1 AP** for a possible **Reaction** and cannot activate this round again.

Party Phase, Activation 4: Senna

Senna uses **Move [1 AP]** to gain **LOS** to Mara. Senna then uses **Attack [1 AP]** with the **Shortbow**. Mara declares **Dodge [1 AP]** before Senna rolls damage. Senna's attack rolls damage directly, and Senna rolls damage [**1d6 = 5, +3 DEX, total 8**]. Mara rolls the **Dodge Check** [**1d20 = 11, +3 DEX, total 14**]. Mara succeeds and takes **0** damage.

Mara has spent all **3 AP** for the round. Senna keeps **1 AP** for a possible **Reaction** and cannot activate this round again.

Party Phase, Passing

Both combatants on each side have been activated. Each side passes. Edric, Mara, and Varek have no **AP** remaining. Senna keeps **1 AP** for **Reactions** until the end of the round.

State after Round 1 Party Phase: Edric **11 HP, 0 AP, carrying Dispatch Satchel**; Mara **12 HP, 0 AP**; Varek **15 HP, 0 AP**; Senna **11 HP, 1 AP**; Dire Wolf 1 **15 HP**; Dire Wolf 2 **15 HP**; Dire Wolf 3 **9 HP**; Dire Wolf 4 **15 HP**.

Monster Phase

The Dire Wolves activate one at a time. Edric carries the **Dispatch Satchel**, so Edric is the **Primary Target** for every Dire Wolf that is not already **Engaged**.

Dire Wolf 1 begins close enough to Edric to move into **Engagement**. They move into **Engagement** with Edric and attack with **Bite**. Dire Wolf 1 is not applying **Pack Tactics** yet because no other Dire Wolf is within the **Bite** attack's melee distance of Edric when the attack is made. Dire Wolf 1 rolls damage [**1d8 = 5, +1, total 6**]. Edric rolls **AD** [**d8 = 3**], reducing the damage to **3**. Edric falls from **11 HP** to **8 HP**. Because **Bite** dealt damage, Edric makes a **STR Check** [**1d20 = 9, +3 STR, total 12**] and succeeds. Edric does not become **Prone**.

Dire Wolf 2 moves toward Edric and ends adjacent to Edric and Dire Wolf 1. They attack Edric with **Bite**. Because Dire Wolf 1 is also within the **Bite** attack's melee distance of Edric, **Pack Tactics** applies. Dire Wolf 2 rolls damage with **Advantage** [**1d8 = 4 and 7, keep 7, +1, total 8**]. Edric rolls **AD** [**d8 = 5**], reducing the damage to **3**. Edric falls from **8 HP** to **5 HP**. Because **Bite** dealt damage, Edric makes a **STR Check** [**1d20 = 6, +3 STR, total 9**] and fails. Edric becomes **Prone**.

Dire Wolf 3 has **9 HP** after Mara's arrow. They move toward Edric, but Varek, Dire Wolf 1, Dire Wolf 2, and the centre ruin leave no legal open position from which they can engage Edric this activation. They end as close as possible to Edric and do not attack.

Dire Wolf 4 moves toward Edric by the shortest legal route. They cannot reach a legal open position from which they can engage Edric, and do not attack.

State after Round 1 Monster Phase: Edric **5 HP, 0 AP, Prone, carrying Dispatch Satchel, Engaged by Varek, Dire Wolf 1, and Dire Wolf 2**; Mara **12 HP, 0 AP**; Varek **15 HP, 0 AP**; Senna **11 HP, 1 AP**; Dire Wolf 1 **15 HP**; Dire Wolf 2 **15 HP**; Dire Wolf 3 **9 HP**; Dire Wolf 4 **15 HP**.

End of Round 1

Resolve end-of-round effects, end effects that last **until the end of the round**, remove all unspent **AP**, then check scoring and other end

conditions. Senna loses the **1 AP** kept for Reactions. Edric carries the **Dispatch Satchel**, is **Prone**, has **5 HP**, and is **Engaged** by Dire Wolf 1, Dire Wolf 2, and Varek.

Round 2

Initiative Phase

Both sides refresh their Heroes to **3 AP**. The Black Briar Raiders roll initiative [**1d20 = 15, +0 INT, +0 SPI, total 15**]. The Road Wardens roll initiative [**1d20 = 8, +0 INT, +1 SPI, total 9**]. The Black Briar Raiders win initiative and choose to act first.

Party Phase, Activation 1: Varek

Varek is already **Engaged** with Edric. Edric is **Prone**, so Varek's melee attacks against Edric roll their base damage dice with **Advantage** unless another rule cancels it.

Varek uses **Attack [1 AP]** with the **Battleaxe** against Edric. Edric chooses not to spend **AP** because the Dire Wolves will attack later. Varek rolls damage with **Advantage** [**1d8 = 4 and 5, keep 5, +3 STR, total 8**]. Edric rolls **AD** [**d8 = 6**], reducing the damage to **2**. Edric falls from **5 HP** to **3 HP**.

Varek uses **Attack [1 AP]** a second time. Because this is Varek's second weapon attack during the same activation, Varek's base damage die would have **Disadvantage**. Edric is **Prone**, so the attack also has **Advantage**. **Advantage** and **Disadvantage** cancel, so Varek rolls normally [**1d8 = 4, +3 STR, total 7**]. Edric rolls **AD** [**d8 = 3**], reducing the damage to **4**. Edric falls from **3 HP** to **0 HP** and is **Knocked Out**. Edric drops the **Dispatch Satchel** in their space.

Varek keeps **1 AP** for **Reactions** and cannot activate this round again.

State after Varek's activation: Edric **0 HP, Knocked Out, Dispatch Satchel dropped**; Mara **12 HP, 3 AP**; Varek **15 HP, 1 AP**; Senna **11 HP, 3 AP**; Dire Wolf 1 **15 HP**; Dire Wolf 2 **15 HP**; Dire Wolf 3 **9 HP**; Dire Wolf 4 **15 HP**.

Party Phase, Activation 2: Mara

Mara uses **Move [1 AP]** to reach the **Treasure Chest**. Mara uses **Interact [1 AP]** to open it. The Road Wardens score **1c**, and the **Treasure Chest** is removed from play. Mara keeps **1 AP** for a possible **Dodge** or **Reflex Attack** later this round.

Party Phase, Activation 3: Senna

Senna uses **Move [1 AP]** to close on Mara and ends adjacent to them. Senna then makes a ranged attack with the **Shortbow** while adjacent to Mara.

Because Senna makes a ranged attack while adjacent to Mara, Mara may declare **Reflex Attack [1 AP]**. Mara declares it before Senna rolls damage. Only 1 **Reaction** may respond to the same action, so Mara cannot also **Block** the shot. Senna rolls damage [**1d6 = 4, +3 DEX, total 7**], and Mara falls from **12 HP** to **5 HP**.

Mara then resolves the **Reflex Attack** with their **Dagger** before Senna takes any further action. A **Reflex Attack** rolls its base damage die with **Disadvantage**. Mara rolls damage with **Disadvantage** [**1d4 = 4 and 2, keep 2, +3 DEX, total 5**]. Senna rolls **AD** [**d2 = 1, total 1**], reducing the damage to **4**. Senna falls from **11 HP** to **7 HP**.

Senna has spent **2 AP** and keeps **1 AP** for **Reactions**.

Party Phase, Activation 4: Road Wardens

Edric is **Knocked Out** and cannot activate. The Road Wardens have no eligible unactivated Heroes with **AP** remaining. They pass.

Party Phase, Passing

The Black Briar Raiders pass. All Heroes have either activated, been **Knocked Out**, or passed. The **Party Phase** ends.

State after Round 2 Party Phase: Edric **0 HP, Knocked Out, Dispatch Satchel dropped**; Mara **5 HP, 0 AP**; Varek **15 HP, 1 AP**; Senna **7 HP, 1 AP**; Dire Wolf 1 **15 HP**; Dire Wolf 2 **15 HP**; Dire Wolf 3 **9 HP**; Dire Wolf 4 **15 HP**.

Monster Phase

The Dire Wolves follow their target priority again. No Hero currently carries the **Dispatch Satchel**, and **Knocked Out** Heroes are not valid targets, so each Dire Wolf chooses the nearest non-**Knocked Out** Hero within **6"** of the battlefield centre. Dire Wolf 1 and Dire Wolf 2 are adjacent to Edric, but Edric is **Knocked Out** and does not prevent them from selecting Varek.

Dire Wolf 1 moves around Edric's dropped satchel and attacks Varek with **Bite**. Varek keeps **1 AP** and declares **Dodge [1 AP]**. Dire Wolf 1 rolls damage [**1d8 = 6, +1, total 7**]. Varek rolls **Dodge** [**1d20 = 7, +1 DEX, total 8**] and fails. The attack resolves normally. Varek rolls **AD** [**d6 = 4**], reducing the damage to **3**. Varek falls from **15 HP** to **12 HP**. Because **Bite** dealt damage, Varek makes a **STR Check** [**1d20 = 5, +3 STR, total 8**] and becomes **Prone**.

Dire Wolf 2 is adjacent to Varek and Dire Wolf 1, so **Pack Tactics** applies. Varek is also **Prone**, but multiple instances of **Advantage** do not stack. Dire Wolf 2 rolls damage with **Advantage** [**1d8 = 3 and 8, keep 8, +1, total 9**]. Varek rolls **AD** [**d6 = 6**], reducing the damage to **3**. Varek falls from **12 HP** to **9 HP**. Because **Bite** dealt damage, Varek makes a **STR Check** [**1d20 = 16, +3 STR, total 19**] and remains **Prone** only from the earlier failed **Check**.

Dire Wolf 3 has **9 HP**. They move toward Varek but cannot reach through the scrum. They end as close as possible without attacking.

Dire Wolf 4 moves toward Varek and cannot attack this activation.

State after Round 2 Monster Phase: Edric **0 HP, Knocked Out, Dispatch Satchel dropped**; Mara **5 HP, 0 AP**; Varek **9 HP, 0 AP, Prone, Engaged by Dire Wolf 1 and Dire Wolf 2**; Senna **7 HP, 1 AP**; Dire Wolf 1 **15 HP**; Dire Wolf 2 **15 HP**; Dire Wolf 3 **9 HP**; Dire Wolf 4 **15 HP**.

End of Round 2

Resolve end-of-round effects, end effects that last **until the end of the round**, remove unspent **AP**, then check scoring and other end conditions. The Road Wardens have **1c** from the **Treasure Chest**, but Edric is **Knocked Out** and the **Dispatch Satchel** lies in the centre. Varek is wounded, **Prone**, and under pressure from the Dire Wolves. Mara has damaged Senna, but must now decide whether to recover the **Dispatch Satchel**, finish Senna, or escape with the smaller score from the chest.

This opening shows why Heraldry Skirmish is not merely a damage race. Edric seized the objective quickly, but spending all **3 AP** left them unable to **Dodge**, **Block**, or **Parry**. Varek punished the exposed carrier, the Dire Wolves punished the centre scrum, and Mara earned coins only by taking a flank objective while the main fight collapsed.

A.12 After Your First Game

Keep **1 AP** available when possible, do not carry the objective unsupported, and fight only when the fight improves your position or protects your extraction lane. The flank **Treasure Chest** is useful, but it is secondary to the **Dispatch Satchel** and should not draw both Heroes away from the centre.

Use these habits in your next teaching game:

- Keep **1 AP** unspent when you expect to be attacked.
- Do not send the satchel carrier forward alone.
- Use **Shift** when leaving melee matters more than speed.
- The **Treasure Chest** is extra money. The **Dispatch Satchel** usually decides the game.
- Clear your extraction path before you run for the edge.

After this teaching game, create a standard party and choose any Core Scenario marked **[Intro]** for your first adventure using the full rules. If you prefer another fast game with pregenerated Heroes, use **Appendix B. Basic Mode** instead.

The full game adds **Wounds**, the **Injuries Table**, healing, and death when a Hero reaches **0 HP**; the **Teaching Knockouts** rule applies only to **The Broken Courier** in Appendix A.

Appendix B.

Basic Mode

Basic Mode is a fast-play version of Heraldry Skirmish for first games, demonstrations, conventions, pickup games, and quick matches. It uses pre-generated Heroes, fixed equipment, complete Hero profiles, complete Monster profiles, and a single replayable scenario so players can begin without building parties, choosing Powers, buying items, or preparing a campaign roster.

Basic Mode uses the core rules except where this appendix says otherwise. It does not use campaign advancement, **Town Phase** rules, **Treasury** management, hireling recruitment, treasure tables, random scenario generation, custom party creation, or persistent Wounds. It still uses the full rules for **AP**, activation, movement, attacks, **Reactions**, Powers, **Hidden**, Light, Darkness, Monsters, treasure, Monster Coin Value, and extraction.

Basic Mode uses **2–4 Heroes** per side on a **24"×24"** battlefield. In **Grid Mode**, use a **24"×24"** map marked in **1"** squares. Each allied combatant activates once per round during the **Party Phase**. The game ends after **6 rounds**.

Basic Mode uses three default Monster groups: **Goblins**, **Skeleton Warriors**, and **Bandits**. Each group begins **Resting**. The **Ogre** profile is an advanced replay option.

A **Resting** Monster Group becomes **Awake** if an enemy moves within **6"**, a visible enemy enters their **LOS** within **12"**, the Group suffers damage, an **Explosion**, collapsing terrain, or an effect that a rule describes as loud occurs within **6"**, or a scenario rule wakes them.

B.1 Basic Mode At a Glance

Element	Basic Mode Rule
Battlefield	**24"×24"** battlefield. In **Grid Mode**, use a **24"×24"** map marked in **1"** squares.
Sides	**2–4 Heroes** per side.
Round Limit	**6** rounds.
Default Monster Groups	**Goblins**, **Skeleton Warriors**, and **Bandits**.
Advanced Monster Profile	**Ogre**.
Default Monster State	Each default Monster Group begins **Resting**.
Primary Treasure	**1 Strongbox** worth **12c**.
Secondary Treasure	**3 Satchels**, each worth **4c**. Use **4 Satchels** if using **Advanced Ogre**.
Campaign Rules	Do not use campaign injuries, recovery, income, Town actions, advancement, or persistent Wounds.

B.2 First 10 Minutes of Basic Mode

Use this sequence to quickly start a Basic Mode game.

1. Select a **2v2**, **3v3**, or **4v4** Hero format.
2. Players draft pre-built Heroes from **B.4 Basic Mode Hero Profiles**.
3. Set up the **24"×24"** battlefield and terrain.
4. Place the **Strongbox**, **Satchels**, and **Monster Entry** markers.
5. Place all **4 Goblins**, all **4 Skeleton Warriors**, and all **4 Bandits** at the **Monster Entry** markers, with one complete group and a **Resting** marker at each entry. If using **Advanced Ogre**, also place the **Ogre** as described in **B.7 Basic Mode Replay Variants**.
6. Deploy both parties of Heroes within their deployment zones.
7. Begin **Round 1** with the **Initiative Phase**.

B.3 Basic Mode Components and Drafting

To play Basic Mode, use the following models or standees:

- **4–8 Hero** models
- **4 Goblin** models
- **4 Skeleton** models
- **4 Bandit** models
- **1 Ogre** model for the **Advanced Ogre** variant
- **1 Strongbox** marker
- **3 Satchel** markers
- **3 Monster Entry** markers
- **6** terrain pieces

The Hero profiles in this appendix provide more options than one game uses. Players may draft from the full list and use suitable models as proxies.

Use the following draft sequence:

1. Player A chooses **1 Hero**.
2. Player B chooses **2 Heroes**.
3. Player A chooses **2 Heroes**.
4. Player B chooses **2 Heroes**.
5. Player A chooses **1 Hero**.

With fewer than **8 Heroes**, the draft stops when both parties reach their predetermined maximum number of Heroes.

If a draft step would exceed a party's predetermined maximum, choose only enough Heroes to fill that party.

The rare-ancestry limit in **6.9** does not apply to the Basic Mode draft.

B.4 Basic Mode Hero Profiles

Each Hero is **Level 1**, begins with **3 AP**, **0 Wounds**, current HP equal to **Max HP**, current NRG equal to **Max NRG**, current Luck equal to maximum Luck, and the listed equipment. Each Hero has already chosen **1 General Talent** and **1 Novice Class Talent**. Powers listed on a Hero profile are that Hero's known Powers for Basic Mode. Ancestry, background, class, talent, and static equipment modifiers are already included in each printed Hero profile unless a rule in this appendix says otherwise. Each profile prints its ancestry traits, background rule, weapon trait rules, and full armour profile, so a profile can be used in isolation without cross-referencing the creation chapters. Do not recalculate ability scores, HP, NRG, Speed, Luck, equipment, talents, or Powers from the full Hero creation rules.

When a Hero profile lists a Power, use the full casting rules in **8.2 Casting Powers**, including its metal equipment restrictions. The profile repeats the Power's cost, range, target, and effect so Basic Mode does not require a separate Power reference table.

Darkvision (12") Reminder: Within **12"**, a Hero with **Darkvision** ignores **Cover** and visual penalties caused solely by nonmagical **Darkness** when determining **LOS** to, targeting, or resolving an effect against a combatant, object, space, or area origin. It does not create **Light**, remove **Darkness**, or ignore **Hidden** or **Invisible**. **Magical Darkness** applies normally.

Ironscar

Class: Fighter | **Ancestry and Background:** Dwarf Soldier | **Level:** 1

HP: 19 | **AV:** 0 | **SPD:** 4" | **Sz:** M | **AP:** 3 | **Luck:** 1 | **NRG:** 0 | **Senses:** Darkvision (12")

STR: +4 | **DEX:** +0 | **INT:** +0 | **SPI:** +0

Ancestry Traits

- **Dwarven Resilience: Checks** against poison are rolled with **Advantage**. Reduce poison damage taken by **1**.
- **Heavy Step:** Reduce the magnitude of the **DEX Pen** of equipped Chest armour with **STR Req 4** or higher by **1**; for example, **-3** becomes **-2**.

Background Rule

- **Soldier:** Your first melee attack each round deals an additional **1 damage of that attack's primary damage type**.

Equipment and Items

- **Mace:** Melee weapon, **1d6 + STR blunt damage**, **Parrying**.
- **Heater Shield:** Shield **AD d8** when using **Block**.
- **Mail Shirt:** Chest **AD d6**, **DEX Pen -1**, **Max Speed 7"**. Apply the **DEX Pen** to your **DEX Checks**, including **Dodge**, and to any damage total that adds your **DEX**.
- **Dagger:** Melee weapon, **1d4 + DEX piercing damage**, **Light**, **Finesse**, **Agile**.

Talents, Powers, and Special Rules

- **Bulwark:** While you are equipped with metal Chest armour as defined in **7.2**, increase your **Max HP** by **4**. This HP increase is already included in this Hero profile.
- **Shield Drill:** While you are equipped with a shield, you gain **+1 AV** against melee weapon attacks.

Weapon Trait Rules

- **Parrying:** You may use the **Parry** Reaction with this weapon.
- **Light:** This weapon may be dual-wielded. When attacking with two **Light** weapons, roll the damage dice for each weapon separately. Choose one weapon's total and discard the other. The chosen weapon is the source of the attack: only its damage type, traits, qualities, poison, and other attack effects apply. An attack made with two **Light** weapons counts as a single attack for the multi-attack rule and for the **Off-Hand Weapon** rule (**6.13**).
- **Finesse:** Attacks use your **DEX** modifier instead of your **STR** modifier for damage calculations.
- **Agile:** The second weapon attack you make with this weapon during an activation does not suffer **Disadvantage** from **Multiple Attacks**.

Blackknife

Class: Rogue | **Ancestry and Background:** Human Smuggler | **Level:** 1

HP: 11 | **AV:** 0 | **SPD:** 5" | **Sz:** M | **AP:** 3 | **Luck:** 2 | **NRG:** 0

STR: +1 | **DEX:** +3 | **INT:** +1 | **SPI:** +0

Ancestry Traits

- **Versatile:** At Hero creation, add **+1** to any one ability score. Already included in this profile's scores.
- **Determined Resolve:** When this Hero is reduced to **0 HP**, they may spend **1 Luck Point** to make a **SPI Check** before gaining a Wound. On a success, they remain at **0 HP**, **Knocked Out**, and **Prone**, but do not gain that Wound and do not roll on the **Injuries Table**. This use of **Luck** is not a reroll. This trait cannot prevent **True Death**, a third Wound, or death caused by a rule that causes immediate death. Wounds and the **Injuries Table** are campaign rules; in a standalone Basic Mode game this trait has no effect.

Background Rule

- **Smuggler:** While you are in **Cover**, your **Hide distance** is **0"**.

Equipment and Items

- **Dagger:** Melee weapon, **1d4 + DEX piercing damage**, **Light**, **Finesse**, **Agile**.
- **Leather Coat:** Chest **AD d2**, **DEX Pen 0**, **Max Speed 8"**.
- **Lockpicks: Interact Checks** made to inspect a treasure marker for a trap in the **Traps** variant are rolled with **Advantage**.
- **2 Throwing Knives:** Thrown weapon, **1d4 + DEX piercing damage**, **Thrown 10"**, **Agile**, **Light**.

Talents, Powers, and Special Rules

- **Finesse Strike:** After applying **Advantage** and **Disadvantage** to a melee weapon attack with a **Finesse** weapon, but before determining **Total Miss** or **Critical Hit**, you may add **+1** to one retained base damage die. If this brings that die to its maximum value, the attack is a **Critical Hit** and resolves exploding bonus dice as normal.
- **Backstab:** The first melee weapon attack during each of your activations against an enemy that is **Prone**, **Weakened**, **Engaged** by 1 of your allies, or without **LOS** to you deals additional damage equal to your **DEX**, using that attack's primary damage type, before mitigation.

Weapon Trait Rules

- **Light:** This weapon may be dual-wielded. When attacking with two **Light** weapons, roll the damage dice for each weapon separately. Choose one weapon's total and discard the other. The chosen weapon is the source of the attack: only its damage type, traits, qualities, poison, and other attack effects apply. An attack made with two **Light** weapons counts as a single attack for the multi-attack rule and for the **Off-Hand Weapon** rule (**6.13**).
- **Finesse:** Attacks use your **DEX** modifier instead of your **STR** modifier for damage calculations.
- **Agile:** The second weapon attack you make with this weapon during an activation does not suffer **Disadvantage** from **Multiple Attacks**.
- **Thrown:** This weapon may make a ranged attack out to its listed **Thrown** range. Add the higher of your **STR** or **DEX** modifier to the damage total; if the weapon also has **Finesse**, use **DEX**. Each individual **Thrown** weapon may be thrown once per activation and is recovered at the start of your next activation. On a **Total Miss** (all retained base damage dice are natural **1s**), that individual weapon is lost.

Hearthbell

Class: Cleric | **Ancestry and Background:** Dwarf Soldier | **Level:** 1

HP: 16 | **AV:** 0 | **SPD:** 4" | **Sz:** M | **AP:** 3 | **Luck:** 1 | **NRG:** 9 | **Senses:** Darkvision (12")

STR: +2 | **DEX:** -2 | **INT:** -1 | **SPI:** +4

Ancestry Traits

- **Dwarven Resilience: Checks** against poison are rolled with **Advantage.** Reduce poison damage taken by **1**.
- **Heavy Step:** Reduce the magnitude of the **DEX Pen** of equipped Chest armour with **STR Req 4** or higher by **1**; for example, **-3** becomes **-2**.

Background Rule

- **Soldier:** Your first melee attack each round deals an additional **1 damage of that attack's primary damage type**.

Equipment and Items

- **Mace:** Melee weapon, **1d6 + STR blunt damage**, **Parrying**.
- **Heater Shield:** Shield **AD d8** when using **Block**.
- **Ring Shirt:** Chest **AD d6**, **DEX Pen -2**, **Max Speed 6"**. Apply the **DEX Pen** to your **DEX Checks**, including **Dodge**, and to any damage total that adds your **DEX**.
- **2 Bandages: Interact [1 AP]:** Make an **INT Check**. On a success, remove **Bleeding** from this Hero or 1 adjacent ally. Each Bandage is one use.

Talents, Powers, and Special Rules

- **Inner Light:** You count as a **Light Source** with **Aura 3"**, and increase your **Max HP** by **3**. This HP increase is already included in this Hero profile.
- **Healing Hands:** Whenever you restore HP to one or more allies with a Power or item, each affected ally regains **+2** additional HP.
- **Cleric Orisons [1 AP, 0 NRG]:** Choose one: **Sacred Spark**, range **10"**, target **1 combatant**, deal **1d4 holy damage**; **Sign of Warding**, range **6"**, target self or **1 ally**, that target gains **+1 AV** the next time they apply **AV** this round; or **Lantern of Faith**, range **10"**, target **1 point in space**, an **Aura 5"** area around the target point becomes **Light** until the end of the round, and **Hidden** enemies in that area immediately lose **Hidden**.
- **Healing Touch [1 AP, 1 NRG]: Range:** 1". **Target:** Self or 1 ally. **Effect:** The target regains **1d10 + SPI HP**.
- **Armour of Faith [1 AP, 1 NRG]: Range:** 12". **Target:** Self or 1 ally. **Effect:** The target gains **+2 AV** until the end of the round.

Weapon Trait Rules

- **Parrying:** You may use the **Parry** Reaction with this weapon.

Graveglass

Class: Wizard | **Ancestry and Background:** Gnome Scholar | **Level:** 1

HP: 9 | **AV:** 0 | **SPD:** 5" | **Sz:** S | **AP:** 3 | **Luck:** 1 | **NRG:** 15 | **Senses:** Darkvision (12")

STR: -2 | **DEX:** -1 | **INT:** +6 | **SPI:** +0

Ancestry Traits

- **Small**
- **Gnome Cunning:** Your **INT** and **SPI Checks** made to resist enemy effects that would make you **Blinded**, **Frightened**, **Sleeping**, or **Weakened**, or force your movement, attacks, or target choices, are rolled with **Advantage**.
- **Artificer's Touch: INT Checks** made to **Interact** with, understand, or examine mechanical hazards and devices are rolled with **Advantage**.

Background Rule

- **Scholar:** Your **INT Checks** made to **Interact** with, decipher, or investigate nonmagical objects, inscriptions, clues, and hazards are rolled with **Advantage**.

Equipment and Items

- **Club:** 1d4 blunt damage. One hand. No requirement. No traits.
- **2 Torches:** A carried torch is a **Light Source** with **Aura 3"**.

Talents, Powers, and Special Rules

- **Knowledge:** Add **+2** to your **Casting Checks** for **Tier 0** and **Tier 1** Powers.
- **Arcane Reserve:** Increase your **Max NRG** by **1 + your Level**. The Max NRG increase is already included in this Hero profile.
- **Wizard Cantrips [1 AP, 0 NRG]:** Choose one: **Arcane Dart**, range **12"**, target **1 combatant**, deal **1d4 arcane damage**, and on a **Critical Cast** you may immediately **Shift 1"**; **Mage Hand**, range **8"**, target **1 unsecured object, unlocked door, lever, latch, or similar small interactable element**, interact with the target within **8"** to open or close an unlocked door, pull a lever, lift or place one unsecured object, or perform a similar **Interact** effect at range, but this can never deal damage, make an attack, or complete an objective unless that objective explicitly allows **Mage Hand**; or **Spark Ward**, range self, target self, add **+3 AV** the next time you apply **AV** this round.
- **Arcane Salvo [2 AP, 2 NRG]: Range:** 24". **Target:** 1–3 combatants. **Effect:** Resolve three separate damage instances. Each instance deals **1d4 + 2 arcane damage**. Assign those damage instances among targets in range. Add your **INT** score once to the total damage dealt by this Power, distributed among targets as you choose. **[Empower 1 NRG]:** Resolve one additional damage instance (4 damage instances total).
- **Arcane Bolt [2 AP, 1 NRG]: Range:** 20". **Target:** 1 combatant. **Effect:** Deal **1d12 + INT lightning damage**. **[Empower 1 NRG]:** Increase the die to **2d8**.

Weapon Trait Rules

- **Light:** This weapon may be dual-wielded. When attacking with two **Light** weapons, roll the damage dice for each weapon separately. Choose one weapon's total and discard the other. The chosen weapon is the source of the attack: only its damage type, traits, qualities, poison, and other attack effects apply. An attack made with two **Light** weapons counts as a single attack for the multi-attack rule and for the **Off-Hand Weapon** rule (**6.13**).
- **Trip:** You may use this weapon to take the **Trip** action.

Redhand

Class: Berserker | **Ancestry and Background:** Orc Farmer | **Level:** 1

HP: 19 | **AV:** 0 | **SPD:** 5" | **Sz:** M | **AP:** 3 | **Luck:** 1 | **NRG:** 0 | **Senses:** Darkvision (12")

STR: +4 | **DEX:** +1 | **INT:** -3 | **SPI:** +0

Ancestry Traits

- **Aggressive:** If unengaged at the start of their activation, this Hero may move up to **2"** toward the nearest enemy in **LOS** before taking their first action. This movement is voluntary movement and may trigger **Reflex Attack** normally.
- **Savage Attacks:** On a melee **Critical Hit**, add **+2** to one exploding bonus die. This modifier cannot cause another explosion.

Background Rule

- **Farmer:** Gain **+3 Max HP**. Already included in this profile's HP.

Equipment and Items

- **Greataxe:** Melee weapon, **1d12+1 + STR slashing damage**, **Heavy**, **Cleave**, **Fatal**.
- **Hide Cuirass:** Chest **AD d4**, **DEX Pen -2**, **Max Speed 7"**. Apply the **DEX Pen** to your **DEX Checks**, including **Dodge**, and to any damage total that adds your **DEX**.
- **Dagger:** Melee weapon, **1d4 + DEX piercing damage**, **Light**, **Finesse**, **Agile**.

Talents, Powers, and Special Rules

- **Vicious:** Add **+2** damage to your melee weapon attacks against **Prone** or **Stunned** targets. When a target you successfully **Push** suffers a **Collision**, they lose **1 HP**.
- **Rage:** Your melee weapon attacks deal **+2 damage** while you are below half your **Max HP**.

Weapon Trait Rules

- **Heavy:** A **Small** combatant cannot equip a weapon with this trait. On a **Critical Hit** with this weapon, you may choose to **Push** the target **2"** directly away or make them **Prone**, in addition to the weapon's primary damage type critical effect.
- **Cleave:** After attacking and reducing a target to **0 HP**, you may immediately make a free attack against another target within the attack's melee distance. A free attack granted by **Cleave** may trigger **Cleave** again if it reduces its target to **0 HP**.
- **Fatal:** On a **Critical Hit**, each exploding bonus die triggered by this weapon's retained base damage dice is one size larger than the weapon's base damage die. For example, a **d12** base weapon rolls a **d20** for each such exploding die.
- **Light:** This weapon may be dual-wielded. When attacking with two **Light** weapons, roll the damage dice for each weapon separately. Choose one weapon's total and discard the other. The chosen weapon is the source of the attack: only its damage type, traits, qualities, poison, and other attack effects apply. An attack made with two **Light** weapons counts as a single attack for the multi-attack rule and for the **Off-Hand Weapon** rule (**6.13**).
- **Finesse:** Attacks use your **DEX** modifier instead of your **STR** modifier for damage calculations.
- **Agile:** The second weapon attack you make with this weapon during an activation does not suffer **Disadvantage** from **Multiple Attacks**.

Thornmere

Class: Ranger | **Ancestry and Background:** Human Scout | **Level:** 1

HP: 13 | **AV:** 0 | **SPD:** 5" | **Sz:** M | **AP:** 3 | **Luck:** 2 | **NRG:** 3

STR: +0 | **DEX:** +3 | **INT:** +0 | **SPI:** +1

Ancestry Traits

- **Versatile:** At Hero creation, add **+1** to any one ability score. Already included in this profile's scores.
- **Determined Resolve:** When this Hero is reduced to **0 HP**, they may spend **1 Luck Point** to make a **SPI Check** before gaining a Wound. On a success, they remain at **0 HP**, **Knocked Out**, and **Prone**, but do not gain that Wound and do not roll on the **Injuries Table**. This use of **Luck** is not a reroll. This trait cannot prevent **True Death**, a third Wound, or death caused by a rule that causes immediate death. Wounds and the **Injuries Table** are campaign rules; in a standalone Basic Mode game this trait has no effect.

Background Rule

- **Scout:** During each **Move**, ignore the first **1"** of additional movement cost imposed by **Difficult Terrain**.

Equipment and Items

- **Shortbow:** Ranged weapon, **1d6 + DEX piercing damage**, **Ranged 12"**.
- **Elven Sickle:** Melee weapon, **1d6 + STR slashing damage**, **Elven**, **Light**, **Trip**. This weapon does not count as metal for the restrictions in **8.2**.
- **Leather Coat:** Chest **AD d2**, **DEX Pen 0**, **Max Speed 8"**.

Talents, Powers, and Special Rules

- **Keen Shot:** After applying **Advantage** and **Disadvantage** to a ranged weapon attack that deals **piercing** damage, but before determining **Total Miss** or **Critical Hit**, you may add **+1** to one retained base damage die. If this brings that die to its maximum value, the attack is a **Critical Hit** and resolves exploding bonus dice as normal.
- **Hunter's Mark [0 AP, 1 NRG]:** Choose one visible enemy within **12"**. The first attack or damaging Power you resolve against that target during each of your activations deals **2 additional damage of its primary damage type before mitigation**. The mark lasts until you choose a new target or the target leaves play.
- **Ranger Minor Rituals [1 AP, 1 NRG]:** Choose one: **Thorn Shot**, range **12"**, target 1 combatant, deal **1d8 + SPI piercing damage**; the target must pass a **STR Check**, or be **Pulled 1"** directly toward you; **Trail Sign**, range **8"**, target 1 point on the ground, create an **Aura 3" Difficult Terrain** area until the end of the round; or **Falcon Eye**, self, your next ranged attack this round ignores penalties from **Cover**.
- **Entangling Roots [1 AP, 1 NRG]: Range:** 18". **Area:** 4"×4" square. **Effect:** Enemies in the area must pass a **STR Check** or their **Speed** becomes **0"** until the end of the round.

Weapon Trait Rules

- **Ranged:** This weapon uses ranged attack rules. It cannot be used to make melee attacks unless a rule or profile says otherwise. You add your **DEX** modifier to the damage total of attacks made with this weapon.
- **Light:** This weapon may be dual-wielded. When attacking with two **Light** weapons, roll the damage dice for each weapon separately. Choose one weapon's total and discard the other. The chosen weapon is the source of the attack: only its damage type, traits, qualities, poison, and other attack effects apply. An attack made with two **Light** weapons counts as a single attack for the multi-attack rule and for the **Off-Hand Weapon** rule (**6.13**).
- **Trip:** You may use this weapon to take the **Trip** action.

Oathscale

Class: Paladin | **Ancestry and Background:** Drakeblood Soldier | **Level:** 1

HP: 14 | **AV:** 0 | **SPD:** 5" | **Sz:** M | **AP:** 3 | **Luck:** 1 | **NRG:** 5

STR: +3 | **DEX:** -1 | **INT:** +0 | **SPI:** +2

Ancestry Traits

- **Draconic Resistance (fire):** You are **Resistant** to fire damage: you take half fire damage, rounded down.
- **Breath Weapon [2 AP]:** Once per round, make a **SPI Check** to project either a **Cone 6"** or **Line 6"** of fire. On a success, affected enemies suffer **1d6 fire damage**.

Background Rule

- **Soldier:** Your first melee attack each round deals an additional **1 damage of that attack's primary damage type**.

Equipment and Items

- **Mace:** Melee weapon, **1d6 + STR blunt damage**, **Parrying**.
- **Heater Shield:** Shield **AD d8** when using **Block**.
- **Breastplate:** Chest **AD d6**, **DEX Pen 0**, **Max Speed 7"**.

Talents, Powers, and Special Rules

- **Shield Master:** While you are equipped with a shield, your **Block** gains **+1 AV**.
- **Lay on Hands [1 AP, 1 NRG]:** Restore **1d4 + SPI** HP to yourself or one adjacent ally.
- **Paladin Orisons [1 AP, 1 NRG]:** Choose one: **Oathspark**, range **1"**, deal **1d6 + SPI holy damage**; **Steadfast Word**, range **3"**, remove **Frightened** from yourself or 1 ally and let that target immediately **Stand** for **0 AP** if **Prone**; or **Mark of Challenge**, range **6"**, target 1 enemy in **LOS**; until the end of the round, that enemy's attack damage rolls against any ally other than you are made with **Disadvantage**.
- **Blessing [1 AP, 1 NRG]: Range:** 12". **Target:** Up to 2 allies. **Effect:** Each target gains **+1** to their next **Check** before the end of the round.

Weapon Trait Rules

- **Parrying:** You may use the **Parry** Reaction with this weapon.

Mossgrave

Class: Druid | **Ancestry and Background:** Human Hermit | **Level:** 1

HP: 13 | **AV:** 0 | **SPD:** 5" | **Sz:** M | **AP:** 3 | **Luck:** 2 | **NRG:** 9

STR: +0 | **DEX:** +0 | **INT:** -1 | **SPI:** +4

Ancestry Traits

- **Versatile:** At Hero creation, add **+1** to any one ability score. Already included in this profile's scores.
- **Determined Resolve:** When this Hero is reduced to **0 HP**, they may spend **1 Luck Point** to make a **SPI Check** before gaining a Wound. On a success, they remain at **0 HP**, **Knocked Out**, and **Prone**, but do not gain that Wound and do not roll on the **Injuries Table**. This use of **Luck** is not a reroll. This trait cannot prevent **True Death**, a third Wound, or death caused by a rule that causes immediate death. Wounds and the **Injuries Table** are campaign rules; in a standalone Basic Mode game this trait has no effect.

Background Rule

- **Hermit:** While no ally is within **4"**, your non-Casting **SPI Checks** are rolled with **Advantage**.

Equipment and Items

- **Club:** 1d4 blunt damage. One hand. No requirement. No traits.
- **Leather Coat:** Chest **AD d2**, **DEX Pen 0**, **Max Speed 8"**.

Talents, Powers, and Special Rules

- **Guiding Presence:** Allies within **6"** of you gain **+1** on **SPI Checks**.
- **Wild Shape [0 AP]:** Once during each activation, transform into one **Novice Beast Form**. The form ends at the end of your next activation, when you are reduced to **0 HP**, or when you end it for **0 AP**. You cannot use **Wild Shape** after casting a **Tier 1** or higher **Druidic Ritual** during the same activation, while a form is active, or again during the same activation after a form ends.
  - **Form Rules:** Replace your **SPD** and **Sz** with the form's listed **SPD** and **Sz**, and use the form's listed flat **AV**. Because **Small** is derived from **Sz S**, you gain or lose **Small** as your Size changes. Your Chest armour and shield remain equipped, but their **AD**, **AV**, **DEX Pen**, **Max Speed**, Item Qualities, and other rules are suspended; you cannot use **Block** or **Parry**. Other modifiers still apply. Replace your weapon attacks with the form's natural attack. It counts as a weapon attack only for its normal AP cost and **Multiple Attacks**, and is not a weapon for other rules unless they explicitly affect natural attacks. Add the higher of **STR** or **SPI** to its damage; at Level 1 it rolls **1** base damage die. Items that occupy Hands remain equipped but cannot be used. Retain your HP, Wounds, NRG, ability scores, Talents, ancestry traits, known Powers, and class features. You cannot cast Powers or use scrolls. You may use **Dodge**, **Reflex Attack**, **Hide**, **Spot**, and **Interact** unless the form says otherwise.
  - **Dire Wolf:** Speed **7"**, **Sz M**, **AV 1**, **Bite:** 1d6 piercing damage. When you declare **Bite** against an enemy adjacent to at least 1 of your allies, the attack rolls 1 additional base damage die.
  - **Boar:** Speed **6"**, **Sz M**, **AV 2**, **Tusks:** 1d6 piercing damage. When you make a **Tusks** attack after using **Move** to move at least **3"** in a straight line toward the target during the same activation, the target is **Pushed 1"** directly away from you when this attack damages the target.
  - **Great Eagle:** Speed **5"**, **Fly (10")**, **Sz L**, **AV 1**, **Talons:** 1d4 slashing damage. While using **Fly**, you do not gain **Cover** from a terrain feature.
  - **Lynx:** Speed **7"**, **Sz S**, **AV 1**, **Claws:** 1d4 slashing damage. While in this form and in **Cover**, your **Hide distance** is **0"**. You ignore additional movement costs from **Difficult Terrain** and do not make terrain **Checks** caused by **Slippery Terrain**. **Small.**
- **Druidic Minor Rituals [1 AP, 0 NRG]:** Choose one: **Vine Lash**, range **4"**, deal **1d8 + 1 piercing damage**; the target must pass a **STR Check** or be **Pulled 1"** directly toward you; **Verdant Touch**, range **1"**, remove **Bleeding**, **Burning**, or **Poisoned [dX]** from self or 1 ally, and that target gains **2 Temporary HP** until the end of the round; or **Pebble Ward**, range **6"**, self or 1 ally gains **+3 AV** the next time they apply **AV** this round.
- **Ironbark [1 AP, 1 NRG]: Range:** 12". **Target:** Self or 1 ally. **Effect:** The target gains **+1 AV** until the end of the round.

- **Regrowth [2 AP, 1 NRG]: Range:** 12". **Target:** 1 ally. **Effect:** The target regains **1d10 + SPI HP**.

Weapon Trait Rules

- **Light:** This weapon may be dual-wielded. When attacking with two **Light** weapons, roll the damage dice for each weapon separately. Choose one weapon's total and discard the other. The chosen weapon is the source of the attack: only its damage type, traits, qualities, poison, and other attack effects apply. An attack made with two **Light** weapons counts as a single attack for the multi-attack rule and for the **Off-Hand Weapon** rule (**6.13**).
- **Trip:** You may use this weapon to take the **Trip** action.

Thoughtwake

Class: Psion | **Ancestry and Background:** Human Scholar | **Level:** 1

HP: 11 | **AV:** 0 | **SPD:** 5" | **Sz:** M | **AP:** 3 | **Luck:** 2 | **NRG:** 9

STR: -1 | **DEX:** +0 | **INT:** +4 | **SPI:** +0

Ancestry Traits

- **Versatile:** At Hero creation, add **+1** to any one ability score. Already included in this profile's scores.
- **Determined Resolve:** When this Hero is reduced to **0 HP**, they may spend **1 Luck Point** to make a **SPI Check** before gaining a Wound. On a success, they remain at **0 HP**, **Knocked Out**, and **Prone**, but do not gain that Wound and do not roll on the **Injuries Table**. This use of **Luck** is not a reroll. This trait cannot prevent **True Death**, a third Wound, or death caused by a rule that causes immediate death. Wounds and the **Injuries Table** are campaign rules; in a standalone Basic Mode game this trait has no effect.

Background Rule

- **Scholar:** Your **INT Checks** made to **Interact** with, decipher, or investigate nonmagical objects, inscriptions, clues, and hazards are rolled with **Advantage**.

Equipment and Items

- **Club:** 1d4 blunt damage. One hand. No requirement. No traits.
- **Leather Coat:** Chest **AD d2**, **DEX Pen 0**, **Max Speed 8"**.

Talents, Powers, and Special Rules

- **Observant:** Your **Spot Checks** are rolled with **Advantage**. Once during each of your activations, choose one **Hidden** or **Invisible** enemy within **4"**. You know that enemy's current space, but this does not remove their state or independently make them a legal target.
- **Mental Shield [1 AP Reaction]: Trigger:** A Power or a source that deals **arcane** or **psychic** damage is declared and would affect you. **Effect:** Reduce the triggering source's damage against you by **6**.
- **Psychic Techniques [1 AP, 0 NRG]:** Choose one: **Mind Needle**, range **10"**, target **1 combatant**, deal **1d6 psychic damage**; **Telekinetic Hand**, range **6"**, target **1 unsecured, non-objective object, latch, lever, or similar small interactable element**, move the target up to **2"**, open or close it if legal, or place one unattended item from within range into an adjacent space. This can never deal damage. **Telekinetic Hand** cannot manipulate Treasure Chests, traps, scenario objective markers, carried objective items, equipped items, locked objects, or any object that requires an **Interact Check** unless a rule explicitly allows it; or **Thought Barrier**, range **6"**, target self or **1 ally**, that target gains **+2** on their next **SPI** or **INT Check** made to resist a Power before the end of the round.
- **Mind Spike [2 AP, 1 NRG]: Range:** 18". **Target:** 1 combatant. **Effect:** Deal **1d10 + INT psychic damage**.
- **Telekinetic Push [1 AP, 1 NRG]: Range:** 12". **Target:** 1 combatant. **Effect: Push** the target **4"** directly away. On a **Collision**, they suffer **1d8 + INT psychic damage**.

Weapon Trait Rules

- **Light:** This weapon may be dual-wielded. When attacking with two **Light** weapons, roll the damage dice for each weapon separately. Choose one weapon's total and discard the other. The chosen weapon is the source of the attack: only its damage type, traits, qualities, poison, and other attack effects apply. An attack made with two **Light** weapons counts as a single attack for the multi-attack rule and for the **Off-Hand Weapon** rule (**6.13**).
- **Trip:** You may use this weapon to take the **Trip** action.

Ashborn

Class: Sorcerer | **Ancestry and Background:** Demonborn Cultist | **Level:** 1

HP: 11 | **AV:** 0 | **SPD:** 5" | **Sz:** M | **AP:** 3 | **Luck:** 0 | **NRG:** 9 | **Senses:** Darkvision (12")

STR: -1 | **DEX:** +0 | **INT:** +1 | **SPI:** +4

Ancestry Traits

- **Infernal Resistance:** You are **Resistant** to fire damage: you take half fire damage, rounded down.
- **Fiendish Legacy (Ash Tongue): Checks** to resist fire and smoke are rolled with **Advantage**.

Background Rule

- **Cultist, Dark Devotion:** Once per round, when you or an ally within **6"** reduces an enemy to **0 HP**, restore up to **2 HP** to yourself.

Equipment and Items

- **Club:** 1d4 blunt damage. One hand. No requirement. No traits.
- **Leather Coat:** Chest **AD d2**, **DEX Pen 0**, **Max Speed 8"**.

Talents, Powers, and Special Rules

- **Conviction [1 AP Reaction]: Trigger:** After applying **Advantage** and **Disadvantage**, one retained base damage die for your attack shows **1**, before determining **Total Miss** or **Critical Hit**. **Effect:** Reroll that die. You must use the new result.
- **Burning Soul:** Add **+1 fire damage** to your weapon attacks and to your damaging **Sorceries**.
- **Tier 0 Sorceries [1 AP, 0 NRG, Blood: 1]:** Choose one: **Ember Pulse**, range **8"**, deal **1d4 fire damage**; **Blood Flicker**, teleport up to **2"** to a legal space in **LOS** without triggering **Reflex Attacks**; or **Hex Glare**, range **8"**, the target enemy in **LOS** must pass a **SPI Check** or become **Blinded**.
- **Chaos Bolt [2 AP, 1 NRG, Blood: 1]: Range:** 20". **Target:** 1 combatant. **Effect:** Choose **fire**, **ice**, **lightning**, or **arcane**. Deal **1d12 + SPI** damage of that type.
- **Bloodspark [1 AP, 2 NRG, Blood: 1]: Range:** 18". **Target:** 1 combatant. **Effect:** Deal **1d10 + SPI lightning damage**. If you fail the **Casting Check**, your **Blood Price** HP loss increases by **+1** (total **2**).

Weapon Trait Rules

- **Light:** This weapon may be dual-wielded. When attacking with two **Light** weapons, roll the damage dice for each weapon separately. Choose one weapon's total and discard the other. The chosen weapon is the source of the attack: only its damage type, traits, qualities, poison, and other attack effects apply. An attack made with two **Light** weapons counts as a single attack for the multi-attack rule and for the **Off-Hand Weapon** rule (**6.13**).
- **Trip:** You may use this weapon to take the **Trip** action.

Silkshade

Class: Assassin | **Ancestry and Background:** Human Performer | **Level:** 1

HP: 11 | **AV:** 0 | **SPD:** 5" | **Sz:** M | **AP:** 3 | **Luck:** 2 | **NRG:** 0

STR: -1 | **DEX:** +2 | **INT:** +2 | **SPI:** +0

Ancestry Traits

- **Versatile:** At Hero creation, add **+1** to any one ability score. Already included in this profile's scores.
- **Determined Resolve:** When this Hero is reduced to **0 HP**, they may spend **1 Luck Point** to make a **SPI Check** before gaining a Wound. On a success, they remain at **0 HP**, **Knocked Out**, and **Prone**, but do not gain that Wound and do not roll on the **Injuries Table**. This use of **Luck** is not a reroll. This trait cannot prevent **True Death**, a third Wound, or death caused by a rule that causes immediate death. Wounds and the **Injuries Table** are campaign rules; in a standalone Basic Mode game this trait has no effect.

Background Rule

- **Performer:** Once per round, after you damage one enemy within **6"**, reduce the final damage dealt to each target by that enemy's next attack this round by **1**, to a minimum of **0**.

Equipment and Items

- **Dagger:** Melee weapon, **1d4 + DEX piercing damage**, **Light**, **Finesse**, **Agile**.
- **Leather Coat:** Chest **AD d2**, **DEX Pen 0**, **Max Speed 8"**.
- **Basic Venom [1 AP]:** Coat one weapon. The poison takes effect the first time an attack made with that weapon damages a target, or it expires at the end of the round, whichever comes first. The weapon attack deals an additional **1d4 poison damage**. One use.
- **2 Throwing Knives:** Thrown weapon, **1d4 + DEX piercing damage**, **Thrown 10"**, **Agile**, **Light**.

Talents, Powers, and Special Rules

- **Surprise Attack:** During each of your activations, add **+2** damage when you attack an enemy that did not have **LOS** to you at the start of that activation.
- **Marked for Death [0 AP]:** Once during each activation, choose one visible enemy within **12"**. The first weapon attack you make against that enemy during each of your activations deals **+3 damage**. The mark ends when you choose a new target, the target leaves play, or you are reduced to **0 HP**.

Weapon Trait Rules

- **Light:** This weapon may be dual-wielded. When attacking with two **Light** weapons, roll the damage dice for each weapon separately. Choose one weapon's total and discard the other. The chosen weapon is the source of the attack: only its damage type, traits, qualities, poison, and other attack effects apply. An attack made with two **Light** weapons counts as a single attack for the multi-attack rule and for the **Off-Hand Weapon** rule (**6.13**).
- **Finesse:** Attacks use your **DEX** modifier instead of your **STR** modifier for damage calculations.
- **Agile:** The second weapon attack you make with this weapon during an activation does not suffer **Disadvantage** from **Multiple Attacks**.
- **Thrown:** This weapon may make a ranged attack out to its listed **Thrown** range. Add the higher of your **STR** or **DEX** modifier to the damage total; if the weapon also has **Finesse**, use **DEX**. Each individual **Thrown** weapon may be thrown once per activation and is recovered at the start of your next activation. On a **Total Miss** (all retained base damage dice are natural **1s**), that individual weapon is lost.

Crowwick

Class: Trickster | **Ancestry and Background:** Halfling Apprentice | **Level:** 1

HP: 9 | **AV:** 0 | **SPD:** 5" | **Sz:** S | **AP:** 3 | **Luck:** 2 | **NRG:** 7

STR: -2 | **DEX:** +3 | **INT:** +2 | **SPI:** +1

Ancestry Traits

- **Small**
- **Naturally Stealthy:** While this Hero is in **Cover**, their **Hide distance** is **0"**.
- **Brave Heart:** You are **Immune** to **Frightened**.

Background Rule

- **Apprentice:** Increase your **Max NRG** by **2**. Already included in this profile's NRG.

Equipment and Items

- **Club:** 1d4 blunt damage. One hand. No requirement. No traits.
- **Leather Coat:** Chest **AD d2**, **DEX Pen 0**, **Max Speed 8"**.
- **Scroll of Minor Illusion [1 AP]: Range:** 6". **Target:** 1 point in space. **Effect:** Place a false sound, brief image, or distraction until the end of the round. The first enemy that makes a **Spot Check** or ranged attack while within **3"** of that point this round suffers **Disadvantage** on that roll. One use.

Talents, Powers, and Special Rules

- **Savvy:** Once per round, when you fail a **Check** during **Interact** with a non-scoring trap, lock, hazard, or object, ignore the consequences of that failure unless the die was a natural **1**. **Savvy** cannot affect objectives, Treasure Chests, extraction, or scenario scoring unless a rule explicitly allows it.
- **Smoke and Mirrors:** Once per round. After you succeed on **Dodge** or successfully cast an **Arcane Spell**, you may **Shift 2"**. If you then meet the conditions to become **Hidden** in **4.3.2**, you become **Hidden**.
- **Trickster Cantrips [1 AP, 0 NRG]:** Choose one: **Glamour Shard**, range **2"**, deal **1d6 + INT arcane damage** and then **Shift 2"**; **False Footing**, range **2"**, the target enemy must pass a **DEX Check** or become **Prone**; or **Stage Smoke**, range **6"**, create an **Aura 2"** area of smoke that provides **Cover** until the end of the round.
- **Force Push [2 AP, 2 NRG]: Range:** 12". **Target:** 1 combatant. **Effect: Push** the target **2"** directly away. On a **Collision**, they suffer **1d4 + INT arcane damage**. **[Empower 1 NRG]:** The **Push** distance becomes **4"**.

Weapon Trait Rules

- **Light:** This weapon may be dual-wielded. When attacking with two **Light** weapons, roll the damage dice for each weapon separately. Choose one weapon's total and discard the other. The chosen weapon is the source of the attack: only its damage type, traits, qualities, poison, and other attack effects apply. An attack made with two **Light** weapons counts as a single attack for the multi-attack rule and for the **Off-Hand Weapon** rule (**6.13**).
- **Trip:** You may use this weapon to take the **Trip** action.

B.5 Basic Mode Monster Profiles

Basic Mode uses the following complete Monster profiles. These profiles use the same stat order and rule language as the main Monster rules.

Basic Mode Goblin

HP: 6 | **AV:** 0 | **SPD:** 6" | **Sz:** S | **LVL:** 1 | **CV:** 1c

Attacks

- **Jagged Blade:** 1d4 slashing damage.
- **Short Sling: Ranged 8"**, 1d4 + 1 blunt damage.

Special Abilities

- **Small.**
- **Nimble:** After making an attack, they use **Shift 1"** toward the nearest **Cover Terrain**, avoiding hazards.

Basic Mode Skeleton Warrior

HP: 6 | **AV:** 0 | **SPD:** 5" | **Sz:** M | **LVL:** 1 | **CV:** 1c

Attacks

- **Burial Blade:** 1d6 slashing damage.

Special Abilities

- **Undead: Immune** to **Poisoned [dX]**, **Bleeding**, **Frightened**, and **Sleeping**.

Basic Mode Bandit

HP: 16 | **AV:** 1 | **SPD:** 6" | **Sz:** M | **LVL:** 2 | **CV:** 3c

Attacks

- **Shortsword:** 1d6 + 3 slashing damage.
- **Shortbow: Ranged 12"**, 1d6 + 2 piercing damage.

Special Abilities

- **Dirty Fighting:** This Monster's attacks deal **+2 damage** against **Prone**, **Stunned**, or **Immobilized** targets.

Basic Mode Ogre

HP: 46 | **AV:** 3 | **SPD:** 4" | **Sz:** L | **LVL:** 6 | **CV:** 31c

Attacks

- **Great Club:** 1d12 + 2 blunt damage.

Special Abilities

- **Sweeping Blow:** On a **Critical Hit**, the nearest other combatant adjacent to this Monster suffers **1d8 blunt damage**.
- **Heavy: Immune** to forced movement.

B.6 Basic Scenario: The Courier's Strongbox

Battlefield: 24"×24". In **Grid Mode**, use a **24"×24"** map marked in **1"** squares.

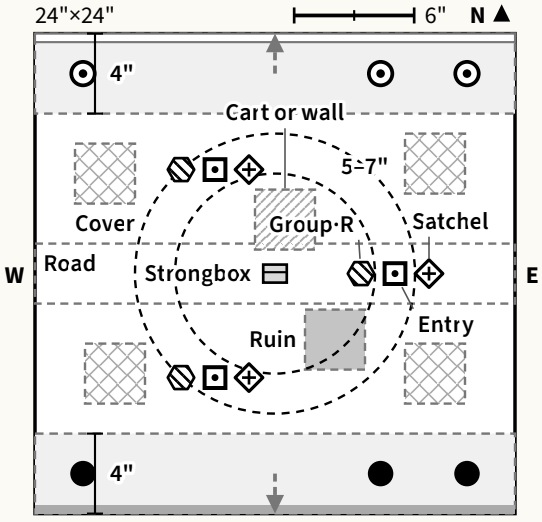
Terrain: Place a road across the centre of the battlefield. Place **2** ruins, carts, or low walls within **4"** of the centre. Place **4** additional terrain pieces, one in each quarter of the battlefield. Use terrain pieces of **3"×3"**. In **Basic Mode**, treat every ruin as **Blocking Terrain**, every cart and low wall as **Impassable Terrain**, and every other terrain piece as **Cover Terrain**.

Deployment: Each side deploys within **4"** of opposite battlefield edges.

Monster Setup: Place **3 Monster Entry** markers around the centre of the battlefield. Each marker must be **5–7"** from the battlefield centre, at least **4"** from each other Monster Entry marker, and outside both deployment zones. Place all **4 Goblins**, all **4 Skeleton Warriors**, and all **4 Bandits** at the **3 Monster Entry** markers, one complete group per marker, assigned at random. All placed Monster groups begin **Resting**.

Treasure: Place **1 Strongbox** at the battlefield centre. It is worth **12c**. Place **3 Satchels**, each worth **4c**, with one Satchel on each Monster Entry marker.

A **The Courier's Strongbox (B.6)**



Schematic. Grey dashed = position not fixed. Group and Satchel are drawn beside each Entry marker; groups are assigned at random.

B **Placement rules and an example score**

Terrain: a road across the centre; 2 ruins, carts or low walls within 4" of the centre; 4 more 3"×3" pieces, one in each quarter. Ruins are Blocking, carts and low walls Impassable, other pieces Cover.

Deployment: each side deploys within 4" of opposite battlefield edges.

Monster Entry markers: 3 markers around the centre, each 5–7" from it, at least 4" from each other and outside both deployment zones. The 3 groups (4 Goblins, 4 Skeleton Warriors, 4 Bandits) are assigned to the markers at random, one complete group per marker, with 1 Satchel on each marker. Every group begins Resting.

Treasure: the Strongbox (12c) at the centre; 3 Satchels (4c each). A carrier of the Strongbox has −2" Speed, to a minimum of 1".

Extraction: leave the battlefield through your own deployment edge; the carried treasure's Coin Value is added to your score.

Example (assumed): Ironscar, SPD 4", carries the Strongbox from the centre

Speed carrying the Strongbox	**4" − 2" = 2" per Move**
Centre to an edge, open ground	**12"; 12" ÷ 2" = at least 6 Moves**
Score: Strongbox + 1 Satchel + 2 Goblins + 1 Bandit	**12 + 4 + 2 + 3 = 21c**

Picking up the Strongbox also costs Interact [1 AP]. Coin Values: Goblin 1c, Skeleton Warrior 1c, Bandit 3c (B.5). The game ends after Round 6; the higher score wins (B.6).

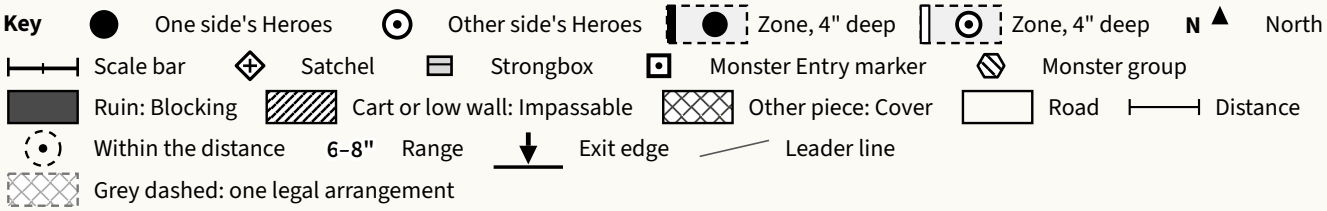


FIG-19. Basic Mode setup for The Courier's Strongbox on a 24"×24" battlefield, with one complete Monster group per Entry marker, assigned at random. Assumed example: carrying the Strongbox cuts Ironscar's SPD 4" by 2" to 2" per Move; extracting it with 1 Satchel, having defeated 2 Goblins and 1 Bandit, scores 12 + 4 + 2 + 3 = 21c; key: FIG-20 (see B.6).

Interact [1 AP]: Pick up the **Strongbox** or one **Satchel** if adjacent to it and not **Engaged**.

Carrying Treasure: A combatant may carry any number of Satchels, but only **1 Strongbox**. A combatant carrying the Strongbox has a **-2"** penalty to their **Speed**, to a minimum of **1"**.

Dropping Treasure: If a combatant carrying treasure is **Knocked Out**, defeated, removed from the battlefield without extracting, or stops being able to carry that treasure, place each carried treasure marker in that combatant's current space.

Extraction: A combatant extracts the treasure by leaving the battlefield through their own deployment edge. Remove that combatant from the battlefield and add the carried treasure's Coin Value to that side's score. An extracted combatant takes no further part in the game.

Monster Coin Value: When a side reduces a Monster to **0 HP**, add that Monster's **Coin Value** to that side's score. If a scenario rule removes a Monster without being reduced to **0 HP**, no side scores their Coin Value unless the rule says otherwise.

Winning: At the end of Round 6, the side with the higher score wins. Score includes extracted treasure and Monster Coin Value claimed during the game. If tied, the side that extracted the **Strongbox** wins. If still tied, the game is a draw.

B.7 Basic Mode Replay Variants

After the first game, use one or more of the following variants to increase replay value without using the full scenario system.

Random Monster Groups: Choose one Climate before setup. Roll three times on that Climate's lowest-tier random Monster table, using the column matching the number of Heroes per side. Reroll duplicate results until all three Random Monster Groups are distinct. Use those groups instead of the three default Monster groups. Place one group at each of the three default **Monster Entry** markers; each begins **Resting**. If **Advanced Ogre** is also used, still roll only three Random Monster Groups. The Ogre is the fourth group and uses the fourth **Monster Entry** marker.

Advanced Ogre: Add a fourth **Monster Entry** marker before Monster Setup. It must be **5–7"** from the battlefield centre, at least **4"** from each other **Monster Entry** marker, and outside both deployment zones. Place the **Ogre** at that marker with a **Resting** marker. Place a fourth **Satchel** worth **4c** on that marker.

Traps: Each **Satchel** and the **Strongbox** is potentially trapped. During setup, prepare **4** face-down tokens for the default scenario: **1** marked **"Trap"** and 3 blank. If the **Advanced Ogre** variant is used, prepare **5** face-down tokens instead: **2** marked **"Trap"** and 3 blank. Place one token under each treasure marker without revealing it.

- **Interact [1 AP]:** A Hero or Hireling within **1"** of a treasure marker may make an **INT Check**. On a success, secretly look at the treasure marker's token and return it face down. On a failure, nothing is revealed.
- **Interact [1 AP], Remove Trap:** A Hero or Hireling adjacent to a treasure marker and not **Engaged** may make a **DEX Check**. On a success, remove that treasure marker's token without revealing it. On a failure, reveal and resolve the token.
- **Trigger:** When a combatant uses **Interact [1 AP]** to pick up a treasure marker that still has a face-down token, reveal the token before the treasure is picked up. If the token is blank, remove the token and complete the **Interact**. If the token is **"Trap"**, the combatant becomes **Prone** and **Poisoned [d8]**, the **Interact** fails, and the token is removed.

Hidden Strongbox: Place **3** **Strongbox** markers along the battlefield midline, each within **6"** of at least one other Strongbox marker. Only one is real. The first time a combatant uses **Interact [1 AP]** while adjacent to a Strongbox marker and not **Engaged**, they make an **INT Check**. On a success, that marker is the real **Strongbox** and may be picked up by the same **Interact**. On a failure, remove that marker as a fake. If **2** fake Strongbox markers have been removed, the last remaining marker is the real **Strongbox**.

Undead Horde: Whenever a **Skeleton Warrior** is removed from play, place a new **Skeleton Warrior** in the nearest legal space at the nearest **Monster Entry** marker. A replacement created by this variant has **CV 0c** and begins **Awake**.

Goblin Horde: Whenever a **Goblin** is removed from play, place a new **Goblin** in the nearest legal space at the nearest **Monster Entry** marker. A replacement created by this variant has **CV 0c** and begins **Awake**.

Bandit Horde: Whenever a **Bandit** is removed from play, place a new **Bandit** in the nearest legal space at the nearest **Monster Entry** marker. A replacement created by this variant has **CV 0c** and begins **Awake**.

Night Skirmish: The battlefield is in **Darkness** except within **Light Sources**. Each side begins with **1 Torch** carried by one allied combatant of its choice. Place one lit torch at the centre of the battlefield.

Ogre Toll: A combatant adjacent to the **Ogre**, not **Engaged** by another enemy, and whose side has at least **2c** in its current score may use **Interact [1 AP]** to pay **2c** from that score and make a **SPI Check**. On a success, the Ogre treats that combatant's party as invalid targets for the rest of the adventure unless a member of that party damages the Ogre. On a failure, the **2c** is lost, and the Ogre remains hostile.

Appendix C.

Rules Reference

This appendix is a reference aid, not a second rulebook. If a summary conflicts with a full rule, use the full rule in the cited section.

Glossary	**C.11**

C.1 Timing Summary

A round of Heraldry Skirmish is resolved in this order:

1. **Initiative Phase**

- Refresh AP.
- Determine Initiative.
- Resolve start-of-round effects.

2. **Party Phase**

- Sides alternate activating allied combatants.
- Each allied combatant may activate once per round if they are eligible.
- Activated combatants must spend at least **1 AP** unless they cannot take actions. A **Stunned** or **Sleeping** combatant remains eligible to activate to end the condition even with **0 AP**; they cannot take actions or spend AP.
- Unspent AP may be saved for **Reactions** later in the round.
- A side must **Pass** when it has no eligible combatants left.

3. **Monster Phase**

- Resolve Monster waking rules.
- Activate each **Awake** Monster Group as described in **Section 3.4**.

4. **End of Round**

- Resolve end-of-round effects.
- End effects that last until the end of the round.
- Remove unspent AP.
- Resolve scenario scoring, extraction, round limits, and victory conditions.

This is the normal order. In solo or cooperative play, **PvE Initiative** may place the **Monster Phase** before the **Party Phase**; resolve each phase once, then proceed to the **End of Round**.

Timing Terms

- **At the start of the round:** After AP refresh and Initiative, before the first activation of the round.
- **At the start of an activation:** Immediately after a combatant is chosen to activate.
- **During an activation:** While that combatant is spending AP and resolving actions.
- **At the end of an activation:** Immediately after that combatant finishes acting.
- **At the end of the round:** During the distinct **End of Round** phase, after both the Party Phase and Monster Phase are complete.

If two or more effects would resolve at the same time, the more specific rule takes priority. If no rule is more specific, resolve them in this order:

1. Initiative winner's side effects
2. Non-Initiative side effects
3. Monster Group effects in ascending Monster Group number
4. Terrain, weather, hazard, and scenario effects in the order listed by the relevant rule

In solo and cooperative play, the round's resolved phase order replaces steps 1 and 2: if the **Party Phase** resolves first, allied-side effects resolve before Monster Group effects; if the **Monster Phase** resolves first, Monster Group effects resolve before allied-side effects. Monster Group effects still resolve in ascending Monster Group number, and terrain, weather, hazard, and scenario effects remain last.

If two effects from the same side would resolve at the same time, the **Party Leader's** controller chooses the order. If these rules still leave 2 or more simultaneous effects tied, use **Random Determination** to choose the next effect to resolve, then repeat until no tied effects remain.

C.2 Core Terms and Abbreviations

Abbreviation	Meaning
HP	Hit Points
AP	Action Points
NRG	Energy
AV	Armour Value
AD	Armour Dice rolled to generate **AV**
APL	Average Party Level
LOS	Line of Sight
TAP	Town Action Points
CV	Coin Value
LVL	Monster Level
SPD	Speed (used for all combatants)
Sz	Size: S (Small), M (Medium), L (Large), or H (Huge)

The full alphabetical glossary of rules terms, conditions, and campaign vocabulary is located in **Appendix C.11 Glossary of Terms and Conditions**. Use it as an alphabetized reference; the detailed rules in the main sections remain authoritative.

C.3 Conditions Summary

This table summarizes the game's core conditions. Each condition defines its own timing and end point. Conditions with the same name do not stack unless a rule says otherwise. If a combatant would gain a second copy of the same condition, keep the longer duration. If both copies use numeric values, keep the higher numeric value. Otherwise, keep the existing condition unless the new rule says they replace the old one. After a condition applied by an enemy effect ends on a combatant, that combatant is immune to the same named condition from enemy effects until the end of their next activation unless a rule says otherwise. This immunity never applies to **Hidden**, **Invisible**, **Prone**, or **Knocked Out**, and never prevents a condition a combatant applies to themselves.

For rules that remove or prevent a **negative condition**, the closed list is **Bleeding, Blinded, Burning, Cursed, Frightened, Immobilized, Poisoned [dX], Prone, Silenced, Sleeping, Slowed, Stunned,** and **Weakened**. **Hidden, Invisible, Knocked Out,** and **Wounds** are not negative conditions.

Condition	Effect	Ends When
Bleeding	At the end of their activation, the combatant loses **2 HP**. This HP loss cannot be reduced by **AV**, **AD**, **Resistance**, or **Immune**.	The combatant regains HP, receives successful **Bandages**, or a rule removes it.
Blinded	Cannot draw **LOS** beyond **2"**. Attack damage rolls and sight-based **Checks** are made with **Disadvantage**.	End of the affected combatant's next activation, or when a rule removes it.
Burning	Suffers **1 fire damage** at the end of each round.	During their activation, the combatant spends **1 AP** to extinguish it; they enter water; or a rule removes it.
Cursed	Cannot regain HP by any means.	End of the adventure, or when removed by **Purify**, a **Potion of Remove Curse**, or a similar effect.
Frightened	Cannot willingly move closer to the source while they are in **LOS**. Attack damage rolls and **Checks** against the source are made with **Disadvantage**.	End of the affected combatant's next activation, or when a rule removes it.
Hidden	Cannot be targeted by attacks, Powers, abilities, or actions that require **LOS**, but does not block **LOS**. Areas of Effect can still affect them if they do not target them directly. The first qualifying harmful effect gains the first applicable Hidden benefit. If a rule changes the distance requirement for taking **Hide**, use that distance as your **Hide** distance while the rule applies.	Ends as listed under **Hidden** in **5.9**.
Immobilized	Speed becomes **0"**. Cannot **Move**, **Shift**, **Climb**, or **Jump**.	End of the affected combatant's next activation, or when a rule removes it.
Invisible	Cannot be targeted by **LOS**-based effects unless the attacker is adjacent or can ignore **Invisible**. A melee attack with **Reach** alone does not allow targeting unless the attacker is adjacent or another rule allows it. Areas of Effect can still affect them. Adjacent attacks are legal if otherwise legal and roll base damage dice with **Disadvantage**.	After the first attack, harmful Power, harmful Special Ability, **Push**, or **Trip** resolves, unless the effect says otherwise.

Condition	Effect	Ends When
Knocked Out	At **0 HP**. Cannot activate, take actions, voluntarily move, attack, use Powers, use Special Abilities, or take Reactions. Remains **Prone** unless a rule prevents it. Resolve damage and **HP** loss while **Knocked Out** under **5.8**.	HP is restored above **0**.
Poisoned [dX]	At the end of the combatant's next activation, suffer the listed poison damage, then remove **Poisoned**.	After the poison damage resolves, or earlier by **Antitoxin**, or by a rule that explicitly removes **Poisoned** or poison.
Prone	Melee attacks against the combatant roll base damage dice with **Advantage**. Ranged weapon attacks from more than **2"** away roll base damage dice with **Disadvantage**. Cannot **Block** or **Parry**. A **Monster** removes **Prone** at the start of their activation before resolving their AI.	The combatant uses **Stand** [**1 AP**], a **Monster** starts their activation, or a rule removes it.
Silenced	Cannot cast Powers or use a Special Ability that explicitly requires speech, chanting, or invocation.	End of the affected combatant's next activation, or when a rule removes it.
Sleeping	Immediately falls **Prone** unless prevented. Cannot take actions, voluntarily move, attack, use Powers, use Special Abilities, or take Reactions. Melee attacks against them roll **1** additional base damage die. They remain eligible to activate to end the condition even with **0 AP**.	Ends immediately on taking damage or losing HP, when an adjacent ally uses **Interact** [**1 AP**] to wake them, or at the end of the affected combatant's next activation. An enemy cannot remove **Sleeping** this way.
Slowed	If Speed is greater than **0"**, it is halved, rounded down to a minimum of **1"**.	End of the affected combatant's next activation, or when a rule removes it.
Stunned	Cannot take actions, voluntarily move, attack, use Powers, use Special Abilities, or take Reactions. They remain eligible to activate to end the condition even with **0 AP**.	End of the affected combatant's next activation, or when a rule removes it.
Weakened	Attack damage rolls are made with **Disadvantage**.	End of the affected combatant's next activation, or when a rule removes it.
Heard the Song	A named condition from **9.7 The Bestiary** (**The Voice Beneath the Bells**). Suffer **−1 SPI** until this condition is removed.	Removed by **Quiet the Bells** [**1 TAP**] at **The Chapel** during the **Town Phase**.

C.4 Actions Summary

The universal actions are available to AP-using combatants unless a rule says otherwise. **Monsters** use **Monster AI** instead of this action list unless a rule explicitly says otherwise.

A combatant may take the same non-Reaction **0 AP** action only once during each activation unless the action says otherwise. **0 AP Reactions** use their own triggers and frequency limits.

Action	AP Cost	Effect
Move	1 AP	Move up to your Speed.
Shift	1 AP	**Shift 1"** without triggering **Reflex Attack**.
Attack	1 AP	Make one melee or ranged attack.
Push	1 AP	Make one Push attempt.
Trip	1 AP	Make one Trip attempt.
Power	Varies	Use one Power you know.
Read Scroll	1 AP	Use one equipped scroll. See **4.3.4**.
Special Ability	Varies	Use one activated Special Ability. Every activated Special Ability lists an AP cost, including **0 AP**. Passive and triggered Special Abilities are not actions.
Stand	1 AP	Remove **Prone** from yourself. This is not movement.
Interact	1 AP	Interact with an **adjacent** and **visible** battlefield element.
Hide	1 AP	Become **Hidden** if outside **LOS** of all enemies, or if you have **Cover** from every enemy with **LOS** and no enemy is within your **Hide distance**. You cannot **Hide** while **Engaged** or carrying a **Light Source**.
Spot	1 AP	Choose one eligible **Hidden** enemy. Make an **INT Check** or **SPI Check** against **12**, whichever is higher. On success, that enemy loses **Hidden**.
Wait	1 AP	Do nothing.
Reload	1 AP	Ready an equipped weapon with the **Reload** trait so it may attack again. See **4.3.5**.

C.5 Reactions Summary

A **Reaction** is an action taken when a rule's stated trigger occurs, usually outside the reacting combatant's activation. A combatant may take a **Reaction** during their own activation if its trigger occurs then. Taking a **Reaction** does not begin or end an activation. To take a **Reaction**, a combatant must have enough unspent AP to pay their cost. **Heroes** and **Hirelings** may use **Reactions** unless a rule says otherwise. Allied **Summons** may use **Reactions** only if a rule explicitly grants that **Summon Reactions**. **Monsters** do not take **Reactions** unless a rule explicitly allows them. A combatant may take multiple **Reactions** in the same round if they have enough unspent AP and a legal trigger, but may take only one **Reaction** in response to the same action or effect. For each affected combatant, only 1 Reaction may be declared by that combatant or on their behalf to modify how the source resolves against them; if 2 or more would do so, the affected combatant's controller chooses which one is declared, and the others spend no costs. A Reaction used by the source's controller to modify the source's own roll does not count against an affected combatant's limit. A Reaction resolves immediately when declared unless its rule or a resolution sequence assigns a later timing. A Reaction that grants a separate action still uses the reacting combatant's one-Reaction limit, but does not prevent a different combatant from reacting unless both Reactions would modify the source against the same affected combatant. If no rule grants an allied **Summon Reactions**, their unspent AP cannot be spent on **Reactions** and is discarded at the end of the round.

Reaction	AP Cost	Trigger	Effect
Block	[1 AP]	An attack or effect would deal **blunt**, **piercing**, or **slashing** damage to you while you have an equipped shield and can take **Reactions**.	Roll your shield's **AD**, if any, and add its flat **AV** to the **AV** you already apply against that source.
Dodge	[1 AP]	An attack or harmful effect that allows evasion targets you. A weapon attack that targets you always allows evasion, whether it targets you alone or with others.	Make a **DEX Check**, using a maximum of **+5** from your own DEX. On success, suffer no damage or HP loss from the triggering effect. On failure, resolve the effect normally. On a natural **1**, also become **Prone**.
Parry	[1 AP]	A melee attack that deals **blunt**, **piercing**, or **slashing** damage targets you while you wield a **Parrying** weapon or have another rule that allows Parry.	Roll the parry weapon's normal base damage dice and attack modifier, including additional base dice from **Martial Supremacy**. Compare the parry total to the attack's total damage of every type after **Roll and build damage**, but before mitigation. On success, suffer none of the attack's damage; effects that do not require the attack to damage you resolve normally. On failure, resolve normally. If all retained parry base dice are natural **1s**, the **Parry** fails, the attack ignores all of your **AV**, and the attack resolves normally otherwise. If a successful Parry has a retained base die showing its maximum value, the attacker suffers a Riposte equal to the parry total and applies **AV** against it normally.
Reflex Attack	[1 AP]	During an enemy's activation, they leave your melee distance using **Move**, or make a ranged attack while within it. **Shift**, forced movement, and ranged attacks made as Reactions do not trigger it.	Make one melee attack with **Disadvantage** on its base damage dice. Resolve movement triggers before the enemy leaves your melee distance. Declare a ranged trigger before that attack's damage is rolled, then resolve the **Reflex Attack** immediately after that attack, before another action.

C.6 Attack Resolution Summary

Whenever an attack uses the normal weapon damage system, resolve it in this order:

1. **Declare and verify:** Name the attacker, attack, target, and damage types; confirm range, **LOS**, visibility, **Cover**, and target legality.
2. **Resolve declaration Reactions:** Resolve redirection and other declaration Reactions, then verify the attack again. Declare the defender's one modifying Reaction, if any.
3. **Roll and build damage:** Generate the complete damage roll: roll and retain base damage dice with all **Advantage** and **Disadvantage**, resolve permitted changes or rerolls of retained base dice, determine provisional **Total Miss** and **Critical Hit** results, roll all applicable exploding and other damage dice, and add modifiers by type. Before consequences, resolve any **Luck** reroll under **2.10** and rebuild the complete roll from the new result. Using only the final result, resolve any **Total Miss** and end the attack if applicable. Otherwise, resolve **Critical Hit** and other after-roll effects at their stated timings, then state the total for each damage type.
4. **Defend and mitigate:** Resolve any chosen **Reaction**, then apply **AV**, other mitigation, and **Immune**, **Resistant**, or **Vulnerable** under **5.1.1**.
5. **Apply and finish:** Apply the remaining damage, then resolve any remaining **Critical Hit** effects, conditions, and damage-triggered effects.

See **2.4.1 Attack Advantage and Disadvantage** for the complete list of core attack modifiers. A specific weapon, Talent, Power, item, Monster ability, terrain feature, weather result, scenario, or other rule states its own additional modifier.

For any damage roll shared by multiple combatants, declare each affected combatant's legal **Reaction**, if any, before rolling, resolve any **Luck** reroll before defence or mitigation, then apply the final roll separately to each combatant. See **2.7.3**. Roll non-area multi-target or repeated damage separately unless the effect says otherwise.

Critical Hits

After applying **Advantage** or **Disadvantage**, only retained base damage dice can trigger a **Critical Hit** or begin an exploding-dice chain. An exploding bonus die that rolls its maximum value explodes again.

An attack's primary damage type is the first damage type listed in its profile. Apply only that type's universal **Critical Hit** rider unless a rule says otherwise.

- **Piercing:** During mitigation, the attack ignores AV unless a rule says otherwise.
- **Blunt:** During mitigation, halve the target's total AV, rounded down as normal. After the attack resolves, the target loses 1 AP if possible; a Monster or target with no AP remaining becomes **Prone** instead.
- **Slashing:** After all mitigation and damage-type modifiers, if the target suffers at least 1 damage from the attack, they become Bleeding.

If a rule says a Critical Hit deals normal damage, do not roll exploding bonus dice or apply universal riders or other Critical Hit effects unless that rule says otherwise.

Damage and AV

AV reduces only blunt, piercing, and slashing damage, regardless of source. Damage of every other type and HP loss ignore AV. Keep each damage type separate until mitigation and damage-type modifiers are complete. Apply each eligible mitigation value once; if it can reduce more than one damage type, reduce eligible types in the order the source lists them.

A combatant is damaged only if the final damage total is 1 or higher.

Multiple Attacks

Unless a rule says otherwise, each melee or ranged weapon attack costs 1 AP. The second and each later weapon attack a Hero or Hireling makes during the same activation rolls its base damage dice with **Disadvantage**. Reaction-granted attacks do not count toward that chain. Monster Multi-Attack follows the Monster text exactly.

C.7 Power Summary

- A caster uses a **Power** by declaring it and choosing a legal target, area origin, or point; paying its listed AP and NRG costs; confirming the declaration against **Declared State**; making the listed **Casting Check**; then resolving the effect.
- A Hero cannot cast an **Arcane Spell** or **Druidic Ritual** with metal Chest armour, a metal weapon, or a metal shield equipped, and cannot cast a **Sorcery** with metal Chest armour equipped. **Divine Prayers** and **Psychic Abilities** are unrestricted. Chest armour with the **Elven** quality and weapons with the **Elven** trait do not count as metal for these restrictions. The same restrictions apply to scrolls.
- Unless a rule says otherwise, a **Casting Check** is a **d20 Check** against **12** using the listed ability.
- A natural **20** is a **Critical Cast**. A natural **1** is a **Critical Failure** and triggers the tradition's backlash rule.
- On a **Critical Cast**, use the first applicable category in **8.2**. A Critical Cast grants only one bonus. The buff, ward, or protection option cannot increase **AP**, **NRG**, damage, healing, maximum statistics, dice count, die size, or target count.
- Unless a Power has **Range: Self**, has **Range: Global**, or explicitly ignores **LOS**, each target, area origin, or point chosen for it must be within range and in the caster's **LOS**. A placed area may extend beyond that range after its origin is placed. Areas cannot penetrate **Blocking Terrain** or a solid floor, roof, or platform.
- Unless a Power says it resolves after the triggering Power, a Reaction triggered by a Power being declared or cast resolves after the caster pays costs and confirms legality, but before the **Casting Check**.
- If a Power creates an ongoing effect and gives no duration, that effect ends at the end of the current round. Named conditions and **Summons** use their own expiry rules.
- A Power's printed damage, healing, and mitigation expression is complete. Add a printed ability score once; do not add an unprinted score.
- When a hostile Power would require a **Monster** to make a **STR**, **DEX**, **INT**, or **SPI Check**, do not roll it: resolve the effect that would occur on a failed Check against that Monster automatically unless they are **Immune** to it. If that Monster's **LVL** is higher than the caster's Level, make the Power's **Casting Check** with **Disadvantage**.
- If a Power changes a **Monster's AP**, use the substitute in **9.1** unless the Power gives a different result.
- A **Weather Shift** normally suppresses the persistent Weather or Cavern Condition until the end of the current round. A duration extension applies normally. Only the latest **Weather Shift** applies; the persistent result resumes when that Weather Shift ends.
- During each round, a combatant may benefit from only one **Power or scroll effect** that grants **AP**, refunds **AP**, or reduces an **AP** cost, regardless of when that effect was used.
- **Arcane Spells**, **Divine Prayers**, **Druidic Rituals**, **Sorceries**, and **Psychic Abilities** remain separate traditions.
- A **Sorcery** always resolves, but the caster pays its **Blood Price** on a failed **Casting Check**.
- If a Summon's attack profile printed in a Power includes **INT** or **SPI**, use the caster's corresponding score when the Power resolves. This does not grant the Summon an ability score.
- A Power that lists an **[Empower X NRG]** option modifies its effect when the caster pays that additional **NRG** cost. See **Empower** in **Section 8.2**.
- A Power's **NRG** cost cannot be reduced below **1 NRG** unless its printed cost is **0 NRG** or the reducing rule states a lower minimum.
- A scroll with an implicit target, area placement, origin, or duration uses the defaults in **7.15 Scrolls**. In particular, an ongoing scroll effect with no duration ends at the end of the current round.

C.8 Monster AI Summary

- At the start of the **Monster Phase**, resolve Monster wake-up rules.
- After wake-up rules are resolved, activate **Awake** Monster Groups in ascending group number order.
- If a Group becomes **Awake** during the **Monster Phase** and has not activated, add it to the remaining order. If its normal position has passed, it activates next after the current Group or effect finishes. Resolve simultaneous insertions in ascending group number order.
- Players do not choose, delay, skip, or reorder **Monster Groups** unless a scenario rule explicitly says otherwise.
- Within an activating Group, if more than 1 Monster remains to activate and no rule sets their order, use **Random Determination** to choose the next Monster. Resolve that Monster's activation completely, then repeat until every Monster in the Group has activated.
- By default, neutral Monster Groups are allied with each other and hostile to every party, but do not target, engage, or wake because of allied Monsters. A Monster described as **hostile to all** treats every other combatant as an enemy, including Monsters outside their own Group; Monsters in their own Group remain allied.
- Monsters do not spend AP, use NRG, take **Reactions**, or use ability scores unless a rule explicitly grants them.
- A Monster never makes a Check. An effect that would require one applies automatically unless the Monster is **Immune** to it.
- Unless a scenario says otherwise, a **Boss** begins **Awake** and uses **Relentless Assault** instead of activating during the **Monster Phase**. Each hostile Hero triggers it once per round after activating. A Hero who spends their last AP on a **Reaction** before activating triggers it after the current activation or effect instead. The Boss cannot exceed the number of starting hostile Heroes. Only their first activation each round resolves start-of-activation Special Abilities and **AI Steps**; every attack step resolves their full printed **Multi-Attack**.
- A Monster has a default perception range of **12"**. A visible enemy for Monster AI must be within perception range and **LOS**. A listed special sense or explicit target range may extend perception as described in **9.5**.
- At the start of a Monster's activation, determine their **Primary Target**, first applying any **Target Priority** printed in a Scenario-Specific Monster's **AI Steps**. Evaluate AI Steps in ascending order; for a step marked **on d6 N+**, roll **1d6** and require **N** or higher. Resolve the first valid AI Step, if any. Otherwise, attack an **Engaged** enemy, move toward and attack the **Primary Target**, or return toward the Group's objective or Guard Point.
- The standard **Primary Target** is the nearest visible enemy. Break ties by lowest current HP, then the most recent enemy to damage that Monster, then **Random Determination**.
- When a party-controlled source reduces a **Monster** to **0 HP** or otherwise defeats them, that party collects the Monster's CV. If no party-controlled source defeats the Monster, no party collects that CV unless a rule says otherwise. Competitive play secures collected Monster CV when the adventure ends; solo and cooperative play use the outcome-grade banking rules.
- A named bestiary Monster created by a Monster rule joins the creator's Group, cannot activate until the next Monster Phase, and yields **0 CV** unless a rule says otherwise.

C.9 Summon Summary

- **Summons** are temporary combatants that their creating rules identify as Summons. A named bestiary Monster placed by a Monster or scenario rule remains a **Monster** unless that rule explicitly identifies them as a Summon.
- An allied **Summon** with no listed AP has **2 AP**. A Summon created during a round gains their full listed or default AP immediately.
- A Summon created by a Power normally takes its activation immediately after the caster's activation. If the Power resolves outside the caster's activation, the Summon activates immediately after the current activation ends, or immediately after the Power resolves if no activation is in progress. This is the Summon's only activation that round. Resolve multiple Summons in an order chosen by the caster's controller.
- If a non-Monster **Summon** must make a **STR**, **DEX**, **INT**, or **SPI Check** with a score omitted from their profile, treat that score as **+0** for that Check.
- Unless a rule explicitly says otherwise, an allied **Summon** cannot take **Reactions**, **Interact**, **Spot**, or **Hide**; carry, claim, control, score, or extract objectives; contribute **Coin Value**; satisfy extraction requirements; or complete campaign objectives.
- A party's limit is **2 allied Summons** in play. If a rule would create a third allied **Summon**, create the Summon, then choose one allied Summon in that party to be dispelled. Resolve the new Summon's "when summoned" effects only if the new Summon remains in play.
- Unless a rule says otherwise, a **Summon** is removed from the battlefield at the end of the adventure.

C.10 Campaign Summary

A campaign follows this structure:

1. **Expedition Phase**
2. **Skirmish Phase**
3. **Aftermath Phase**
4. **Town Phase**

During the **Aftermath**, record each secured reward in the **Treasury** or **Storage** once; do not record a reward again if it was already added during play. Then resolve casualties and injuries, confirm adventure completion, and roll on the completed expedition's **Journey Table** before the **Town Phase**. During an adventure, an allied Hero adjacent to a death marker may use **Interact [1 AP]** to recover and carry the dead Hero's items to extraction. Journey effects that choose a Hero use only living Heroes from the Active Party that completed the adventure.

Competitive play secures collected Monster CV when the adventure ends unless a scenario says otherwise. In solo and cooperative play, **Major Victory** and **Costly Victory** secure collected Monster CV; **Withdrawal** and **Catastrophe** lose it unless a scenario says otherwise.

During the **Town Phase**, each party normally receives **4 TAP** to spend on Town actions such as trade, healing, magical research, retraining, Stronghold construction, and recruiting persistent support. A party may add no more than **1 new Hero** per Town Phase with **Recruit Hero [1 TAP]**, and its Roster can contain no more than **8 Heroes**. Its Stronghold roster can contain no more than **8 Hirelings**, including Animal Companions. Hirelings are paid party assets and never modify enemy, Boss, reinforcement, or objective scaling. Purchasing a **Stronghold Component** costs **1 TAP**, and a party may purchase no more than **1 Stronghold Component** during the same **Town Phase**.

Starting items gained through **Recruit Hero** cannot be sold, transferred, reassigned, or placed in shared **Storage** until that recruit completes one adventure in the **Active Party**. If the recruit leaves the Roster before then, remove those starting items.

In competitive campaigns, a party that completes any **5** different **Stronghold Components** achieves **Triumph** after the current Town Phase. If both parties do so during the same Town Phase, both achieve Triumph. Solo and cooperative campaigns instead end with the **Triumph Finale** in **11.5.4**, which a party may attempt once it has completed any **5** different Stronghold Components and its Active Party has **APL 9–10**.

Pausing and Resuming a Campaign

This is record-keeping guidance only; it does not create a rewind, reset, replay, or save/reload permission. Between adventures, preserve enough of the existing campaign record to resume accurately: the **Roster** and Active Party; each Hero's Level, Wounds, advancement choices, and persistent rewards; **Treasury** and shared **Storage**; Hirelings and Animal Companions; completed Stronghold Components and their benefits; and any death, retirement, Journey result, injury, reward, or other effect that still matters later.

If an adventure itself is paused by agreement, record enough existing battlefield state to continue the same position: round and current phase; activation/Initiative state; current HP, NRG, and AP; conditions and ongoing effects; Monster Group numbers and states; objective and treasure positions/ownership; clocks and scores; delayed reinforcements; and which combatants have already activated. No listed item changes the underlying rules; omit anything that is not relevant to that adventure.

C.11 Glossary of Terms and Conditions

This is the sole alphabetized glossary for core rules terms, conditions, campaign vocabulary, and reference terminology used throughout the manuscript. The detailed rules in the main sections remain authoritative.

Acid: A damage type.

Active Party: The Heroes selected from a campaign party's Roster for the current adventure. A standard Active Party contains **4 Heroes**.

Adamantine: An item quality. **Adamantine** items are metal for rules that care whether an item is metal. See **7.6**.

Adjacent: The horizontal distance and vertical separation between the two spaces or points are each **1"** or less. In **Grid Mode**, the two horizontal positions must overlap or neighbour each other orthogonally or diagonally, and the vertical separation between them must be **1"** or less.

Advantage: Add one extra die of the same type to the affected roll, then ignore the lowest single die result among the affected dice. For a d20 **Check**, roll **2d20** and ignore the lower die. If both **Advantage** and **Disadvantage** apply, those rules cancel.

Aftermath: Short form of **Aftermath Phase**.

Aftermath Phase: The third phase of the campaign cycle, resolved after the Skirmish Phase. Wounds, fates, and rewards are settled here before the **Town Phase**. See **11.2**.

AI Step: A numbered Monster AI procedure label such as **AI Step 1** or **AI Step 2**. These labels indicate behaviour priority order only. They are not movement terms and are unrelated to **Shift**. When a step is marked **on d6 N+**, roll **1d6** as that step is evaluated; the step is valid only on **N** or higher.

Allied: On your side.

Ally: Another combatant on your side. You are not your own ally unless a rule explicitly says otherwise.

AP: The resource used to move, attack, cast Powers, interact, and take Reactions.

APL: Average Party Level. During an adventure, add the Levels of all Heroes in the **Active Party**, divide by the number of Heroes in that Active Party, then round down. During the following Town Phase, continue using that APL even if Heroes are swapped. Before the first adventure, use the starting Active Party.

Arcane: A damage type and magical tradition used by Arcane Spells.

Area of Effect: A blast, **Cone**, **Line**, **Aura**, burst, or similar effect that affects an area rather than a single target. In **Tabletop Mode**, a combatant source uses the centre of their footprint as the origin of a non-Aura area unless a rule names another origin point, and a combatant is affected if any part of their rules footprint lies within or touches the area. Areas of Effect cannot penetrate **Blocking Terrain** or a solid floor, roof, or platform. Cover, **Hidden**, and **Invisible** do not protect against an Area of Effect that does not target the combatant directly unless a rule says otherwise. Unless an Area says otherwise, roll its damage once for all affected combatants and use the shared-roll procedure in **2.7.3**.

Armour Dice (AD): Dice rolled to generate **AV**. Chest **AD** is rolled automatically against blunt, piercing, and slashing damage; shield **AD** is rolled only through **Block**. Add the result to every applicable source of flat AV. The total reduces only **blunt**, **piercing**, and **slashing** damage.

Armour Value (AV): Mitigation against **blunt**, **piercing**, and **slashing** damage, regardless of source. Damage of every other type and HP loss ignore AV. You apply AV automatically whenever you would suffer such damage; it costs no AP and is not a Reaction. AV may be flat or generated by **Armour Dice (AD)**; all AV is treated identically, and a rule that reduces, halves, or ignores AV applies to the total.

Aura: An Area of Effect that extends in all directions from its source, centre point, target point, marker, terrain feature, or origin point. In **Grid Mode**, it uses the geometric square-centre rules in **2.7.3**, not the orthogonal and diagonal distance counting in **2.6**. Unless a rule says otherwise, an Aura moves

with its source and ends when its source leaves play.

Awake: A Monster Group state. Awake Monster Groups activate during the **Monster Phase**.

Base Damage Dice: The die or dice rolled for an attack before static modifiers and critical bonus dice.

Beast: A combatant whose rule gives them the **Beast** tag. Monsters normally gain the tag from the **Beast** Special Ability, and all Animal Companions have it. Beast-targeting rules affect that combatant; the tag has no other effect by itself.

Bench: Any Heroes on your Roster not currently in the Active Party.

Bleeding: At the end of their activation, a combatant with **Bleeding** loses **2 HP**. This HP loss cannot be reduced by **AV**, **AD**, **Resistance**, or **Immune**. It ends if they regain HP, receive **Bandages**, or a rule removes it. A **Cursed** combatant cannot end **Bleeding** by regaining HP; **Bandages** and condition-removal effects still work.

Blinded: You cannot draw **LOS** beyond **2"**. Attack damage rolls and **Checks** that require sight are made with **Disadvantage**.

Block: A Reaction used when an attack or effect would deal blunt, piercing, or slashing damage to you while you have a shield equipped. Roll your shield's AD, if any, and add its flat AV to the AV you already apply against that source.

Blocking Terrain: Terrain that cannot be entered, moved through, or ended in. It blocks **LOS**.

Blood Price: HP loss paid by a Sorcerer when a Sorcery fails its **Casting Check** or when a Sorcery rule requires it. **Blood Price** is HP loss, not damage.

Blood Surge: A Sorcery or Sorcerer rule that increases power through blood-fuelled cost or backlash, as defined by the specific rule that grants it.

Blunt: A damage type.

Boss: A unique LVL 10 Monster used as a capstone threat. Unless a scenario says otherwise, a Boss begins **Awake** and uses **Relentless Assault** instead of activating during the **Monster Phase**.

Boss Scale: The multiplier applied to a Boss's printed HP and other listed values. It equals the number of starting Heroes on all sides hostile to the Boss, minimum **1**. Hirelings, Animal Companions, Summons, and other non-Hero allied combatants never contribute. See **9.7 The Bestiary**.

Burning: At the end of each round, suffer **1 fire damage**. During your activation, you may spend **1 AP** to end **Burning** on yourself. It also ends if you enter water or a rule removes it.

Carried Objective: A scenario marker, treasure item, or protected element carried by a Hero under the default pickup, transfer, drop, and extraction rules in **Section 10**, unless its own scenario rule overrides them.

Caster Supremacy: A Caster Automatic Special Ability gained at Level 4. When the Hero casts a damaging **Tier 0** Power, they roll one additional base damage die of that Power's normal base damage die type.

Casting Check: The **Check** made to resolve a Power. It uses the casting ability specified by the Power, class, tradition, or item.

Celestial: A combatant whose rule gives them the **Celestial** tag. The tag has no effect by itself; rules that affect Celestials say so explicitly.

Check: A d20 roll plus the listed ability score or modifier against a target of **12**, unless a rule says otherwise. A non-Monster combatant with no listed value for a required ability score treats that score as **0** for that Check. A Monster never makes a Check, as described in **2.3**.

Climb: Vertical movement during a **Move** action. Each **1"** climbed costs **2"** of movement and requires a **STR Check** after declaring how far the combatant will climb. On a failure, the combatant does not climb, remains at the starting position, becomes **Prone**, and ends their movement. If that position has no legal support, resolve **Falling** from that point.

Coin Value: The wealth a side has secured, measured in coins. It includes banked and secured coins, the **CV** of Monsters that side de-

feated, the listed value of secured scenario objectives, and the list price of items secured from **Treasure rolls**. A scenario may name a narrower total for its own victory condition.

Coins: The game's currency. Written as **Xc**, where **X** is the number of coins.

Collision: Forced movement stopped early by **Impassable Terrain**, **Blocking Terrain**, or another combatant. The target stops at the last legal position. Another restriction, a battlefield edge, or missing support beyond a physical edge does not cause a **Collision**. A **Collision** deals no damage by itself; a rule that deals **Collision** damage says so. See **4.4.6**.

Combatant: Any Hero, Hireling, Monster, Summon, or other model that can act on the battlefield.

Cover: Partial protection. Cover is binary and does not stack. A target that occupies **Cover Terrain** or an area that provides **Cover** has Cover against nonadjacent enemies. A sight line that crosses, or touches the edge or corner of, any terrain feature other than **Open Terrain** outside the two spaces also grants Cover. A sight line crossing another combatant grants Cover only if that combatant is not **Prone** or **Knocked Out** and their **Sz** is the same as or larger than the target's **Sz**. Other rules may grant Cover. Ranged weapon attacks and non-area damaging ranged Powers against a target with **Cover** roll their base damage dice with **Disadvantage**. Harmful **LOS**-based Powers that require a **Check** to affect that target are also made with **Disadvantage**. Cover never applies to melee weapon attacks. Cover granted only by a sight line crossing a combatant does not satisfy any requirement to have Cover in order to become or remain **Hidden**. Areas of Effect and hazards ignore Cover unless a rule says otherwise.

Cover Terrain: Terrain that may be entered. It provides **Cover** against nonadjacent enemies. It can be seen into and out of near its edge, but not across its depth.

Critical Cast: A natural **20** on a **Casting Check**. The Power succeeds and gains one Critical Cast bonus as described in **8.2**.

Critical Failure: A natural **1** on a d20 **Check**. Some other rules, such as Parry, may define their own critical failure result.

Critical Hit: An attack or damaging Power in which any retained base damage die shows its maximum value. The first listed damage type is its primary damage type and determines its universal Critical Hit rider unless a rule says otherwise.

Critical Success: A natural **20** on a d20 **Check**. Some attack or reaction rules may also define their own critical success result.

Cursed: You cannot regain HP by any means, and therefore cannot end **Bleeding** by regaining HP; **Bandages** and condition-removal effects still work. **Cursed** lasts until the end of the adventure unless a rule removes it, such as **Purify** or a **Potion of Remove Curse**.

Dangerous Terrain: Terrain with a listed hazard that applies when a combatant enters it, crosses it, or ends movement or forced movement in it. Unless the terrain rule says otherwise, resolve a given **Dangerous Terrain** feature no more than once per movement or forced movement.

Darkness: A visibility state. Every unlit area provides **Cover** against nonadjacent enemies. Darkness does not block or limit **LOS** unless a rule says otherwise.

Darkvision: A sense that ignores **Cover** and visual penalties caused solely by nonmagical **Darkness** when determining **LOS** to, targeting, or resolving an effect against a combatant, object, space, or area origin within its listed range. It does not create **Light**, remove **Darkness**, or ignore **Hidden** or **Invisible**. **Magical Darkness** applies normally unless another rule says otherwise.

Declared State: A combatant's recorded movement and positional outcome after a legal declaration under **2.6.1 Declared Movement and Positional State**. A **Declared State** remains authoritative until the combatant moves again, is moved by an effect, a battlefield-state change invalidates one of their declared facts, or a rule requires verification.

Deep Water: A **Terrain Tag**. Water too deep to stand in. A combatant in **Deep Water** swims

at the surface, treats it as **Difficult Terrain**, cannot be **Prone**, and makes attack damage rolls, **STR Checks**, and **DEX Checks** with **Disadvantage**.

DEX Check: A **Check** using **DEX**.

DEX Pen: The **DEX** penalty listed by a piece of armour or a shield. It applies to **DEX Checks** and to any rule that uses the **DEX** modifier, and it does not reduce damage. See **7.10**.

Difficult Terrain: Terrain in which each **1"** moved costs **2"** of movement. In **Grid Mode**, entering a **Difficult Terrain** square costs **2"** of movement for an orthogonal step and **3"** for a diagonal step.

Disadvantage: Add one extra die of the same type to the affected roll, then ignore the highest single die result among the affected dice. For a d20 **Check**, roll **2d20** and ignore the higher die. If both **Advantage** and **Disadvantage** apply, those rules cancel.

Dodge: A Reaction that uses a **DEX Check**, with a maximum of **+5** from your own DEX score. On success, suffer no damage or HP loss from the triggering effect. On failure, resolve the effect normally; on a natural 1, also become Prone. A successful Dodge does not cancel non-damage effects unless the triggering rule says it does.

Elevation: Height above the battlefield surface. A combatant is at a **higher elevation** than another only when the difference between their elevations is **2"** or more. In **Grid Mode**, each marked elevation level is **1"** and the difference must be at least **2** levels. Attacks against an enemy at a lower elevation roll their base damage dice with **Advantage**. Adjacency and melee distance also use vertical separation under **2.9.9**.

Empower: An option on some Powers that modifies the Power's effect when the caster pays an additional **NRG** cost declared at casting. See **Empower** in **Section 8.2**.

Enemy: Any combatant not on your side, including opposing party combatants and Monsters, unless a rule says a specific combatant is not an enemy for that interaction.

Engaged: Adjacent to at least one enemy.

Explosion: An effect that specifically says it explodes. Do not treat every Area of Effect as an **Explosion** unless its rule says so. See **2.7.3**.

Extract: To successfully leave the battlefield with treasure, loot, or another carried objective.

Falling: The fall origin is the point named by the triggering rule, or the point where the combatant lost support or fell from. Fall distance is the vertical distance between the fall origin and the point where the combatant is placed after the fall. A falling combatant loses **1 HP for every full 1" fallen beyond the first 1"**. After applying this HP loss, they become **Prone** unless a rule says otherwise. Falls of **1"** or less cause no HP loss. This HP loss has no damage type and cannot be reduced by **AV**, **AD**, **Resistance**, or **Immune**. Falling is not movement and does not trigger **Reflex Attack**.

Fiend: A combatant whose rule gives them the **Fiend** tag; the **Fiend** Special Ability grants this tag. The tag has no effect by itself; rules that affect Fiends say so explicitly.

Finesse: A weapon trait. Attacks made with a **Finesse** weapon add **DEX** instead of **STR** to the damage total. See **7.7**.

Fire: A damage type.

Footprint: The rules area a combatant occupies. **Sz S** and **Sz M** use a **1"×1"** footprint; **Sz L** uses **2"×2"**; **Sz H** uses **3"×3"**. See **Size and Footprints** in **2.6**.

Forced Movement: Movement caused by a rule rather than chosen movement. Forced movement includes **Push**, **Pull**, and **Slide**, and never triggers **Reflex Attack**.

Frightened: You cannot willingly move closer to the source while it is in **LOS**. Attack damage rolls and **Checks** you make against the source are made with **Disadvantage**.

Guard Point: The point on the battlefield a Monster Group treats as their anchor for movement, patrol, and response. Usually assigned during scenario setup.

Heal / Healing: Restoring lost HP. Healing is reduced or prevented only if a rule says so.

Heard the Song: A named condition defined in **9.7 The Bestiary (The Voice Beneath the**

Bells). A Hero with this condition suffers **−1 SPI** until it is removed. Remove it during the **Town Phase** with **Quiet the Bells [1 TAP]** at **The Chapel**.

Hero: A player-controlled adventurer and the primary member of a party.

Hidden: Prevents attacks, Powers, abilities, and actions that require **LOS** from targeting the combatant, but does not block **LOS**. The first attack, harmful Power, or harmful Special Ability they resolve gains the first applicable benefit in **5.9**, then **Hidden** ends. Their normal **Hide distance** is **2"**; a rule that changes it changes both the requirement for taking **Hide** and the distance at which a nearby enemy ends **Hidden**. **Hidden** also ends under the other triggers in **5.9** and does not prevent Areas of Effect that do not target the combatant directly.

Hireling: An allied non-Hero combatant whose profile or granting rule identifies them as a Hireling. A Hireling follows the normal combat rules except where their own rules say otherwise. Hirelings do not count toward Party Size or APL and never modify enemy, Boss, reinforcement, or objective scaling.

Holy: A damage type.

HP: Hit Points. A profile that lists one HP value uses it as both current and maximum HP unless a rule says otherwise. When a Hero is reduced to **0 HP**, that Hero becomes **Knocked Out** instead of being immediately removed unless a rule says otherwise.

Huge (H): A Size category with a **3"×3"** footprint, or **3×3 squares** in Grid Mode.

HP loss: A reduction of **HP** that is not damage. **AV** and **AD** never reduce **HP loss**, and effects that trigger on damage do not trigger on **HP loss** unless they say so. See **5.4**.

Ice: A damage type.

Immobilized: Your Speed becomes **0"**. You cannot **Move**, **Shift**, **Climb**, or **Jump**.

Immune: Takes **0 damage** from the stated source or damage type, or ignores the stated condition or effect if a rule says so.

Impassable Terrain: Terrain that cannot be entered, moved through, or ended in. It provides **Cover**. It does not block **LOS**.

Initiative: The start-of-round process used to determine Party Phase order and simultaneous timing precedence.

Initiative Winner: The side that wins Initiative for the round and chooses which side activates first during the Party Phase.

Injuries Table: The d20 table rolled when a Hero is reduced to **0 HP** and survives long enough to resolve the result.

INT Check: A **Check** using **INT**.

Invisible: Prevents enemies from targeting the combatant with **LOS**-based attacks, Powers, or Special Abilities unless the attacker is adjacent or has a rule that ignores **Invisible**. A melee attack with **Reach** does not by itself allow targeting unless the attacker is adjacent or another rule allows it. An adjacent attacker that cannot ignore **Invisible** rolls the attack's base damage dice with **Disadvantage**. It does not prevent Areas of Effect that do not target them directly. **Invisible** ends after the combatant's first attack, harmful Power, harmful Special Ability, **Push**, or **Trip** resolves unless the effect says otherwise.

Journey Table: The d20 table rolled during the **Aftermath Phase** for the completed expedition's Climate. Apply the rolled result immediately. See **11.2.3**.

Jump: Horizontal movement during a **Move** action. Each **1"** jumped costs **2"** of movement and requires a **DEX Check** after declaring a legal landing point. A **Jump** cannot increase elevation by more than **1"**. On a failure, the combatant falls and their movement ends.

Knocked Out: You are at **0 HP**. You cannot activate, take actions, voluntarily move, attack, use Powers, use Special Abilities, or take Reactions. You remain **Prone** unless a rule prevents you from being **Prone**. Resolve damage and **HP** loss while **Knocked Out** under **5.8**.

Large (L): A Size category with a **2"×2"** footprint, or **2×2 squares** in Grid Mode.

Legendary Artifact: A unique named item. A party cannot hold two copies of the same named **Legendary Artifact**; a treasure result that would duplicate one is rerolled once. See **7.16**.

Legendary Veteran: A Hero that **Retires** at **Level 10** becomes a Legendary Veteran in addition to producing their normal **Retirement Payout**. The Veteran cannot be assigned during the **Town Phase** in which they are created. Beginning with the party's next **Town Phase**, assign the Veteran to one completed Stronghold Component. Once assigned, they cannot be reassigned. A Legendary Veteran grants the benefit listed for their assigned Component. See **11.4**.

Light Source: Creates **Light** in its Aura.

Lightning: A damage type.

Line of Sight (LOS): A legal visual line from a source to a target. Tabletop Mode draws the sight line between the centres of the source and target combatant footprints, markers, terrain features, hazards, or listed points. Grid Mode draws it between the centres of one occupied source square and one occupied target square. If range, **LOS**, and **Cover** apply to the same effect, the same square pair must satisfy all three. If no legal sight line can be drawn, the target is not in **LOS**.

Living Combatant: Any combatant that does not have the **Undead** or **Construct** ability.

Luck (Luck Points): A Hero resource. Spend **1 Luck Point** after seeing an eligible d20 **Check** or damage roll, but before applying consequences. Reroll the entire roll and use the new result. A roll can be rerolled by **Luck** only once. If more than one Hero could spend **Luck**, use the decision order in **2.10**.

Magical Darkness: Darkness that a rule explicitly describes as magical. Ordinary **Darkvision** does not ignore **Cover** or visual penalties caused by Magical Darkness unless another rule says otherwise.

Magical Weapon: A weapon with **Enchanted +X**, a named **Permanent Special Item** weapon, or a weapon a rule explicitly calls magical. **Masterwork, Silvered, Cold Iron, Elven, Sacred, Palesteel,** and **Adamantine** do not make a weapon magical by themselves. A Power, poison, oil, or temporary damage-type change does not make a weapon magical unless the effect explicitly says so.

Martial Supremacy: An Automatic Special Ability gained at Level 4. A Martial Hero's weapon attacks roll one additional base damage die. A Hybrid Hero gains that additional die only for weapon attacks made with their **Primary Weapon**. Other applicable sources of additional base damage dice stack normally.

Medium (M): The default Size category. Medium combatants use a **1"×1"** footprint, or **1×1 square** in Grid Mode.

Max HP: A combatant's maximum **HP**. A Hero's starting value is Ancestry Base HP plus Class Starting HP Bonus, increased at each Level. Current **HP** never exceeds **Max HP**. See **6.2**.

Max NRG: A caster's maximum **NRG**, equal to Level plus twice their Primary Casting Score, minimum **0**. Martial classes have no **NRG** pool. See **6.2**.

Max Speed: The highest **SPD** a combatant may have while wearing a given piece of armour. Armour that lists a **Max Speed** caps **SPD** at that value. See **7.10**.

Metal Equipment: Metal Chest armour, shields, weapons, and qualities are defined in **7.2**. Their restrictions on Power and scroll use are defined in **8.2**.

Monster: A neutral or hostile non-party combatant controlled by the Monster AI rules.

Monster Allegiance: Unless a scenario says otherwise, neutral Monster Groups are allied with one another and hostile to every party. They do not target, become **Engaged** with, or wake because of allied Monsters. A Monster or Group that is **hostile to all** treats every other combatant, including Monsters outside their own Group, as an enemy; Monsters in their own Group remain allied unless a rule says otherwise.

Monster Group: A set of **Monsters** that share a group number and activate during the same Group activation in the **Monster Phase**. If no rule sets the order of individual Monsters within the Group, use **Random Determination** as described in **3.4.2**.

Monster Phase: The phase in which Monster waking rules are resolved and each **Awake** Monster Group activates.

Move: The universal action that lets a combatant move up to their Speed. **Climb** and **Jump** are allowed only during **Move** unless a rule explicitly says otherwise.

Natural: A **Terrain Tag**. Roots, undergrowth, foliage, water, mud, sand, snow, ice, or unworked earth or stone. It excludes doors, walls, buildings, stairs, bridges, structural rubble, traps, objectives, Power-created terrain, and scenario hazards unless a rule explicitly labels that feature natural.

Necrotic: A damage type.

Negative Condition: One of the following conditions: **Bleeding, Blinded, Burning, Cursed, Frightened, Immobilized, Poisoned [dX], Prone, Silenced, Sleeping, Slowed, Stunned,** or **Weakened**. **Hidden, Invisible, Knocked Out,** and **Wounds** are not negative conditions. The term does not include Wounds, scenario-specific states, or permanent injuries unless a rule explicitly says otherwise.

NRG: Energy used to cast Powers and activate certain abilities.

Off-Hand Weapon: When a Hero equips two one-handed weapons, the equipped weapon not chosen as their **Primary Weapon**. See **6.13**.

Open Terrain: Terrain with no effect on movement, **Cover**, or **LOS**.

Parry: A Reaction against a melee attack that deals **blunt**, **piercing**, or **slashing** damage. The defender must wield a weapon with the **Parrying** trait or a rule that allows **Parry**, then rolls that weapon's normal base damage dice and normal attack modifier and compares the result to the attack's total damage of every type after **Roll and build damage**, but before mitigation. Success negates all of the attack's damage, not only blunt, piercing, or slashing.

Party: One side's allied Heroes and Hirelings. Allied Summons belong to their controlling party for party-wide limits, but are not Heroes, Hirelings, or Roster members.

Party Leader: The Hero nominated by a side to anchor that side's Initiative rolls and to make choices assigned to the **Party Leader** by these rules. A party retains that designation for the duration of an adventure even if the **Party Leader** leaves the battlefield or is removed from play. See **6.1** for full rules.

Party Phase: The phase in which players activate allied combatants one at a time.

Party Treasury: The shared campaign coin total of the party. Only secured or banked Coins are added to it, and each reward is added only once.

Piercing: A damage type.

Poison: A damage type.

Poisoned [dX]: At the end of your next activation, suffer the listed poison damage, then remove **Poisoned**.

Power: A supernatural effect that uses the casting rules in **Section 8**.

Pressure Clock: A mandatory solo and cooperative pacing rule rolled after scenario setup, unless the scenario assigns a specific Clock. Each clock lists its trigger, escalation, fail threshold, and mitigation. See **10.5.7**.

Primary Target: The enemy a Monster is currently trying to attack, move toward, or affect. A Scenario-Specific Monster applies any printed **Target Priority** before the normal target priorities. Under standard Monster AI, the **Primary Target** is the nearest visible enemy within the Monster's perception range; ties use lowest current HP, then the most recent enemy to damage that Monster, then **Random Determination**. If the Monster cannot reach any position from which it may attack its Primary Target this activation, it retargets under **Blocked Route** in **9.5**.

Primary Weapon: A Hero's designated equipped weapon. A two-handed weapon, or the only weapon equipped, is automatically Primary. When a Hero equips two one-handed weapons, choose one as Primary and treat the other as their **Off-Hand Weapon**. See **6.13**.

Prone: Melee attacks against you roll their base damage dice with **Advantage**. Ranged weapon attacks made from more than **2"** away roll their base damage dice with **Disadvantage**. You cannot **Block** or **Parry**. Spend **1 AP** to **Stand**. If a **Monster** is **Prone** at the

start of their activation, remove **Prone** before resolving their AI.

Psychic: A damage type and magical tradition used by Psychic Abilities.

Pull X": Forced movement that moves the target up to **X"** directly toward the source of the effect or toward a specified point.

Push X": Forced movement that moves the target up to **X"** directly away from the source of the effect or away from a specified point.

Psychic Ability: A Power of the Psychic tradition. See **8.7**.

Random Determination: The universal fallback when a rule requires 1 random option from a finite set and gives no other procedure. Every eligible option receives an equal chance; use the smallest die that can include all eligible options and reroll excess results. See **2.6.3**.

Reach: A weapon, natural attack, or Monster attack trait. A melee attack with **Reach** may target an otherwise valid enemy within **2"** in **Tabletop Mode**, or within **2** squares in **Grid Mode**, including diagonal squares. **Reach** does not change **Engagement**.

Reaction: An action taken when a rule provides a legal trigger and the reacting combatant can pay its cost from unspent **AP**. A combatant may take multiple **Reactions** in the same round, but only one in response to the same action or effect. For each affected combatant, only 1 **Reaction** may be declared by that combatant or on their behalf to modify how the source resolves against them. A **Reaction** used by the source's controller to modify the source's own roll does not count against that limit. A separate action granted by a **Reaction** may trigger **Reactions** normally. An allied **Summon** may spend unspent **AP** on **Reactions** only if a rule explicitly grants that **Summon Reactions**; otherwise, that **AP** is discarded at the end of the round.

Recharge X-Y: A Monster ability tag. If the ability has been used this adventure, roll **1d6** at the start of that Monster's activation; on **X-Y**, the ability becomes available again. A given Recharge ability cannot be used more than once per round unless a rule explicitly says otherwise.

Reflex Attack: A Reaction melee attack triggered during an enemy's activation when they leave your melee distance using **Move** or make a ranged attack within it. Normal melee distance is 1" in Tabletop Mode or adjacent in Grid Mode; Reach extends it to 2" or 2 squares. Shift, forced movement, and ranged attacks made as Reactions do not trigger Reflex Attack.

Relentless Assault: The Boss activation rule in **9.7 The Bestiary**. Each hostile Hero triggers 1 Boss activation per round after activating. A Hero who spends their last AP on a **Reaction** before activating triggers it after the current activation or effect instead. The Boss cannot exceed the number of starting hostile Heroes. Only the Boss's first activation each round resolves start-of-activation Special Abilities and **AI Steps**. The Boss does not activate during the **Monster Phase**.

Reload [1 AP]: A universal action. Ready an equipped weapon with the **Reload** trait so it may attack again. See **4.3.5**.

Resistant: Takes half damage, rounded down as normal, from the stated source or damage type.

Riposte: Damage dealt to the attacker when a successful **Parry** has a retained base damage die showing its maximum value. A **Riposte** is not an attack.

Roster: All Heroes currently belonging to the party in campaign play.

Round: The full sequence of **Initiative Phase**, **Party Phase**, **Monster Phase**, and **End of Round**.

Same-Named Effects: Two or more ongoing effects with the same name do not stack on the same combatant, item, or area unless a rule explicitly says otherwise; apply only one instance at a time. See **2.1.2 Same-Named Effects**.

Setup Roll-off: The Party Leader's controller rolls **1d20** once for their party. The higher result wins, and the winning party makes the listed setup choice. Reroll ties. In solo and cooperative play, the allied party automatically

wins and makes the listed winner's choice unless a scenario says otherwise. See **10.1**.

Shallow Water: A **Terrain Tag**. Water shallow enough to wade or swim across at the surface. It is also **Difficult Terrain** unless **Swim** or **Amphibious** says otherwise, and it does not grant **Cover** by itself.

Shift: A universal action or rule-granted short movement. A combatant may spend **1 AP** to **Shift 1"**. In **Grid Mode**, a diagonal square costs **1"** of **Shift** distance. A **Shift** is not a **Move**, cannot include **Climb** or **Jump**, cannot cross a gap, obstacle, or elevation change that would require **Climb** or **Jump** unless a rule explicitly says otherwise, and does not trigger **Reflex Attack** unless a rule says otherwise.

Silenced: You cannot cast Powers, and you cannot use a Special Ability that explicitly requires speech, chanting, or invocation.

Size (Sz): A combatant's physical rules category: **Small (S), Medium (M), Large (L),** or **Huge (H)**. Size determines footprint. See **Size and Footprints** in **2.6**.

Slashing: A damage type.

Sleeping: You immediately fall **Prone** unless prevented. You cannot take actions, voluntarily move, attack, use Powers, use Special Abilities, or take Reactions. Melee attacks against you roll **1** additional base damage die. You remain eligible to activate to end **Sleeping** even with **0 AP**. **Sleeping** ends when you take damage or lose HP, when an adjacent ally uses **Interact [1 AP]** to wake you, or at the end of your next activation. **Sleeping** is not the same as a **Resting** Monster.

Slippery Terrain: Terrain that may force a **DEX Check** if a combatant uses voluntary movement to move through it during one activation. On a failure, the combatant becomes **Prone** and their movement ends. If a combatant becomes **Prone** or falls while on **Slippery Terrain**, they slide **2"** in the direction they were travelling or being moved.

Slowed: If your Speed is greater than **0"**, halve it, rounded down to a minimum of **1"**.

Small (S): A Size category with a **1"×1"** footprint, or **1×1 square** in Grid Mode. A combatant with **Sz S** has **Small**: they cannot equip equipment with the **Heavy** equipment trait and may move through spaces occupied by **Large** or **Huge** combatants during voluntary movement, but cannot end in an occupied space. The Monster Special Ability **Heavy** is unrelated. All other movement rules still apply.

Sorcery: A Power of the Sorcery tradition. A **Sorcery** always resolves, but a failed **Casting Check** requires its **Blood Price**. See **8.5**.

Space: The area a combatant, marker, hazard, or terrain feature occupies. A combatant's space is their **footprint**, determined by **Sz** under the **Size and Footprints** rules in **2.6**. In **Grid Mode**, it is the square or squares that footprint occupies.

Speed (SPD): The distance a combatant may normally move with one **Move**. **SPD** is the abbreviation of **Speed** and is used for all combatants, including **Monsters**.

SPI Check: A **Check** using **SPI**.

Spot: A universal action. Choose one **Hidden** enemy within **12"** and **LOS**. **Spot** may choose a **Hidden** combatant despite the targeting restriction in **5.9**. Make an **INT Check** against **12**, with **Disadvantage** if that enemy has **Cover**. On success, that enemy loses **Hidden**. **Spot** does not remove **Invisible** unless a rule says otherwise.

Stand: The universal action that removes **Prone** from yourself.

Storage: The party's shared pool of unequipped items, consumables, and gear between adventures. Coins are tracked separately in the **Party Treasury**.

STR Check: A **Check** using **STR**.

Stronghold: The party's permanent campaign base. It has **10** available Components, and completing any **5** different Components wins a competitive campaign.

Stronghold Component: One of the 10 permanent upgrades a campaign party may build. Components are purchased only during the **Town Phase**. Competitive **Triumph** requires 5 different Components. See **11.3**.

Stunned: You cannot take actions, voluntarily move, attack, use Powers, use Special Abili-

ties, or take Reactions. You remain eligible to activate to end **Stunned** even with **0 AP**. **Stunned** ends at the end of your next activation, or immediately if a rule removes it.

Summon: A temporary combatant that their creating rule identifies as a Summon. A combatant does not become a Summon merely because a rule places or creates them. In particular, a named bestiary Monster placed by a Monster or scenario rule remains a **Monster** unless that rule explicitly identifies them as a Summon. An allied Summon with no listed AP has **2 AP**, and a Summon created during a round gains their full listed or default AP immediately. Unless a rule says otherwise, a Summon remains in play until they are reduced to **0 HP**, are dispelled through the allied Summon limit, are removed by a rule, or the adventure ends. A party's limit is **2 allied Summons** in play. If an effect would create a third allied Summon for that party, create the Summon, then choose one allied Summon in that party to be dispelled and removed from play. Resolve the new Summon's "when summoned" effects only if the new Summon remains in play. If more than one player controls that party, the player exercising **Party Leader** authority chooses which allied Summon is dispelled. Enemy, neutral, and Monster-created Summons do not count against a party's allied Summon limit unless a rule says otherwise. Unless a rule explicitly says otherwise, an allied Summon cannot take **Reactions**; take the **Interact**, **Spot**, or **Hide** actions; carry, claim, control, or score treasure or scenario objective markers; contribute **Coin Value**; satisfy extraction requirements; or complete campaign objectives. They are removed at the end of the adventure. If an allied Summon is carrying a treasure or scenario objective marker without a rule that allows them, they immediately drop that marker in their current space.

Sunder: A Martial Automatic Special Ability gained at Level 7. The Hero's weapon attacks ignore the first **4 AV** of their target. Because all **AV** is treated the same, **Sunder** reduces the target's total **AV**, whether that **AV** is flat or generated by **AD**.

Swim (X"): Surface movement across **Shallow Water** and **Deep Water** at the listed Speed. It ignores movement penalties, movement **Checks**, **Difficult Terrain**, and attack, **STR Check**, and **DEX Check Disadvantage** caused by water or swimming. Swimming does not change elevation.

TAP: Town Action Points spent on Town actions during the Town Phase in campaign play.

Target: The combatant, marker, hazard, terrain feature, or point chosen by a rule or action.

Target Priority: A Scenario-Specific Monster rule printed before that Monster's numbered **AI Steps**. Apply it when determining the Monster's **Primary Target**. If no listed target is valid, use the normal Monster target priorities. **Target Priority** is not an **AI Step** and does not end the Monster's activation. See **9.5**.

Temporary HP: A separate pool of temporary protection that absorbs damage and **HP loss** before normal **HP**. **Temporary HP** is not healing, does not stack with other **Temporary HP** unless a rule says otherwise, is granted as a fixed value without a dice roll, and always expires at the end of the round. See **5.4.2 Temporary HP**.

Terrain: Battlefield features that may affect **LOS**, movement, Cover, hazards, or objectives.

Terrain Tag: An optional label that adds movement, hazard, or other special rules without changing a terrain feature's Terrain Type. A Terrain Tag does not grant or remove **Cover** by itself. The tags are **Natural**, **Difficult Terrain**, **Dangerous Terrain**, **Slippery Terrain**, **Shallow Water**, and **Deep Water**.

Terrain Type: The single exclusive category assigned to each terrain feature, distinct part of a complex feature, or supporting surface at setup. A Terrain Type determines whether the feature may be entered and its default interaction with **Cover** and **LOS**. The types are **Open Terrain**, **Cover Terrain**, **Impassable Terrain**, and **Blocking Terrain**.

Total Miss: An attack whose retained base damage dice are all natural **1s**, unless a rule says otherwise. A **Total Miss** deals no damage and ends the attack. See **5.3**.

Treasure roll: One roll of **1d100** on the Treasure Table matching the party's current **APL**. Treasure Tables are ordered from least to most valuable. A treasure marker lists the number of Treasure rolls it yields, resolved when that marker is looted. See **7.6.1**.

Treasury: A campaign party's shared pool of coins. Coins spent on items, training, hirelings, and **Stronghold Components** are paid from the **Treasury**. See **11.2**.

Triumph: The final campaign victory achieved by completing the Stronghold in competitive play or winning the **Triumph Finale** in solo or cooperative play.

Vault Reserve: Temporary spending power granted by the Vault Stronghold Component. It can be spent only during the Town Phase in which it is gained, only on its listed categories, and is lost if unspent. See **11.3**.

Visible: A combatant, marker, hazard, terrain feature, or point is visible to you if you have **LOS** to it, it is not **Hidden** from you, and no other rule prevents you from seeing it.

Vulnerable: Takes double damage from the stated source or damage type.

Weakened: Your attack damage rolls are made with **Disadvantage**.

Weather Shift: A Power that temporarily suppresses the adventure's persistent Weather or Cavern Condition. It normally lasts until the end of the current round, but an explicit duration extension applies normally. Only the most recently resolved **Weather Shift** applies; when it ends, the persistent result resumes. A Weather Shift changes only weather effects unless it explicitly says otherwise.

Wild Shape: A Druid class feature that transforms the Druid into a listed form, replacing **SPD**, **Sz**, and other listed values. See **6.12**.

Wound: A permanent injury marker. A Hero dies immediately upon suffering a third Wound.

Wounded: A combatant having at least **1 Wound**. Some rules and items have effects that trigger on, or specifically target, Wounded combatants.

C.12 Play Examples

Hero Creation Example

Elspeth chooses a miniature of a mail-clad pilgrim carrying a mace and lantern. They build the Hero by choosing an ancestry, then a background, then a class, then the starting equipment package that best matches the miniature. Once the profile is complete, they record the Hero's HP, Speed, Size, Luck, ability scores, Special Abilities, and equipped gear before moving on to their next Hero.

Power Casting Example

*Brother Hal spends 2 AP to cast a Divine Prayer with Range 8". The target is in **LOS** and within range, so the Power is declared. Hal rolls 1d20 and adds SPI. Their total is 14, meeting the universal target of 12, so the Power succeeds and its effect is resolved. If Hal had rolled a natural 1, the Power would have critically failed and they would have suffered that tradition's failure effect instead.*

Melee Combat Example

*A Raider attacks a Guard with a hand axe. The Guard declares Parry. The Raider rolls **1d6 = 5**, adds **+2 STR**, and would deal **7 damage**. The Guard rolls a parry total with a shortsword: **1d6 = 5**, plus **+4 STR**, for **9**. The parry succeeds, so the Guard takes **0 damage**. Because the Guard's parry base die was not a maximum result, no **Riposte** damage is dealt back.*

Ranged Combat Example

*A Hunter fires a bow at an enemy across the courtyard. A low ruined wall is **Impassable Terrain** and the sight line crosses it, so the target has **Cover**. The bow attack is still legal, but the Hunter rolls the base damage dice with **Disadvantage**. The lower result is used, then DEX is added, and the target resolves their defence normally.*

Scenario Generation Example

Before the battle begins, the players determine the climate, scenario, weather, and Monster Groups as instructed by the scenario section. They then place terrain, assign each Monster Group a group number and Guard Point, deploy the battlefield, and begin Round 1 with the Initiative Phase.

Monster AI Example

During the **Monster Phase**, Groups 1, 2, and 4 are **Awake**. They activate in ascending group number order: Group 1 first, then Group 2, then Group 4. When Group 2 activates, no rule sets the order of its individual Monsters, so use **Random Determination** to choose which remaining Monster activates next. Each chosen Monster executes the **first valid instruction** of the **Standard Monster AI Script** and ends their activation before another Monster in the Group is chosen. No player chooses to delay or reorder the Groups or their individual Monsters.

Hostile AI Step 1 Example

A **Green Dragon** begins their activation with three Heroes clustered in front of them. They roll **5** for **Poison Breath (AI Step 1, on d6 5+)**, so the AI Step is valid. Place the cone using the Monster area-placement priorities, resolve the listed Checks and damage, and end the Dragon's activation.

Grid Movement and Multi-Square Example

*A **Large** combatant with a 2×2 footprint takes a **Move** in Grid Mode. After each orthogonal or diagonal step, every square the combatant would occupy must be legal. If one square of the new footprint enters **Difficult Terrain**, use the highest movement cost that applies to any square occupied after that step. The combatant may move through an allied combatant if the normal movement rules allow it, but cannot end the Move overlapping another combatant. This applies **4.4.3** directly; the example creates no additional footprint rule.*

Grid LOS and Cover Example

*A Ranger targets a two-square Monster in Grid Mode. Under **2.6**, test source-square and target-square pairs using one pair for range, **LOS**, and **Cover**. One pair has a sight line that touches the corner of a **Cover Terrain** square but does not pass through that square's interior and crosses no **Blocking Terrain**. That pair has **LOS**, and the touched terrain grants **Cover**. If another legal pair gives the target less Cover, use that pair instead; if Cover is tied, use the shortest range. If every possible pair is blocked by **Blocking Terrain**, a solid floor/roof/platform, or the interior of an intervening **Cover Terrain** square as described in **2.7.2**, the Ranger has no **LOS**.*

Monster Route-Resolution Example

*A Monster has a visible **Primary Target** but cannot attack from its current position. Two legal routes lead to the same required attack position: one is **6"** long and one is **7"** long. Under **9.5 F. Movement Priorities**, use the **6"** route because it is the shortest legal route. If two legal routes remain exactly tied after applying every relevant movement priority, determine only that unresolved final choice randomly. Player tactical preference never replaces the printed priorities.*

C.13 Single-Sheet Rules Summary

Use this double-sided table reference as a summary of common procedures. It does not override the full rules.

Size and Footprints Summary

Sz	Footprint
S	**1"×1" / 1×1 square**; has **Small**
M	**1"×1" / 1×1 square**
L	**2"×2" / 2×2 squares**
H	**3"×3" / 3×3 squares**

Small: Cannot equip equipment with the **Heavy** equipment trait. During voluntary movement, may move through **Large** or **Huge** combatants but cannot end overlapping a combatant. See **2.6**.

Side A: Round, Actions, and Combat

Adventure Preparation

1. APL. **2.** Climate. **3.** Core Scenario. **4.** Secondary Objectives. **5.** Weather. **6.** Setup Roll-off. **7.** Terrain. **8.** Objectives and Markers. **9.** Monsters. **10.** Guard Points. **11.** Party Deployment. **12.** Round 1.

See **10.1** for the complete procedure and **10.1.1** for Climate and Core Scenario selection.

Round Sequence

1. **Initiative Phase:** Refresh AP, roll Initiative, resolve start-of-round effects.
2. **Party Phase:** Sides alternate allied activations. Each allied combatant may activate once per round. An activated combatant must spend at least **1 AP** unless they cannot take actions; a **Stunned** or **Sleeping** combatant remains eligible to activate to end the condition even with **0 AP**, taking no actions and spending no AP. Unspent AP may be saved for **Reactions**. A side must **Pass** when they have no eligible combatants left.
3. **Monster Phase:** Resolve Monster waking rules, then activate each **Awake** Monster Group as described in **Section 3.4**.
4. **End of Round:** Resolve end-of-round effects, end effects that last until the end of the round, remove unspent AP, then check scoring, extraction, round limits, and victory conditions.

This is the normal order. In solo or cooperative play, **PvE Initiative** may place the **Monster Phase** before the **Party Phase**; resolve each phase once, then proceed to the **End of Round**. That phase order also sets simultaneous-effect priority between allied-side and Monster Group effects; terrain, weather, hazard, and scenario effects remain last.

Universal Actions

Action	Cost	Summary
Move	1 AP	Move up to Speed.
Shift	1 AP	**Shift 1"** without triggering **Reflex Attack**.
Attack	1 AP	Make one melee or ranged attack.
Push	1 AP	Make a **STR Check** with **Disadvantage**. On a success, **Push** an adjacent combatant **2"**.
Trip	1 AP	You must be wielding a weapon with **Trip**. Choose a combatant of your **Sz** or smaller within that weapon's **Range** or melee distance. Make a **STR or DEX Check** with **Disadvantage**. On a success, the target becomes **Prone**.
Power	Varies	Resolve the **Universal Casting Sequence**.
Special Ability	Varies	Use one activated Special Ability. Every activated Special Ability lists an AP cost, including **0 AP**. Passive and triggered Special Abilities are not actions.
Stand	1 AP	Remove **Prone** from yourself.
Interact	1 AP	Interact with an **adjacent** and **visible** battlefield element.
Hide	1 AP	Become **Hidden** if outside enemy **LOS**, or if you have **Cover** from every enemy with **LOS** and no enemy is within your **Hide distance**. You cannot **Hide** while **Engaged** or while carrying a **Light Source**.
Spot	1 AP	Make an **INT Check** or **SPI Check** against **12**, whichever is higher, to remove **Hidden** from one eligible enemy.

A combatant may take the same non-Reaction **0 AP** action only once during each activation unless the action says otherwise. **0 AP Reactions** use their own triggers and frequency limits.

Attack Resolution

1. **Declare and verify:** Name the attacker, attack, target, and damage types; confirm melee distance or range, **LOS**, visibility, Cover, and target legality.
2. **Resolve declaration Reactions:** Resolve redirection and other declaration Reactions, then verify the attack again. Declare the defender's one modifying Reaction, if any.
3. **Roll and build damage:** Generate the complete damage roll: roll and retain base damage dice with all **Advantage** and **Disadvantage**, resolve permitted changes or rerolls of retained base dice, determine provisional **Total Miss** and **Critical Hit** results, roll all applicable exploding and other damage dice, and add modifiers by type. Before consequences, resolve any **Luck** reroll under **2.10** and rebuild the complete roll from the new result. Using only the final result, resolve any **Total Miss** and end the attack if applicable. Otherwise, resolve **Critical Hit** and other after-roll effects at their stated timings, then state the total for each damage type.
4. **Defend and mitigate:** Resolve any chosen **Reaction**, then apply **AV**, other mitigation, and **Immune**, **Resistant**, or **Vulnerable** under **5.1.1**.
5. **Apply and finish:** Apply the remaining damage, then resolve any remaining **Critical Hit** effects, conditions, **Wounds**, and **Knocked Out** effects.

AV reduces only blunt, piercing, and slashing damage, regardless of source. Damage of every other type and HP loss ignore AV. Keep each damage type separate until mitigation and damage-type modifiers are complete. Apply each eligible mitigation value once; if it can reduce more than one damage type, reduce eligible types in the order the source lists them.

For any damage roll shared by multiple combatants, declare each affected combatant's legal **Reaction**, if any, before rolling, resolve any **Luck** reroll before defence or mitigation, then apply the final roll separately to each combatant. See **2.7.3.** Roll non-area multi-target or repeated damage separately unless the effect says otherwise.

Combat Reactions

Reaction	Cost	Trigger	Summary
Block	1 AP	An attack or effect would deal blunt, piercing, or slashing damage to you while you have a shield and can take Reactions.	Roll your shield's AD, if any, and add its flat AV to the AV you already apply.
Dodge	1 AP	An attack or evadable effect targets you.	DEX Check, using a maximum of +5 from your own DEX. Success: suffer no damage or HP loss. Failure: resolve normally. Natural 1: also become Prone.
Parry	1 AP	A melee attack that deals blunt, piercing, or slashing damage targets you while you have a legal parry weapon or rule.	Roll parry weapon damage against the attack's total damage of every type after Roll and build damage, but before mitigation. If all retained base dice are natural 1s, Parry fails, the attack ignores all of your AV, and the attack resolves normally otherwise. Success: suffer none of the attack's damage; effects that do not require the attack to damage you resolve normally.
Reflex Attack	1 AP	During an enemy's activation, they leave your melee distance using Move or make a ranged attack within it. Shift, forced movement, and ranged attacks made as Reactions do not trigger it.	Make one melee attack with Disadvantage on its base damage dice. Declare a ranged trigger before that attack's damage is rolled.

Power Defaults

- A **Critical Cast** grants only one bonus from the first applicable category in **8.2**.
- **Arcane Spells** and **Druidic Rituals** prohibit metal Chest armour, weapons, and shields; **Sorceries** prohibit metal Chest armour. **Divine Prayers** and **Psychic Abilities** are unrestricted. Elven Chest armour and Elven weapons do not count as metal for these restrictions. Apply the same restrictions to scrolls.
- If a Power creates an ongoing effect and gives no duration, it ends at the end of the current round. Named conditions and **Summons** use their own expiry rules.
- During each round, a combatant may benefit from only one **Power or scroll effect** that grants **AP**, refunds **AP**, or reduces an **AP** cost, regardless of when that effect was used.

Side B: Conditions, AI, Terrain, and Cover

Rules Boundaries

- **Celestial / Fiend:** Explicit creature tags with no inherent effect; the **Fiend** Special Ability grants the **Fiend** tag.
- **Living combatant:** Any combatant without **Undead** or **Construct**.
- **Magical weapon: Enchanted +X**, a named **Permanent Special Item** weapon, or explicitly magical; material and craftsmanship qualities alone are insufficient.

Conditions

Condition	Summary
Bleeding	At the end of their activation, a combatant with **Bleeding** loses **2 HP**. Ends when HP is regained, Bandages succeed, or a rule removes it.
Blinded	**LOS** maximum **2"**. Sight-based **Checks** and attack damage rolls have **Disadvantage**. Ends at the end of the affected combatant's next activation.
Burning	Suffer **1 fire damage** at the end of each round. Ends by spending **1 AP**, entering water, or rule removal.
Cursed	Cannot regain HP by any means. Lasts until the end of the adventure unless removed.

Condition	Summary
Frightened	Cannot willingly move closer to the source in **LOS**. Attacks and **Checks** against the source have **Disadvantage**. Ends at the end of the affected combatant's next activation.
Hidden	Cannot be targeted by attacks, Powers, abilities, or actions that require **LOS**, but does not block **LOS**. The first qualifying harmful effect gains the first applicable Hidden benefit, then Hidden ends. A rule that changes the distance requirement for Hide changes its detection distance by the same amount. Areas of Effect can still affect them.
Immobilized	Speed becomes **0"**. Cannot **Move**, **Shift**, **Climb**, or **Jump**. Ends at the end of the affected combatant's next activation.
Invisible	Cannot be targeted by **LOS**-based effects unless adjacent or ignored by a rule. A melee attack with **Reach** alone does not allow targeting unless the attacker is adjacent or another rule allows it. Areas of Effect can still affect them. Adjacent attacks have **Disadvantage**. Ends after the first attack, harmful Power, harmful Special Ability, **Push**, or **Trip** resolves unless stated otherwise.
Knocked Out	At **0 HP**. Cannot activate, take actions, voluntarily move, attack, use Powers, use Special Abilities, or take Reactions. Remains **Prone** unless a rule prevents it. Resolve damage and **HP** loss while **Knocked Out** under **5.8**. Ends when HP is restored above **0**.
Poisoned [dX]	At the end of next activation, suffer listed poison damage, then remove it.
Prone	Melee attacks against them have **Advantage**. Ranged weapon attacks from more than **2"** have **Disadvantage**. Cannot **Block** or **Parry**. Stand for **1 AP**. A **Monster** removes **Prone** at the start of their activation before resolving AI.
Silenced	Cannot cast Powers or use vocal Special Abilities. Ends at the end of the affected combatant's next activation.
Sleeping	Falls **Prone**; cannot act; remains eligible to activate even with **0 AP**. Melee attacks against them roll **1** additional base damage die. Ends on damage, when an adjacent ally spends **1 AP**, or at the end of their next activation.
Slowed	If Speed is greater than **0"**, it is halved, rounded down to a minimum of **1"**. Ends at the end of the affected combatant's next activation.
Stunned	Cannot take actions, voluntarily move, attack, use Powers, use Special Abilities, or take Reactions. Remains eligible to activate even with **0 AP**. Ends at the end of their next activation.
Weakened	Attack damage rolls have **Disadvantage**. Ends at the end of the affected combatant's next activation.

Negative conditions: Bleeding, Blinded, Burning, Cursed, Frightened, Immobilized, Poisoned [dX], Prone, Silenced, Sleeping, Slowed, Stunned, and **Weakened** only.

Monster AI Flow

1. Determine enemies using the default allegiance rules in **9.3** and any scenario or profile override.
2. Apply any **Target Priority** printed in a Scenario-Specific Monster's **AI Steps** when determining their **Primary Target**.
3. If no printed **Target Priority** produces a valid target, determine the normal **Primary Target**: nearest visible enemy within perception range; ties use lowest current HP, then the most recent enemy to damage that Monster, then **Random Determination**.
4. Evaluate numbered **AI Steps** in ascending order. For a step marked **on d6 N+**, roll **1d6** and require **N** or higher. Resolve the first valid step.
5. If **Engaged** with a valid enemy, attack that enemy.
6. Otherwise move toward the **Primary Target** and attack if able.
7. Otherwise move toward the scenario objective, Guard Point, or patrol route.

When a party-controlled source reduces a **Monster** to **0 HP** or otherwise defeats them, that party collects the Monster's CV. If no party-controlled source defeats the Monster, no party collects that CV unless a rule says otherwise. Competitive play secures collected Monster CV when the adventure ends; solo and cooperative play use the outcome-grade banking rules.

Terrain and Cover Snapshot

- **Difficult Terrain:** Terrain in which each **1"** moved costs **2"** of movement. In **Grid Mode**, entering a **Difficult Terrain** square costs **2"** of movement for an orthogonal step and **3"** for a diagonal step.
- **Dangerous Terrain:** resolve the listed hazard when a combatant enters, crosses, or ends movement or forced movement in it.
- **Shallow Water: Difficult Terrain** that may be crossed by wading or surface swimming. It does not provide **Cover** by itself.
- **Deep Water:** Surface swimming only. It is **Difficult Terrain**; a swimmer cannot be **Prone** and has **Disadvantage** on attack damage rolls, **STR Checks**, and **DEX Checks** unless **Swim** or **Amphibious** says otherwise.
- **Cover:** Partial protection. **Cover** is binary and does not stack. A target that occupies **Cover Terrain** or an area that provides **Cover** has Cover against nonadjacent enemies. A sight line that meets any terrain feature other than **Open Terrain** outside the two spaces also grants Cover. A sight line crossing another combatant grants Cover only if that combatant is not **Prone** or **Knocked Out** and their **Sz** is the same as or larger than the target's **Sz**. Cover granted only by a sight line crossing a combatant does not satisfy any requirement to have Cover in order to become or remain **Hidden**. Ranged weapon attacks and non-area damaging ranged Powers against a target with **Cover** roll their base damage dice with **Disadvantage**. Harmful **LOS**-based Powers that require a **Check** to affect that target are also made with **Disadvantage**. **Cover** never applies to melee weapon attacks. Areas of Effect and hazards ignore **Cover** unless a rule says otherwise.
- **Light Source:** Creates **Light** in its **Aura**. Within that **Aura**, **Darkness** is removed. It does not remove other forms of **Cover**.
- **Darkness:** Every unlit area provides **Cover** against nonadjacent enemies. It does not block or limit **LOS** unless a rule says otherwise. **Magical Darkness** must be explicitly named; ordinary **Darkvision** does not ignore its **Cover** or visual penalties.
- **Natural:** A **Terrain Tag**. Roots, undergrowth, foliage, water, mud, sand, snow, ice, or unworked earth or stone; it excludes structures, structural rubble, traps, objectives, Power-created terrain, and scenario hazards unless explicitly labelled natural.
- **Elevation:** A combatant is at a **higher elevation** than another only when the difference between their elevations is **2"** or more. In **Grid Mode**, each marked elevation level is **1"** and the difference must be at least **2** levels. Attacks against that lower combatant roll base damage dice with **Advantage**. Adjacency and melee distance also use vertical separation under **2.9.9**.

C.14 Equipment Quick Reference

This summary covers the most common equipment procedures. Use the full item entry when a specific rule differs.

Procedure	Rule
Equip an item	Before deployment, meet every listed ability requirement and remain within the location and Hands limits in **7.2**. An item cannot help you meet its own requirement. Equipped permanent items cannot change during an adventure unless a rule explicitly allows it.
Weapon damage modifier	Add **DEX** with **Finesse**; otherwise add **STR** for melee, the higher of **STR** or **DEX** for **Thrown**, and **DEX** for other ranged weapons. Add the modifier once per attack.
Armour AV	Automatic and free. Roll equipped Chest **AD** and add applicable flat **AV**, excluding shield AV.
Block [1 AP]	Add your equipped shield's **AD** and flat **AV** to the **AV** you already apply.
Use a potion	Spend **1 AP** unless the item says otherwise, then expend it. For a thrown potion, choose an origin point within the listed range and **LOS**, then centre the listed area on that point. Temporary effects normally end at the end of the round.
Apply poison	Spend **1 AP** to coat one weapon. The first attack with that weapon that damages a target before the end of the round gains the poison effect and consumes it. An attack that deals no damage does not consume the poison. One weapon attack can benefit from only one weapon-applied consumable.
Read a scroll	Apply the metal equipment restrictions for the scroll's tradition, spend **1 AP**, make the listed **INT** or **SPI Casting Check** against **12**, resolve success or backlash, then destroy the scroll. Scrolls cost no NRG. If the declared target or initial area would require a higher-**LVL Monster** to make an ability Check, make the scroll's **Casting Check** with **Disadvantage**.
Thrown weapon	Each individual weapon may make one ranged attack per activation. A **Total Miss** loses that weapon unless its rule says otherwise. Unlost weapons are recovered at the start of the wielder's next activation.
Sell an item	Gain **50%** of base value, rounded down to the nearest **1c**, unless a rule says otherwise. Starting items gained through **Recruit Hero** cannot be sold until that recruit completes one adventure in the **Active Party**.
Enhanced value	Apply the quality's multiplier or flat adjustment to the mundane base value, then apply any stated minimum. Use the finished value printed on an Enhanced table when treasure grants that item.

Metal equipment: See **7.2** for metal Chest armour, shields, weapons, and qualities. A shield is metal unless its entry says otherwise.

Material weapon traits: Cold Iron gains its bonus against **Fey**; **Silvered** gains its bonus against **Lycanthropes**; **Sacred** gains its bonus against **Fiends**; **Adamantine** ignores up to **2 AV**. These qualities do not make a weapon magical unless a rule explicitly says otherwise.

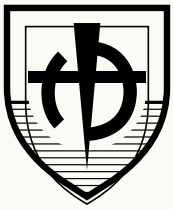
Banners rot in the rain. Shrines sink into the mud. Oaths are broken, kings are buried, and the roads between settlements grow more dangerous with each passing season. Yet the ruins of the world still glitter with coin, relics, and forgotten power, and the desperate, the devout, the greedy, and the doomed continue to march into darkness to claim them.

A standard competitive game uses 4 Heroes per side on a 36"×36" battlefield. It is usually played by 2 players, but supports 2–8 players by dividing control of each side's Heroes among allied players.

Heraldry Skirmish supports solo and cooperative play.

A typical single game, called an adventure, lasts about 60–90 minutes (4–8 rounds). A typical campaign spans 16–18 adventures and is usually split across 8–18 play sessions.



Release Candidate 485 (RC485)
